ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1889.

RESOLUTION.

POLICE

Calcutta, the 27th June 1890.

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1889.

Read also—

The Annual Reports of the Chief Presidency Magistrate and the Presidency Magistrate of the Northern Division on the Criminal Administration of their Courts for the year 1889.

The Reports for the year 1888 and the orders of Government thereon.

The following statement shows the number of cognizable and non-cognizable cases reported in the Town and Suburbs of Calcutta during 1889 and the two preceding years:—

		1887.	1888.	1889.
Cognizable	Penal Code*	6,485	8,619	8,421
	Miscellaneous	21,566	29,716	24,643
Non-cognizable ...	Penal Code*	6,566	5,759	5,627
	Miscellaneous	20,475	19,569	21,692
	Total ...	55,092	63,663	60,383

* As in previous years, some offences under other Acts are included in this table with offences under the Penal Code.

The decrease in cognizable crime occurred mainly under the head of street offences. There were 12,543 such cases in 1889 against 16,793 in 1888. The increase in non-cognizable offences is due to the fact that the number of cases under the Conservancy Act rose from 18,617 in 1888 to 20,691 in 1889.

2. *Arrests and convictions.*—The number of persons arrested and summoned fell from 69,377 in 1888 to 56,762 in the year under review. The decrease occurred mainly under the heads (1) Public and local nuisances, (2) Miscellaneous offences under the Stage Carriage Act, (3) Street offences, and (4) Offences under Port Acts. The number of persons convicted was 49,003 against 61,865 in 1888. The percentage of convictions for cognizable offences fell from 94·68 to 93 30, and for non-cognizable offences from 71·12 to 65·99.

3. *False Cases.*—There were only 60 false cases out of a total of 50,297 reported in the Town and only 24 out of 10,086 reported in the Suburbs. In 1888 the numbers were 87 and 31, respectively, in the Town and the Suburbs. The Lieutenant-Governor observes with satisfaction that the proportion of false cases has been steadily decreasing year by year. In the Town, out of 20 prosecutions for false complaints, 12 ended in conviction, in 6 of which the complainants were sentenced to terms of imprisonment varying from two to six months, and in 6 only fines were inflicted In 28 cases fines were inflicted under section 552 of the Code of Criminal Procedure, compensation being awarded in 25 cases to the aggrieved parties. In 3 cases the defendants were discharged, and in the remaining 9 cases the evidence was insufficient for further proceedings. No case was instituted by any Court *suo motu*.

In 10 out of the 16 prosecutions instituted in the Suburbs, the complainants were imprisoned for terms ranging from one to six months; in the other 8 false cases no persons were charged, and the complaints were not of a nature that warranted further proceedings.

4. *Property stolen and recovered.*—The value of the property stolen was Rs. 1,51,267 against Rs. 1,22,523 in 1888, and that of the property recovered Rs. 69,199 against Rs. 59,401 in 1888. In the Town the percentage of property recovered, 49 02, was the same as in the preceding year, but in the Suburbs there was a marked falling off from 33·89 to 35·06. This is said to have been mainly due to unsuccessful investigation in a heavy case of burglary which occurred near Tallygunge.

5. *Ratio of cognizable crime to area and population.*—The ratio of cognizable crime to population in the Town and Suburbs was as follows :—

	Area in square miles.	Population.	Proportion of crime to population.
Town ...	7·8	433,219	1 to 16·83
Suburbs ...	23	251,439	1 to 34·65

6. *Cognizable crime in the Town.*—The following statement shows the number of true cognizable cases reported within the town during the last three years :—

Crime.	1887.	1888.	1889.
Abetment of offence not committed ...	.....	.....	1
Class I—Offences against the State, &c. ..	49	43	32
„ II—Serious offences against the person ...	213	182	186
„ III—Serious offences against person and property	185	163	189
„ IV—Minor offences against the person ...	58	71	53
„ V—Minor offences against person and property	2,223	2,037	2,309
„ VI—Other offences not specified above ...	4,408	7,710	6,891
Special and Local laws ...	16,009	18,950	16,074
Total ...	23,145	29,156	25,735

There was a satisfactory decrease in offences relating to coin, the number of which was 5 against 13 in 1888. Six persons were arrested, of whom 4 were convicted and 2 discharged. The maximum sentence inflicted was 6 months' rigorous imprisonment.

There were 4 cases of murder against 6 in 1888. In one of these cases the accused, a Burman convict in the Presidency Jail, who in a sudden fit of passion killed the convict-warder, also a Burman, by a blow from a heavy block of wood, was sentenced to capital punishment. The same sentence was passed upon a seaman of the British barque *Roanoke*, who committed an indecent assault on a young

shipmate, and on being threatened with exposure, mortally stabbed him with a clasp knife, and also in the case of a constable of police who, in a fit of jealousy, cut the throat of a woman whom he was in the habit of visiting. In the remaining case the accused, who is a native of the Gwalior State, absconded. The Commissioner of Police says that communication will be maintained with the authorities of that State until his arrest is effected.

Cases of grievous hurt decreased to 17 from 26 in 1888, the average of the five preceding years being 33. Twenty-nine persons were arrested, of whom 14 were convicted and 15 discharged. It is said that these cases are frequently settled out of Court. There were 33 cases of hurt by dangerous weapons against 57 in 1888. Two highway robberies were committed by European soldiers stationed in Fort William. In the first case the offenders escaped, but in the second a man was apprehended and sentenced, on conviction, to one year's rigorous imprisonment.

True cases of burglary rose from 161 to 179, and the number of convictions from 95 to 119. The amount of property stolen was much smaller than in any of the four preceding years, but the proportion of property recovered was only 32·15 per cent. as compared with an average of 47·33 per cent. in those four years. The Lieutenant-Governor agrees with Mr. Lambert in thinking that the conditions of Eastern life, the habit which prevails so largely among native shop-keepers in the town of quitting their shops at night, and the general insecurity of dwelling-houses in this country, are very favourable to the commission of the offence of burglary in Calcutta. None the less the offence is very much less frequent in Calcutta than in mofussil towns, a fact which must be attributed to the better watch and ward maintained on Calcutta.

In theft cases there was an increase of 283 as compared with 1888. No explanation of the increase is given. The percentage of cases detected was 48·91 against 47·32 in 1888. The number of cases of criminal breach of trust fell from 269 to 261 in 1889. The most audacious offenders are said to be the drivers of bullock-carts who steal a registration plate from some other cart and hurry off with their load of cloth or grain into remote parts of the Suburbs, or to the railway, having previously arranged for the disposal of the goods at some distant market. The tin ticket, the number of which has probably been taken down by the merchant's sircar, is then removed and the proper ticket is re-affixed to the cart, or the cart is thrown aside as being of no further use. Nine such cases were successfully prosecuted during the year, but the offenders were all summarily dealt with and consequently received but light sentences. The Commissioner of Police suggests that all serious cases of this nature should be committed to the Sessions for trial. Out of 462 persons charged under the Gambling Act, 441 were convicted. In one case the keeper of a gaming house in Jorabagan, who had been previously convicted, was arrested on a warrant and sentenced to a fine of Rs. 5 only. Mr. Lambert rightly objects to such leniency on the part of the Magistrate who tried the case. Under the Stage Carriage Act there were 2,079 cases and 2,032 convictions, against 2,632 cases and 2,702 convictions in the previous year; the decrease is due to the fact that summary arrest is not now made for the offence of carrying excess passengers, procedure by summons being substituted for it. The officers of the Society for the Prevention of Cruelty to Animals did much good service throughout the year in prosecuting offenders under the Act, and over 98 per cent. of the persons arrested were convicted and punished. The barbarous practice of flaying goats alive was for the first time exposed, but the leniency of Magistrates in such cases as these, as well as in the numerous 'phooka' cases, seriously detracts from the good effect of the prosecutions. The Lieutenant-Governor hopes that the serious nature of such offences will be duly weighed by all Presidency Magistrates in similar cases in the future.

7. *Cognizable crime in the Suburbs.*—The following is a comparative statement of true cognizable crime during the past three years :—

Crime.		1887.	1888.	1889.
Class I—Offences against the State, &c.	...	15	14	15
„ II—Serious offences against the person	...	77	53	75
„ III— Ditto against person and property	...	171	127	151
„ IV—Minor offences against the person	...	15	25	21
„ V— Ditto against property	...	709	738	680
„ VI—Other offences not specified above	...	717	1,534	651
Special and local laws ...	...	3,073	6,604	5,662
Total	...	4,777	9,095	7,255

There was one case of an offence relating to Government currency notes. A native of Burrisal, in whose lodgings at Machooa Bazar counterfeit notes and two leaden plates prepared for forgery had been found, was sentenced to five years' rigorous imprisonment. An accomplice of his at Burrisal received a similar sentence, but it was quashed by the High Court. There were three cases of murder against one in 1888. In one of these cases the accused was on conviction sentenced to transportation for life. In the other two cases no clue was obtained to the murderers. There were three cases of culpable homicide, in one of which a Hindu of the labouring class, who committed a murderous assault on his wife, was sentenced to be hanged, but the High Court reduced the sentence to ten years' transportation. In a second case the accused were discharged by the High Court. In the remaining case the culprit escaped. It is satisfactory to observe that there were only 16 cases of grievous hurt against 21 in 1888 and an average of 25 in the five previous years. In one of these cases three policemen attached to the Tallygunge thana were on conviction sentenced to terms of rigorous imprisonment ranging from two to three years. There were 11 cases of kidnapping, in one of which a notorious offender, who decoyed a little girl from her house by promising her sweetmeats, and robbed her of her gold ornaments, was on conviction sentenced to seven years' transportation. The figures of detection and conviction under the head of burglary and lurking house-trespass are good, but the proportion of property recovered to property stolen is low, owing to the failure of the police to recover property valued at Rs. 6,500 stolen in one case near Tallygunge.

8. *Non-cognizable crime in the Town.*—As explained above, the large increase in the number of cases under this head occurred in conservancy prosecutions. There were 4 cases of forgery against 15 in 1888. Convictions were obtained in 2 cases. The number of cases of extortion was 15 against 17 in 1888. In two cases committed to the Sessions the offenders were sentenced to six and three years' rigorous imprisonment respectively. In one case a constable was sentenced to six months' imprisonment for extorting four annas from a milkman.

9. *Non-cognizable crime in the Suburbs.*—There was a decrease of 71 cases as compared with the previous year. This calls for no special notice.

10. *Suicides.*—The number of cases in the Town and Suburbs was 83 against 84 in 1888. In 36 per cent. of the cases death was caused by hanging, and in 28 per cent. by means of opium. Of the persons who committed suicide, 65 were Hindus, 10 Mahomedans and 8 Christians.

11. *Accidental deaths.*—There were 292 accidental deaths against 351 in 1888. One hundred and three deaths were due to drowning as against 152 in the previous year; 30 were caused by falls from trees and buildings, and 31 by carriages and horses. One hundred and forty-two drivers of public and private carriages were prosecuted for rash and furious driving, of whom 124 were convicted.

12. *Arms Act.*—The importation of fire-arms increased from 1,889 pieces in 1888 to 2,655 pieces in 1889. The Commissioner of Police attributes the increase to the importation of a cheaper class of weapon. There was an increase of 411 in the number of guns imported, and of 216 in the inland transport of guns. The imports of percussion caps rose from 15,470,000 to 23,384,000 in 1889, owing to the fact that the surplus stock in hand at the commencement of the year was much less than that at the commencement of 1888. The number of guns sold in Calcutta was 2,720 against 2,709 in 1888, of which only 957 were of native manufacture against 1,084 in 1888. There were seven prosecutions under the Act against 35 in the previous year.

13. *European Vagrancy Act.*—Thirty-three persons were admitted to the Workhouse under section 5 of the Act. Two persons were deported, 12 were shipped away as seamen, and 2 others provided with employment.

14. *Fire-Brigade Act.*—Nine fires occurred in the Town, 16 in the Suburbs and six in Howrah. The damage done is estimated at Rs. 1,38,490 against Rs. 12,53,480 in 1888. In only one case was there the loss of a human life. The most serious fire occurred at Narcoldanga, resulting in the destruction of a large quantity of hay and straw, and 14 tiled huts, worth in all Rs. 40,000. The fire lasted for four days and three hours.

15. *Strength and cost of the Police.*—The total cost of the Town Police was Rs. 4,52,725 against Rs. 4,60,302 in 1888, and that of the Suburban Police Rs. 1,58,255 against Rs. 1,60,066. The decrease in expenditure on both the Town and Suburban Police was due to minor causes and calls for no explanation.

16. *The Police Force.*—There were 1,97[illegible] up-country men in the police against 1,957 in 1888, and 173 Bengalis against 181 in 1888. The number of up-countrymen employed as officers was 99 against 78 Bengalis. T[illegible]

Commissioner of Police observes that the natives of Lower Bengal possess many of the qualities essential for detective police work, but the salary of the two lower grades is altogether insufficient to induce young Bengalis of education to enter the police. The result is that the force is encumbered in these grades by an undue proportion of unintelligent up-countrymen who, except in physique, are inferior to the mass of people whose interests they are engaged to protect. The question of raising the salary of the lower grade of native officers to which Mr. Lambert properly attaches great importance should be made the subject of a separate communication. The percentage of casualties in the force was 9·74 against 11·40 in the previous year. Fifteen members of the force were punished judicially against 16 in 1888. Fifty-six men were dismissed and two men deserted, against 81 and 3 respectively in 1888. The number of vacancies was 288 against 337 in 1888. The decrease occurred chiefly under the heads of resignations and dismissals.

17. *Hotels, liquor shops, &c.*—Two hundred and sixty-eight certificates were granted for hotels, shops for the sale of exciseable articles, and native eating-houses in the Town, and 52 in the Suburbs, against 286 and 46 respectively in 1888. The fees realized amounted to Rs. 822, against Rs. 1,180 in the Town and to Rs. 235 against Rs. 198 in the Suburbs.

18. *Property found and restored.*—Property to the value of Rs. 20,668 was picked up and brought to the police office, and 88 per cent. of the amount was restored to the owners.

19. *Old offenders.*—Two hundred and seventy-eight old offenders were convicted in the Town against 257 in 1888. Of these, 80 had been convicted more than three times. In the Suburbs the corresponding figures were 83 and 16 against 132 and 19 in 1888. Eighty-eight notorious offenders were photographed on their release from jail, and their names registered by the Detective Department.

20. *Judicial work.*—The number of cases instituted in the Northern Division was 14,053, in the Southern Division 13,415, and before the Bench of Presidency Magistrates 21,149, against 15,28[illegible], 15,820 and 18,941 respectively in 1888. Of 35,768 persons appearing before the Courts, 32,732 were convicted and 2,911 acquitted. The ratio of conviction in cognizable cases was 96·84 in the Northern Court, 95·58 in the Southern Court, and 70·37 in the Bench Courts, and 57·78, 40·7 and 40·44 respectively in non-cognizable cases (excluding conservancy prosecutions). The total amount of fines imposed in the Southern Division was Rs. 37,253, of which Rs. 34,633-8-3 was realized; the corresponding figures in the Northern Division were Rs. 22,424-6 and Rs. 21,425-10. Sentences of whipping were passed on 75 persons, and 15 juvenile offenders were sent to the Alipore Reformatory. The total amount of fines imposed by Benches in municipal cases was Rs. 30,078 against Rs. 28,947 in 1888.

21. *Adjournments*—The total number of cases adjourned was 422, of which 187 were before the Northern Division Court, 183 before the Chief Magistrate, and 52 before the Benches. Of these 52 cases only 34 were adjourned once. Out of 338 adjourned hearings in the Northern Division Court, 45 were heard on the following day; the corresponding figures in the Chief Magistrate's Court being 342 and 61. The Commissioner of Police considers that the practice of adjourning cases which are ready for hearing to some distant date not only imposes hardship on the large body of witnesses who belong to the poor and labouring classes, but exposes them to improper overtures from parties who will suffer if the witnesses speak the truth, and that efforts should be made to shorten the periods of adjournments in both the Presidency Courts. He is further of opinion that no case should, in the absence of special reason, be made over to a Bench which cannot be disposed of at a single sitting. The Lieutenant-Governor agrees in this view, and desires that the attention of the Chief Presidency Magistrate be drawn to the matter.

22. *Benches*—The Chief Magistrate observes that, though there have been fewer cases of absence without notice on the part of Honorary Magistrates, absence on insufficient notice still continues. The list of attendance shows that out of 105 Honorary Magistrates only 13 have attended 20 times and more. The Lieutenant-Governor appreciates the services which these gentlemen have rendered to the administration of justice. There were 46 Honorary Magistrates who attended less than 10 times during the year.

Most of those who never attended at all were either in Europe or have since resigned.

23. *Personnel of the force*—Mr. J. Lambert was Commissioner during the greater portion of the year, while Mr. A. B. Barnard held the office of Deputy Commissioner throughout the year. The acknowledgments of the Lieutenant-Governor are due to both these officers for their efficient administration of the Department during the year. The names of the subordinate officers favourably mentioned have been noted.

ORDER.—Ordered that copies of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information, and for communication to the Presidency Magistrates, and to the Commissioner of the Presidency Division for information.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 28th June, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
BURDWAN DIVN. 1	Burdwan June 28, '90	12·31	Heavy rain all over the district. Sowing of *amun* and *aus* nearly finished. Transplanting of *amun* commenced in some places. Sugarcane doing well. Prices of common rice:— Srs. Burdwan ... ... 17 / Culna ... ... 14 / Cutwa ... . 14 1/16 / Ranigunge ... ... 15½ } per rupee.
	Culna ...	11·56	
	Cutwa ...	13·64	
	Ranigunge ..	13·49	
2	Bankoora „ 28, '90	6·84	Weather—cloudy. Heavy rain during the week. Transplanting of rice going on in low lands in some places and in others fields are being prepared for it. Young seedlings coming on well. Sugarcane and other standing crops thriving. Cotton is being gathered in Bishenpore with a 12-anna outturn. Common rice is selling at 17½ seers per rupee at Sudder and 17 seers at Bishenpore.
3	Birbhum „ 28, '90	10·69	Very heavy rain at the beginning of the week. Sowing of *amun* almost completed, under very favourable circumstances.
	Rampore Haut ..	10·05	
4	Midnapur „ 28, '90	13·09	Heavy and frequent rain. Sowing and transplanting somewhat checked by heavy rain. No damage by floods as yet reported. Prices of common rice:— Srs. Sudder ... ... 15 / Tumlook .. .. 14 / Ghatal .. .. 16 / Contai ... ... 18 } per rupee.
5	Hooghly „ 28, '90	10·32	Much rain in the earlier part of the week; weather fair since Thursday (26th). All crops doing very well. There is some mention of floods in Jehanabad. Prices of common rice:— Srs. Sudder ... ... 13 / Serampore ... ... 13 / Jehanabad .. .. 15 } per rupee.
	Serampore ...	7·11	
	Jehanabad ...	12·21	
	Howrah „ 28, '90	5·90	Weather—cloudy and wet. *Aus*, *amun*, sugarcane, and jute doing well so far. Damage to crops on low lands in the Uluberia subdivision is likely to occur if rain continues. Coarse rice 14 to 15 seers per rupee.
	Central Districts.		
PRESIDENCY DIVN. 6	24-Perghs. June 28, '90	7·14	Weather—rainy at the beginning of the week; hot and cloudy at the end. Prospects of all standing crops favourable. Transplanting of *amun* going on, and ploughing continues. Prices stationary.
7	Nuddea „ 28, '90	11·41	8·17 inches of rain fell on Sunday (22nd). The fall has been general throughout the district. Prospects and condition of the crops on the ground are very good.
	Kushtea ..	3·26	
	Meherpore ...	4·56	
	Chuadanga ...	4·77	
	Ramghat ...	8·69	
8	Khoolna „ 28, '90	9·70	Heavy rain in the early part of the week; hot and clear weather in the latter part. Prospects and condition of all crops good.
	Bagirhat ...	16·02	
	Satkhira ...	9·09	
9	Jessore „ 28, '90	15·23	Weather—cloudy and rainy. No injury to crops reported from the heavy rain of the 21st and 22nd. Prospects continue favourable.
	Jhenidah ..	5·86	
	Magura ...	4·34	
	Narail ...	8·81	
	Bongong ...	5·98	
10	Moorshedabad „ 28, '90	7·02	Weather—cloudy and sultry. *Bhadoi* being weeded. Sowing of *amun* going on. Prospects good.
RAJSHAHYE DIVN. 11	Dinagepur „ 28, '90	3·79	Weather—seasonable. Transplanting of *kaimanti* paddy in progress. Prospects of standing crops good. Price of rice at Sudder and Thakurgaon stationary.
	Thakurgaon ...	10·42	
12	Rajshahye „ 28, '90	Figures not given	Weather—quite seasonable. Jute, *aus*, and *amun* all flourishing. The rain has done much good, but a break was necessary. This is already being experienced.
	Nattore ...	11·59	
	Nowgong ..	7·67	
13	Rungpur „ 28, '90	7·55	Weather—cloudy. Heavy rain falls every day. The rainfall retards the process of transplanting the *amun* rice. It is equally unfavourable to the *aus* harvest, which is now in full swing. Prospects generally good, but dry weather is much needed.
	Kurigram ...	8·12	
	Nilphamari ...	8·09	
14	Bogra „ 28, '90	6·01	Weather—seasonable. State and prospects of all crops good. Rice, jute, and sugarcane thriving, and transplantation of *amun* has begun in some places.
	Sherpur ...	10·82	
	Nowkhilla ...	6·63	
15	Pubna „ 28, '90	3·20	Weather—cool and cloudy. The late incessant rain has somewhat damaged the jute crop standing on the higher land, but the prospects of the *amun* and *aus* crops continue to be good. Prices rule as before.
16	Darjeeling „ 28, '90	14·71	Weather—rainy. Continued rain in the Terai is injuring the jute and *bhadoi* crops, and a break for some days is wanted.
17	Julpigoree „ 28, '90	7·28	Weather—sultry and cloudy; rainy at times. Condition of the young plants of *bhadoi* and jute good. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—*concluded.*			
	Eastern Districts.		
Dacca Divn. 18	Dacca June 28, '90	5·84	Weather—rainy and cloudy. Rice and jute thriving. Harvesting of *aus* paddy in chur lands continues. Common rice sold at from 12 to 15 seers per rupee.
19	Furreedpur „ 28, '90	4·54	Weather—rainy with occasional breaks. Prospects of standing crops favourable. *Til* being harvested. Prices of common rice:— Srs. Sudder ... ... 13 / Goalundo ... ... 16 / Madaripur ... ... 14 } per rupee.
20	Backergunge „ 28, '90	11·48	Weather—seasonable. Prospects of crops good. Common rice selling at from 12 to 16 seers per rupee.
21	Mymensingh „ 28, '90	9·31	It is raining every day, and the weather is cloudy and comparatively cool. State of crops favourable. *Amun* sowings going on. Condition of *aus* paddy and jute good. Coarse rice selling at 13½ seers per rupee.

* Mean of six days. † Mean of five days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ... The *humidity* of the atmosphere is expressed as percentage, saturated air being presented by 1... A clear sky is denoted by 0 and an overcast sky by 10. The number ... are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the past ... stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

...ears. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. ... sky cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means ...ears. The means of the district are the numerical average of the rainfall return received in the district, *i.e.*, from total rainfall at the subdivisional

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 27th of June 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 21st June.	Sunday, 22nd June.	Monday, 23rd June.	Tuesday, 24th June.	Wednesday, 25th June.	Thursday, 26th June.	Friday, 27th June.	Total. Number of rainy days.	Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 1 May to date.

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 1st July* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 27TH OF JUNE 1890.

TOWARDS the end of last week the unsettled conditions resulting from the depression which had formed off the Orissa coast and thence moved in a north-north-westerly direction, had almost entirely disappeared, and at the beginning of the present week a very shallow low-pressure area remained in Lower Bengal. This depression gradually developed at first with an easterly motion, but afterwards it moved to the north-west, exerting an important influence on the weather conditions and rainfall distribution over Bengal up to the last two days of the week. Unusually heavy rainfall and very low temperature have been recorded in all districts except Orissa, where temperature has been very low, but rainfall has also been below the normal.

On the 21st pressure was less than a twentieth of an inch below the normal over almost the whole province, while at Jessore, Dacca, and Burrisal defect was slightly over that amount. This very shallow depression appears to be the commencement of the disturbed conditions, for on the 22nd a rapid fall was general in the eastern districts, the area of lowest pressure extending from the head of the Bay to Mymensingh and as far east as Silchar. The depression was therefore well to the east on Sunday, and over the greater part of Bengal winds were cyclonic. Heavy rain had begun to fall, Midnapore reporting eight inches, and all the southern stations from Calcutta eastwards from two to four inches. On the following day the depression had moved very nearly due west, the centre of lowest pressure and of the cyclonic circulation being between Berhampore and Burdwan. A very perfect cyclonic circulation obtained, with strong winds at the head of the Bay and in Lower Bengal. Rainfall was heavier than on the 22nd at all stations to the south of the centre, Jessore and Akyab reporting ten inches, Ranaegunge and Krishnagore eight inches, Burdwan seven inches, and several other stations from three to six inches. Wind velocity at Saugor Island and Gopalpur averaged more than 30 miles for the twenty-four hours previous to 8 a. m. on the 23rd, at which hour it was 36 miles at Saugor Island and 40 miles at Pooree. Up till 8 a m. on the 24th the stormy weather intensified, the depression moving in a north-westerly direction, but it would appear that it broke up, one portion being near Allahabad, and the other near Purneah and Bhagulpore when observations were taken on the 24th. Pressure at Purneah was 29·344 inches and at Bhagulpore 29·349 inches, defect at these two stations exceeding a quarter of an inch, while gradients were steep over the province and the Bay, the difference between Purneah and Tavoy exceeding six-tenths of an inch. The average wind velocity at Saugor Island rose to 42 miles an hour, and strong winds were blowing over the northern half of the Bay and at all inland stations except those in the extreme north. Falls of three and four inches of rain were common on this day in the west and south, but in North Behar and the greater part of North Bengal comparatively small amounts were reported. A very rapid rise followed, and by the 25th the depression near Purneah had completely filled up, excess pressure being general in all districts except the west of Behar. Heavy rain continued to fall till the 24th, and for the last two days ordinary monsoon conditions prevailed over the whole province, cloudy skies with moderate wind and light rain being reported from all except the Orissa stations.

Pressure—Changes have been roughly given above for those stations near which the area of lowest pressure passed. As the depression advanced, the fall of pressure was very rapid, but it recovered much more rapidly after the passage of the centre. Defect near the centre was about a quarter of an inch, and pressure changes at those stations varied from ·15 inch to ·33 inch, the latter occurring at Purneah on the 26th. As the distribution was below the normal during five days out of the seven, the means are below the normal in all districts except Orissa.

Temperature—Has been largely below the normal, the defect in the means for the week in the large divisions being—Chutia Nagpur 4·6°, South Behar 3·9°, South-West Bengal 3·2°, East Bengal and North Behar slightly over 2°, Orissa 2,° and North Bengal 0·5°. The area, therefore, over which the lowest temperatures have been recorded include the western districts from South Behar to Orissa.

Rainfall.—Unusually heavy rain fell during the early part of the week in all districts except Orissa, the average amounts in South-West Bengal, South Behar, and Chutia Nagpur being three times the normal, in North Behar and East Bengal twice the normal, and in North Bengal 1·5 inches in excess. Expressed as percentages of the normal for each district we get—South Behar 332, South-West Bengal 330, Chutia Nagpur 280, East Bengal 203, North Behar 192, North Bengal 128, and Orissa 74. The falls in South-West Bengal were generally over 6 inches, except in the Midnapore and Nuddea districts, and over 10 inches in Burdwan and parts of Khoolna and Jessore, the heaviest falls being 15 6 inches at Jessore and 16 inches at Bagirhat. In East Bengal the heaviest were 23 inches at Cox's Bazar and 13 inches at Chittagong and Fenny, but falls were generally between 5 and 8 inches. The lightest falls in North Bengal were 2 to 4 inches in Maldah and Dinagepore, but in the other districts 6 to 7 inches were very frequently reported. In Behar the same uniform distribution prevailed, and in Chutia Nagpur from 4 to 6 inches fell except in part of Manbhoom and Hazaribagh, where a few stations reported over 10 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 27th of June 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the New Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86, formerly in the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV. and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, p passing temporary showers, ● continued rain, ⊕ solar corona, ≤ lightning, ⚡ strong wind.

N.B.—In the weekly report from 8th to 14th June 1890 read 29·605 for 29·65 as the mean of pressure of the 13th June 1890.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 30th June 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 14th June 1890.

Births.

The births registered during the week ending with Saturday, the 14th June 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 13·9 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 5·2 lower than the rate of the corresponding week of any of the past five years, with which comparison is instituted, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	25·2	16·0	17·9	18·3	18·2	19·1	13·9

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 24th May 1890.	31st May 1890.	7th June 1890.	14th June 1890.	Towns.	Weeks ending— 24th May 1890.	31st May 1890.	7th June 1890.	14th June 1890.

It will be seen that last week the highest birth-rate was returned from Comillah (38·5) and the lowest from Chupra (4·). No births were registered during the week in Darjiling town.

Deaths.

The deaths registered during the week under review correspond to an annual rate of 23· per 1,000 of the population. The rate of the week is 1·2 lower than the average rate of the corresponding week of the past five years, and is higher than the rate of the corresponding week of any of the past five years except 1885 and 1886, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	33·0	23·2	20·9	21·4	22·4	24·2	23·0

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 24th May 1890.	31st May 1890.	7th June 1890.	17th June 1890.	Towns.	Weeks ending— 24th May 1890.	31st May 1890.	7th June 1890.	14th June 1890.
Burdwan	22·9	25·9	16·8	19·8	Naraingunj	41·4	8·3	24·8	24·8
Midnapore	17·0	29·4	20·1	15·5	Chittagong	7·0	11·7	30·6	11·7
Hughli and Chinsurah	27·9	27·9	32·8	29·5	Comillah	11·6	30·8	30·8	34·7

Jessore	..	6·1	49·0	12·2	Monghyr	23·5	19·9	26·2	18·1
Rampore Beauleah	23·6	26·3	23·6	23·6	Purneah	17·3	10·4	27·7	3·5
Darjiling	44·5	14·8	59·3	14·8	Poori	33·6	62·9	142·7	125·9
Dacca	26·6	16·2	30·5	24·0					

It will be seen that last week the highest mortality occurred in the town of Poori (125·9) and the lowest in Purneah (3·5).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follow:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Poori ...	31·5	Poori ...	65·0	Poori ...	21·0
Durbhanga ...	13·3	Comillah ...	27·0	Gya ...	13·6
Mozufferpore ...	10·9			Burdwan ...	12·2
Patna City ...	5·5			Bhagulpore ...	10·8
Howrah ...	2·3				

The total mortality from the several registered death-causes in the twenty-seven towns amounted to 3·5 per 1,000 from cholera, against the same ratio in the preceding week; 8·9 from fever, against 13·0; 3·0 from bowel-complaints, against 2·3; ·7 from injury, against ·5; 6·0 from other causes, against 6·3 in the preceding week, and ·8 from small-pox, against ·5. The mortality from small-pox is noticeably severe in Patna City, there being 7 deaths (2·3 per 1,000 of the population).

The mortality of last week according to *Sex*, *Class* and *Age* was as follow:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	23·6	Christians ...	29·9	Under 1 year ...	135·2
Females	22·3	Hindus ...	23·6	1 and under 5 years ...	32·5
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	105	Mahomedans ...	21·4	5 „ 10 „ ...	10·8
				10 „ 15 „ ...	5·9
				15 „ 20 „ ...	16·7
				20 „ 30 „ ...	14·5
				30 „ 40 „ ...	21·4
				40 „ 50 „ ...	18·7

	Tons.
INCREASE.	
Grain—	
(2) Rice	113
This is due to greater export owing to high rate at Calcutta.	
Jute—	
(1) Raw	166
This is due to greater export at Calcutta for want of water in the Bhagiruthy.	
Railway plant and rolling-stock	68
This is due to more materials carried during the month for maintenance.	
Sugar—	
(1) Drained	21
Due to greater demand in the local market in Moorshedabad.	
(2) Undrained	23
Due to greater demand in the local market in Moorshedabad.	
DECREASE.	
Coal	253
Due to previous stock not being exhausted.	
Cotton piece-goods—	
(1) European	14
Due to import by steamer plying between Tentooliah on the Bhairob and Calcutta.	
Oil-seeds—	
(1) Linseed	482
Exported to Calcutta by steamer plying between Tentooliah and Calcutta.	
(2) Mustard and rape	128
Due to less import owing to less demand.	
Tobacco	11
Due to less import owing to less demand.	

R. G. MOOKERJEE,
Manager, Nalhati State Railway.

STATISTICAL DEPARTMENT,
The 7th July, 1890.

P. NOLAN,
Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of June 1890.

		Date.	Hour.
	Inches.		
The mean pressure of the month	29·550		
The average pressure of June from 24 years' registers ...	29·549		
The highest pressure in the month	29·704	3rd	10
The lowest pressure in the month	29·378	23rd	16
The range of pressure	0·326		
	Hours.		
The total number of hours of bright sunshine during the month	101·7		
The maximum possible number of hours of sunshine ...	403·4		
	°		
The mean temperature of the month	84·4		
The average temperature of June from 24 years' registers	85·0		
The highest temperature in the month	95·7	1st.	
The lowest temperature in the month	71·4	6th.	
The range of temperature during the month	24·3		
The mean daily range of temperature	11·7		
The greatest range of temperature in one day	18·8	2nd.	
	Per cent.		
The mean humidity of the month	84		
The average humidity of June from 24 years' registers ...	81		
	Inches.		
The mean vapour pressure of the month	0·988		
The average vapour pressure of June from 9 years' registers ...	0·998		
The mean cloud proportion of the month	6·94		
The average cloud proportion of June from 13 years' registers	7·13		
The total rainfall of the month	13·40		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	13·12		
The average fall of June from 48 years' registers	12·08		
The greatest fall in 24 hours	4·28	22nd.	
	Days.		
The number of rainy days in the month	21		
The average number of rainy days in May from 24 years' registers	19		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	143·7		
The mean difference of sun and air temperatures	53·9		
The greatest sun temperature	156·3	28th.	
The greatest excess of sun over air temperature	66·5	28th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·5		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·6		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·3	5th.	
	Miles.		
The mean movement of the wind per day	145·0		
The greatest movement of the wind in one day	390·0	24th.	
The greatest movement of the wind in one hour	24·0	24th	11 to noon.

The number of hours with winds from each of the 8 points—

N. 2, N.E. 11, E. 69, S.E. 129, S. 263, S.W. 175, W. 18, N.W. 6, Calm 47.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·5 higher; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 7th July 1890.

Meteorological Report of the Province of Beng

...r the week ending Friday, the 4th of July 1890.

Meteorological Division.	District.	Representative station.	Station Observations. Air pressure. Mean barometric height, 8 A.M.	Air pressure. Mean reduced to sea-level.	Air pressure. Variation from mean.	Wind. Prevailing direction.	Wind. Mean wind velocity.	Temperature. Highest during week.	Temperature. Date.	Temperature. Lowest during week.	Temperature. Date.	Temperature. * Mean of six days.

Meteorological Division.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for each day. The humidity of the atmosphere is expressed as percentage, saturated air being presumed to give. A clear sky is denoted by 0 and an overcast sky by 10. The normal mean of cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means represent the average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question during which [illegible] the district mentioned is supposed divided by the number of stations. A rainy day is one on which at least two-tenths of an inch fell.

Remarks.—The variations are negative when the mean for the week is less than the corresponding normal mean, and positive when greater.

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 8th July* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 4TH OF JULY 1890.

THE weather during the present week has been affected throughout by the depression which formed near the head of the Bay about the beginning of July. Though the cyclonic disturbance crossed the coast late on the 1st or early on the morning of the 2nd, moving rapidly in a westerly direction into Central India, the after-effects in the form of violent atmospheric oscillations continued till the end of the week, the waves moving from east to west across Bengal and the northern half of the Bay.

The depression began to form on June 28th, the first day of the present week, appearing as a local shallow depression over South-West Bengal and Orissa, the lowest pressure after a slow fall in these parts being 29·585 inches at Balasore. Pressure distribution over Bengal was very nearly normal, a small excess of two-hundredths of an inch being reported from the stations in the north-west corner of the Bay, while towards the east coast it increased to nearly a twentieth of an inch. Westerly winds were blowing at Cuttack and False Point, and the easterly element in directions at eastern stations had become more pronounced. Rainfall was generally light and local in the south-west corner of the province, but was heavy and general in North Bengal and Behar. On the 29th the fall of pressure was brisk in all districts except to the west of Behar, and was most rapid in North Bengal and Assam, but when compared with the normal distribution, a diffused shallow depression covered the whole of the northern half of the Bay, extending from Diamond Island in a north-westerly direction as far as Ranchee, while rainfall becoming more general within the shallow depression, was more local and much lighter in the other parts of the province. Wind circulation was more distinctly cyclonic, and the centre lay about midway between Balasore and Calcutta. After this a somewhat rapid deepening occurred towards the east of the low-pressure area, and on the 30th the centre of lowest pressure was to the east of False Point and north of Saugor Island. The largest changes were in Arakan, the fall at Akyab being over a tenth of an inch, and in consequence of the rapid fall in East and North Bengal, a trough of low pressure extended from the Bay in a northerly direction, so that the storm seemed likely to move in that direction. Weather was stormy with heavy rain squalls over the northern half of the Bay to the rear of the depression, but in Bengal the only important falls of rain were in Chutia Nagpur and South Behar, East and North Bengal being almost rainless. On the 1st July the storm showed further signs of development and was moving slowly towards Orissa, so as to pass over False Point. Northerly winds were blowing at all the Orissa stations and in Chutia Nagpur and South-West Bengal as far north as Ranchee and Berhampore. Pressure was lowest at False Point, measuring there 29·39 inches, and gradients were much steeper over the Bay, the difference between False Point and Tavoy being half an inch. The slow westerly motion of the centre continued, and it passed over False Point about midnight, the lowest pressure reported from that station being 29·09 inches. On this day fairly heavy rain was falling at all the Orissa stations, wind force was steadily increasing, and after the centre crossed the coast and southerly winds set in, a strong gale blew to the north of Gopalpore. A very rapid rise of pressure followed, and by 8 a. m. on the 2nd there had been a rise of half an inch at False Point, while in the east of the Bay and over the eastern districts of Bengal the very rapid rise of from ·15 inch to 2 inch was reported. This rapid rise continued on the following day, and there was then over the whole of Bengal very high pressure, excess varying from ·1 inch in East Bengal to ·2 inch in Orissa, so that from being half an inch below the normal, an excess of two-tenths accumulated in about 28 hours. This high pressure prevented the influx of moist winds to South-West Bengal, which was to be expected after the westerly motion of the storm, and though easterly winds still blew in Behar, a westerly current was setting in, and after the rapid fall of pressure on the 4th in the east and north, became general in all districts of the province. Rain was practically absent on Friday over the western half of Bengal, and moderate amounts were falling in East and North Bengal. The weather over the Bay rapidly improved, and by the afternoon of the 2nd only moderate winds were blowing.

Pressure—Changes, as detailed above, have been very rapid and sudden, especially after the passage of the depression. As there has been a large defect at one time, and a large excess at another, the means for the week have been very little influenced, and thus in Orissa, where the largest difference from the normal would be expected, there is defect of only two-hundredths of an inch. In the other districts the means are very nearly normal, generally differing from it by only a few thousandths of an inch.

Temperature—Has been low in the western districts, but changes have been of very little importance and of the usual oscillatory nature, with a rather more rapid and general rise towards the end of the week. Defect is 2° in Chutia Nagpur, 1·2° in Orissa, while in South Behar and South-West Bengal it is about half a degree. In Assam, North Bengal and North Behar excess is about 1°, and in East Bengal ·6°.

Rainfall—Has been largely below the normal except in Orissa, where the heavy rainfall during the passage of the storm has caused an excess of 3·4 inches, the average fall being 220 per cent. of the normal. In East Bengal less than half the normal amount has fallen, and in South-West Bengal, North Bengal, and North Behar the proportion is very little larger. The fall in Orissa is 6·25 inches, in Chutia Nagpur 2·17 inches, while in all the other districts

the average fall is very nearly 1·5 inches slightly over this amount except in South-West Bengal, where it is 1·3 inches. The heaviest falls reported from Orissa are—Pooree 9·6 inches, Balasore 8·4 inches, Bhuddruck 6 inches, and Kendrapara 5 inches. Very heavy rain fell in North Bengal on Saturday, the 28th of June, Alipore Dooar reporting 8 inches and several other stations from 3 to 4 inches. In these districts, viz., Julpigoree, Cooch Behar, and the Darjeeling Hills, falls were much lighter and more local till the last day of the week, when some heavy rain was again reported. Generally over Bengal falls have very seldom been over 3 inches, and frequantly under 1 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 4th of July 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of June.		Since 15th May 1890.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, t thunder, p passing temporary showers, / strong wind, ⊕ solar corona.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 21st June 1890.

Births.

The births registered during the week ending with Saturday, the 21st June 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 14·2 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 4·2 lower than the average rate of the corresponding weeks of the past five years, and is also lower than the rate of the corresponding week of any of the past five years, with which comparison is instituted, *vide* the figures below:—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	21·1	16·0	18·0	17·3	19·3	18·4	14·2

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 31st May 1890.	7th June 1890.	14th June 1890.	21st June 1890.	Towns.	Weeks ending— 31st May 1890.	7th June 1890.	14th June 1890.	21st June 1890.
Burdwan	9·1	21·4	32·0	7·6	Narainganj	16·6	24·8	12·4	58·0
Midnapore	18·6	18·6	13·9	8·1	Chittagong	16·4	11·7	9·4	23·5
Hughli and Chinsurah	37·7	26·3	19·7	14·8	Comillah	23·1	15·4	38·5	11·5
Serampore	21·6	23·6	23·6	29·4	Patna	3·6	6·2	7·5	7·8
Utterpara	18·9	...	18·9	9·4	Gya	19·1	19·8	16·4	12·3
Howrah	14·3	18·9	10·9	15·5	Arrah	27·5	13·2	8·4	17·9
Bali	14·0	7·0	10·5	10·5	Mozufferpore	15·8	10·9	7·3	18·2
Kishnagar	7·6	15·1	15·1	9·5	Durbhanga	18·1	11·0	20·5	17·3
Ranaghat	6·0	6·0	12·0	..	Chupra	11·1	9·1	4·0	3·0
Santipore	14·0	10·5	17·5	8·8	Bhagulpore	24·5	10·9	12·7	17·2
Jessore	6·1	...	6·1	...	Monghyr	10·9	17·2	20·8	23·5
Rampore Beauleah	21·0	23·6	31·5	36·8	Purneah	3·5	17·3	13·9	...
Darjiling	7·4	22·2	...	59·3	Poori	14·7	18·9	21·0	29·4
Dacca	11·0	10·4	9·1	7·8					

It will be seen that last week the highest birth-rate was returned from Darjiling (59·3) and the lowest from Chupra (3·). No births were registered during the week in, Ranaghat, Jessore and Purneah towns.

Deaths.

The deaths registered during the week under review correspond to an annual rate of 26·9 per 1,000 of the population. The rate of the week is 2·4 higher than the average rate of the corresponding weeks of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1885, *vide* the figures below:—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	34·0	24·8	16·9	23·9	22·8	24·5	26·9

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 31st May 1890.	7th June 1890.	14th June 1890.	21st June 1890.	Towns.	Weeks ending— 31st May 1890.	7th June 1890.	14th June 1890.	21st June 1890.
Burdwan	25·9	16·8	19·8	15·3	Narainganj	8·3	24·8	24·8	16·6
Midnapore	29·4	20·1	15·5	20·1	Chittagong	11·7	30·5	11·7	16·4
Hughli and Chinsurah	27·9	32·8	29·5	19·7	Comillah	30·8	30·8	34·7	11·5
Serampore	29·4	18·7	23·6	15·7	Patna	15·6	21·4	17·5	15·5
Utterpara	9·4	47·2	18·9	28·3	Gya	32·1	42·4	27·3	34·8
Howrah	13·2	13·6	20·6	12·0	Arrah	32·3	21·5	13·2	37·1
Bali	21·1	10·5	14·0	17·5	Mozufferpore	38·9	26·8	28·0	26·8
Kishnagar	11·4	9·5	[illegible]	...	Durbhanga	33·0	26·7	33·0	21·2
Ranaghat	12·0	12·0	[illegible]	6·0	Chupra	12·1	11·1	12·1	14·1
Santipore	5·2	8·8	14·0	15·8	Bhagulpore	28·2	23·6	24·4	18·1
Jessore	6·1	49·0	12·2	36·7	Monghyr	19·3	26·2	18·1	17·2
Rampore Beauleah	26·3	23·6	23·6	23·6	Purneah	10·4	27·7	3·5	10·4
Darjiling	14·8	59·3	14·8	37·0	Poori	62·9	142·7	125·9	343·0
Dacca	16·2	30·5	24·0	17·5					

It will be seen that last week the highest mortality occurred in the town of Poori (363·) and the lowest in Ranaghat (6·). No deaths were registered during the week in Kishnagar town.

Measured by last week's mortality, the highest annual death-rates from cholera, fever and other causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Poori ...	241·3	Poori ...	86·0	Poori ...	18·9
Arrah ...	15·5	Jessore ...	36·7	Gya ...	12·9
Mozufferpore ...	13·4	Darjiling ...	29·6	Midnapore ...	12·4
Durbhanga ...	5·5	Gya ...	21·2	Serampore ...	11·0
Patna City ...	4·5			Bhagulpore ...	10·9

The total mortality from the several registered death-causes in the twenty-seven towns amounted to 8·3 from cholera, against 3·5 per 1,000 in the preceding week; ·7 from small-pox against ·8; 10·1 from fever, against 8·9; 2·2 from bowel-complaints, against 3·; ·4 from injury, against ·7; and 5·2 from other causes, against 6· in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	25·9	Christians ...	7·5	Under 1 year ...	168·0
Females	28·1	Hindus ...	30·1	1 and under 5 years ...	35·2
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	92	Mahomedans ...	19·4	5 „ 10 „ ...	12·2
				10 „ 15 „ ...	14·0
				15 „ 20 „ ...	17·3
				20 „ 30 „ ...	12·8
				30 „ 40 „ ...	24·9
				40 „ 50 „ ...	30·7
				50 „ 60 „ ...	36·9
				60 years and upwards ...	48·2

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 7th July 1890.

Comparative Statement of the principal commodities carried over the Bengal Central Railway during the month of April 1890.

	Tons.
Increases.	
Coal	817
For railway and flotilla consumption.	
Betel-nuts	899
Principally from the B. C. F. Company.	
Decreases.	
Oilseeds	878
A general decrease in despatches from principal stations said to be due to late crop and dull market.	
Sugar	1,545
The decrease in despatches from Jhikargachi during the month was 34,564 maunds, but Maslandpur, Gobardanga, Jadabpur, Nabharan and Jessore also show a falling off. The demand in Calcutta for date sugar appears to have absolutely ceased.	

F. P. Quinlan,
Examiner of Accounts.

Calcutta, *the 2nd July* 1890.

Tirhoot State Railway.

Statement shewing the increase and decrease of principal staples carried over the line during the month of May 1890, *as compared with the corresponding period of* 1889.

					9,45,465		73,820	
					1,58,983		1,58,983	

Total quantity of goods carried during the month of May 1890 aggregated maunds 11,04,448 as compared with the maunds 9,45,465 carried during the corresponding period of 1889, and maunds 9,64,740 carried during the previous month, shewing increase of maunds 1,58,983 in one case and maunds 1,39,708 in the other.

Explanation of increases and decreases in the principal commodities carried during May 1890.

Increases.

	Mds.
Coal and coke	16,919
Due to construction of Sitamarhi extension.	
Piece-goods	5,340
Due to greater requirements of Nepal and to prosperous season.	
Gunny bags	3,471
Due to increase in bagged goods.	
Iron	18,888
Due to importation of drainage pipes for water-works at Khatmundu.	
Oil	2,910
Due to old stock having been exhausted.	
Railway materials	59,143
Due to construction of Sitamarhi and Kanwa Ghât extension.	
Salt	32,897
Due to old stock having been exhausted and to the merchants laying in a fresh stock before the rains.	
Saltpetre	2,483
Due to greater demand and favourable rates at Calcutta.	
Seeds	55,983
Due to good crop and favourable market.	
Spices	4,640
Due to greater requirements at Nepal and to old stock having been exhausted.	
Sugar and jaggree	4,216
Due to good production and favourable rates.	
Tobacco	8,479
Due to good production and favourable rates.	
Timber	3,760
Due to greater despatch by Messrs. Dear and Co. from Segowlie.	

Decreases.

	Mds.
Food-grains	68,708

Last year, owing to the scarcity in Tirhoot, a good quantity of food-grains was imported in the district, which has not been done this year as the crop is abundant; hence the decrease.

G. C. Wolfe, *Offg. Examiner.*

PUBLIC HOLIDAYS IN BENGAL.

No. 1289, dated Simla, the 3rd July 1890.

From—C. J. LYALL, ESQ., C.I.E., Offg. Secy. to the Govt. of India, Home Dept.,
To—The Secretary to the Government of Bengal, Financial Department

I AM directed to acknowledge receipt of your letters No. M $\frac{1-H}{1}$ 28, dated 19th April, and No. M $\frac{1-H}{2}$ 16, dated the 21st April last, to the address of the Department of Finance and Commerce, with which His Honour the Lieutenant-Governor submits a correspondence which has passed between the Government of Bengal and various Public Bodies and Associations, and makes proposals for the notification of certain days as public holidays in the Lower Provinces of Bengal under section 25 of the Negotiable Instruments Act.

The Lieutenant-Governor recommends that the holidays which have hitherto been gazetted as public holidays under section 25 of the Act should in future be distributed between two notifications, the first, issued under the Act, dealing with those Hindu holidays only the observance of which is absolutely required in order to enable Hindu employés, whether in the service of Government or of

private persons, to fufil their religious duties, and the second, issued as an executive order, including the remaining days hitherto observed as public holidays and applicable to all public offices and Magisterial and Revenue Courts under the Government of Bengal. It is explained that the ground of the distinction made is that the former class, which are days of religious obligation, are distinct from the latter, which are days of social observance only; that the effect of notifying all holidays without distinction under the Negotiable Instruments Act is to interfere most seriously with trade, shipping, and monetary business; and that the course which is recommended in regard to the Hindu holidays included in the second notification is that which has always been pursued in regard to all Muhammadan holidays, and has not been found to cause inconvenience. His Honour has no intention of in any way curtailing the holidays at present allowed to public servants in Bengal, but merely wishes to remove what he regards as a reasonable source of complaint to the mercantile community, who are unable to transact business on days notified under the Act, although large numbers of vessels arrive by sea and leave the port of Calcutta, large quantities of goods are received by rail, and bills mature and ought to be paid.

2. In reply, I am to say that the Governor-General in Council has carefully considered the proposals made in your letter and the correspondence forwarded with it, and desires me to convey his acknowledgments of the thoroughness with which the matter has been investigated and the thoughtful and considerate spirit in which His Honour the Lieutenant-Governor has dealt with this difficult subject. The main principle of the proposals, to make a distinction between those holidays which require to be notified under the Negotiable Instruments Act and those which do not require to be so notified but may be allowed as a matter of executive arrangement, is one which has long been recognized in other Presidencies, and has in fact been always in force in Bengal in regard to the Muhammadan holidays, which are observed by one-third of the population of the province. It appears to the Government of India that, in view of the consequences which ensue from the notification of holidays under the Act, such notification should clearly be restricted to those days when a cessation of business is absolutely necessary, and that there is no need to apply the same process to days which are only occasions for festive and social gatherings. The proposals made by the Lieutenant-Governor have reference only to the Durga Puja holidays, and in regard to these it is shown, in paragraph 10 of your letter, that the restrictions upon business which the system hitherto followed imposes are not observed by the native community themselves. His Honour writes:—

> It is not to be forgotten that in all places in Bengal, and especially in Calcutta, the Durga Puja holidays are the season of the busiest life in all the year. The shop-keepers have no holiday, the cloth-sellers, the money-changers, the confectioners, the grocers and the general dealers are busy all day long; in the bazar there is no holiday, but business is as brisk as it can be. The clerks and sircars in the bazar are not idle men. It is only in the public offices that stagnation reigns. It is not therefore a real or just ground for complaint if in a few public offices for public reasons a few clerks are required to attend office on certain days which are allowed to remain holidays to the great majority of clerks employed in the public service.

What is here stated regarding the activity of trade during the Durga Puja holidays is confirmed by the following passage in the letter from the Secretary to the Bengal National Chamber of Commerce, dated the 27th March 1890:—

> The Committee beg further to observe they take particular note of the fact that trade is very brisk during the Puja holidays, the demand for a number of articles being larger during the twelve days than throughout the rest of the year. This may be explained by reason of the large influx of people from all parts of the country bent upon making the most of the holidays. The curtailment of the holidays must necessarily involve a serious pecuniary loss to the trade.

For these reasons, while regretting that the arrangement proposed by His Honour the Lieutenant-Governor should not commend itself to those representatives of the Hindu community whose replies are enclosed in your letter, the Government of India sanctions the proposals made, and authorizes the issue of the notifications forwarded by you.

I am, however, to observe that if the Governor-General in Council rightly understands the letters from Mahámahopádhyáya Mahesh Chandra Nyáyaratna, dated the 4th and 14th November 1889, it would seem that the 23rd October

is one of those days which should be set apart as required for religious observance, and His Excellency in Council would suggest, for the consideration of His Honour the Lieutenant-Governor, that it might be added to the 20th, 21st, and 22nd October in the list of holidays to be notified under the Act. If this is done the balance might be redressed by removing the 24th December from the holidays to be gazetted under the Act, and entering it as an office holiday in the other notification.

3. The Governor-General in Council accepts the proposals of His Honour the Lieutenant-Governor as regards the offices under the Government of Bengal to be kept open during the holidays which will henceforth not be notified under the Act. In all these offices special arrangements should be made, by contracting the hours of business, by limiting the work undertaken to what is really urgent, by granting leave to Hindu employés wherever practicable, and by utilizing as much as possible the services of their non-Hindu fellow-clerks to minimise the inconvenience which may be felt by those who have hitherto enjoyed close holidays on the days which will in future be open. Under proper arrangements, so far from hardship being entailed on any considerable section of the community, not more than three or four Hindu clerks under the Government of Bengal are likely to be affected by the change. Separate orders to the same effect will be given by the Government of India in regard to the offices directly subordinate to it which are situated in Calcutta.

4. I am to request that, with the Lieutenant-Governor's permission, this letter and yours to which it is a reply, with the enclosures of the latter commencing with your letter Nos. M $\frac{1-H}{1}$ 18-22, dated the 19th January last, and the two letters from Pandit Mahesh Chundra Nyáyaratna, may be published for general information in the *Calcutta Gazette*.

No. M $\frac{1-H}{2}$ 16, dated Calcutta, the 21st April 1890.

From—H. J. S COTTON, Esq., Offg. Secy. to the Govt. of Bengal, Financial Dept.,
To—The Secretary to the Government of India, Dept. of Finance and Commerce.

I AM directed to submit, for the consideration and orders of the Government of India, a copy of the marginally noted correspondence which has passed between this Government and various local Associations and Offices regarding the notification of public holidays in the Bengal Province.

Letter from the Bengal Chamber of Commerce, No. 944—89, dated 22nd November 1889, and enclosures.

Government letter No. Mis. $\frac{1-H}{1}$ 16, dated 11th December 1889, with enclosure.

Letter from the Indian Association, No. 60, dated the 15th March 1890.

Letter from the Bengal National Chamber of Commerce, dated the 27th March 1890.

Letter from the British Indian Association, dated the 7th April 1890.

2. The history of the question is given in my circular letter of the 19th January to the Bengal Chamber of Commerce and other Associations. The holidays notified under the Negotiable Instruments Act in Bengal are now exactly the same as those which were sanctioned by the Government of India on the 29th October 1867. Although the Chamber of Commerce have not ceased to press for their reduction, their representations have, with reference to the orders passed by the Government of India on the 28th January 1880, and reiterated in 1882, been invariably rejected by this Government. A copy of the reply sent by the Lieutenant-Governor to the Chamber of Commerce in 1888 was transmitted to the Government of India with my letter No. M $\frac{1-H}{1}$ 7, dated 17th September 1889. A copy of a correspondence with the Chamber in 1889 is

among the enclosures now submitted. In the orders issued by Government on that occasion it was pointed out that the reasons adduced by the Government of India in 1882 against any reduction in the number of holidays were in full force, and the following extract from your letter No. 3712, dated 12th September 1882 was quoted:—

"The Governor-General in Council is aware that the closing of the Government offices in Calcutta for a period of 12 days is productive of some inconvenience to the mercantile community, but on the other hand it cannot be overlooked that, in the words of the Lieutenant-Governor of Bengal the inconvenience and loss which the mercantile community suffer from the existing state of things, great and serious as they are, cannot be remedied without inflicting a still more serious hardship on a far more numerous, though less influential, portion of the community."

3. A new suggestion has, however, now been made, which it is believed will be able to satisfy the reasonable requirements both of the European commercial body and of the Hindu community. When the holidays for the current year were notified under the Negotiable Instruments Act by Government, a deputation from the Chamber of Commerce waited on the Lieutenant-Governor at Belvedere in December last, and strongly pressed upon His Honour the necessity of modifying the form of notification by which public holidays were gazetted. The deputation laid stress on the alteration which the passing of the Negotiable Instruments Act had introduced into the conditions of the problem since the decision of Government was arrived at ten years ago, and indicated that it might be found possible to find a solution of an admitted difficulty by restricting the number of holidays gazetted under the Act, but at the same time retaining by executive authority the existing number of holidays for all public offices save the few which are indispensable to the foreign commerce of the port. The question thus stated was then very carefully considered by the Lieutenant-Governor, and the result was the issue of the circular letter of the 19th January, to which I am to request that a reference may be made by the Government of India for a *resumé* of the discussion as well as of the arrangements it is proposed to adopt. His Honour's views are so fully expressed in that letter that it is not necessary to enter again upon the subject at any length.

4. Briefly speaking, it is now proposed to notify holidays in Bengal under two separate notifications: first, in regard to public holidays notified as such under the Negotiable Instruments Act; and, secondly, in regard to holidays which are notified as such by the closure of public offices. These two separate notifications would be in the form given and apply to the days specified in the draft notifications annexed to this Government letter of the 19th January.

5. Before publishing these notifications or applying to the Government of India for permission to modify the form in which public holidays are notified in Bengal, the Lieutenant-Governor desired that the Bengal Chamber of Commerce, the Bengal National Chamber of Commerce, the Calcutta Trades' Association, the British Indian Association, the Indian Association, the Bank of Bengal, the Exchange Banks, and the Heads of the Offices immediately concerned, should be consulted; and it will be seen from the replies which form an enclosure to this letter that the proposal has elicited considerable difference of opinion. The Bengal Chamber of Commerce, the Bank of Bengal, the Trades' Association, and the Board of Revenue give it their concurrence. But the letter from the Exchange Banks accords only a hesitating and incomplete support. The managers of these banks would evidently prefer to retain intact the holidays notified under the Act. They express themselves as perfectly willing to accept the proposals put forward by Government, if only the majority of the mercantile community is in favour of them. But they observe that "it has not been effectively demonstrated, by general vote or otherwise, whether reduction of holidays finds favour or disfavour among the majority at the present time." Looking to the importance of this question, the Lieutenant-Governor deemed it right to transmit the letter of the Exchange Banks to the Chamber and to consult the Committee again on the subject. Accordingly, upon the 17th February, I was directed to inform the Chamber that although the Lieutenant-Governor had no doubt that the opinion of the Chamber as a body had been expressed in the letter already received from their Secretary, yet, with reference to the observation made by the Exchange Banks, it would be more satisfactory to Government if, with the permission of the President

and Committee, it could be stated approximately how far the doubt expressed by the Banks, "whether a majority of the (mercantile) community is in favour of fewer holidays," can be set at rest by reference to the relative number of supporters of either view among the members of the Chamber. In reply to this letter the Committee intimated that they were unable to comply with the suggestion of Government that a formal vote of the Chamber should be taken on the question; but on occasion of the Annual Ordinary Meeting of the Chamber, the President, Sir Alexander Wilson, referred to the subject in his address, and in the course of the proceedings called for an informal vote as an expression of the Chamber's opinion. The result is reported to have been the unanimous confirmation of the views expressed by the Committee. The list of gentlemen present at this meeting is given in Mr. Clarke's demi-official letter of the 7th March, and it appears to the Lieutenant-Governor to contain as complete a representation of the mercantile interests of the port as it could be possible to assemble together for such a purpose. Although, as stated in my letter to the Chamber, it would have been more satisfactory to Government to have received an official reply as to whether any considerable minority of their members was opposed to any change, the Lieutenant-Governor has no doubt that the expression of opinion of the members of the Chamber on the occasion of their Annual General Meeting may be accepted as conclusive proof of the views of the overwhelming majority of the mercantile community of Calcutta. This opinion is in accordance with the views expressed by the Bank of Bengal, the best judge of the requirements of the commercial public, by the Trades' Association, and by the Committee of the Chamber, during a period of agitation for thirty years.

6. On the other hand the Bengal National Chamber of Commerce, the Indian Association, and the British Indian Association are opposed to any change in the method of notifying the existing holidays. Their letters are enclosed, and are entitled to the consideration they deserve as undoubtedly representing the great mass of Hindu opinion on the subject. But the Lieutenant-Governor does not find that they bring forward any new arguments or raise any objections which have not already been met by anticipation and fully replied to in my letter of the 19th January. The British Indian Association are, indeed, prepared to admit that the Currency Office and Shipping Office should be kept open during some of the holidays along with the Custom House. The National Chamber of Commerce and the Indian Association are not willing to make any concession. Their apprehension is, as the National Chamber of Commerce puts it, that the Government proposals are "but the thin end of the wedge, which in time must bring about the total abolition of the Doorga Poojah holidays in all public offices."

7. With reference to this remark, I am to explain that the objection of the native associations appears to be based in a large measure on a misconception of the arrangements proposed by Government. The effect of a notification under the Negotiable Instruments Act is that Promissory Notes or bills of exchange do not mature on the holidays therein specified, but are deemed to be due on the next preceding business day, and it is complained by the mercantile community that business is to a large extent paralysed when there are twelve such holidays in succession. There can be no dispute of the justice of this complaint and of the great inconvenience which the present procedure affords to the commercial public. The great increase in the number of steamers visiting the port, and the consequent necessity of expedition in despatching them, has also largely augmented the inconvenience caused by a twelve days' continuous closure of the offices to the trade of the port. To remedy these grievances, it is proposed that the number of holidays under the Act should be reduced; but it is not proposed that the number of holidays in Government offices generally should be diminished, and the executive order which it is intended to issue sufficiently shows that they will continue to be closed for the same period as at present. Nor will the promulgation of these parallel orders produce any perceptible effect upon the general body of the Hindu community. Certain social festivals of the Hindus will be placed on the same footing as Mahomedan holidays. But in both cases reasonable facilities will be afforded by Government for carrying on business. This is now done in the case of Mahomedan holidays and ought to be done in the case of Hindu social festivals.

On the other hand, certain Mahomedan holidays are now granted by executive order, and are, as a matter of fact, universally enjoyed in all parts of Bengal except in certain specified offices at the Presidency. The opening of these particular offices does not in any way govern the practice elsewhere, and we may expect that certain Hindu holidays, if notified in the same way as Mahomedan holidays as days upon which certain offices in Calcutta will be open, will be accepted in exactly the same way as Mahomedan holidays are now accepted.

8. The view which the British Indian Association appear to hold that the holidays under the Act should not be altered, but that by executive order the holidays in certain offices should be reduced, does not in any way meet the difficulty of which the commercial community complain. The opening or closing of a particular public office (important as it is that the offices should remain open) does not so much impede the transaction of public business as the declaration that for twelve days in succession exchange bills receivable cannot be legally collected, and Promissory Notes payable cannot be legally paid. The only manner in which this difficulty can be met is by reducing the number of holidays notified under the Act. And this is what it is now proposed to do without at all interfering with religious prejudice. The proposals now made declare that all days necessary for the performance of religious ceremonies shall be holidays under the Act. The remaining days of the Doorga Poojah, which are devoted to social festivities, are no longer included in the category of such holidays: but in order to allow every possible concession to the claims of Hindu clerks who are employed in public offices, it is proposed to declare by executive order that these offices, with a few specified exceptions, shall remain closed as they are at present. A distinction is drawn between holidays notified under the Act and those declared in public offices by executive order, and it seems to the Lieutenant-Governor that, by the recognition of this clear distinction, a compromise has at last been found, in the only way in which it was possible to find it, which satisfactorily meets the reasonable claims of the Hindu community as well as the interests of trade and commerce.

9. The Registrar of Calcutta and Shipping Master are opposed to the exclusion of their offices from the holidays notified by executive order, but in the opinion of the Lieutenant-Governor the arguments adduced by these officers are of no validity. The commercial community have always objected, and with reason, to the closing of the Registration Office for twelve consecutive days; and although, as represented by the Registrar, the number of documents presented for registration at this season is likely to be inconsiderable, it is apparent from this fact that a small establishment will be sufficient for carrying on the work, and that the hardship of attending office will therefore be felt by very few. The Shipping Office is one which, in the interests of the Port, it is absolutely necessary to keep open on every day on which it is possible to do so.

10. The Lieutenant-Governor has the strongest sympathy with the very general desire of the Hindu community that no obstacle should be placed by Government in the way of its Hindu employés meeting together at their homes, at the season of the Doorga Poojah holidays, for the celebration of religious, social, and domestic ceremonies. It is far from His Honour's desire to encourage any policy which would deprive Hindu employés as a body of the satisfaction of enjoying their great annual festival in the future as they have done in the past. There is nothing, however, in the proposals now made which, in the Lieutenant-Governor's opinion, is likely to lead to any such unfortunate result. It is true that a few clerks employed in a few offices may be subjected to some inconvenience by being required to attend office on days on which they now get a holiday. But the inconvenience is one which they must bear in the public interest. They will enjoy some compensating advantages. And it is not to be forgotten that in all places in Bengal, and especially in Calcutta, the Doorga Poojah holidays are the season of the busiest life in all the year. The shop-keepers have no holiday, the cloth-sellers, the money-changers, the confectioners, the grocers and the general dealers are busy all day long; in the bazar there is no holiday, but business is as brisk as it can be. The clerks and aircars in the bazar are not idle men. It is only in the public offices that stagnation reigns. It is not therefore a real or just ground for complaint if in a

few public offices for public reasons a few clerks are required to attend office on certain days which are allowed to remain holidays to the great majority of clerks employed in the public service.

11. Having regard to the correspondence with the Government of India on the subject of holidays in Bengal on previous occasions, the Lieutenant-Governor does not wish to take action in the direction now proposed without the previous sanction of His Excellency the Governor-General in Council. I am now to request that this sanction may be accorded and permission given to publish the draft notifications which are the annexure to my letter of the 19th January. It will be seen that the opinion of the law officers of Government has already been obtained that there appears to be no legal objection in the way to prevent the Government from cancelling the notification of public holidays already published at page 1010 of Part I of the *Calcutta Gazette* of 11th December 1889, and substituting in its place a new list.

12. I am to add that the executive order of the Government of Bengal, under which the public offices under this Government (excluding those specified in the notification) will be closed during certain days of the Doorga Poojah holidays in the same manner as these offices are now closed on the occasion of Mahomedan festivals, will obviously have no force in regard to offices under the Government of India, and the Lieutenant-Governor would therefore venture to recommend that the benefit of similar orders may be extended generally to the offices under the Supreme Government employed in the Lower Provinces. It will no doubt be necessary to exempt certain offices from the effect of such an order, as has been done in regard to offices under the Bengal Government; and in the opinion of the Lieutenant-Governor, as intimated in a separate letter of this day's date, the Currency Office should be so exempted; but it may easily be arranged that in these offices, as in the excepted offices under the Government of Bengal, if it be found impossible to grant the Hindu employés their holidays during the excluded days of the Doorga Poojah festival, they should not be required to attend in larger numbers than are actually necessary for the transaction of business, and that other concessions in the way of leave at other times should be given to them.

Nos. Mis. $\frac{1\text{-H}}{1}$ 18-22, dated Calcutta, the 19th January 1890.

From—H. J. S. COTTON, Esq., Officiating Secretary to the Govt. of Bengal, Financial Department,

To—The Secretary to the Bengal Chamber of Commerce; Secretary to the Bengal National Chamber of Commerce; Secretary to the Calcutta Trades' Association; Secretary to the British Indian Association; and Secretary to the Indian Association.

I AM directed to inform you that the Lieutenant-Governor has again had his attention drawn to the question of the number of public holidays in the Bengal Province, and to communicate to you the following observations on the subject, with a request that they may be laid before $\frac{\text{the Bengal Chamber of Commerce.}}{\text{your Association, the Bengal National Chamber of Commerce.}}$ and that you will be so good as to furnish the Lieutenant-Governor with the opinion of the $\frac{\text{Chamber}}{\text{Association}}$ on the suggestions made, as well as with any further remarks on the subject which the $\frac{\text{Chamber}}{\text{Association}}$ may wish to offer.

2. It appears to the Lieutenant-Governor to be unnecessary to discuss the early history of the question, but in recent times it is material to note the following points:—

3. In 1860 the Bengal Chamber of Commerce suggested that holidays should be reduced to the days actually required for the ceremonial observances of the Hindu religion. A Committee, consisting of Messrs. J. J. Harvey, W. S. FitzWilliam, and Baboo Prosonno Kumar Tagore was appointed, and recommended, among other things, that the Doorga Poojah holidays should be 14 days for Hindus and 10 days for all other Government servants. These proposals were accepted by the Local Government, but on the 15th April 1862 they were set aside by the Government of India, and 27 days (including

12 days for the Doorga and Lakhi Poojahs) were declared public holidays. The number of days was raised to 30 by the order of the Government of India dated 29th October 1867, and the general holidays * then sanctioned have remained unchanged up to the present time.

4. In 1874 the Chamber of Commerce recommended that the Doorga Poojah holidays should be reduced from 12 days to one week, and this proposal was supported by Sir George Campbell. Much opposition was, however, raised, and the proposal was rejected by the Government of India. Arrangements were, however, made for facilitating business in the Custom House, which it was ordered should remain closed for one week only.

5. In 1875 the Calcutta Trades' Association urged that the Doorga Poojah holidays should be reduced to the days of actual religious observance, and it was then directed that the Custom House should remain closed for five days only. The proposal that the Bank of Bengal should be closed for five days only was then rejected by the Government of India.

6. In 1878 the Chamber of Commerce again addressed Government, requesting "that the Doorga Poojah holidays be reduced and restricted to the four days which they understand are absolutely necessary for the observance of that annual festival, with the proviso that, should the festival terminate on a Friday, the holidays be extended so as to admit of business being resumed on the following Monday."

7. A representative Committee was appointed to consider and report on the question. The majority† reported as follows:—

† Mr. G. Yule. | Mr. S. Cochrane.
„ C. J. Brookes. | „ J. D. Maclean.

"That only the four days required for strictly religious purposes be close holidays;

"That if the fourth religious day fall on Friday, the offices shall not re-open till the following Monday;

"That the Public Debt Office, the Treasury, the Currency Office, the Money-order Office, the Stamp Office, and all Pay offices be closed on these four days only, but that in other Government offices the Heads of Departments shall have discretion to give leave to their subordinates for the whole or any part of the twelve days, provided the current work of their office is carried on."

8. The two Hindu Members‡ of the Committee recorded a dissent which concluded as follows:—

‡ Baboo Kisto Das Pal.
„ Durga Churu Law.

"Considering that the arrangements made by Government in 1874, by which the Custom House is kept open during the Doorga Poojah vacation, except for five days, and the jetties work without intermission, the inconvenience to the trade of the city is not serious; that the number of holidays in Bengal is less than that in the other provinces; that a general vacation of seven or eight days during Christmas does not in any way affect or inconvenience commerce in Madras and the North-Western Provinces; that the present Doorga Poojah vacation is necessary for the observance of the religious and social ceremonies of the Hindus; that it is a general holiday for all classes of public servants for rest, recreation and travelling; that it affords almost the only opportunity to the lower grades of officers to visit their mofussil homes once a year; that in a sanitary point of view a prolonged rest of 12 to 15 days in a year is of great importance, as it enables the officers of Government to discharge their duties much more satisfactorily than what they could do if no periodical rest was allowed; and that its curtailment would give rise to much hardship and dissatisfaction among the Hindu as well as other servants of Government, and also among the general public whose business engagements are regulated by the practice in the public offices, we are of opinion that no change in the present Doorga Poojah holidays is called for."

9. Mr. Dampier, the President of this Committee, recorded a separate memorandum, in which he stated that the recommendation of the majority of the Committee "amounted to a proposal that all public offices shall be kept open, and that all persons who are engaged in business must attend to business on all but the four close days." But he considered that the mercantile community had made out a case for some reduction in the length of the holidays, and suggested that the number of days should be summarily curtailed from 12 to 9 or 8.

10. The papers of the case were transmitted to the Government of India with a letter from this Government, No. 3809, dated 12th September 1879. In that letter the Lieutenant-Governor observed:—

"It may be conceded that the curtailment of the holidays proposed by the majority of the Committee will not interfere with any *bonâ fide* religious prejudices of the Hindu community. Any shortening of the vacation may prevent social ceremonies, visits home, and the enjoyment of the rest and recreation of a holiday; but when the question of opening the Custom House was discussed in 1874 to 1876, it was clearly decided that five days are all that are necessary for the purely religious observances of Hindus during the Doorga and Lakhi Poojahs, and this decision must be considered applicable to the Hindu clerks in all other offices. It must be accepted also as regards Bengal that on days when Hindu employés are authorised to be absent, offices cannot remain open, and that, whatever rule is laid down for the Bank of Bengal, the Currency and Pay offices at the Presidency must of necessity govern the holidays of all or almost all the other offices in Bengal. The partial opening of offices during the latter portion of the vacation, as suggested in the third proposal of the majority of the Committee, is not really practicable, and their recommendation amounts to this, that all public offices shall be kept open on all but the four days of religious observance."

11. The question as a balance of convenience was then discussed by the Bengal Government, and it was recommended that there should be no alteration in the present holidays.

12. This recommendation was not accepted by the Government of India, and in orders dated 4th October 1879 it was directed that effect should be given to the proposals of the majority of the Committee.

13. On the return of the Government of India to Calcutta, the orders of the 4th October were cancelled. In a letter dated 28th January 1880 it is written:—

"Since his return to the Presidency, His Excellency the Governor-General in Council has found reason to doubt whether the Government of India allowed sufficient weight to the inconvenience which will be entailed by the enforcement of this decision upon the Hindu community of Calcutta and some other parts of Bengal, and to the strength of the popular attachment to these annual holidays.

"On the other hand, His Excellency is disposed to think that he may have underrated the extent to which the complaints of the mercantile community may be obviated, or at least mitigated, by careful arrangements in the several public offices to meet their requirements."

14. It is then ordered that "the observance of the Doorga Poojah holidays in the public offices in Calcutta shall continue as heretofore," and the Bengal Government are enjoined to take measures to meet, as far as possible, the convenience of the mercantile community.

15. In 1882 the Chamber of Commerce again urged that the Doorga Poojah holidays should be restricted to the four close days which are alone observed as religious holidays. But both the Government of Bengal and the Government of India refused to re-open the question.

16. During 1886 and 1887 the Chamber of Commerce made several representations on the subject of Custom House holidays and the general routine of Custom House business. Special objection was taken to the continuous closing of the Custom House for periods varying from two to seven days. In 1888 a Committee* was appointed to enquire into the whole question, and submitted the following recommendation:—

* Mr. C. P. L. Macaulay.
„ R. Steel.
„ E. D. Wylie.
„ J. Scobell Armstrong.

"It has hitherto been the usage that the Custom House should not be opened on any gazetted holiday for any purpose free of charge, except on certain days in the long holidays of the Doorga Poojahs. This practice appears to us not to be suited to the requirements of the trade of Calcutta. We recommend that for the Custom House, as distinguished from the Preventive Department, Sundays, New Year's Day, Good Friday, the Queen's Birthday and Christmas Day should in future be held to be absolutely close holidays, but that on the week days for which the office is closed in the Doorga Poojahs, and on all ordinary gazetted holidays other than the days mentioned above, the Custom House should be opened free on charge for one hour, viz., from 11 A.M. to 12 noon, all work applied for up to 12 o'clock being carried through, provided that notice is given to the Assistant Collector before closing hours of the day previous, or if this be a holiday, 24 hours in advance, that it is required to have the office so opened. On such opening, vessels would be allowed to enter and clear on the import and export sides, and provisional bill-of-entry for free goods as well as shipping bills for free goods issued, but the treasury would, as in Bombay, remain closed. It is understood that arrangements can be made to carry out this in the Doorga Poojah holidays without obliging Hindu clerks to attend. The above change will further not affect the opening of the Custom House as heretofore on such advertised days as may be fixed on

in the Doorga Poojah holidays for the receipt of duty and complete transaction of Custom House business."

17. These proposals were sanctioned by the Local Government.

18. In 1888 and in 1889 the Chamber of Commerce have made further representations to Government, urging that "only those days should be declared public holidays under the Negotiable Instruments Act which are actually required to be devoted to necessary religious ceremonies." To these letters the Government has replied at length reciting the arguments which were accepted by the Government of India in 1880 and 1882. It has been pointed out "that the inconvenience and loss which the mercantile community suffer from the existing state of things, great and serious as they are, cannot be remedied without inflicting a still more serious hardship on a far more numerous, though less influential, portion of the community." The Government was unable to comply with the wishes of the Chamber, and on the 11th December 1889 a notification was published in the Gazette, under which the holidays declared under section 25 of the Negotiable Instruments Act will remain the same in 1890 as they have been in previous years.

19. In consequence of the publication of this notification, a deputation from the Chamber, consisting of Sir A. Wilson, Mr. Wylie, Mr. McCaw and Mr. Stuart, waited on the Lieutenant-Governor at Belvedere on the 19th December 1889, and strongly pressed upon His Honour the necessity of reducing the number of holidays under the Act. They laid stress on the alteration which the passing of the Negotiable Instruments Act has introduced into the conditions of the problem since the decision of Government was arrived at in 1879, and they indicated that it might be possible to find a solution of it by restricting the number of holidays gazetted under the Act, but retaining by executive authority the existing number of holidays for all public offices, save the few in Calcutta which are indispensable to the foreign commerce of the port. The question as thus stated deserves very careful consideration.

20. The Negotiable Instruments Act XXVI of 1881 became law subsequent to the discussions of 1879 and 1880. Under section 25 of that Act, when the day on which a Promissory Note or bill of exchange is at maturity is a public holiday, the instrument shall be deemed to be due on the next preceding business day. The expression "public holiday" includes Sundays, New Year's Day, Christmas Day, Good Friday, and any other day declared by the Local Government by notification in the official Gazette to be a public holiday. Under this section the 30 authorised public holidays in Bengal are now published, and the gravamen of the Chamber is, firstly, that public business is to a large extent paralysed during these holidays by the closing of the Exchange Banks, which will not undertake the responsibility of transacting business during days upon which negotiable instruments will not mature; and, secondly, that the trade of the port is materially affected by the closure of the Shipping Office and the inability to obtain port clearance during these days. It is pointed out that in the interval from 30th September to 10th October 1889, which were declared public holidays under the Act on account of the Doorga and Lakhi Poojahs in 1889, the shipping arrivals in the port of Calcutta showed a gross tonnage of 73,210, and a registered tonnage of 48,179; that the departures showed 63,962 gross and 45,538 registered tonnage; that 29 steamers and 2 ships arrived in port, and that 19 steamers and 13 ships left the port. The East Indian Railway brought into the market 25,084 tons of goods, and the Eastern Bengal State Railway 4,52,514 maunds, of which 3,63,875 were jute. The fact that all bills maturing in the interval fell due on Saturday, September 28th, is brought to notice as a most serious inconvenience and burden on the trade of the port. In the discussion that took place in 1879 much stress was laid by the native members of the Committee on the fact that the then existing facilities were sufficient. They urged that, though the Banks were closed, exchange operations might be and were carried on, and, that as a matter of fact, the Banks did take cheques from purchasers of bills during the vacation; and that remittances by telegram or otherwise were not necessarily suspended. The Chamber urge that this is not now the case, and that the Banks have felt it unsafe to do any business at all on holidays gazetted under the Negotiable Instruments Act since that Act came into operation, and consequently that the inconvenience to commerce has become intensified.

21. Of the force of these representations there can be no doubt; and it is equally clear that it is the duty of the Government to mitigate the grievance if it is possible to do so without imposing greater hardship on others. The question to be examined is whether this can be done by reducing the number of public holidays under the Negotiable Instruments Act, and at the same time increasing the number given in Government offices by the executive order of Government. Mahomedan holidays are now granted by the executive order of Government in the following way:—"It is notified for general information that," on specified dates, "all public offices and Revenue and Magisterial Courts in Bengal, with the exception of the offices of Collector of Customs, Shipping Master, the Registrar of Assurances, Calcutta, the Collector of Stamp Revenue, Calcutta, the Stamping Department of the Office of the Superintendent of Stamps, Calcutta, and the Salt Rowanah and Opium Sale Departments of the Board of Revenue, shall be closed." The effect of these orders is to give a general holiday in Government offices with the exception of those specified. To those excepted offices special instructions are issued that "though it is not expedient to close them on the days in question, it is hoped that it will be possible to arrange to relieve of their duties on those days any Mahomedan ministerial officers who may apply for leave." The holidays are granted generally, but the trade of the port is not allowed to suffer. It is an arrangement which His Honour believes has been found to give satisfaction to all concerned. What the Lieutenant-Governor would now propose for consideration is that all those days of the Doorga Poojahs, which are not actually required to be devoted to necessary Hindu religious ceremonies, should be notified as holidays in the same way as Mahomedan holidays are now notified, and that only those days which are devoted to religious ceremonies should be notified as public holidays under the Act.

22. An objection which may be brought against this proposal is that on Poojah days, which are not notified under the Act as public holidays, every bank and mercantile office in the city will be kept open. This is the argument which was felt to have so much weight in the discussions of 1879-80. But the objection is less strong than it seems to be. The Banks would be in no worse position—indeed in a better one in regard to enforced closing—than they were in before the Act was passed: whatever force attached to the argument used by the native members of the Committee as to their being able to afford sufficient facilities to commerce without absolutely closing their doors, would acquire additional strength under the present proposal; while in regard to mercantile offices, the Lieutenant-Governor is disposed to doubt whether there will be any very material change. All the merchants in Calcutta now require so many of their clerks as are necessary to carry on business to attend during the holidays; business is not allowed to stop, notwithstanding the closure of the Exchange Banks and Shipping Office; and the Lieutenant-Governor is assured on competent authority that the reduction of the number of holidays under the Act is not likely to appreciably affect the actual attendance of clerks. The merchants of Calcutta have always been ready to give holidays during the days actually devoted to religious ceremonial observance, and all employés in merchants' offices now know very well that a condition of their service is that on other days they are expected to attend office when work has to be done.

23. Sir Steuart Bayley has no doubt that the mercantile community will continue to show every reasonable consideration to their Hindu clerks in regard to attendance. It is to their interest to do so: the work of their offices depends on mutual agreement on both sides. After all, attendance in office is a matter of contract arrangement between employer and servant, and it is impossible to justify any interference on the part of Government, which would insist on mercantile offices remaining without clerks for twelve days at a time. Of course no such interference is really contemplated, but the papers on the subject give some colour for supposing that the claim has sometimes been made. If it is formally abandoned, the objection under discussion must also be given up.

24. On the other hand, I am to point out that a notification in the proposed form will enable Government to give a general holiday in its own offices, excepting those only which are required to remain partially, or it may

be wholly, open to meet the exigencies of modern commerce. All that is expected from Government is to afford reasonable facilities for carrying on business. This is done in the case of Mahomedan holidays, and ought to be done in the case of Hindu social festivals. The number of Government offices affected is inconsiderable, and the amount of hardship which would be inflicted on the Hindu employés concerned would not be great. The Lieutenant-Governor would, however, strictly enjoin in regard to these excepted offices that the Hindu employés should be allowed their holidays, whenever possible, and that, if it be found impossible to grant them, other concessions in the way of leave at other times should be given.

25. A point which had great weight in influencing the decision in 1879 was that advanced by Mr. Dampier and others that the opening of certain offices at the Presidency would necessarily govern the practice of all or nearly all the other offices in Bengal. It is now argued that this position is no longer tenable as shown by the fact that certain Mahomedan holidays are granted by executive order, and are, as a matter of fact, universally enjoyed in all parts of Bengal, except in certain offices at the Presidency. The opening of these particular offices does not in any way govern the practice elsewhere. It appears to follow that certain Hindu holidays, if notified in the same way as Mahomedan holidays, will be accepted in the same way as Mahomedan holidays are now accepted, and it is urged there is an opportunity of settlement on this basis. The provisions of the Negotiable Instruments Act enable the Government to make a clear distinction between public holidays notified under the Act and holidays notified by executive order: and it seems to His Honour that advantage may be taken of this distinction, which did not exist when the question was formerly under discussion, to sanction arrangements which, while recognizing the claims of the Hindu community, will also satisfy the interests of trade and commerce.

26. It is undoubtedly the case that the attitude of the Chamber becomes a stronger one every year. The proportion of steamers which comes into the port constantly increases, and the requirements of trade are more urgent now than they were ten years ago. The holiday arrangements are proportionately more irksome and impose greater comparative restrictions than they did then. The claims of commercial progress are recognized in other parts of India. It was pointed out by Baboos Kisto Das Pal and Durga Charan Law in 1879 that "the number of holidays in Bengal is less than that in other provinces." But whatever may have been the case in 1879, the exact reverse is the fact in 1889. The number of holidays for 1889 notified under the Negotiable Instruments Act in Madras (including New Year's Day, Good Friday and Christmas Day, which are public holidays under the Act) was 18; in Bombay the number was 21; in Bengal the number was 29. A *primâ facie* case is therefore made out for reduction in the number of public holidays notified under the Act. If the number of Doorga Poojah and Lakhi Poojah holidays gazetted under the Act were reduced from 12 to 5, there would still remain 22 public holidays in Bengal, which is a larger number that either at Bombay or Madras, and is, the Lieutenant-Governor understands, a larger number than is allowed in any other country in the civilized world.

27. The Chamber of Commerce have proposed that the total number of public holidays notified under the Act should be reduced to 12 days only as specified in their recommendation, and they have declared that these 12 days "shall be the holidays recognized by the Chamber under shipping orders and charter parties as holidays according to the custom of the port." But the Lieutenant-Governor is not aware of any reason why Government should accept so great a change as this. The Chamber are at liberty to declare what charter party holidays they please; but they cannot expect that the Government should regulate the public holidays throughout the province according to the custom of the Calcutta port. It appears that in Madras the public holidays under the Act are identical with the charter party holidays declared by the Chamber of Commerce. In Bombay, however, the local Chamber of Commerce have fixed the number of their charter party holidays at 14, while the Bombay Government has notified the number of public holidays to be 21. Similarly in Bengal there can be no objection to the Chamber fixing the

representations)

area," at least as a permanent remedy for the existing evil, inasmuch as these lands are already much silted up and are already considerably higher than the "protected" lands which have to be drained; but, as a remedial measure, the re-opening of these lands to tidal spill, and the absolute prohibition of any new embankment within their limits, will no doubt for a time put a check on the present rapidly increasing obstruction to the drainage of the country, and from this point of view His Honour accepts the conclusions arrived at, and the Board will be requested to make the necessary arrangements as soon as possible in communication with the Public Works Department of this Government.

4. The second cause of floods, as disclosed by the Committee's report, is the construction of cross-dams in the main drainage channels for the purpose of excluding salt water during the dry season. It is stated that—

"The immediate effect of a cross-dam in a tidal channel is to cause a deposit of silt below the dam. In the flood season, when the flow of drainage took place, the dams were cut, and there was a sufficient scour to clear out the beds of the channels. Some deposit did, however, take place, which it was important to remove, and this necessitated the construction of the dam at a lower point in the channel in order to facilitate its removal. Cross-dams were in former years, and as recently as the year 1884, constructed in the Itaberiah, Oodbadul khals, but they were replaced eventually by one dam in the Sadar khal, below the junction of these khals with the main drainage channel, and the last dam constructed in 1887 was made at Birjoo, some three miles only above Kalinagar lock. The effect has been to concentrate the deposit of silt carried up by the first rush of the flood tide and create an obstruction in the main channel.

"During our inspection of the Kolaberiah khal it was found that, although no obstruction was apparent in the bed at the sites of various cross-dams that had been constructed since 1882, at the Birjoo cross-dam there was a depth of water of only 1 foot below the dam, while the depth was 4½ feet above.

"The accumulation of silt here was due to a deposit which had taken place during two years, and which extended to either bank. The cross-dam had been cut in the centre, but not to a width or depth sufficient to allow of drainage water from above being effectually discharged.

"At the same time, following on a recent settlement of the jalpai lands, bunds were being constructed by the chakdars (settlement-holders) along the margin of the channel, and the area of the channel was being contracted.

"Every condition existed for favouring the rapid silting up of the bed and blocking the drainage of the country above.

"It was shown by a cross-section of the country, taken during our inspection, that had free flow been allowed to the entrance of the tidal water, at a point about two miles above the cross-dam at Birjoo, the high tide in the flood season would have risen to 2½ feet above the country immediately on either side of the Sadar khal, and 5 feet above it for a distance of upwards of half a mile on either side to the Government embankments."

The recommendations of the Committee in regard to cross-dams are as follow:—

"I. Cross-dams in the main arterial drainage channels should be removed, and the reconstruction of them should not be allowed save where they are really required in order to protect cultivated land in the neighbourhood of these channels from inundation by salt water. Under the notification to which we have already referred, the construction of these cross-dams without the previous permission of the Collector is prohibited in many, if not in all, the main drainage channels. Moreover the construction of cross-dams in any water-course protected by the public embankments specified in schedule D, Act II of 1882, is illegal, apart from any special notification. The Collector should not, we think, give his consent to the construction of cross-dams unless and until the Engineer has reported, after local inquiry, that the cross-dam is required in each case, and the Engineer should not report in favour of allowing cross-dams save when he has ascertained that the mischief likely to be caused by the construction of a dam is less than the injury which is likely to ensue from unpreventable inundation of cultivated land by tidal water. It must be remembered, too, that it is not enough, in order to justify the construction of these cross-dams, to be able to show that without them certain lands are liable to inundation. It is further necessary to ascertain that such lands cannot be protected by repairs of the existing "hussea" bunds along the sides of the channels, or by the construction of new "hussea" bunds. These "hussea" bunds should be repaired or constructed, as the case may be, at expense of the parties whose lands are protected in the manner provided in the Act. Where channels are protected by public embankments now under charge of public officers, and maintained at the public expense, either as being included in schedule D embankments, or as being situated in Government estates, such repairs of "hussea" bunds as may be required in order to permit of the removal of cross-dams, or prohibition of their reconstruction, will have to be undertaken by the Public Works Department. So also, when Public Works officers have, in connection with the coast or other canals, diverted the ordinary drainage into new channels (called pass khals), Government is responsible for keeping these channels in efficient condition and for maintaining the "hussea" bunds abounding them, so far as the channels are new. Though we are of opinion that the hasty construction of these dams across the main drainage channels without proper inquiry, and afterwards the failure to remove them

in due time, has caused much mischief, yet we are not prepared to recommend their wholesale removal or absolute prohibition in future, without having it carefully ascertained beforehand in each case that adequate precaution has been taken to guard against the mischief which might ensue from inundation of cultivated land by salt water. It may be well here to remark that we do not attribute blame to the officers of the Public Works Department, or to the Collector, for having hitherto allowed the construction of these dams in the past. Of the expediency of allowing them there has always been some doubt, and some of them have been constructed from time immemorial.

"Our remarks on the injury that results from these dams, and the inexpediency in general of allowing them to be made, do not apply to temporary dams made for the purpose of permitting the excavation of the beds of the channels themselves when these channels require to be cleared. But even as to temporary dams, made merely for the purpose of permitting excavation of the beds of water channels, care should be taken that they are removed as soon as the channels above them have been cleared. They cause a deposit of silt at or near them. This silt raises the bed of the stream below the dam, and this affects the level at which water flows off throughout the whole country served by the channel. In this way one cross-dam near the mouth of the Kolaberiah khal affected most injuriously the drainage of the Jellamutha and Sujamutha pergunnahs, and caused much loss to the Government khas mehals in the Burdwan estate—a loss which might have been almost entirely obviated by removal of the dam and clearing out of the deposit of silt caused by it between the site of the dam and the mouth of the khal. Since the date of our visit the silt caused to be deposited by the dam in question has been, at our suggestion, cleared away, with the result that the water-logged parts of Sujamutha at once dried up. Wherever, therefore, a cross-dam is constructed, even for a temporary purpose, the authority which constructs or permits its construction should be held responsible, not alone for the removal of the dam in due time, so as not to interfere with the general drainage of the country served by the channel, but also for the removal of any silt which may have been deposited below the dam, which would affect the level of the bed of the stream."

These proposals are approved by the local officers as well as by the Board, but the damage done by these cross-dams is doubtless so great that His Honour is inclined to think that the prohibition suggested in the opening lines of the above quotation from the report is not sufficiently stringent, and that no cross-dams should be allowed except temporary dams put by the Engineer in charge to allow of silt clearance above them, and that the officer putting such dam should be responsible for its complete removal at the earliest possible opportunity. All existing cross-dams, whether in major or minor drainage lines, should be removed. "Hussea" bunds are almost equally objectionable as contracting the area over which the tidal water can spill, and even though the plea be to keep the tide off otherwise culturable land, no increase in their existing number or section should be permitted. The Board add a recommendation in favour of the construction of sluices, which may be separately submitted in connexion with any particular case in which such a sluice may be desirable.

5. The third cause affecting the floods is the canalization of the Sarpai, as to which the Committee observe—

III.—Canalization of the Sarpai.

"It cannot be denied that the construction of a sluice at the mouth of the Sarpai, constituting as it does a permanent cross-dam, has accelerated the deposit of silt in the channel of the Bagda below it, and that too to such an extent as materially to reduce its discharging power. The silting up of the Bagda was, however, stated by Mr. Levinge, before the canalization of the Sarpai, to be only a question of time, and would have occurred apart from that canalization, owing to the causes described in the preceding paragraphs (I and II), had no remedy for them been applied."

As a further remedial measure they proposed to utilise the Balliaghye branch canal as a drain for the country formerly drained by this portion of the Bagda. This, it was stated, will involve a flood enbankment on the right side of the canal, and cutting of an outlet into the Bagda above the Sarpai sluice, and, it is supposed, will cost about Rs. 1,20,000. The work has now been partly executed, and even in its unfinished state has had the most marked success, having the effect of stopping the silting up of the Rasulpore river, and, perhaps, of slightly diminishing the effect of former silting, but unfortunately it appears to be doubtful whether this improvement will be permanent.

6. The Committee do not attribute great comparative importance to the obstruction to drainage caused by the Hidgellee Tidal Canal, as to which they remark as follows:—

"We visited, as already stated, certain places where it had been represented that the natural drainage had been obstructed by the Hidgellee Canal. We found that the old khals or drainage channels had been blocked at these places, but it was stated that sufficient waterway had been provided by the diversion of the old drainage into new channels which had been made by the Public Works Department. We observed, however, on the spot that

number of holidays according to the custom of the port at 12, while the number of public holidays may be 22, or any other number notified by Government under the Act. Moreover, it has been stated that a reduction in the number of continuous Doorga Poojah public holidays will sufficiently meet the contention of the Chamber, which is not so much against the total number of holidays in the year as against the obstruction to business occasioned by the occurrence of 12 public holidays in succession. Although objection has been taken to the continuous character of the Christmas holidays which, now when Sundays are included, usually amount to five days in succession, it has not been pressed home with the same persistence as the objection to the Doorga Poojah holidays, which are at present also continuous and are more than twice as long in duration. It is only in regard to the Doorga Poojahs, therefore, that the Lieutenant-Governor is disposed at present to consent to any reduction in the number of public holidays under the Act. The other public holidays might remain unchanged for the present. It is desired by the Chamber that if any change is made it should take effect from the year 1890, and the Lieutenant-Governor proposes to take action as he may be advised in this respect.

28. I am to sum up this letter as follows:—

It is proposed to notify holidays in Bengal under two separate notifications: first, in regard to public holidays notified as such under the Negotiable Instruments Act; and, secondly, in regard to holidays which are notified as such by the closure of public offices. These two separate notifications would be in the form given, and apply to the days specified in the draft notifications annexed.

In addition to any remarks on the general question which may be offered, the Lieutenant-Governor desires to be favoured with an opinion on the following points:—

(1)—Whether the effect of the publication of these notifications will be to make a clear distinction between public holidays under the Negotiable Instruments Act and those notified by executive order only, in so far that the Exchange Banks will remain closed on the "public holidays" only, and not on the other days.

(2)—Whether the effect of the publication of these notifications will wholly or partially meet the growing requirements of trade and commerce.

(3)—Whether the effect of the publication of these notifications will be to inflict serious hardship on a considerable section of the community by depriving them of holidays which they now enjoy.

(4)—Whether the proposals now made are accepted by the Chamber / your Association as a reasonable present compromise between interests which admittedly conflict with one another.

29. The third question, as to the effect on the general community of notifying the non-compulsory days of the Doorga Poojah as holidays by executive action instead of under the Negotiable Instruments Act, is the most important, and that to which your attention is specially invited. The Lieutenant-Governor would in no case make a change without the previous sanction of the Government of India, and he desires to lay the question before His Excellency in Council with the fullest light that previous enquiry can throw upon it.

30. In conclusion, I am to say that the Lieutenant-Governor will be glad to obtain an answer to this letter at the Chamber's / Association's early convenience.

ANNEXURE.

DRAFT NOTIFICATION.

The 1890.—Under section 25 of Act XXVI of 1881, entitled "The Negotiable Instruments Act, 1881," the Lieutenant-Governor hereby declares the following days to be public holidays during the year 1890 :—

25th January	...	Sripanchami.
6th March	...	Dolejatra.
5th April	...	Easter Saturday.
12th ,,	...	Chaitsankranti.
24th May	...	Empress' Birthday.
29th ,,	...	Dashahara.
7th August	...	Janmashtami.
13th October	...	Mahalaya.
20th, 21st and 22nd, 27th and 28th October	...	Doorga and Lukhi Poojahs.
11th and 12th November	...	Kali Poojah.
20th and 21st ,,	...	Jagadhatri Poojah.
24th, 26th and 27th December	...	The day preceding and two days following Christmas Day.

Sundays, New Year's Day, Good Friday, and Christmas Day are public holidays under the Act.

Offg Secy. to the Govt. of Bengal.

DRAFT NOTIFICATION.

The 1890.—With reference to the above notification, the Lieutenant-Governor hereby notifies that on the following days during 1890, which are not declared to be "public holidays," the offices under the Government of Bengal, and all Revenue and Magisterial Courts in Bengal, with the exception of the offices of Collector of Customs, Shipping Master, the Registrar of Assurances, Calcutta, the Collector of Stamp Revenue, Calcutta, the Stamping Department of the Office of the Superintendent of Stamps, Calcutta, and the Salt Rowannah and Opium Sale Departments of the Board of Revenue, shall be closed :—

I.—MAHOMEDAN HOLIDAYS.

Eed-ul-fitr, which falls on the 21st May, or, if the moon be not visible on the 20th May, on the 22nd May.

Eed-ul-zoha, which falls on the 28th July, or, if the moon be not visible on the 18th July, on the 29th July

Mohurrum, the last two days of which fall on the 26th and 27th August, or, if the moon be visible on the 16th August, on the 25th and 26th August.

Fatiah-doaz-dahum, which falls on the 27th October, or, if the moon be not visible on the 15th October, on the 28th October.

II.—HINDU HOLIDAYS.

Doorga Poojah, the 18th, 23rd, 24th and 25th October; Lukhi Poojah, the 29th October.

Offg. Secy. to the Govt. of Bengal.

Indian Association.

No. $\frac{8}{107}$, dated Calcutta, the 30th January 1890.

From—Lieut. E. W. Petley, R.N., Port Officer and Shipping Master, Calcutta,
To—The Under-Secretary to the Government of Bengal, Financial Department.

I have the honour to acknowledge the receipt of your letter No. Mis. $\frac{1\text{-H}}{1}$ 35, dated the 20th instant, and annexure, calling for the opinion of this office in respect of certain proposals relating to the public holidays in Bengal, and in reply to state that it appears to me that the proposal contained in paragraph 29 of the letter of the Government of Bengal, Nos. Mis. $\frac{1\text{-H}}{1}$ 18-22 of the 19th idem, will meet the requirements of the mercantile community as represented by the Chamber of Commerce and the Trades Association; but I fear the publication of the proposed double notification will cause hardship to the Government employés who will be deprived of their holidays. My reason for such opinion is based on the following grounds:—

In the six departments and offices which the notification will affect, the bulk of their establishments is composed of Hindus, who usually take this opportunity of visiting their country homes during the Doorga Pooja vacation. These homes, I understand, are mostly ancestral properties, where the social system of the Hindus, being of a patriarchal type, all the relatives, close and distant, of the holders of these properties meet from the different parts of India, and this deprivation of intercourse between relatives, &c., is the hardship which will chiefly be felt, and which concession in the way of leave, &c., at other times, when families are again separated, will hardly satisfy.

No. 75, dated Calcutta, the 3rd February 1890.

From—Baboo Pratapa Chandra Ghosha, Registrar of Calcutta,
To—The Secretary to the Government of Bengal, Financial Department.

I have the honour to acknowledge the receipt of your letter No. $\frac{1\text{-H}}{1}$ 34Mis., dated the 20th ultimo, forwarding copy of letter No. $\frac{1\text{-H}}{1}$ 18-22Mis. of the Financial Department, with its annexure of draft notification regarding the holidays to be observed in public offices, for opinion and report.

1. In reply, I beg to submit my views on the point indicated in paragraph 29 of your letter *seriatim*.

(1) The publication of the notification, draft of which has been annexed to the letter under reply, will, in my humble opinion, make a clear distinction between public holidays under the Negotiable Instruments Act and those notified by executive order only in so far that the exchange banks will remain closed on the "public holidays" only and not on the other days. The excepted offices will, as a matter of fact, be kept wholly open, and although the benevolent special instructions of the Government direct that, though it is not expedient to close them on the days in question, it is hoped that it will be possible to relieve of their duties on those days any ministerial officers whose religious requirements compel them to apply for leave, the heads of departments as a matter of fact will find great difficulty in extending that privilege, exigencies of the service constraining them to refuse the just claims of the poor clerks who cannot force themselves into the notice of the higher authorities without suffering seriously in return. The Government cannot be unaware that it is as much difficult for poor clerks to make their grievances heard as it is for Government to make the heads of departments carry on their business with a portion of their establishment in attendance.

(2) I believe the effect of the publication of these notifications will wholly meet the growing requirements of trade and commerce. It is not for me to remark that whether the mercantile community have proved that they have any real complaint to make. The Negotiable Instruments Act was passed in 1881. And in 1888 and 1889 the Government has been pleased to negative the Chamber's representations because the inconvenience and loss which the mercantile community suffer from the existing state of things, great and serious as they are, cannot be remedied without inflicting a still more serious hardship on a far more numerous though less influential portion of the community. With-

in this short interval, forgive me if I say no new circumstance has intervened as to justify the reversal of the most noble, wise, and statesman-like ruling the Bengal Government issued in 1889, *i.e.* last year. In my humble opinion, further enquiries are necessary to ascertain the exact nature of the loss complained of by the mercantile community. The inconvenience arising from the closure of the exchange bank may easily be removed without the direct interference of Government; for, as the constituents of these banks are members of the mercantile community, they may be kept open or close at their pleasure.

(3). I cannot help confessing that the publication of these notifications will not only inflict serious hardship on a considerable section of the community by depriving them of holidays which they now enjoy, but will extend its evil effects not only to the Hindoo community at large but to all classes of population in Calcutta. In these days, when the demonstrative feeling of the community is in its highest tension, a curtailment as indicated by the notification is likely to wake up invidious distinction in the minds of the Hindoo community especially, for within the last couple of years, while the Government has recognised the propriety of closing offices on days of Mahomedan festivals, a backward movement has been evinced in the case of the Hindoo community by the deprivation of the privileges which the latter have been enjoying ever since the British flag was unfurled from the towers of Fort William. For nearly two centuries the Government has not thought it proper to recognise the rights of the Mahomedan community of Calcutta, and the good which the extension of the privileges to that section of the community by closing public offices on Mahomedan festivals is calculated to secure will, I am constrained to admit, be greatly counterbalanced by the unpleasantness which the contemplated curtailment will create in the minds of the Hindoo community. I need not add that such a curtailment will, in addition to the unpleasantness mentioned above, materially injure and inconvenience the public non-trading community generally.

2. The question of the number of public holidays in the Bengal Province has been the subject of much discussion for upwards of a quarter of a century, and although the mercantile community of Calcutta, represented by the Bengal Chamber of Commerce and the Calcutta Trades' Association, have been urging for the last 30 years the desirability of affording greater facilities to the trade by reducing the number of Hindoo holidays observed in public offices, considerations of privations and difficulties to which the general community as well as the clerks would be subjected have always influenced the patriarchal Government in ruling otherwise. The attitude of the Chamber has, however, become stronger every year, and it may be surmised that some inconvenience and loss are sustained by the mercantile community owing to the long Doorga Poojah vacation which under the Negotiable Instruments Act have become public holidays, and that that loss is princpally due to the closing of the following offices:—

(1) The Office of Collector of Customs.
(2) ,, ,, Shipping Master.
(3) ,, ,, Collector of Stamp Revenue.
(4) ,, ,, the Stamping Department of the Superintendent of Stamps.
(5) ,, ,, the Salt Rowannah and Opium Sale Department of the Board of Revenue.

3. It will be observed that from the list I have excluded the office of the Registrar of Assurances, Calcutta, and my reason for doing so I will have the honour to submit further on. It is not for me to say that the customs and habits of the country of adoption of the mercantile and trading community should bear some weight in determining the question of holidays and balance of convenience, nor am I justified to refer in detail to the accommodations already provided for by keeping open the Customs and the other offices, but I cannot help observing that the period of 12 days already fixed for the Doorga Poojah vacation is the minimum to which it can possibly be reduced.

4. The proposal regarding the curtailment of public holidays, as has been set forth in the Government letter, has to be considered in its two different aspects—firstly, in so far as it will affect the general public by the opening or closure of the public offices generally; and secondly, in so far as it will affect them by the opening or closure of the office of the Registrar of Assurances, Calcutta.

5. As regards the first side of the question I need not repeat the arguments already before the Government, as they had been put forth by abler and more influential members of the community. As a Hindoo officer and having a certain number of Hindoo clerks under me, and having to deal with all classes of Hindoo and mercantile community of Calcutta, I cannot but record that the Doorga Poojah vacation is already too short. I do not know what interested political pundit has induced the Government to believe that the real Doorga Poojah ceremonies occupy only three days. There is not a Hindoo pundit or layman who can say that the real Doorga Poojah does not extend over a period of more than fifteen days. It commences on the ninth day of the waning moon and ends on the tenth day of the waxing fortnight following. It may be said that there are not many families in Calcutta who observe the ceremony for such a long period—that is to say, who observe the *Navamyádi Kalpa*; but the same argument may be urged against the "three days' (correctly five days' ceremony," for, as a matter of fact, there are few families who observe even the same. Properly speaking, the minimum observance of the poojah occupies five days, for it commences on the sixth and ends on the tenth day of the waxing moon. But the Doorga Poojah of the Hindoos of to-day is in one sense more important than the great *Asvamedha* (horse sacrifice) of the Vedic period, inasmuch as the horse sacrifice was observed by the ruling sovereigns only, while the Doorga Poojah (the *Asvamedha* of the Iron age) is observed by all classes of people—nay, it is said in the Shastras that it is to be observed by the *Mlechhas*, Savaras, and all non-Hindoo races; besides, the *Asvamedha* was a free will offering, while the Doorga Poojah to every Hindoo is a compulsory observance and not to observe it is a sin; and although the actual worship may not occupy a longer period, the preparations, the collections of a thousand and one things for the proper performance of the ceremony cannot possibly be made in a short time. Besides, the five days and nights are fully occupied in observing ceremonies both social and religious. On the tenth day, until the idol is placed in the water, many Hindoo families observing fast do not prepare their food, and many a family invite their friends close upon midnight of the tenth day of the moon and feast together. It is unnecessary to repeat that all the arrangements for sending ladies to their fathers' house or bringing them back to their husbands fall on the nine auspicious days of the Doorga Poojah so well known throughout India as the *Navaratri*. And last, though not the least, is the ceremony of the autumnal *Navánna*, a ceremony observed on the income of the new crop, which is pre-eminently directed to be observed in that fortnight of the month of *Asvin* when the Devi is worshipped.

6. As regards the second side of the question, the office of the Registrar of Assurances, Calcutta, is not much resorted to by the mercantile community for any urgent or ephemeral or temporary accommodation of business, for, under the Act, such negotiable instruments have been classed under the optional heads. I have not as yet had an occasion to register a single on demand note, promissory note, hundi, &c., and documents of that nature executed by the mercantile or trading community of Calcutta in course of their business. All such transactions are primarily kept confidential, and the mercantile community loathe to give publicity to such deeds which affect their commercial credit. The only class of deeds for which they resort to this office are of a permanent nature such as leases, mortgages and conveyances, which, under the Act, may be presented any time within four months from the date of execution. Powers of attorney alone of persons abruptly leaving Calcutta not previously arranged may require the Registrar to authenticate during the 12 days' vacation. But the wide distribution of registration offices throughout India and the more liberal provisions of section 33, clause (*b*), have provided for all such contingencies. It will thus be seen that the closing of the office of the Registrar of Assurances, Calcutta, is not likely to inconvenience the mercantile community any way.

7. I beg to append a statement showing the number of registrations effected by merchants and traders and also by the non-trading community of Calcutta during the first 15 days following the expiry of the Doorga Poojah vacation. It will be seen that the table contains statistics of the past 20 years, and the figures in column 3, which show the number of registrations by merchants and traders, fully corroborate the fact that the Calcutta Registry Office is rarely resorted to by the mercantile community of Calcutta during the period which intervenes between the expiry of the 12 days' Doorga Poojah vacation and the re-opening of the Court of Small Causes, Calcutta. I have left out figures for the five years preceding the two decades, as my office records do not show any important transactions by merchants and traders during that period. It will also be seen from the statement that even of the few registrations relating to purely mercantile transactions a good portion were powers of attorney, a class of documents of not an urgent nature, as has already been noticed. Although it is out of place to mention here and in the face of the proposals for curtailment of holidays, I cannot help observing that the office of the Registrar of Assurances, Calcutta, may be kept closed with the Court of Small Causes, Calcutta, without putting the mercantile community of Calcutta to any the least inconvenience and loss.

Statement showing the number of Registrations effected during the first fifteen days following the opening of the office after the Doorga Poojah vacation.

Year.	Number of registrations by persons other than merchants and traders.	Number of registrations by merchants and traders.	Remarks.
1870 ...	90	2	Powers of attorney.
1871 ...	95	2	Ditto.
1872 ...	81	8	Of which two were powers of attorney.
1873 ...	76	5	Ditto one ditto ditto.
1874 ...	75	9	Ditto five ditto ditto.
1875 ...	91	14	Ditto five ditto ditto.
1876 ...	76	13	Ditto seven ditto ditto.
1877 ...	98	8	Ditto four ditto ditto.
1878 ...	85	11	Ditto five ditto ditto.
1879 ...	137	14	Ditto four ditto ditto.
1880 ...	83	9	Ditto two ditto ditto.
1881 ...	98	9	
1882 ...	97	12	Ditto four ditto ditto.
1883 ...	75	7	Ditto four ditto ditto.
1884 ...	119	5	Ditto two ditto ditto.
1885 ...	98	8	Ditto three ditto ditto.
1886 ...	91	8	Ditto one ditto ditto.
1887 ...	97	9	Ditto two ditto ditto.

No. 1328, dated Calcutta, the 4th February 1890.

From—T. T. Allen, Esq., Superintendent and Remembrancer of Legal Affairs,
To—The Secretary to the Government of Bengal, Financial Department.

With reference to your No. 1-1 24 of the 19th ultimo, having consulted with the Advocate-General, I have the honour to say that there appears no legal obstacle in the way to prevent Government from cancelling the notification of public holidays already published, and substituting in its place a new list.

No. 73, dated Calcutta, the 7th February 1890.

From—S. E. J. Clarke, Esq., Secretary, Bengal Chamber of Commerce,
To—The Offg. Secy. to the Government of Bengal, Financial Department.

The Committee of the Chamber of Commerce have perused with great interest the able and clear *resumé* of the holiday question contained in your

letter No. Mis. $\frac{1-H}{1}$ 18 of the 19th January, and they cheerfully acknowledge the admission contained in your paragraph 27 that the holiday arrangements under the "Negotiable Instruments Act" are proportionately more irksome and impose greater restrictions now then they did ten years ago, because the requirements of trade are more urgent now than they were then. This admission recognises the principle for which the Chamber of Commerce has so long contended, and renders it unnecessary for the Committee to follow you in your review of the discussion.

There is, however, a statement in your paragraph 25 which the Committee are glad to see made you say that "all that is expected from Government is to afford reasonable facilities for carrying on business. This is done in the case of Mahomedan holidays, and ought to be done in the case of Hindu social festivals."

The Committee are bound to say that they can see no reason why a distinction should be made in the treatment of Hindu and Mohomedan holidays, and they regard with satisfaction the manner in which His Honour the Lieutenant-Governor has, in your paragraph 26, approached this point.

I am to point out that the Committee of the Chamber of Commerce have taken equal exception to continuous holidays at Christmas with continuous holidays at the Doorga Poojas, and that in my No. 944 of 22nd November last, they suggested that the holidays at Christmas time should be restricted to Christmas Day and the day after—December 25th and 26th. In the notification which accompanied your letter under reply, the Christmas holidays for 1890 are from the 24th to 27th December, both days inclusive; as the 28th December falls on a Sunday, this means that business must close on a Tuesday, a mail day, and remain closed till the following Monday. There is no reason that they can see for making December 24th a holiday, and they would suggest that the draft notification be amended accordingly.

In the Doorga Pooja holidays, they would point out that the notification would close business from Saturday, October 18th, to Thursday, October 23rd, and they would suggest, for the consideration of His Honour the Lieutenant-Governor, that the 23rd October might be transposed with the 22nd in the lists under the "Negotiable Instruments Act" and Hindu holidays respectively.

This brings them to the points set out in your paragraph 29, as those on which Sir Steuart Bayley desires an expression of opinion:—

(1) The Committee are clearly of opinion that the effect of the publication of the notifications suggested will be to make a clear distinction between public holidays under the "Negotiable Instruments Act" and those notified by executive order only.

(2) They are further of opinion that the effect of the publication of the notifications will partially meet the growing requirements of trade and commerce.

(3) They do not consider the effect of the publication of the notifications will be to inflict serious hardship on a considerable section of the community, by depriving them of holidays which they now enjoy.

(4) And lastly, the proposals now made, with the exception suggested as to Christmas, are accepted by the Chamber as a reasonable present compromise between interests which admittedly conflict with one another.

The Committee would suggest that the notifications, amended as they have ventured to suggest, should be published in the *Calcutta Gazette*, and they would be glad to give them, when they appear, the widest circulation possible.

In conclusion, I am to repeat, generally, the request made in my No. 944 of 22nd November, that the Chamber may be permitted an opportunity of considering the holidays the Government may propose to declare under the "Negotiable Instruments Act" before such holidays are published in

the Gazette. This request is made on the grou[nd] that it would considerably assist the Chamber in settling the holidays und[er] Charter Parties and Shipping Orders.

community. That attitu[de]

No. M 1-88, dated Calcutta, the 11th February 1890.

From—The Agent for the Chartered Mercantile Bank of India, London, and China; the Agent for the Chartered Bank of India, Australia, and China; the Manager of the Delhi and London Bank, Limited; the Manager of the Bank of India, Limited; the Agent for the Hongkong and Shanghai Banking Corporation; the Manager of the Agra Bank, Limited; the Manager of the Comptoir National D'Escompte de Paris; the New Oriental Bank Corporation, Limited.

To—The Offg. Secretary to the Government of India, Financial Department.

We, the undersigned, have the honor to acknowledge the receipt of your letter of 19th ultimo, requesting that we should state what we ought to be done in the matter, and to express our opinion on the proposals contained in your letter of same date, so that they can see their way that they can see their way to move the Chamber of Commerce and others. In accordance with this request we have the honor to submit the following remarks.

We believe that with the increase of business, and the manner in which especially owing to keen competition, which has become a necessity with some merchants at this Port, paragraph 26, approached the holidays at Christmas time should be as much as possible. They say that the obstruction to trade at this Port, but more Doorga and Lukhi Poojas would, if the holidays at Christmas time should be as much as possible. ously injurious to them. The Exchange Committee of the Chamber of in my No. 944 of known as the to the same extent as others, and would, if the holidays at Christmas time should be as much as possible. for the benefit both of their European December 25th and 26th. 2 days, be seri- however, for some years recognised that under reply, the Christmas holidays intact have seemed to have some claim on them, both days inclusive. No. 985, dated Calcutta, the 17th February 1890.

From—H. J. S. COTTON, Esq., Offg. Secy. to the Govt. of Bengal, Financial Dept.,
To—The Secretary to the Bengal Chamber of Commerce.

WITH reference to the correspondence ending with your letter No. 73, dated the 7th February 1890, regarding public holidays in Bengal, I am directed to forward the enclosed copy of a letter* from the Agents and Managers of the Exchange Banks in Calcutta on the subject. The Chamber will observe that the Banks are prepared to accept the proposals made in my letter No. $\frac{1\text{-H}}{1}$18, dated the 19th January 1890, provided that the majority of the mercantile community is in favour of them, but they add that "it has not been effectively demonstrated by general vote or otherwise whether reduction of holidays finds favour or disfavour among the majority at the present time."

* Dated 11th February 1890.

2. I am desired to request that the Chamber will be so good as to inform the Lieutenant-Governor whether there is a considerable minority of their members opposed to any change. The Lieutenant-Governor has no doubt that the opinion of the Chamber as a body has been expressed in the letter already received from their Secretary; but, with reference to the observation made by the Exchange Banks, it would be more satisfactory to Government if, with the permission of the President and Committee, it could be stated approximately how far the doubt expressed by the Banks, "whether a majority of the (mercantile) community is in favour of fewer holidays," can be set at rest by reference to the relative number of supporters of either view among the members of the Chamber.

No. 131-90, dated Calcutta, the 26th February 1890.

From—S. E. J. CLARKE, Esq., Secretary, Bengal Chamber of Commerce,
To—The Secretary to the Government of Bengal, Financial Department.

THE Committee of the Chamber of Commerce desire me to reply to your No. 985, dated 17th February, in which you state, as a deduction from a remark occurring in a letter dated the 11th of February on the subject of holidays, addressed to Government by the Agents and Managers of the Exchange Banks in Calcutta, that it would be more satisfactory to Government if it could be stated approximately, by a reference to the relative number of supporters of either view among the members of the Chamber, "whether a majority of the (mercantile) community is in favour of fewer holidays."

This appears to be an invitation to the Committeee to take a vote of the Chamber on the question whether they do, or do not, represent the views of those by whom they were elected.

As regards the remark of the Exchange Banks, I am to say that the Government will attach to it no doubt just so much weight as it deserves. But the doubt expressed by the Banks had never, until you favoured the Committee with a copy of their letter, been expressed to the Committee. The representatives of five Banks met the Committee on 5th September last in conference on the subject of holidays. Further, on 27th December, and again on 24th of January, a representative of the Exchange Banks attended meetings of the Committee. But on neither of these three occasions was the question raised which you have now brought to notice. The Exchange Banks, I am to say, have not sent in to the Chamber a copy of their letter of the 11th of February.

It is known to His Honour the Lieutenant-Governor that the Committee of the Chamber is now in a special manner, as compared with what formerly obtained, representative.

As to the attitude of the Chamber on this holiday question, I am to point out that the first step taken by the Committee was in obedience to a mandate of a general meeting held on the 11th December 1860, and that during the intervening period of more than 29 years the attitude of all the previous Committees in office has been consistent, has been supported by the Chamber, and has never, until now, been questioned as representing the wishes of the mercantile community. That attitude can to-day be correctly expressed in the

following extract from a letter addressed by the Chamber to the Government of Bengal so far back as 27th of November 1878:—

"The Committee do not undervalue the convenience attending the entry and clearance of vessels during the holidays, and the partial importation and exportation of merchandise on passes obtained in anticipation of the holidays; but these operations are after all only a fraction of the general business of the port, which is practically prevented from being carried on during that long interval: for while the Bank of Bengal and the other banking establishments are compulsorily closed, a general suspension of business, for a period longer than takes place in any other port in the world, is inevitable, and the inconveniences resulting from such a system are of such grave concern to the commercial community that their interests urgently call for a material amendment of the recognition which these holidays receive from Government."

Reviewing the whole history of this controversy, and their own position in relation to it, the Committee can see no reason for complying with the suggestion you seem to have put forward, that they should take a vote of the Chamber and must accordingly decline to take any such action.

No. 173, dated Calcutta, the 7th March 1890.

Demi-official from—S. E. J. CLARKE, Esq., Secretary to the Bengal Chamber of Commerce,

To—The Secretary to the Government of Bengal, Financial Department.

THE Committee of the Chamber of Commerce, although unable to comply with the suggestion of Government that a formal vote of the Chamber should be taken on the question whether the views as to holidays under the Negotiable Instruments Act, advocated by the Committee, were the views of the majority of the Chamber, yet agreed with the late President, the Hon'ble Sir Alexander Wilson, to take advantage of the opportunity afforded by the Annual Ordinary General Meeting to remove the matter beyond doubt. Sir Alexander Wilson, therefore, referred to this phase of the holiday question in his address, and in the course of the proceedings called for an informal vote on the point as an expression of the Chamber's opinion. The result was an unanimous confirmation of the views expressed by the Committee.

I enclose for your information a list of those present.

BENGAL CHAMBER OF COMMERCE.

28*th February* 1890.

ANNUAL ORDINARY GENERAL MEETING.

The following gentlemen were present:—

Dated Calcutta, the 24th February 1890.

From—G. HICKIE, Esq., Secretary, Calcutta Trades Association,
To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to acknowledge the receipt of your letter No. $\frac{1-H}{1}$20, dated 19th January, on the subject of public holidays in the Province of Bengal.

2. The Committee of the Trades Association have noticed with much satisfaction that this matter is again receiving the attention of the Government. From the statement of facts set out in your letter, it is abundantly manifest that the whole question of public holidays is one of great importance to the mercantile and trading community of Calcutta, and the Committee trust that the present consideration of the subject will result in a settlement which will be more satisfactory to all interests

3. The Trades Association, as far back as the year 1875, addressed the Government of Bengal on the injury inflicted on the commerce of the Port by the prolonged suspension of business during the Doorga Pooja vacation, and the arguments then advanced have not lost any of their force. The inconvenience and loss to the business portion of the European community, characterised by the Government itself as "great and vexatious," continue to be felt, and will increase unless the reasonable claims of those who suffer from the existing state of things and earnestly seek a remedy are adequately met.

4. There is another feature of the question which should not be overlooked. Calcutta is the centre of business for the whole of Upper India, and the cessation of business in Calcutta for twelve consecutive days causes very serious loss and inconvenience to the large community outside Lower Bengal who know nothing of the Doorga Pooja holidays and have no sympathy with them.

5. It is gratifying to the Association to learn from your letter that His Honour the Lieutenant-Governor proposes that only those days of the Doorga Poojas "which are devoted to religious ceremonies should be notified as public holidays under the Negotiable Instruments Act." It was precisely on this basis that the Association, in its representation of March 1875, contended that these holidays should alone be maintained, and the Committee feel sure that the justice which marks His Honour's proposal will commend itself to those who regard the question in all its bearings without feeling or prejudice. His Honour has now, it is noticed, expressed his willingness to limit the number of these holidays to five days under the Negotiable Instruments Act, and to allow a similar number of holidays for the Doorga Poojas by executive order, the latter number to be applicable to certain specified offices under the Government of Bengal. It is further proposed to deal with this distinction under two separate notifications, and in connection therewith you desire to be furnished with the opinion of the Association on the following points.

Whether the effect of the publication of these notifications will be to make a clear distinction between public holidays under the Negotiable Instruments Act and those notified by executive order only, in so far that the Exchange Banks will remain closed on the "public holidays" only, and not on the other days.

6. The proposed notifications will, the Committee believe, be sufficient to make a clear distinction between public holidays under the Act and holidays to be given to Government employés by executive order.

7. The Committee are of opinion that the effect of the notifications will be to minimise, in some measure, the inconvenience heretofore experienced; it will, however, be possible only after some experience of the working of the new arrangement to state whether it has met the requirements of trade and commerce to the full extent desired.

Whether the effect of the publication of these notifications will wholly or partially meet the growing requirements of trade and commerce.

8. In regard to this point, the Committee believe that the time has come when the Government may, without inflicting any real hardship upon any portion of the community, assume a firm attitude and grant to the commercial interests in Calcutta the relief so constantly sought in the direction of the curtailment of the long official Doorga Pooja holidays. The question of interference with religious observances may be at once set aside; there is no wish on the part of the European community to interfere with these, but with reference to the social aspect of the question, it may properly be urged that the Hindus themselves, by opening for the most part their places of business even on the close Pooja days, support our arguments for the reduction of the holidays. The Committee believe that, for years to come, the present practice of allowing Hindu employés a long holiday to visit their homes will be continued, with this difference, however, that the holiday will be granted by the employer and not be forced upon him by a social custom backed up by Government orders.

Whether the effect of the publication of these notifications will be to inflict serious hardship on a considerable section of the community by depriving them of holidays which they now enjoy.

9. In regard to the fourth and last question, I am desired to say that the Committee accept the proposals as a reasonable compromise between the several interests, and with the hope that in their actual working they may be found sufficient.

Whether the proposals now made are accepted by your Association as a reasonable present compromise between interests which admittedly conflict with one another.

10. While action is being taken, the Committee are of opinion that it would be well to lay down as a principle, that when a Hindu holiday falls on Sunday, it shall not be necessary to declare as a public holiday the previous or the following day.

In submitting these remarks for the favourable consideration of His Honour the Lieutenant-Governor, I am directed to convey the thanks of the Committee to His Honour for affording them an opportunity of again expressing their views on this question.

No. 206B, dated Calcutta, the 20th March 1890.

From—A. E. STALEY, Esq., Offg Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

I AM directed to acknowledge the receipt of Government order No. $\frac{1-H}{1}$ 23, dated 19th January last, forwarding a copy of a letter addressed to the Chambers and Associations noted in the margin, regarding public holidays in Bengal, and requiring the Board to obtain and submit with their own opinion the opinions of the Collector of Customs, of the Superintendent of Stamps, and of the Collector of Stamp Revenue, Calcutta, on the proposals therein contained.

HON'BLE F. B. PEACOCK.

1. To the Secretary to the Bengal Chamber of Commerce.
2. To the Secretary to the Bengal National Chamber of Commerce.
3. To the Secretary to the Calcutta Trades Association.
4. To the Secretary to the British Indian Association.

To the Secretary to the Indian Association.

2. In reply, I am to state that the officers above referred to were, as desired, consulted on the subject, and an abstract of their opinions is given below for the information of Government.

Collector of Customs, Calcutta.—The only change that the step contemplated would make in the present practice of the Custom House would be the addition of one day to the four days on which it is kept open entirely during the Doorga Pooja holidays.

Provided the other public holidays are left as in the draft notification, there is no reason, as far as the Custom House is concerned, to take exception to the change now proposed.

Superintendent of Stamps, Calcutta.—The Stamping Department of this office consists of one Christian and one Hindu clerk, two pressmen and two coolies. These last are all Mahomedans, and therefore are not affected in any

way so far as their religious observances are concerned by the Doorga Pooja holidays.

If it is eventually deemed expedient to curtail these holidays in the interests of the commerce of the port, there would not be any serious objection to urge so far as this office is concerned. Arrangements might be made by which part of the establishment would be present to do any urgent work, or notice might be given to banks and mercantile firms to get any cheques, &c., they wanted stamped done before the commencement of the holidays. All documents stamped here are printed forms, and it would only be necessary for these parties to lay in a sufficient stock of each kind to carry them over the holidays to allow of the Stamping Department getting the same holidays as other Government servants.

Collector of Stamp Revenue, Calcutta.—As to the supply of stamps by this office, it is to be observed that all firms and men of business, as a rule, provide themselves with a sufficient supply in advance of their ordinary requirements, and particularly against wants during close holidays. The public are also served in this direction by licensed stamp vendors, 70 to 80 of whom have shops in various parts of the town, which are kept open every day, and it is the interest of the vendors to do business even on close holidays.

The number of European, Christian and Mahomedan hands in the office of the Collector is not large enough to admit of the Hindu assistants being relieved during the Hindu holidays; and it is to be borne in mind that the proposal affects not only the officers attached to the Stamp Department, but also those employed in the Treasury and Account Departments, which must necessarily be kept open with the Stamp Department; so that practically almost the entire office will be deprived of a concession which has been long enjoyed and which is highly appreciated for several good reasons.

As regards the effect of the proposed notifications, the Collector feels no hesitation in stating that the proposal, if adopted, would cause serious hardship to a considerable section of the community, and he ventures to state that, so far as this office is concerned, the measure is not needed.

3. As to the Custom House and the office of the Superintendent of Stamps, there need be no difficulty in carrying out the change proposed by Government, nor do the Board think there need be in that of the Collector of Stamp Revenue. There are, it will be seen, means, outside that office, available to the general public to provide themselves during holidays with most, if not all, the stamps they require; and as regards the Doorga Pooja vacation, the Board think it would go far to prevent any inconvenience that might otherwise arise if, some time before the vacation arrived, the Collector were to put a notice in the newspapers asking mercantile firms and others requiring stamps to supply themselves therewith before and not during the holidays, in order that as many of the employés as possible might not be compelled to attend office during the vacation. If this were done, it would not be necessary to have more than one or two clerks present to meet any emergency that might arise. The Collector would no doubt be able to arrange that these clerks should not be Hindus. In this view, the Board see no objection to holidays being notified in Bengal under two separate notifications, as proposed in paragraph 29 of the letter which forms the enclosure of the Government order under reply.

No. 60, dated Calcutta, the 15th March 1890.

From—Baboo Surendronath Banerjee, Honorary Secretary to the Indian Association,

To—The Secretary to the Government of Bengal, Municipal Department.

I am directed by the Committee of the Indian Association to acknowledge the receipt of your letter No. Mis. $\frac{1-H}{1}$22, dated the 19th January 1890, and to observe as follows.

2. The Committee must be permitted to express their regret that the Chamber of Commerce should now seek to reopen the question of the Doorga

Pooja holidays, which was definitely settled after careful consideration by a Committee consisting of such men as Mr. Dampier, Raja Durga Charan Laha, the late Hon'ble Kristo Dass Pal and others; and the views of the Committee received the support of no less an authority than Sir Steuart Bayley, who was then officiating as Lieutenant-Governor of Bengal. "The fact is," remarked Sir Steuart Bayley, "their (those of the mercantile community) interests and those of the Hindu community are on this point not reconcileable, and it is necessary for the Government to decide between the two; and the Lieutenant-Governor does not recommend, for the sake of what would be an inappreciable relief to Commerce, any alteration in the present national holidays of the Hindus." The Committee naturally enquire if anything has happened since then which should lead to the change which the Chamber has so often pressed for. Mr. Cotton states in his letter under reply:—

"The gravamen of the Chamber is, *firstly*, that public business is to a large extent paralysed during these holidays by the closing of the Exchange Banks, which will not undertake the responsibility of transacting business during days upon which negotiable instruments will not mature; and, *secondly*, that the trade of the port is materially affected by the closure of the Shipping Office and the inability to obtain port clearance during these days. It is pointed out that in the interval from 30th September to 10th October 1889, which were declared public holidays under the Act on account of the Doorga and Lakhi Poojas in 1889, the shipping arrivals in the Port of Calcutta showed a gross tonnage of 73,210 and a registered tonnage of 48,179; that the departures showed 63,962 gross and 45,538 registered tonnage; that 29 steamers and two ships arrived in port, and that 19 steamers and 13 ships left the port. The East Indian Railway brought into the market 25,084 tons of goods, and the Eastern Bengal State Railway 4,52,514 maunds, of which 3,63,875 were jute. The fact that all bills maturing in the interval fell due on Saturday, September 28th, is brought to notice as a most serious inconvenience and burden on the trade of the port. In the discussion that took place in 1879, much stress was laid by the native members of the Committee on the fact that the then existing facilities were sufficient. They urged that, though the banks were closed, exchange operations might be and were carried on, and that, as a matter of fact, the banks did take cheques from purchasers of bills during the vacation; and that remittances by telegram or otherwise were not necessarily suspended. The Chamber urge that this is not now the case, and that the banks have felt it unsafe to do any business at all on holidays gazetted under the Negotiable Instruments Act since that Act came into operation, and consequently that the inconvenience to commerce has become intensified."

3 Influenced by these considerations, the Government have suggested a modification of the existing arrangements in connection with these holidays. It is not indeed proposed to curtail the holidays, but they will be provided for in a way somewhat different from what has hitherto been the practice. Only five days, the days of actual religious celebration, will be included as holidays under the Negotiable Instruments Act, and the rest will be declared so by an order of the Government, which would have the effect of placing them on the same footing with the recently created Mahomedan holidays. The Committee must declare their inability to endorse these proposals, and they must enter their respectful but firm protest against any recommendation which would involve any alteration in the existing number of holidays, or the procedure which is now adopted in granting them. The feeling is general that this would be but the beginning of the end, and would mean the eventual curtailment of the holidays. An executive order may vary from year to year, and it involves an element of uncertainty, which would afford each year a further temptation to renewed agitation. Nor is this all. An executive order of the Government of Bengal will not apply to the offices under the Government of India, many of which at the time of the Doorga Poojas are located in Calcutta; whereas a declaration under the Negotiable Instruments Act would have the force of law, and would be binding upon all offices, whether of the local or of the Supreme Government.

4. The most important allegation made by the Chamber, on the strength of which mainly the proposed alteration in the holidays has been recommended, is that "public business to a large extent is paralysed during these holidays by the closing of the Exchange Banks." But the Committee learn that the Exchange Banks are opposed to the curtailment of the holidays and to the changes that have been proposed. If the Committee are correct in their information, then they have no hesitation in saying that the Government would not be justified in making any change in any way in connection with these holidays.

5. There is one other remark which the Committee would desire to make in this connection. In the notification which it is proposed to be issued for the closing of the Government offices, there are some offices named which at the present moment remain closed, but which would be deprived of their holidays if the Government carry out their present proposals; for instance, the office of the Registrar of Assurances now enjoys its annual Doorga Pooja holidays: under the proposed orders it will be deprived of them. The Committee earnestly hope that the Government will continue the present arrangements in connection with the Doorga Pooja holidays. These holidays have a deep hold upon the national mind, and any step which might be construed into an attempt to interfere with them would spread dissatisfaction and alarm throughout the community. The benefit that might be gained, the Committee are convinced, would be inconsiderable compared with the harm that would be done.

Dated Calcutta, the 27th March 1890.

From—BABOO SITANATH ROY, Honorary Secretary to the Bengal National Chamber of Commerce,

To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to acknowledge the receipt of your letters No. $\frac{M\ 1-H}{1}$ 20, dated 16th December 1889, and No. $\frac{M\ 1-H}{1}$ 21, dated 19th January 1890, with their accompaniments. The Committee of the Bengal National Chamber of Commerce have directed me to submit the following for the consideration of His Honour the Lieutenant-Governor.

The Chamber believes that the question raised in the letter of the Government of India, dated the 4th November 1889, of keeping the Currency Office open to some extent during the Doorga Pooja holidays, is one of a most important character, inasmuch as it affects a very numerous portion of Her Majesty's subjects. The question ought not, therefore, to be disposed of without very serious and full consideration in its various aspects.

2. Although the Government of India, in recognition of the views of the Government of Bengal, expressed in Mr. Macaulay's letter (referred to in the above communications), attaches due importance to the necessity of maintaining the liberal principle on which the policy of the Government is based, yet having in view the question of the "inconvenience and loss upon the mercantile community by the entire closure of the Currency Office for 12 consecutive days," offers a solution of this difficulty by proposing to adopt the suggestion of the Head Commissioner of Paper Currency, which it believes "does not necessarily involve a departure" from that principle.

3. The Chamber as composed of merchants and mainly of Hindu members, before expressing its opinion on the particular suggestion, begs to put on record a full exposition of the facts relating to the religious and other aspects of the question, which may help the Government to come to a right conclusion on the subject.

4. The Doorga Pooja is regarded as their greatest festival by the Hindus, specially in Bengal. Its initial ceremony, called *bodhan*, which is regulated according to the practice observed in different families, takes place on different dates previous to the commencement of the image worship days, the longest period from the *bodhan*, including the four days of the Pooja, being 17 days, during which the rituals and Bodhan worship are continuous, as also the various entertainments connected therewith. In former times, therefore, Government in consideration of the above facts and the time required for preliminary

preparation, granted very long holidays, but in later times, in view of the dates on which the Bodhan ceremony was being generally observed and of the improved facilities for travel, the duration of the holidays was reduced to the lowest possible limit, viz. 12 days, inclusive of the Lukshmi Pooja holidays. It may be useful to add that many Hindus specially devote themselves to a very strict religious ritual, called the *Navaratri*, or nine days' fast.

5. During these holidays relatives and friends from different parts of the country meet in the houses of such amongst them as celebrate the Poojas there, or for social reunions at home. Some busy themselves in arranging their private business and domestic affairs, for which they find no leisure during the rest of the year, others enjoy a much-coveted rest or seek to recoup their health in various ways. Thus then, it will be seen that in its religious, social, and humane aspects, the duration of the Doorga Pooja holidays is none too long. It is not also true that the religious holidays are only four. My Committee are not unmindful of the interests of foreign commerce, but they feel that in fixing the number of the Doorga Pooja holidays at twelve, the reduction of those holidays has reached the lowest possible limit.

6. These holidays commence only a day before the latest day for the worship of Bodhan, *i.e.*, the Shastiday, which is indispensably necessary for the preparation of the inaugural ceremony of worshipping the deity; and from that day to the immersion of the image into the river is one consecutive series of devotional days, and the period intervening between the immersion day and the Lukshmi Pooja days is devoted to social and family reunions, which form a part of the religious ceremonies of the Hindus in Bengal.

7. All respectable mercantile firms generally make payments by cheques, which again mostly pass into different accounts in the bank-books, and when cashed at the banks may be converted into coin or notes of all denominations. Whatever small business, therefore, of the mercantile community may be impeded by the Currency Office being closed could be arranged for beforehand, and, as hitherto, without any serious difficulty.

8. Under the above circumstances the Government of Bengal, in Mr. Macaulay's letter above referred to, rightly concurred in the views of the British Indian Association that there was no very great necessity for opening the Currency Office during the holidays, and that a partial opening of it during a portion of the period would be an infringement of the wise policy of the Government.

9. The desirability of a reconsideration of the India Government orders of 1882, based upon the views of the Bengal Government reaffirmed by His Excellency's late decision, rests upon a somewhat exaggerated idea of the inconvenience caused to a portion of the mercantile community.

10. Sir Steuart Bayley, though he allowed that some loss would be caused to the mercantile community by the observance of these holidays in public offices, pointed out that such inconvenience should be subordinated to a much respected popular national custom. As for the public inconvenience, the Chamber is of opinion that the majority of the general public, consisting largely of Hindu merchants themselves, willingly forego work to merge themselves for awhile into the happy domestic life in the country, and thus little or no inconvenience is actually felt by the general public by the entire closure of the Currency Office.

11. My Committee find it difficult to understand why the question of the duration of these holidays should be re-opened once more. It was understood that the Negotiable Instruments Act had settled it once for all, and my Committee respectfully submit that the mere opinion of the Head Commissioner of Paper Currency should not be allowed to have greater weight with the Government than the maturely formed decisions on the subject by successive Viceroys and Governors-General in Council.

12. The Head Commissioner proposes to employ a few non-Hindu clerks in the Exchange Department of the Currency Office; this may be either as additional hands or in place of the Hindu clerks. The Chamber begs to point out that such an arrangement would be introducing a religious test in the public service, which would be contrary to the spirit of the administration and the declared policy of absolute religious tolerance among its subjects by the British

Government. The consideration how far the scheme would harmonise with the arrangements of the Treasury the Chamber cannot undertake to decide now; but with the general knowledge which it has of such arrangements, with the light thrown by the India Government letter itself, it cannot but express an opinion unfavourable to the scheme and to its practicability.

13. The Currency Treasurer, from the very nature of the business that is transacted in the Currency Office, is obliged, to a very great extent, to place implicit confidence in his subordinates. To compel him therefore to accept the services of people not known to him, much less of those in whom he may have no confidence, the Chamber is of opinion, is an unmerited and uncalled for hardship which, with the small amount of deposit which he may reasonably expect from such of his subordinates, may not be mitigated. Besides, in the opinion of the Chamber, the scheme seems to be an infringement of a broad principle.

14. There is yet another objection to keep the Currency Office open even partially during the said holidays. Such opening on the same ground (that is, inconvenience to commerce) must to a certain extent lead to some other offices being kept open, and others would soon follow suit. Thus it is feared that this change is but the thin end of the wedge, which in time must bring about the total abolition of the Doorga Pooja holidays in all public offices, and what is now enjoyed by all the clerks as a right will, if the modification is adopted, be left to the option of the office masters. The question rightly viewed is not one of conflicting interests of the mercantile community and the general public on the one hand and the Hindu clerk on the other, but one of some avoidable inconvenience and perhaps petty loss to a portion of a particular class of merchants, as against the grave religious, social and economic interests of the whole Hindu community, and also as against the declared policy of the Government, and, to a certain extent, against the efficiency of the Government service itself.

15. The Committee beg further to observe they take particular note of the fact that trade is very brisk during the Pooja holidays, the demand for a number of articles being larger during the twelve days than throughout the rest of the year. This may be explained by reason of the large influx of people from all parts of the country bent upon making the most of the holidays. The curtailment of the holidays must necessarily involve a serious pecuniary loss to the trade.

16. With reference to the question raised in your 2nd letter, whether it might not be possible to effect a compromise between interests which admittedly conflict with one another "by restricting the number of the Pooja holidays gazetted under the N. I. Act to five days only, but retaining by executive authority the existing number of holidays for all public offices in Bengal, save the few in Calcutta which are indispensable to the foreign commerce of the port," the Chamber most respectfully beg to observe that such a procedure once sanctioned will ultimately lead to the total abolition of the Doorga Pooja holidays in all offices, especially in Calcutta. For, in the words of Mr. Dampier, the opening of certain offices in Calcutta would govern the practice of all other offices, if not in Bengal, at least at the Presidency, and as such, only those five days gazetted under the N. I. Act would be treated as close holidays, while the other seven days which might be notified as Doorga Pooja holidays under the executive order of the Government would never be observed as such.

17. The Committee of the Chamber apprehend that in time it might be deemed necessary, in the interest of trade, to keep other offices, besides those named in your letter, open, or such a result, they believe, would follow of itself as a necessary consequence, while all the mercantile offices would at once regulate their practice according to that observed in the Government offices.

18. The proposed change would thus necessitate the attendance of all the subordinate officers (Hindus and non-Hindus) even during the days gazetted as holidays under the executive order of the Government. And as Hindus form the bulk, from 90 to 95 per cent. of the total employés or subordinate officers in the several offices in Calcutta, no office can be kept going and in working order, and absolutely no business could be done, unless Hindu employés were made to attend. It will be thus seen that by necessitating the compulsory attendance of all such Hindu employés, the ultimate result would be the extinction of the Pooja holidays, all but the few days which may be gazetted as such

under the N. I. Act, and even of those few days there is absolu tely no guarantee that they will not be required to be sacrificed to the exigencies of the growing trade of this port.

19. Under the circumstances, any curtailment of the allotted number of Pooja holidays now granted under the N. I. Act would not only be a source of serious dissatisfaction to the Hindus in general, whether in Calcutta or in the mofussil, but inflict great hardships upon a very large number of Hindu employés and their families and relatives; while the solution proposed by His Honour the Lieutenant-Governor, though it may satisfy the requirements of the trade of this port, would be regarded as a new departure from the principle of religious neutrality hitherto observed by Government in its relation with the subject races, and as such would give rise to serious heart-burning.

20. There can be no analogy between Hindu and Mahomedan employés, for the Mahomedans form a very infinitesimally small portion of the subordinate officers in the several offices in Calcutta, and thus no harm is done by the Mahomedan religious days being notified as holidays under the executive order of the Government, for the offices during such holidays can very well be kept open without necessitating the attendance of Mahomedan employés.

21. Under the circumstances the Chamber is of opinion that the course proposed by the Bengal Government, by way of solution of conflicting interests, cannot be regarded at all as satisfactory from the Hindu point of view, being all advantageous to the other side. It is true that some inconvenience, and it may be loss, is caused to foreign commerce by the absolute closure of the several Presidency offices for 12 days together, but the same complaint may justly be made not only by the mofussil merchants and traders, but by zemindars alike, on account of the absolute closure of the mofussil Civil Courts and of the Small Cause Court here for a month; but for all that, in a country where the majority of the population are Hindus, and where the Pooja festival has such a strong hold upon them, no one can venture to suggest that the number of Pooja holidays should be curtailed in the mofussil Civil Courts as well.

Dated Calcutta, the 7th April 1890.

From—Raj Kumar Sarvadhikari, Secretary, British Indian Association,
To—The Offg. Secretary to the Government of Bengal, Financial Department.

I have the honour to acknowledge the receipt of your letters noted in the margin* on the question respectively of keeping the Currency Office open to some extent during the Doorga Pooja holidays, and of the number of public holidays to be observed in the Bengal Province under the Negotiable Instruments Act. In reply I am directed by the Committee of the British Indian Association to submit, for the consideration of His Honour the Lieutenant-Governor, the following observations.

* No. Mis. $\frac{1H}{1}$ 21, dated 16th December 1889.

No. Mis. $\frac{1H}{1}$ 21, dated 19th January 1890.

2. It seems unnecessary to the Committee to refer to the history of the question previous to the year 1882. In March of that year the Chamber of Commerce submitted certain representations, to be noticed hereafter, respecting the curtailment of the Doorga Pooja holidays. The Government of Bengal on the 27th July 1882 made the following pertinent remark: "The inconvenience and loss which the mercantile community suffer from the existing state of things, great and serious as they are, cannot be remedied without inflicting a still more serious hardship on a far more numerous, though less influential, portion of the community." The Government of India in September 1882 felt "bound to attach its proper weight to the strong attachment which the Hindu community of Calcutta manifest to these holidays, and to the serious hardship which any curtailment of them would inflict on a large class." The Governor-General in Council accordingly "regretted that the consideration put forward by the Bengal Chamber of Commerce did not appear to him sufficient to justify any modification of the orders passed in January 1880, or the re-opening of a question which had been decided after careful consideration in all its aspects."

3. The principle so deliberately laid down in 1882 has since been reaffirmed in the letter of the Government of India, dated 4th November 1889,

received with your letter of the 16th December last. In suggesting the possibility of making certain arrangements for the conduct of a specified class of business in the Currency Office during a portion of the holidays, the Government of India remark, paragraph 6, that such arrangements do not "necessarily involve a departure from the *principle on which the policy of Government is based.*"

4. The Committee of the Association observe that the Negotiable Instruments Act was passed in 1881. In their representation made to the Government of India in March 1882 the Chamber of Commerce dwelt on the fact "that great and general inconvenience and serious loss are caused by the total closing of the Currency and other Government offices for the whole period of 12 days, and on the possibility of making arrangements by which the employés of Government offices could take leave in relays without stopping the work of the offices. The unqualified decision of the Government on this representation has been already adverted to. It is now only necessary to refer to two circumstances which require particular notice, viz. (1) that the representation was made and the orders of Government were passed some time after the Negotiable Instruments Act had been in operation, and (2) that all that the Chamber asked for was the possibility of making some arrangements for the conduct of business in particular Government offices as against the "*total closing*" thereof.

5. The gravamen of the Chamber's present contention is, 1*st*, that public business is to a large extent paralysed during these holidays by the closing of the Exchange Banks, and 2*nd* that the trade of the port is materially affected by the closure of the Shipping Office and the inability to obtain port clearances.

6. Hitherto the objections raised were based on the inconvenience caused to trade by the continuous closing for 12 days of certain Government offices only. The objection that Exchange Banks will not undertake the responsibility of transacting business during days upon which negotiable instruments will not mature is now raised for the first time, *i.e.*, eight years since the Act has been in operation; at all events the inconvenience could not have been keenly felt. Whatever inconvenience was heretofore entailed upon the mercantile community by the general observance of the Doorga Pooja holidays has been removed to a great extent by the Bank of Bengal and Custom House being kept open during certain days of the period. The interests of Exchange Banks depend altogether on those of commerce; in fact both act upon each other; and if in the interests of trade it is essentially necessary that they should be kept open, at least on the days on which the Bank of Bengal transacts business, it is only natural to suppose that they will be kept open. Perhaps the inconvenience caused by their remaining closed is not great, or is minimised by the Bank of Bengal being kept open. If the Bank of Bengal can transact business, notwithstanding the holidays, in all its departments—Exchange as well as others—it does not appear why other Banks, having large transactions, should find it unsafe to do any business at all on certain days among the holidays gazetted under the Act. In this they will be particularly helped if arrangements can be made in the way suggested by the Government of India for the transaction of business in the Government Currency Office.

7. The second objection now raised by the Chamber is as respects the closing of the Shipping Office during the holidays. The objection is of the nature of that raised against the total closing of the Currency Office. Both will be noticed further on.

8. The general question now under discussion under the orders of His Honour the Lieutenant-Governor is whether it would not serve all interests to notify only four of the Doorga Pooja holidays under the Negotiable Instruments Act, and to notify the rest as holidays except in certain offices in Calcutta, which will be kept open for all these days to meet the exigencies of commerce. If the words of Mr. Dampier, quoted in your letter, do not fully apply, "if the opening of these offices would not necessarily govern the practice of all or nearly all the other offices in Bengal," it would, my Committee fear, govern the practice of all or nearly all the offices in the Presidency, imperial as well as provincial. The Mahomedan holidays notified by executive order are, so far as the Committee are aware, scarcely observed in the offices in Calcutta, and the opening of these on the Mahomedan holidays scarcely causes any inconvenience, for the number of Mahomedan employés is very insignificant, and such employés

can always obtain leave without detriment to the work of the offices concerned. Hindu employés naturally form the majority—a very large majority—in the Presidency offices, and the result of the notifications proposed to be issued will be, the Committee anticipate, the compulsory attendance of Hindu employés not only in the excepted offices, but in all or nearly all other offices in Calcutta eight days out of the twelve. This means that the interests of commerce should be entirely subserved, while a large though less influential portion of the Hindu community of Calcutta, admitted to be strongly attached to this national holiday, will be subjected to serious hardship. Such a result, the Committee are distinctly of opinion, would be subversive of the principle on which the policy of Government is based. That principle, the Committee repeat, is the prevention of hardship to the Hindu community of Calcutta even at the risk of some inconvenience and loss to the mercantile community. The Government of Bengal on the 27th July 1882 observed :—"It is true that it was proposed last year to require only a very small section of the establishment to attend for a part of two days; but it is justly urged that the principle on which the policy of Government is based would none the less be unnecessarily infringed." The proposed notifications would not the less, the Committee venture to hold, cause an infringement of the principle deliberately accepted by Government, and the Committee earnestly trust that His Honour the Lieutenant-Governor will be as careful to maintain it as the Government of 1882 was.

9. That in the abstract all questions of leave between employer and employés are purely private, and the Government, which has no State religion of its own, can claim no right on principle to legislate about holidays. As a matter of fact leave on holidays is granted as a matter of favour, and this favour is regulated by consideration of a wider kind than what is indicated by the abstract right. It is well known and admitted that if all holidays be stopped work would not be necessarily stopped, but that certain sections of the community would be grievously hurt, and it is to avoid this injury to the feelings of the community that leave is allowed on broad statesmanlike principles, and not with an eye to the smallest leave possible in the case of certain departments, as in the Navy, where leave for the observance of the Sabbath is not granted. But in questions concerning general leave, such facts are never taken into account. Similarly, in considering the question of Banking and Shipping Offices, we should not think proper to alter or affect the general law. Special conveniences may be secured for particular sections of the community, and that most readily by departmental orders, and not by changing the law. It is undeniable that a general denial of leave on particular holidays would be more desirable to some persons than departmental orders, but in a mixed community our merchants should be satisfied with the principle of mutual toleration, and not insist upon their dues at the sacrifice of those who do not belong to their profession. With the Currency Office in a position to encash Council Drafts during some of the holidays, the Exchange Banks will, it is supposed, find it safe to work, and with the Shipping Office similarly open at stated intervals along with the Custom House, there could be no impediment to port entries and port clearances being effected. Inconveniences now felt are likely to be removed to a great extent if these measures are adopted while holidays are kept intact; and to this extent the Committee of the Association give their assent.

Dated Calcutta, the 4th November 1889.

From—Pundit Mohesh Chunder Nyaratna,
To—The Secretary, Bengal Chamber of Commerce.

In reply to your letter of the 30th ultimo, No. 884-89, I enclose herewith, in a tabular form, a list of Hindu holidays for the year 1890. I may add that in drawing up the list I have consulted the learned Professors of the Sanskrit College. The Hindu holidays are mostly festivals connected with religion in which worship or ceremonies with a religious sanction are indissolubly associated with festivities. It sometimes happens that a day of worship, with or without festivity, is followed by a day of festivity with no worship, but with only certain observances with a religious sanction. A few of the holidays are

days of fasting followed by no fasting. In my list I have included no day in which there is no worship, with or without festivity, or ceremony with religious sanction, with or without festivity.

A list of Hindu holidays for the year 1890.

Holidays.	Months and dates.	Days of the week.	Remarks.
Saraswati Puja ...	25th and 26th January ...	Saturday and Sunday	This is a festival observed by all Hindus, except those belonging to the lowest castes.
Siva Ratri ...	17th and 18th February ...	Monday and Tuesday	The first day is a day of fast. The fast is kept by only a few.
Dol Jatra or Holi ...	5th and 6th March ...	.....	There are two days of worship on this occasion. This is a very popular festival with Hindustanees, but not so with Bengalees.
Basanti Puja ...	26th to 30th March ...	.....	These are festivals observed by only a few people.
Annapurna Puja ...	28th March	.....	
Ram Navami ...	29th ,, ...	.....	This is a moderately popular festival.
Chaitra Sankranti ...	12th April	Saturday	This is a holiday observed by all orthodox Hindus of good caste.
Dasahara ...	29th May	Thursday ...	This is a bathing festival and is universally observed. The time of the day for bathing is every year not the same. It may be any hour of the day.
Suan Jatra ...	3rd June	Thursday ...	This is not a general festival.
Rutha Jatra ...	19th ,, ...	Thursday ...	Not an important festival.
Punor Jatra ...	27th ,, ...	Friday	Ditto ditto.
Janmashtami ...	7th and 8th August ...	Thursday and Friday...	An important holiday.
Mahalaya ...	13th October	Monday	A day for offerings to the names of ancestors, observed by all orthodox Hindus of good caste.
Durga Puja ...	19th to 23rd October ...	Sunday to Thursday...	A most important festival.
Lakshmi Puja ...	27th and 28th October ...	Monday and Tuesday	A moderately popular festival.
Kali Puja ...	11th and 12th November...	Tuesday and Wednesday.	An important festival.
Bhratri Dwitya ...	14th November ...	Friday	At this festival sisters entertain brothers. A general and most important festival, though the worship connected therewith has now for the most part been dispensed with. Ceremonies with a religious sanction are, however, observed.
Kartick Puja ...	14th and 15th November...	Friday and Saturday ..	A moderately popular festival.
Jagat Dhatri Puja ...	20th and 21st ditto ...	Thursday and Friday	An important festival.
Rassa ...	25th and 26th ditto ...	Tuesday and Wednesday.	A festival observed by a few, 25th according to Saktas and 26th according to Vaishnavas.

Mohesh Chunder Nyaratna.

Dated Calcutta, the 14th November 1889.

Demi-official from—Pundit Mohesh Chunder Nyaratna,
To—The Secretary to the Bengal Chamber of Commerce.

In reply to your letter of the 12th instant, No. 914—89, I beg to say that the Doorga Pooja in 1890 will really commence on the 19th October. On this day the worship is to consist of *Bodhana* and *Amantrana*, *i.e.*, of rites for awakening the *Devi* from her sleep, the season being one for sleep to the gods and goddesses according to Hindu belief, and for invitation to her. This ceremony takes place at dusk, and is performed by the priest, and, in the case of Brahmans, sometimes by the head of the family assisted by the priest. The

regular pooja with festivities commences on the morning of the 20th October, and continues to the 22nd. On the 23rd there is to be *Bisarjana* ceremony, *i.e.*, the parting ceremony with the *Devi*. This ceremony, like that of awakening and inviting, is performed by the priest in the morning. There is, however, the ceremony of throwing the idol into rivers or tanks in the afternoon, with attendant processions, and the exchange of greetings among relatives and friends in the evening. The strictly worship days for others besides priests in 1890 will thus be the 20th, the 21st, and 22nd October. The strictly worship day for the Lukhi Pooja will be the 27th October.

In conclusion, I think it proper to observe that among the people the festivities, &c., attendant on poojas are matters of greater interest than the poojas (strictly religious worship) themselves. From this point of view, I consider the day immediately following the three days of regular pooja on the Doorga Pooja occasion a necessary part of the period of the pooja. From the same point of view, I consider that the day following the day of worship on the occasion of Kali Pooja, instead of the pooja day itself, should be holiday when only a day's holiday is given on this occasion. The pooja takes place at night, and the attendant festivities and processions take place for the most part the following day.

The enclosure of your letter is returned herewith.

AGRICULTURAL CONGRESS TO BE HELD AT VIENNA IN OCTOBER NEXT.

The 9th July, 1890.—The following papers are published for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secy. to the Govt. of Bengal.

Circular No. 5—5-9M&Ex., dated Simla, the 2nd July 1890.

From—J. W. P. MUIR-MACKENZIE, ESQ., C.S., Under-Secy. to the Govt. of India, Revenue and Agricultural Department,

To—The Secretary to the Government of Bengal.

IN continuation of circular No. 3—5-7 dated the 15th May last, I am directed to forward, for the information of His Honour the Lieutenant-Governor, copy of a further letter received from the Imperial and Royal Austro-Hungarian Consul-General, Bombay, on the subject of the Agricultural Congress to be held at Vienna in October next.

No. 561, dated Bombay, the 9th June 1890.

From—F. STOCKINGER, ESQ., Imperial and Royal Austro-Hungarian Consul General,

To—The Secretary to the Government of India, Foreign Department.

REFERRING to my letter, dated the 31st March, No. 311, I have the honour to inform you that, according to a letter recently received from the Imperial Royal Agricultural Society in Vienna, the languages of the debates at the Agricultural Congress to be held in October next will be the German, English and French, not German and French only, as previously stated.

Only papers that may be presented to the Congress have to be written in German or French.

His Excellency the Austrian Minister for Agriculture very much hopes that he will be able to welcome members, official or non-official, from a country of such vast importance in agriculture as India.

I may also mention that the Austro-Hungarian Lloyd's Steam Navigation Company has granted a reduction of 50 per cent. on their ordinary fares for delegates to the Vienna Congress, and similar reductions have been made by the principal railway lines in Austria and Hungary.

DISTRICT ROAD FUND.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

ROAD CESS.

No. 2422R.C.

Dated Calcutta, the 11th July 1890.

READ—

Letter from the Accountant-General, Bengal, No. 135L.F., dated 2nd July 1890, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st March 1890.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the 4th quarter of the year 1889-90 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to the Commissioners of the Rajshahye, Bhagulpore, Chittagong, and Chota Nagpore Divisions, to the Superintending Engineers of the Eastern and Western Circles, and to the Financial Department of this Government for information.

By order of the Lieutenant-Governor of Bengal,

W. B. BESTIC,

Under-Secretary to the Govt. of Bengal.

DISTRIC

E. T. ATKINSON,
Accountant-General, Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 12th July, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
BURDWAN DIVN. 1	Burdwan July 12, '90	6·14	Weather—rainy. Transplantation of paddy going on. Prospects of sugarcane good. Prices of common rice:— Srs. Burdwan ... ... 17 Culna ... ... 13 Ranigunge ... ... 16 } per rupee.
	Culna ...	2·24	
	Ranigunge ...	4·77	
2	Bankoora „ 12, '90	3·75	Weather—rainy with sunshine at close of week. Transplanting of *amun* rice going on. Standing crops thriving. It is reported that the late high flood in the Damooda has caused some damage to sugarcane in the northern part of thana Sonamookhi. Common rice sells at 18 seers per rupee at Sudder and 17½ seers at Bishenpore.
3	Birbhum „ 12, '90	9·01	Unusually heavy rain throughout the southern area of the district. Elsewhere good rain. Cultivation going on actively. Transplanting has begun. Prospects very good so far. Price of common rice still 16 to 20 seers per rupee.
	Rampore Haut ...	3·63	
4	Midnapur „ 12, '90	1·42	Rain fell on most days. Paddy cultivation progressing well. Dry weather now would be good for indigo. Prices of common rice:— Srs. Ch. Sudder ... ... 15 0 Contai ... ... 19 0 Tumlook ... ... 14 8 Ghatal ... ... 15 3½ } per rupee.
5	Hooghly „ 12, '90	1·40	Weather—fair with light showers. All crops doing well. Prices of common rice:— Srs. Sudder ... ... 13½ Serampore ... ... 16 Jehanabad ... ... 16 } per rupee.
	Serampore ...	1·49	
	Jehanabad ...	1·95	
	Howrah „ 12, '90	4·68	Weather—showery. Paddy crops and sugarcane doing well. Transplanting of *amun* going on. Some damage to jute crop reported from the Uluberia subdivision. Price of coarse rice 14 to 15 seers per rupee.
	Uluberia ...	1·73	
	Central Districts.		
PRESIDENCY DIVN. 6	24-Perghs. July 12, '90	6·35	Weather—seasonable. Transplantation of *amun* going on. Prospects fair. Price of rice stationary.
7	Nuddea „ 12, '90	1·96	Weather—seasonable. Prospects of crops on the ground promising. Flood water has receded a little in the Kushtea subdivision.
	Kushtea ...	3·01	
	Meherpore ...	2·43	
	Chuadanga ...	4·60	
	Ranaghat ...	2·45	
8	Khoolna „ 12, '90	3·93	Weather—rainy. Prospects of all crops continue good. Some slight injury appears to have been caused in the Sudder on account of excessive rainfall.
	Bagirhat ...	2·60	
	Satkhira ...	1·22	
9	Jessore „ 12, '90	2·84	Weather—cloudy and rainy. State and prospects of standing crops generally good, but some damage to paddy crops sown late on the low lands is apprehended in the Jhenidah and Narail subdivisions.
	Jhenidah ...	6·02	
	Magura ...	2·91	
	Narail ...	1·48	
	Bongong ...	1 3	
10	Moorshedabad „ 12, '90	2·88	Weather—seasonable. *Aus* and *amun* doing well. *Aus* is being weeded and *amun* transplanted.
RAJSHAHYE DIVN. 11	Dinagepur „ 12, '90	4·91	Weather—fairly cool with heavy showers nearly every day. Transplantation of *haimanti* paddy going on. Outturn of *bhadoi* rice and jute may now be estimated at 18 annas each. Price of rice as before.
	Thakurgaon ...	2·35	
12	Rajshahye „ 12, '90	6·45	Weather—rainy and clouds gathering. Reaping of jute going on. Condition of standing crops (sugarcane, *bhadoi*, &c.) good. Transplanting of winter paddy (*amun*) commenced in Borind, and sowing going on elsewhere. More rain wanted in Borind.
	Nattore ...	3·61	
	Nowgong ...	2·33	
13	Rungpur „ 12, '90	1·28	A break in the rains. Temperature high, but the effect is modified by cool easterly winds. Transplantation of *amun* rice proceeding. *Aus* harvest drawing to a close with excellent results. Much damage has been done by floods in the Brahmaputra churs owing to the sudden rise of that river.
	Kurigram ...	1·32	
	Gaibanda ...	1·85	
	Nilphamari ...	4·23	
14	Bogra „ 12, '90	1·84	Weather—seasonable. Jute is being cut and steeped in some places. The crop is likely to be a bumper one. The harvest of *aus* rice has begun, with good outturn. The transplantation of *amun* is going on. Common rice is selling at 18 seers per rupee.
	Sherpur ...	2·27	
	Nowkhilla ...	2·21	
15	Pubna „ 12, '90	2·33	Weather—cloudy and rainy. Jute, *amun*, and *aus* doing well. Jute and *aus* are being harvested at Serajgunge. Prices slightly lower.
16	Darjeeling „ 12, '90	17·11	Weather—rainy with occasional breaks in the hills. Too much rain in the Terai. The excessive rain in the Terai is likely to injure the jute and *bhadoi* crops. *Bhutta*, *bhadoi*, *marua*, and *haimanti* progressing well. Potatoes being harvested in some places in the hills. Prospects good.
17	Julpigoree „ 12, '90	11·30	Weather—cloudy and sultry. *Bhadoi* paddy and jute growing well. In some of the thanas the condition of these crops is bad owing to heavy rain. Prices stationary.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts.		
Dacca Divn.	18	Dacca ...	.....	Report not received.
	19	Furreedpur July 12, '90	0·95	Weather—seasonable. Some portions of thanas Furreedpur and Ainpur have been overflooded and some damage done to the crops. Elsewhere prospects are favourable. Price of rice stationary.
	20	Backergunge „ 12, '90	3·16	Weather—seasonable. Prospects of *aus* crop fair, but the *amun* seedlings have been injured in some places by the sudden rise of water. Common rice selling at about 13 seers per rupee.
	21	Mymensingh „ 12, '90	4·41	Weather—seasonable. Rain falls every day. Prospects of standing crops very good. Harvesting of *aus* rice has commenced. *Amun* rice is being transplanted. Common rice sells at 13½ seers per rupee.
Chittagong Divn.	22	Chittagong „ 12, '90	17·59	Weather—seasonable. *Pania aus* being harvested. Common rice selling at 17 seers per rupee.
	23	Noakholly „ 12, '90	5·46	Weather—seasonable. State of *aus* crop good. Sowing of *amun* progressing. Price of rice stationary.
	24	Tipperah „ 12, '90	4·59	Weather—cloudy, cool and damp. *Amun* and jute thriving. *Aus* being harvested. Prospects favourable. Prices stationary.
	25	Chittagong Hill Tracts. „ 11, '90	4·13	Showers daily. Strong south-west wind throughout the week. *Jum* paddy and cotton plants progressing. Lands are being ploughed for late rice crop. Common rice is being sold at 11 seers 6¾ chittacks per rupee.
		Hill Tipperah „ 11, '90	1·73	Weather—rainy and cool. Harvesting of *aus* paddy continues. Transplanting of *amun* going on. Prospects of jute favourable. Common rice selling at 15 seers per rupee.
BEHAR.				
Patna Divn.	26	Patna „ 12, '90	2·81	Weather—hot. Alternate rain and sunshine during the week. Sowing of paddy and *bhadoi* crops still going on. *Makai*, *kauni*, and paddy previously sown are growing well. Prices of food-grains slightly rising.
		Dinapore ...	1·45	
	27	Gya „ 12, '90	10·06	Weather—hot and cloudy. Transplanting of *marua* and sowing of *makai* and paddy going on. Sugarcane doing well. Sufficient rain for *bhadoi*. Prices of food-grains stationary.
	28	Shahabad „ 12, '90	5·94	Weather—cloudy and rainy with occasional breaks. Sowing of *bhadoi* and transplanting of paddy in progress. Sugarcane doing well. Prospects hopeful.
		Buxar ...	1·04	
		Bhabuah ...	1·70	
		Sasseram ...	1·34	
	29	Durbhunga „ 12, '90	4·91	Weather—cloudy and rainy. Prospects of *bhadoi* very favourable. Transplanting of *marua* is rapidly progressing. Paddy seedlings doing well. Indigo manufacture in progress. Price of common rice varies from 14 to 15½ seers per rupee.
		Madhubani ...	2·23	
		Somastipur ...	1·21	
	30	Muzufferpur „ 12, '90	3·76	Weather—rainy on most days of the week. Temperature moderate. Transplantation of *marua* and rice has commenced. Prospects of all crops good.
		Hajipur ...	6·45	
		Sitamarhi ...	2·87	
	31	Sarun „ 12, '90	1·55	Weather—wet and stormy. Rain almost daily. Prospects promising, but a few days' sun required for all crops.
	32	Chumparun „ 12, '90	5·59	Weather—very hot; fair and cloudy alternately. Sufficient rain all over the district. Transplantation of rice progressing. *Bhadoi* crops thriving. Indigo manufacture going on. Prices almost stationary.
		Bettiah ...	6·09	
Bhagulpur Divn.	33	Monghyr „ 12, '90	0·53	Weather—cloudy and warm with easterly wind. *Bhadoi* sowings doing well, also indigo and *makai*. The area submerged in Jamui has been resown.
		Begusserai ...	0·66	
		Jamui ...	0·30	
	34	Bhagulpur „ 12, '90	5·01	Weather—rainy. Transplanting in progress. In Soopool the late heavy rain has facilitated transplanting of *bhadoi*, which was backward. In Banka half the area under *makai* has been sown already.
		Banka ..	0·91	
		Mudhepura ...	5·20	
		Soopool ...	5·63	
	35	Purneah „ 12, '90	5·58	Weather—showery and sultry. *Bhadoi* rice is being weeded; it is everywhere a good crop. Indigo is being manufactured. Transplantation of *aghani* rice going on. *Kauni* is being harvested.
		Kishengunge ...	6·62	
		Arrareah ...	7·12	
	36	Maldah „ 12, '90	2·13	Weather—rainy and cloudy; high east wind at times. *Bhadoi* sowings completed. Transplantation of winter paddy begun, but some more rain is wanted for it at Bumangola. Indigo manufacture continues. Common rice selling at from 13 to 17 seers per rupee.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables compputed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; g, gloomy; p, passing temporary showers; t, thunder.

J. H. GILLILAND,

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1890.

DURING the first half of June ordinary hot-weather conditions usually prevail over the greater part of the province, the chief features being clear skies with low humidity and high temperature. But the moist current from the Bay of Bengal beginning in Burmah some time in May and passing northwards is deflected by the Assam hills, so that in the north-east corner, and sometimes in the northern part of East Bengal, heavy rain continues to fall from the beginning of June. The dry hot weather remains unchanged till the commencement of disturbed weather in the Bay, when somewhat suddenly the sky becomes cloudy, and hot moist weather is general in the lower districts, till the disturbance, crossing the coast, moves in a north-westerly direction, giving heavy rain along its course. After its passage the rainfall area gradually extends, and rain becomes general in all districts. Thus as a rule the change from the hot weather to the rains is clearly defined by the commencement of the depression in the north of the Bay.

During the present year heavy rain began to fall in Burmah very early in May, and it will be remembered that during the first two weeks of May intensely hot weather prevailed in Bengal till near the end of the second week, after which cloudy weather with high humidity, low temperature, and scattered showers prevailed till the end of the month. The weather during the first two weeks of June has been similar to that of the latter half of May. Scattered rain fell except in East and North Bengal, where heavy and continuous rain was reported, especially from the former. Pressure was low over Behar, and a steady wind circulation continued for some time, velocity rising at times as the differences of pressure increased over the province. But notwithstanding the cloudy weather, rainfall was generally below the normal except in North Bengal, and though a moist current was undoubtedly blowing over Bengal, heavy rain did not set in till about the end of the third week. During the first week a shallow depression formed in Behar, pressure falling briskly on the 4th, and rapidly on the 5th, in the northern districts, in consequence of which heavy rain fell, not only in North Bengal, but also in North Behar, from the 6th to the 8th, and heavier and more general rain fell in the south-eastern districts. In the western districts, over which westerly winds were blowing from the Central Provinces, the sky was clear with very high temperature, excess in South Behar being 4° and in Chutia Nagpur 2·4°, so that differences of pressure as well as of temperature were large from east to west, and conditions were very favourable for strong easterly winds. After rain commenced to fall in Behar, temperature fell very rapidly at western stations, the largest falls on the 7th being 16° at Dehree, 15·6° at Gya, and 11·5 at Hazaribagh, and from being 4° in excess for the first week, mean temperature fell to 5° below the normal for the second week in South Behar. Rainfall continued to be considerably below the normal in all the southern districts except Orissa, where general rather heavy rain fell on the 7th and 10th, and scattered showers on the 8th and 11th. From the fact that rainfall during this week was largely above the normal in the northern districts, while over a strip of country lying between Orissa and these districts there was considerable defect, this heavier rain in Orissa was probably due to the disturbed conditions which at that time were general over the greater part of the peninsula. From the 13th to 17th only scattered rain fell in the north and east, skies clearing and temperature rising slowly in all districts, but about the 17th pressure began to fall in the north-west corner of the Bay, and the first depression of the season formed.

Shallow depression from 17th to 20th.—A brisk fall of pressure commenced in Orissa and the north-west corner of the Bay on the 17th, and the low-pressure area became more distinct on the 18th, when a narrow trough of low pressure ran from the head of the Bay in the usual north-westerly direction. The intensification of the depression was accompanied by a slight deepening along the length of the trough, while on the 19th there was considerable defect and steep gradients to the south-east behind the centre. After remaining two days close to the Orissa coast, the depression moved over Orissa and Chutia Nagpur, where it filled up on the 20th. The influence of the depression was not wide, light cyclonic winds blowing in its near neighbourhood, while comparatively fine weather prevailed in the north and east of the province. Fairly heavy general rain fell in Orissa on the 18th, in Orissa and South-West Bengal on the 19th, and in all districts on the 20th. Immediately after the filling up of this shallow depression in Chutia Nagpur, and before the unsettled conditions resulting therefrom had passed away, a second depression began to form over the eastern part of South-West Bengal. The combined influence of the two depressions, that is, the after-effects of the first being intensified during the formation of the second, caused very stormy weather with abnormally heavy rain in all parts of Bengal.

Second depression from 21st to 24th.—On the 20th easterly winds were blowing over the whole province except in Orissa, and these directions remained unchanged on the 21st, but velocity was diminishing rapidly. On the 22nd westerly winds had set in over South Behar, Chutia Nagpur, and South-West Bengal. Pressure at first fell briskly, the fall becoming more rapid on the 22nd, when the area of lowest pressure extended from the head of the Bay to Mymensingh and as far east as Silchar. The depression was therefore well to the east, and winds were cyclonic over the whole of Bengal. Heavy rain had begun to

fall, Midnapore reporting 8 inches, and all the southern stations from Calcutta eastwards from 2 to 4 inches. On the following day the depression had moved nearly due west, the centre of lowest pressure and of the cyclonic circulation being between Berhampore and Burdwan. A very perfect circulation obtained with very strong winds at the head of the Bay and in Lower Bengal. Rainfall was heavier than on the 22nd at all stations to the south of the centre, Jessore and Akyab reporting 10, Raneegunge and Krishnagûr 8, Burdwan 7, and several other stations from 3 to 6 inches. Wind velocity averaged more than 30 miles an hour for the day previous to 8 a.m. on the 23rd, at which hour it was 36 miles at Saugor Island and 40 miles an hour at Pooree Up till 8 a.m. on the 24th the stormy weather intensified, the depression moving in a north-westerly direction, but it would appear that it broke up, one portion being near Allahabad and the other near Purneah and Bhagulpore when observations were taken on the 24th. Pressure at Purneah was then 29·344 inches, and at Bhagulpore 29·349 inches, defect at these two stations exceeding a quarter of an inch, while gradients were steep over the province and the Bay, the difference between Purneah and Tavoy exceeding ·6 inch. The average wind velocity at Saugor Island rose to 42 miles an hour, and very strong winds were blowing at all inland stations except those in the extreme north. Heavy rain continued in the southern districts, but in North Behar and the greater part of North Bengal comparatively small amounts were received. The depression had filled up on the 25th, and after that ordinary monsoon weather prevailed in Bengal for some days.

The influence of the depression practically ceased on the 25th, and on the 28th pressure began to fall again in the north-west corner of the Bay and the adjacent districts. The low-pressure area which then began to form developed slowly on the 29th and 30th without much change of position, so that the description of this storm belongs to the meteorology of the month of July. It was not accompanied by heavy rain except in the immediate neighbourhood of the centre, and passed in a westerly direction over False Point into Central India during the night of the 1st July, but it was peculiar in being followed by rapid and large atmospheric oscillations, the waves passing from east to west across Bengal and the nothern half of the Bay. While it retained its position at the head of the Bay, moderately calm weather with light rain prevailed at inland stations.

As the only means of comparing the strength of the monsoon in different years is by means of the wind velocity, the accompanying table has been prepared to show the average wind velocity in June at the coast stations and at a few a short distance inland. It will be seen that the average for the present month is normal or below the normal at the eastern stations, but is considerably above the normal in the north-west corner of the Bay. The only part of Bengal where rainfall is below the normal is that contiguous to the north-east corner of the Bay, so that both wind force and actual rainfall bear out that, so far, a weak monsoon current has been blowing on the east coast, but that in the west of the Bay it has been stronger than usual:—

Stations.	Actual average wind velocity in June 1890.	Normal wind velocity in June.	Variation of actual for June 1890 from normal.

Gopalpur	389	314	+75

Pressure—Was rising in the early part of June, but after the first three days a rapid fall set in in the northern districts, resulting in a depression over Behar. The most rapid fall was ·17 inch at Julpigoree and Dhubri and defect was ·15 inch in South Behar, from which it gradually diminished towards the south till it had almost vanished at the head of the Bay. During the second week it was generally in excess by variable amounts ranging up to ·06 inch, the relatively higher pressure being in Orissa, South-West Bengal, the Sunderbuns, and Singbhoom. During the third week pressure continued high in all districts except Orissa and Chutia Nagpur, where the formation of the depression caused somewhat rapid changes. These were of no importance till the 18th, when a brisk fall commenced at Orissa stations and continuing on the 19th gave defect of ·2 inch at False Point and ·15 inch at the other stations. On the 20th the depression was over Chutia Nagpur and slightly more diffused, defect being ·15

inch at Ranchee only. By the following day it had filled up. Gradients were very steep to the south-east of the depression, the difference between False Point and Tavoy at one time being half an inch. While the second depression was moving over the western districts, changes were large, defect near the centre being ·25 inch, and the rise after the passage of the centre being at some stations about a third of an inch. On the 25th the rise was very rapid over the whole province. The means for the whole month are very nearly normal, differences being generally under a hundredth of an inch.

Temperature—During the first week was high in the western districts and gradually fell towards the east, mean excess in South Behar being 4°, and defect in Assam 2·7°. In the second week it fell rapidly, especially in the western districts, where there was defect ranging up to 4·6° in North Behar. From being 4° above it fell to 3° below the normal in South Behar. Differences from the normal were much smaller for some days in the middle of the month, but on the occasion of the unsettled conditions towards the end of the month very cool weather prevailed, defect in Chutia Nagpur being 4·6°, in South Behar 3·9°, and in South-West Bengal 3·2°. Mean temperature for the month is normal in East Bengal, ·4° below in North Bengal, ·5° in South Behar, about 1° in Orissa, South-West Bengal and Assam, 1·6° in North Behar, and 1·9° in Chutia Nagpur. The highest temperature in South Behar was 110·6°, in South-West Bengal and North Behar slightly above 104°, and in Orissa and Chutia Nagpur above 103°, while in the other districts it was always under 100°.

Rainfall—Was generally deficient, except in North Bengal, during the early part of the month, but between the 20th and 24th unusually heavy rain fell in all districts with the result that the falls for the whole month are above the normal over the whole province except in the south-east corner, including the Sunderbuns, Chittagong, and Tipperah. The falls during the week beginning on the 20th expressed as percentages of the normal for each district give—South Behar 332, South-West Bengal 330, Chutia Nagpur 280, East Bengal 203, North Behar 192, North Bengal 128, and Orissa 74. Some of the heaviest falls in twenty-four hours during these days were—Jessore 9·9, Mankur 9·7, Jamtara and Jhalda 8·6, Jehanabad 8·4, Culna and Krishnagur 8·2, and Raneegunge 8 inches on the 23rd. On the 24th falls were lighter, generally under 4 inches, but Chittagong reported 9·3 and a few subdivisional stations in East Bengal 6 inches.

The falls for the month are very heavy in the neighbourhood of the Assam hills, and especially in the north-east corner of the province, Alipore Duar receiving 55, Cooch Behar 48, Mickilgunge 47, Fallacatta 45, Matabhanga and Buxa 44, Julpigoree and Dinhatta nearly 41 inches. Amounts decrease rapidly towards the south, only a few stations in that neighbourhood reporting more than 20 inches. Over the rest of the province falls are between 10 and 20 inches except in Chutia Nagpur, where they are generally about 8 inches. Over a strip of country stretching from the Hooghly district in a north-westerly direction, and including the western districts of South-West Bengal and part of South Behar along the course taken by the centre of the depression which began to form in the centre of Bengal about the 20th, relatively very heavy falls were received, the actual falls being between 15 and 20 inches, and in some cases above the latter amount. In the Sunderbuns and Chittagong and Tipperah falls were generally between 15 and 20 inches, and in the Chittagong Hill Tracts under 15 inches, but 34 inches fell at Cox's Bazar and 27 at Hurrishpore.

In the north-east districts excess was generally over 10 inches, the largest difference from the normal being 19·6 inches at Mickilgunge. Along the course taken by the centre of the depression excess amounts of about 10 inches are also recorded, these being chiefly in Burdwan, Bankoora, Rajshahye, Gya, Monghyr, and the Sonthal Pergunnahs. In the other districts, except Chutia Nagpur and the south-east corner, falls are from three to four inches above the normal, but small areas of deficient rainfall occur in the following districts:—Cuttack, Midnapore, Pubna, Bogra, and Maldah, the differences, however, being generally small. In Chutia Nagpur the fall is very nearly normal, and in East Bengal below the normal by amounts ranging up to 6 inches.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the ti
The humidity of the atmosphere is expressed as percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbe
The numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the ye
stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

years. The variations are negative when the mean for the week is less than the corresponding normal mean, and positive when greater.
sening cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means
years. The means of the districts are the numerical average of the gainfall return received in the districts, i.e., from total rainfall at the subdivisional

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 11th of July 1890.

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 15th July* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 11TH OF JULY 1890.

In the early part of the week a shallow depression lay along the foot of the hills over North Bengal and North Behar, causing westerly winds in all districts. While these winds continued, that is, on Saturday and Sunday, general rain fell in East and North Bengal and the eastern parts of South-West Bengal, but over the western half of the province rain was almost entirely absent. Meanwhile in the Bay strong winds were again developing, velocity at Saugor Island increasing from 10 miles an hour on Sunday to 24 miles on Monday and 31 on Tuesday. These high velocities were not due to any depression over the Bay, as pressure decreased steadily to North Bengal, but gradients were steeper than usual owing to the shallow depression in that district. Pressure remained steady in the north-east corner of Bengal, and fell briskly in Chutia Nagpur and the west of Behar, the low-pressure area becoming more diffused, and ultimately lowest pressure being transferred to the western districts. After this easterly winds recommenced in North Bengal and Behar, and the normal circulation was established by the 8th. General heavy rain then fell in all districts except Orissa and part of South-West Bengal, some heavy falls being reported on the 9th, and this general rainfall continued, though not in such large amounts, till the end of the week. During the last three days very few stations did not receive daily rain. During the latter half of the week pressure changes were of very little importance. On Thursday a brisk fall in Chutia Nagpur caused a very shallow depression to appear there, but within it defect was not more than a twentieth of an inch, and as the distribution was very nearly normal over the Bay, differences of pressure increased very slightly, and only a faint cyclonic circulation was perceptible in its near neighbourhood.

Pressure—Changes have been very unimportant, the largest rarely exceeding a twentieth of an inch. In the early part of the week defect was about a twentieth of an inch in North Bengal, and towards the end in Chutia Nagpur. As, when above the normal it has been by very small amounts, the means for the week are below the normal at nearly all stations, the largest differences being in North Bengal and North Behar, where they are very near a twentieth of an inch, and in one or two cases exceed it. There is a slight excess in Orissa, and defect of about two-hundredths of an inch in Lower Bengal.

Temperature—Fell almost steadily throughout the week, changes being somewhat irregular, from the variable falls of rain. In the early part of week, and again at the end, it rose in the western districts, and about the middle of the week it rose in East and North Bengal, but at other times it has been falling slowly as a rule. The means are hence below the normal in all districts, defect being largest in the west. In Chutia Nagpur it is 1·6°, South Behar 1·4°, East Bengal 1·2,° Assam 1·1°, South-West and North Bengal and Behar rather less than 1°, and Orissa ·5°. The highest temperature recorded during the week was 99° in South Behar, and the lowest 67° in East Bengal.

Rainfall.—Heavy general rain has been falling in East and North Bengal during the greater part of the week, and in the other districts from about the middle of the week. The heaviest falls were on Wednesday the 9th, when many stations reported heavy falls, the largest amount being 9·7 inches at Chittagong. Some other heavy local falls are Matabhanga 7·6 inches on the 5th and Fallacatta 5·8 inches on the 7th. The mean rainfall for the different districts are all above the normal except for Orissa and Chutia Nagpur, there being defect of ·4 inch in the former and ·1 inch in the latter. Excess is slightly over an inch in East Bengal and Behar, ·7 inch in South-West Bengal, and ·2 inch in North Bengal. Falls for the week are uniform and generally under 2 inches in Orissa, between 2 and 4 inches in South-West Bengal, but with a few local falls between 6 and 9 inches. In East Bengal the falls are usually over 3 inches and above 6 inches at Munshigunge, Dacca, Naraingunge, Ramchandrapore, and Netrokona. In Julpigoree, Cooch Behar and the Darjeeling Hills, falls, except at a few stations, are between 10 and 20 inches, the largest being Kurseong 19 inches, Fallacatta and Darjeeling 17 inches, Siliguri and Buxar 16 inches. In Behar and Chutia Nagpur amounts are more variable, but usually lie between 2 and 4 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 11th of July 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.								
			Averages for week.				Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.

J. H. Gilliland,
For Meteorological Reporter to the Govt. of India

Meteorological Office, India;
The 14th July 1890.

MEMORANDUM.

Quarterly review of births and deaths registered in twenty-seven of the principal towns of Bengal for the Quarter ending 31st March 1890.

BIRTHS.

THE births registered in twenty-seven of the principal towns of Bengal during the three months ending with March 1890 were 5,691, and correspond to an annual rate of 21·44 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is ·68 lower than the mean rate of the corresponding quarters of the past five years (1885—89) but higher than the rate of the corresponding periods of any of the past five years except 1885 and 1889, *vide* the figures below :—

	Quarter ending 31st March—						
	1885.	1886.	1887.	1888.	1889.	Quarterly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	24·88	21·12	20·52	20·72	23·40	22·12	21·44

The births registered in each of the twenty-seven principal towns during the first quarters of 1890, 1889 and the average of the five years 1885—89 correspond to the following rates per 1,000 of the population of those towns :—

Towns.	Ratio per mille. Quarter ending 31st March of—			Towns.	Ratio per mille. Quarter ending 31st March of—		
	1890.	1889.	Average of five years 1885—89.		1890.	1889.	Average of five years 1885—89.
Burdwan	20·28	32·88	23·44	Naraingani	31·84	33·18	30·56
Midnapore	17·28	14·76	16·20	Chittagong	14·80	11·16	18·30
Hughli and Chinsurah	23·44	31·68	29·40	Comillah	32·96	35·80	33·16
Serampore	31·68	34·04	29·56	Patna	11·72	13·84	20·68
Utterpara	27·92	28·28	23·20	Gya	22·40	20·96	24·32
Howrah	21·12	23·52	22·96	Arrah	33·28	15·60	11·68
Bali	19·40	25·08	19·68	Mozufferpore	19·08	11·32	15·60
Kishnagar	18·76	22·40	21·24	Durbhanga	30·48	35·68	31·80
Ranaghat	20·24	7·36	6·44	Chupra	26·32	24·52	15·60
Santipore	16·16	21·40	13·44	Bhagulpore	25·04	29·24	30·12
Jessore	9·40	19·28	15·32	Monghyr	31·28	36·28	31·20
Rampore Beauleah	30·08	42·00	31·32	Purneah	14·88	24·20	17·56
Darjiling	30·20	20·40	11·96	Poori	17·08	29·36	16·60
Dacca	16·89	10·04	16·96				

The above statement shows that birth registration is still extremely imperfect. The supposed standard in India is 40 per thousand, and it is probably even higher than this, but it will be seen that in not one of the twenty-seven principal towns of Bengal was this standard reached during the quarter under review. The nearest approach to it was attained in the town of Arrah, where the ratio was 33·28. In only eight, however, out of the twenty-seven principal towns of the province, viz., Arrah, Comillah, Naraingani, Serampore, Monghyr, Durbhanga, Darjiling, and Rampore Beauleah, did the statistics of birth registration exceed 30 per thousand. In all the rest the rate was very low, especially in the towns of Jessore, Patna, Chittagong, and Purneah, where the statistics are so imperfectly recorded that the ratio was less than 15 per thousand. This result is very discouraging, and shows that the Municipal Commissioners do not pay attention to this elementary and very necessary portion of their duties.

DEATHS.

The deaths registered in the twenty-seven principal towns of Bengal during the quarter ending with March 1890 were 5,948, and correspond to an annual rate of 22·40 per 1,000 of the aggregate population of those towns. This rate is ·44 higher than the mean rate of corresponding periods of the five years 1885—89, and is also higher than the recorded mortality of the first quarters of 1887, 1888 and 1889, *vide* the figures below :—

	Quarter ending 31st March of—						
	1885.	1886.	1887.	1888.	1889.	Quarterly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	24·00	22·40	21·84	21·00	20·48	21·96	22·40

The deaths registered in each of the twenty-seven principal towns during the first quarters of 1890, 1889, and the average of the five years 1885—89 correspond to the following rates per 1,000 of the population of those towns :—

Towns.	Ratio per mille. Quarter ending 31st March of— 1890.	1889.	Average of five years 1885—89.	Towns.	Ratio per mille. Quarter ending 31st March of— 1890.	1889.	Average of five years 1885—89.
Burdwan	25·60	36·24	30·48	Narainganj	31·20	35·64	27·36
Midnapore	27·64	21·68	24·40	Chittagong	18·91	11·92	18·24
Hughli and Chinsurah	36·60	29·28	30·48	Comillah	37·60	25·08	28·12
Serampore	37·88	34·72	30·96	Patna City	10·56	12·20	14·32
Utterpara	36·28	24·92	27·56	Gya	36·92	26·32	32·04
Howrah	21·52	25·12	24·92	Arrah	18·00	9·70	7·36
Bali	20·76	23·72	22·64	Mozufferpore	12·44	9·88	15·04
Kishnagar	11·64	17·60	20·36	Darbhanga	22·00	23·40	23·48
Ranaghat	22·08	3·68	5·04	Chupra	11·84	12·44	10·04
Santipore	10·36	10·76	13·44	Bhagulpore	19·84	16·48	22·32
Jessore	41·88	24·92	29·64	Monghyr	19·80	16·88	18·48
Rampore Beauleah	25 24	25·44	30 08	Purneah	21·04	50·84	36·20
Darjiling	33·60	26·76	17·64	Poori	84·24	46·80	42·60
Dacca	18·08	20·12	21·72				

The registration of deaths in most of the principal towns of Bengal is also unfortunately extremely imperfect. The total registered mortality of the quarter under review is a trifle higher, it is true, than that of the corresponding periods with which it is compared, but in individual cases it is deplorably defective and supplies very little scope for any observations on the comparative health of municipalities. It will be seen that the statistics vary very widely in different municipalities the natural climatic and other conditions of which are similar; for instance, Gya, Patna, and Arrah; Serampore, Uttarpara, Ranaghat, Santipore and Kishnagar. There can be no reason why under proper administrative arrangement the registration should not be as complete at Patna and Arrah as at Gya or in Ranaghat, Santipore and Kishnagar as in Serampore and Utterpara. The Municipal Commissioners of those five towns, as well as the Municipal Commissioners of Howrah, Bali, Rampore Beauleah, Dacca, Chittagong, Mozufferpore, Chupra, Bhagulpore, and Purneah would do well to enquire into and test the accuracy of registration in their towns which are backward in this respect. The very high rate of mortality in Poori during the quarter under review is due to an epidemic of small-pox and cholera in that town.

The total mortality during the quarter under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding quarters of 1889 and the average of the five years 1885—89 :—

	Ratio per mille during the— Quarter ending 31st March 1890.	Quarter ending 31st March 1889.	Quarterly average of quarter ending 31st March 1885—89.
Cholera	2·64	2·56	2·36
Small-pox	·72	·16	·16
Fever	9·08	8·00	9·24
Bowel-complaints	3·08	2·68	3·24
Injury	·48	·44	·36
Other causes	6·32	6·56	6·52

Compared with the average figures of the past five years it will be seen that the figures of 1890 are pretty even except small-pox. Compared, however, with the first quarter of 1889, there is a noticeable increase in the mortality of the 1st quarter of 1890 under the heads Fever and Small-pox.

The highest annual death-rates from the several registered death-rates occurred in the following towns :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Bowel-complaints.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Poori ...	19·20	Darjiling ...	23·92	Utterpara ...	12·32	Poori ...	16·28
Comillah ...	16·28	Jessore ...	22·12	Poori ...	9 84	Serampore ...	13·88
Narainganj ...	11·76	Gya ...	21·04	Serampore ...	9 20	Midnapore ...	12·72
Jessore ...	9·40					Gya ...	10·64
Utterpara ...	8·68					Utterpore ...	10·16
Hughli and Chinsurah ...	4·92					Bhagulpore ...	9·44
Howrah ...	4·84					Narainganj ...	9·20
Gya ...	3·92						
Chittagong ...	3·04						
Ranaghat ...	2·76						
Dacca ...	2·72						
Bali ...	2·68						
Midnapore ...	2·60						
Serampore ...	2·40						

From small-pox high mortality occurred only in the town of Poori, where there were 134 deaths from this cause; ratio 21·60 per 1,000 of the population.

The mortality of the quarter under review according to *Sex*, *Class* and *Age* was distributed as follows:—

According to Sex.

	Ratio per *mille.*
Males	24·60
Females	20·00
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population	123

According to Class.

	Ratio per *mille.*
Christians ...	17·80
Hindus ...	23·12
Mahomedans ...	20·72
Buddhists ...	7·88

According to Age.

	Ratio per *mille.*
Under 1 year ...	147·64
1 year and under 5 years ...	24·04
5 years „ 10 „ ...	11·73
10 „ „ 15 „ ...	8·68
15 „ „ 20 „ ...	13·80
20 „ „ 30 „ ...	13·36
30 „ „ 40 „ ...	16·80
40 „ „ 50 „ ...	19·12
50 „ „ 60 „ ...	24·96
60 years and upwards ...	67·64

Detailed information regarding the vital statistics of the quarter under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 12th July 1890.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the Quarter ending 31st March 1890.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL;
The 12th July 1890.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 28th June 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 28th June 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 16·9 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is ·6 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years except 1887 and 1889, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	22·6	17·3	13·7	17·6	16·3	17·5	16·9

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 7th June 1890.	14th June 1890.	21st June 1890.	28th June 1890.	Towns.	Weeks ending— 7th June 1890.	14th June 1890.	21st June 1890.	28th June 1890.
Burdwan	21·4	32·0	7·6	19·8					
Midnapore	18·6	13·9	3·1	20·1	Naraingunj	24·8	12·4	58·0	12·4
Hughli and Chinsurah	26·3	19·7	14·8	18·1	Chittagong	11·7	9·4	23·5	21·1
Serampore	23·0	23·6	29·4	27·5	Comillah	15·4	38·5	11·5	38·5
Uttarpara		19·9	9·4	9·4	Patna City	6·2	7·5	7·8	11·4
Howrah	18·9	10·9	15·5	13·2	Gya	19·8	16·4	12·3	21·9
Bali	7·0	10·5	10·5	14·0	Arrah	13·2	8·4	17·9	10·8
Kishnagar	15·1	15·1	9·5	26·5	Mozufferpore	10·9	7·3	18·2	15·8
Ranaghat	6·0	12·0	..	6·0	Durbhanga	11·0	20·5	17·3	28·3
Santipore	10·5	17·5	8·8	17·5	Chupra	9·1	4·0	8·0	8·0
Jessore	...	6·1	..	..	Bhagulpore	10·9	12·7	17·2	21·7
Rampore Beauleah	23·6	31·5	36·8	34·2	Monghyr	17·2	20·8	23·5	24·4
Darjiling	22·2	...	59·3	..	Purneah	17·3	13·9	...	3·5
Dacca	10·4	9·1	7·8	9·7	Poori	18·9	21·0	29·4	14·7

It will be seen that last week the highest birth-rate was returned from Comillah (38·5) and the lowest from Purneah (3·5). No births were registered during the week in Jessore and Darjiling towns.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 25·6 per 1,000 of the population. The rate of the week is ·9 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1885 and 1889, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	29·2	22·1	20·3	23·4	28·7	24·7	25·6

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 7th June 1890.	14th June 1890.	21st June 1890.	28th June 1890.	Towns.	Weeks ending— 7th June 1890.	14th June 1890.	21st June 1890.	28th June 1890.
Burdwan	16·8	19·8	15·8	19·8

Uttarpara	47·2	18·9	28·3	...	Patna City	21·4	17·5	15·3	14·3
Howrah	12·6	20·6	19·0	8·6	Gya	42·4	27·3	34·8	27·3
Bali	19·5	14·0	17·5	10·5	Arrah	21·5	18·2	37·1	45·5
Kishnagar	9·5	9·5	...	...	Mozufferpore	26·8	29·9	26·8	36·5
Ranaghat	12·0	6·0	6·0	...	Durbhanga	26·7	38·0	21·2	26·0
Santipore	8·8	14·0	18·8	7·0	Chupra	11·1	12·1	14·1	19·1
Jessore	40·0	12·2	36·7	12·2	Bhagulpore	22·6	24·4	18·1	16·3
Rampore Beauleah	23·6	23·6	23·6	15·8	Monghyr	26·2	18·1	17·2	19·9
Darjiling	59·3	14·8	37·0	59·3	Purneah	27·7	3·5	10·4	27·7
Dacca	30·5	24·0	17·5	19·5	Poori	142·7	125·9	368·0	246·5

It will be seen that last week the highest mortality occurred in the town of Poori (245·5) and the lowest in Santipore (7·). No deaths were registered during the week in Utterpara, Kishnagar and Ranaghat towns.

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Bowel-complaints.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Poori ...	184·6	Darjiling ...	44·5	Serampore ...	17·6	Poori ...	21·0
Mozufferpore ...	19·5	Comillah ...	30·8			Midnapore ...	12·4
Arrah ...	14·4	Poori ...	29·4			Bhagulpore ...	9 9
Durbhanga ...	11·0	Purneah ...	27·7				
Patna City ...	2·3	Arrah ...	21·5				

The total mortality from the several registered death-causes in the twenty-seven towns amounted to 7·1 from cholera, against 8·3 per 1,000 in the preceding week; ·2 from small-pox, against ·7; 9·3 from fever, against 10·1; 2·9 from bowel-complaints, against 2·2; ·6 from injury, against ·4; and 5·4 from other causes, against 5·2 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	27 8	Christians ...	29·9	Under 1 year ...	163·9
Females	23·2	Hindus ...	27·0	1 and under 5 years ...	38·6
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	119	Mahomedans ...	22·2	5 „ 10 „ ...	13·7
				10 „ 15 „ ...	11·9
				15 „ 20 „ ...	11·6
				20 „ 30 „ ...	14·5
				30 „ 40 „ ...	22·5
				40 „ 50 „ ...	23·3
				50 „ 60 „ ...	34·9
				60 years and upwards ...	49·0

Detailed information regarding the vital statistics of the twenty-seven towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 14th July 1890.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 28th June 1890.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of April 1890.

INCREASES.

	Tons.
Coal	17,039
For railway and flotilla consumption principally.	
Cotton piece-goods	843
Ordinary fluctuation.	
Rice	3,691
Principally from Forbesganj (49,000 maunds) and from Hilli (40,000 maunds). The period with which the comparison is made was one of partial failure of the rice crop.	
Jute, unscrewed	4,631
Goalundo, Serajganj, Narayanganj, and Mymensing contributed this increase; a considerable percentage of last season's crop was withheld in hopes of a rise in prices.	
Betel-nuts	728
Almost exclusively in receipts from the B. C. Flotilla.	
Salt	3,209
The increase was in despatches from Chitpore.	
Firewood	681
From the Southern Section.	

DECREASES.

Oil-seeds	1,881
Decreases in despatches from the Eastern Section generally; also from Serajganj. The crop was late, and the market is dull.	
Railway plant, &c.	2,434
Completion of work on Behar Section.	
Sugar	1,243
Falling off in despatches from Choondanga, Alamdanga, Jagati, and Goalundo. There has been no demand in Calcutta for raw sugar produced in Eastern and Central Bengal.	

CALCUTTA, *the 12th July* 1890.

RESOLUTION ON THE REPORT OF MIDNAPORE FLOODS COMMITTEE.

REVENUE DEPARTMENT—FAMINE.

Calcutta, the 18*th July*, 1890.

RESOLUTION.

READ—

Resolution of this Government, dated the 12th February, 1889.

Report of the Midnapore Floods Committee, dated the 1st June, 1889.

Letter No. 875A, dated the 11th November, 1889, from the Board of Revenue, with enclosures.

Note on embankments in Bengal, by the Chief Engineer, dated the 24th May, 1890.

1. In the autumn of 1888, the attention of the Bengal Government was forcibly drawn to the large loss of crops caused by floods in parts of the district of Midnapore, and particularly in an area of three or four hundred square miles, forming the basins of the Rasulpore and Haldi rivers. Measures were at once taken to relieve the distress of the cultivators, and enquiries were instituted through the Public Works Department to ascertain the origin of the obstruction to drainage in that district with a view to such remedial action as might be found practicable. It was subsequently determined to appoint a Committee, consisting of the Director of Agriculture, Major McArthur, R.E., and Mr. Reily, a Manager of the Burdwan Raj estate part of which lies in the area affected, to make a further investigation. The report of this Committee was received in June, 1889, and immediate effect was given to some of the recommendations it contained. The Lieutenant-Governor, having since received the opinion of the Collector, the Commissioner, and the Board of Revenue on the subject, is now in a position to review the proposals made by the Committee.

2. In regard to the origin of the disaster, the report of the Committee indicates that severe floods, causing the greatest injury to crops, occurred in

1823, 1831, 1832, 1833, 1848 and 1850, a fact which indicates an original deficiency in the natural drainage of these basins, antecedent to the action taken within the last forty years. During that period Government has spent half a million sterling on embankments in Midnapore, four times as much as all the other landlords of that district. Moreover, a sea-dyke has been recently constructed in connexion with the tidal canal, which has, according to the Committee, conferred enormous benefits on the landlords and tenants by protecting their lands from the numerous inundations of the sea to which they were formerly exposed. It is desirable, in considering the general bearing of the report, to bear these facts in mind, as the Committee necessarily dwell mainly on the defects in the action of Government, giving less prominence to the natural agencies which produce floods in Midnapore, and to the success with which in many places these have been counteracted.

3. The Committee attribute great importance, as a subsidiary cause of the floods, to the embanking, by cultivators, for the purpose of reclamation, of salt-water marshes, or low-lying wastes, which has led to the silting up of the tidal creeks, notably those known by the names of Bagda and Mydakhally. As observed in the Public Works Department of this Government—

"These creeks for seven or eight months of the year discharge little or no natural drainage; but so long as the low country lying about them was, comparatively speaking, unembanked, the flood tides swept freely over it; while, with the return of the ebb, these accumulated waters were poured back into the channels with redoubled force, and so scoured them out. By this simple process the creeks were maintained by nature in an efficient state to discharge the drainage of the monsoon. During recent years, however, the large tidal basin has been embanked and reclaimed. The consequence is that the tidal waves are headed back by the embankment and deposit their silt in the bed of the creeks, which are rapidly rising above the level of the country which they formerly drained. Thus after heavy rainfall not only is the whole of the reclaimed country thrown out of cultivation, but the drainage of more inland tracts is blocked and their crops also are damaged and destroyed."

The ryots themselves have urged the same views on Government by petition, and there seems to be no doubt as to the reality of the evil. Mr. Price, when Settlement Officer, indicated in detail the extent to which private persons possess interests in these lands, the proprietary right of which generally vests in Government. The Committee's recommendations in this matter are as follow:—

(1) That the Public Works Department should determine and mark off the portion of the jalpai lands necessary to afford a sufficient spill area;

(2) That a detailed survey should be made of the lands so defined, to ascertain what bunds should be removed and what compensation should be given for such removal; and

(3) That meanwhile no new settlement of jalpai lands should be made, except for grazing purposes, growth of trees, or other purposes not involving the construction of embankments, and that the construction of new embankments, on jalpai lands already settled within the area considered sufficient by the Public Works Department for spill area, be stopped.

From paragraph 31 of the report it appears that both the Engineer officers and the natives of the district attach more importance to the effect of embanking the jalpai land than the Committee quite endorse; but in the face of the facts and arguments adduced by the Executive Engineer, the Lieutenant-Governor cannot but accept the conclusion that embankments are primarily responsible for the entire difficulty. Cross-dams have doubtless done much harm and accelerated the deterioration of the drainage channels, but until the main drainage channels had been very considerably silted up, cross-dams in them, as, *e.g.*, that at Birjoo, would not have been possible. The sections of the country between the marginal embankments of the Sadar and Bagdu nullahs show that the silting of that portion of the country through which the flood waters are supposed to escape, and of the beds of those nullahs (which are the main drainage lines), has been so great that practically the drainage has to be passed away on the top of an embanked ridge, and that a state of things has resulted which calls for some much more radical measures than any of those suggested by the Committee. It appears to be impossible to consider any portion, or even the whole of the jalpai lands, as "a sufficient spill

the pass khal provided was not in working order in the places visited, and that these khals do not provide as efficiently for the drainage of the country in the immediate neighbourhood of the canals as the old water-courses. Major McArthur gave instructions by which it is understood this defect will be remedied. The remodelling of the Hidgellee Tidal Canal—a project which, we understand, has been recently sanctioned by the Government of India—will, by the lowering of the bed of the canal, afford complete facilities for drainage of that part of country so far as it has been obstructed by this canal."

The work of putting in order the outfalls, and deepening the bed of this canal, is now in progress, and will, it is believed, completely remedy the defects indicated.

7. The Committee properly point out that embankments Nos. 43, 44 and portions of Nos. 40 and 42 were removed from the schedule of works which Government is bound to maintain, without giving to those concerned the notice required by law. This was, no doubt, an error, and in future greater care must be taken to carry out in its entirety the procedure prescribed by the Act. The question whether the defect may affect claims of remission for revenue must be decided separately in each case. The report of the Committee does not indicate that the maintenance of these embankments would by itself have been a measure of any utility.

8. The following recommendations, less directly connected with the causes of the flood, have been made by the Committee:—The drainage of the Government land in the Argoal circuit at a cost of Rs. 50,000; a cutting across from the mouth of the Kholabaria khal to a point near the Kalinagar bungalow, also estimated to cost Rs. 50,000; and a sluice at Bhograi, to cost Rs. 6,000, also a new sluice at Baintghur estimated at Rs. 42,000. In view, however, of the arguments brought forward to show that the silting up of the Russulpore is due to the tidal water being confined to the bed of the river, instead of being able to spill over a wide extent of country forming a reservoir out of which a sufficient body of water returns at ebb tide to create an efficient scour, it seems doubtful whether these proposed cuts and sluice at Baintghur (that at Bograi is in quite a different locality) will not very soon share the fate of the Russulpore into which they would open, and silt up to such an extent as to be useless. Their usefulness depends entirely on keeping the Russulpore river open, and their action in doing so would not appear to be more than very partial and temporary; being of the nature of a continuation merely of the channel of the Russulpore, the action which has taken place there would equally take place in the new cuts. This matter should receive careful consideration in the Public Works Department before such large sums of money are expended on the proposed works.

9. The Committee observe—

"It is manifest that it will be of little use to have the main rivers or khals kept open by Government if the subsidiary channels which pass through several estates are neglected, and that it is useless for a particular zemindar to keep that part of a channel open which passes through his own estate, if his neighbour neglects his part. Many of these channels have been neglected by private owners, and it is obvious that it should not be open to any owner to keep in efficient working order or not, as he pleases, a channel which does not affect him alone, but others whose lands may be situated many miles away from his property. The want of practical interest in the maintenance of embankments and of power of co-operation on the part of the zemindars, was pointed out by Mr. H. V. Bayley in his notes on Midnapore in 1851, and he recommended that 'they should be disconnected with all direct concern in payment for execution of repairs.' The same principles apply with equal or greater force to the clearing of watercourses."

On this view they recommend that charge be taken by the Public Works Department of all the main arterial drainage channels, and that they be kept up at the expense of the zemindars and ryots concerned in the manner provided in Parts II and VI of Act II (B.C.) of 1882. The Commissioner and Collector concur in this opinion, from which the Board do not dissent. The law gives the Collector a discretion to initiate proceedings of the kind indicated, and enquiries should be conducted by him at once, in communication with the Public Works Department, with a view to giving effect to the policy advocated by the Committee.

10. The thanks of the Lieutenant-Governor are tendered to the members of the Committee for their careful enquiry and full report.

ORDER—Ordered, that this Resolution be published in the *Calcutta Gazette*, and that copies of it be forwarded to the Public Works Department of this Government, and the Board of Revenue, Lower Provinces.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 19th July, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.

* Means of 5 days. † Means of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for
The Humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The
are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during
stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

, week ending Friday, the 18th of July 1890.

Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1890. Mean for district.	Since 15th May 1890. Normal mean.	Since 15th May 1890. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If an are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 22nd July* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 18TH OF JULY 1890.

SETTLED weather has prevailed throughout the week, the chief feature being the weak monsoon which has been blowing in the west of the Bay, while in the eastern and northern districts general and in some cases very heavy rain has fallen throughout the week. In Orissa and the adjacent part of South-West Bengal practically no rain has fallen, but in the opposite corner of the province, in the east of North Bengal, excessively heavy rain has been received, excess in the Darjeeling hill tracts amounting to 13 inches.

The week commenced with the usual wind circulation, pressure slightly low and falling slowly in the northern districts, temperature one or two degrees below the normal in all districts, and light general rain except in the west. The wind circulation remained unchanged till the middle of the week, pressure changing slowly on the 12th and 13th, then rising rapidly for one day and again slowly on the 15th, after which a rapid fall set in, a shallow low-pressure area forming in the west of Behar and gradually extending eastwards till considerable defect prevailed in all the northern districts. General rain fell during these days in Behar, North and East Bengal, the falls being unusually heavy in the Darjeeling Hill districts and adjacent plains on Monday the 14th and 15th, diminishing in amount on the 16th, but again increasing after the rapid pressure changes during the latter half of the week. Temperature did not differ much from the normal in the first half of the week, and the usual small oscillations continued in all districts except North Bengal and Behar, where cool weather prevailed towards the end of the week. When the depression began to form in the west of Behar on the 16th, westerly winds commenced, and the current being comparatively dry, rain was much lighter on the 16th and 17th till pressure rising rapidly in North Bengal on Friday, the last day of the week, the easterly current again set in and very heavy rain was received at all the northern stations, especially in the west of Behar. On the 17th the westerly current extended as far east as Rungpore and Dhubri, but in the northern half of South-West Bengal and East Bengal light irregular winds were blowing, and the heaviest rain on this day fell in these districts. The absence of rain in the western districts was probably due to the comparatively dry westerly winds which have been blowing without interruption from Central India and extending as far west as the centre of South-West Bengal, so that the current from the Bay has been confined to the east and [redacted] Behar.

Pressure—Rose briskly to rapidly on Monday, and fell rapidly about the middle of the week, but at other times changes have been unimportant. The means for the week are everywhere slightly in defect, the greatest differences being between ·03 and 04 inch in North Bengal and Behar. In the lower districts the means are very nearly normal, defect being generally only a few thousandths of an inch.

Temperature—Has been considerably below the normal in Assam, North Bengal, and Behar, in consequence of the heavy rain which has fallen in these districts, but in Orissa, South-West Bengal, and Chutia Nagpur, where there has been a partial break in the rains, it has been slightly above the normal. Defect in North Behar is 2·3°, in Assam 2°, in North Bengal and South Behar between 1° and 1·5°, while excess is ·7° in Orissa, and the means in the other districts differ from the normal by less than half a degree.

Rainfall—As stated above, was excessively heavy in the northern districts of North Bengal and part of North Behar on Monday the 14th and again on Friday the 18th; but on the latter date the rainfall area extended further south, nearly all the stations in Behar reporting from two to five inches. Some of the heaviest falls on the 14th are—Kalimpong 8·6, Kurseong 7 8, Siliguri 5·9 inches, and Julpigoree received 7 inches on the 15th. On the 18th Kurseong reported 8·3, Siliguri 5 4, Tajpore 6·9, Durbhunga 5·3, Mozufferpore 4·7, Gogri 5·9, and Bickram 4 inches. In Orissa and the adjacent parts of South-West Bengal and Chutia Nagpur the total falls for the week are in almost all cases under half an inch. In the northern part of South-West Bengal and in East Bengal, falls are in many cases between 1 and 2 inches and at a few stations over 3 inches, the heaviest being in Moorshedabad and Backergunge. In Pubna, Bogra, Rajshahye, Maldah, and Rungpore, the average fall is about 2 inches, in Dinagepore 5 inches, but in Julpigoree and the Darjeeling hills heavy falls are reported, the average for the latter being 15 inches. In North Behar falls are generally between 4 and 6 inches, the heaviest being in Purneah and Durbhunga. Amounts are more variable in South Behar and the northern parts of Chutia Nagpur, and generally lie between 2 and 5 inches.

The mean fall for North Behar is 5·1 inches, for East and North Bengal and South Behar about 3·5 inches, Chutia Nagpur 2·2 inches, South-West Bengal 1·6 inches, and Orissa 1 inch. Excess in North Behar is 3·1 inches, and defect in Orissa over 2 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 18th of July 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; g, gloomy; t, thunder.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 21st July 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 5th July 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 5th July 1890, in twenty-seven principal towns of Bengal, excluding one (Gya) from which no return has yet been received, correspond to an annual rate of 16·4 per 1,000 of the aggregate population of the twenty-six towns, which is 985,453. This rate is 2·9 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years except 1886—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	23·4	16·1	20·5	18·2	18·0	19·8	16·4

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 14th June 1890.	21st June 1890.	28th June 1890.	5th July 1890.	Towns.	Weeks ending— 14th June 1890.	21st June 1890.	28th June 1890.	5th July 1890.

					Poori	21·0	29·4	14·7	28·1

It will be seen that last week the highest birth-rate was returned from Chittagong (42·3) and the lowest from Kishnagar (1·9).

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 19·6 per 1,000 of the population. The rate of the week is 4·8 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1888—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	28·5	22·5	23·4	18·4	29·0	24·4	19·6

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 14th June 1890.	21st June 1890.	28th June 1890.	5th July 1890.	Towns.	Weeks ending— 14th June 1890.	21st June 1890.	28th June 1890.	5th July 1890.
Burdwan	19·8	15·3	19·8	16·8					
Midnapore	15·8	20·1	26·3	21·7	Naraingunj	24·8	18·6	20·7	8·3
Hughli and Chinsurah	29·5	19·7	27·9	23·0	Chittagong	11·7	16·4	23·5	37·6

					Poori	135·9	2[illegible]·0	2[illegible]·6	80·0

It will be seen that last week the highest mortality occurred in the town of Poori (86·) and the lowest in Ranaghat (6·).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Small-pox.*	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Poori ...	27·3	Hughli and Chinsurah ...	4·9	Comillah	34·7	Darjiling ...	22·2	Poori ...	25·2
Mozufferpore ...	14·6			Darjiling	29·6	Poori ...	14·6	Serampore	15·7
Arrah ...	13·2							Chittagong	11·7
Durbhanga ...	6·3								

The total mortality from the several registered death-causes in the twenty-six towns amounted to 3·3 from cholera, against 7·6 per 1,000 in the preceding week; ·5 from small-pox, against ·3; 8·1 from fever, against 8·5; 2· from bowel-complaints, against 3·2; ·3 from injury, against ·6; and 5·4 from other causes, against 5·3 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	20·8	Christians ...	22·5	Under 1 year ...	160·9
Females	18·4	Hindus ...	18·9	1 and under 5 years ...	31·2
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	113	Mahomedans ...	21·3	5 „ 10 „ ...	12·6
		Budhists ...	25·7	10 „ 15 „ ...	12·8
				15 „ 20 „ ...	13·7
				20 „ 30 „ ...	9·5
				30 „ 40 „ ...	10·6
				40 „ 50 „ ...	13·1
				50 „ 60 „ ...	19·1
				60 years and upwards ...	48·1

W. H. GREGG, *Dip. Publ. Health, Camb.*,

The 22nd July 1890.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 5th July 1890.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during five weeks and two days ended 30th June 1890.

INCREASES.

Cotton.—This is a continuation of the increase reported throughout the half year; the increase was chiefly in despatches from the Bombay, Baroda and Central India Railway *vid* Agra to Calcutta.

Iron.—Consisted chiefly of iron pipes for Segowlie on the Tirhoot State Railway, and for Allahabad and Agra and machinery for Delhi.

Ghee.—The increase occurred in long distance despatches from stations on the Tundla district to Howrah for local consumption.

Railway material, Foreign.—Chiefly in despatches from Howrah to Delhi, Umballa and Umaria.

Salt.—This increase was chiefly in despatches of imported salt from Howrah.

Stone and marble.—Despatches of road metal from Pakur to Chitpore caused the increase recorded under this head.

Bones.—Chiefly in despatches from Mokameh Ghât, *vid* Digha Ghât and *vid* Mogulserai, to Bally and Chitpore.

Potatoes.—This increase was in despatches from Patna and Dinapore to Howrah for local consumption.

DECREASES.

Coal and coke.—There was an increase in the weight of upwards traffic attended with a decrease in earnings, and this was chiefly in despatches for the Oudh and Rohilkhund and the North-Western Railways. The falling off in the downward traffic was due to want of tonnage for export to coast ports and to smaller demand by Eastern Bengal State Railway stations.

Piece-goods, European.—Chiefly in despatches from Howrah and Bombay *vid* Jubbulpore, due to the dull state in the trade generally

Gunny bags.—Due to the dull state of the markets for linseed and wheat.

Wheat.—The falling off was due to there being no demand for export to Europe.

Gram and pulses.—Chiefly in despatches from stations on the "D" district owing to the crops having been nearly destroyed by severe frosts last winter.

Rice (husked and unhusked).—As reported in previous months, the falling off was entirely in upwards rice traffic.

Other rain and spring crops.—Due to large despatches last year of cheap food-grains to stations in the North-West Provinces and on the Gya and Tirhoot State Railways.

Brass and copper.—Chiefly in despatches from Howrah to Mirzapur and other stations owing to high prices.

Seeds.—The decrease was chiefly in linseed to Howrah for export owing to large stocks being held back in up-country markets for better prices.

Tobacco.—Chiefly in despatches from Mokameh Ghât, Barh, Patna and stations on the Tirhoot State Railway to Cawnpore and Jubbulpore owing to the market being dull.

* The coaching traffic shews a heavy decrease as compared with the corresponding period of 1889, which embraced 13 days as against 12, besides which the figures for the former period included abnormal traffic due to an eclipse of the moon; hence the apparent falling off.

RESOLUTION ON THE SUBJECT OF THE FOUNDATION AND FUTURE MANAGEMENT OF A NEW LEPER ASYLUM FOR CALCUTTA.

RESOLUTION.

MEDICAL.

Dated Calcutta, the 29th July 1890.

READ—

The Annual Reports of the District Charitable Society for the years 1887, 1888, and 1889.

Read—

A letter, dated 28th June 1890, from the Joint Honorary Secretaries to the Prince Albert Victor Permanent Memorial Fund.

The Leper Asylum of Calcutta was first made over to the District Charitable Society in the year 1831, and with a short interruption has remained under the management of that body ever since. It was originally situated at Balliaghatta, but in 1840 was removed to its present site in Amherst Street, which was granted by Government, and new buildings were erected:—these, with additions and improvements made from time to time, are the premises now in use.

The working of the institution during the last three years is shown in the following table:—

	1887.	1888.	1889
Number of patients at the beginning of the year	87	72	84
Number of new patients	51	46	64
Number of re-admissions	78	72	51
Number discharged ...	124	90	88
Number died	21	16	38
	Rs.	Rs.	Rs.
Total expenditure	7,276	8,368	8,975

The number of lepers in the Town and Suburbs, as ascertained by the Census of 1881, is 387, but it seems highly probable that others have escaped enumeration, and that the actual number now existing is largely in excess of these figures. It may, therefore, be said that not more than one-fifth of the ascertained leper population are at any one time in the Asylum. Even with this number the wards are overcrowded.

The disadvantages of the present site have often been pointed out, and have long been acknowledged. It is in the middle of a crowded urban population, its limits are so circumscribed as to preclude material additions to the existing buildings, while the surrounding lands are so valuable that the quantity required could not be obtained except at enormous cost. Again, its accessibility is such as to afford the lepers very easy means of withdrawing themselves from the care and treatment which it is desirable for their own sake, as well as for their fellow-citizens, that they should receive. The statistics quoted above show how frequent these withdrawals are. In his report for 1888, the medical officer remarked that "a great number of lepers take their discharge when they have improved considerably in health by a longer or shorter stay in the Asylum, but these very same lepers are obliged again to be admitted in a worse condition than when they left, with open and foul sores, and with their health deteriorated." Under these circumstances it is obviously most desirable that the Asylum should be removed to some site, where more ample accommodation can be provided, which shall be at some distance from a dense population, which shall be wholesome and convenient for the unfortunate sufferers, and which at the same time shall not be sufficiently easy of access to tempt them to leave it readily.

Hitherto the District Charitable Society has received a grant of Rs. 100 per mensem from the Calcutta Municipality, an annual grant of Rs. 125 from Government for medicines, and the interest, amounting to Rs. 596 a year, of two special Trust Funds. With the exception of the Rs. 1,921 thus obtained, the District Charitable Society has met the expenditure of the asylum from its general funds. In 1889 this excess expenditure amounted to upwards of Rs. 7,000 per annum.

Excluding the grants of the Government and the Municipality, the assets of the Asylum, apart from any share which might be assigned to it from the general funds, are the endowments, the capital value of which is Rs. 19,500, and the site and buildings which are, the Lieutenant-Governor is informed, worth Rs. 80,000.

Sir Steuart Bayley is satisfied that the whole subject is one which can best be considered by a Committee, the composition of which he proposes shall be as follows:—

The President and two members of the District Charitable Society;
The Chairman and two members of the Corporation of Calcutta;
Mr. W. J. Simmons on the part of the Health Society;
A representative of the Permanent Memorial Fund;
Two medical officers to be appointed hereafter.

It is possible that experience may show the necessity of nominating additional members: in this case the Lieutenant-Governor will appoint them.

The appointment of this Committee is in substantial accordance with the wishes of the subscribers to the Permanent Memorial Fund, as expressed by the Joint Honorary Secretaries, who have intimated that the subscriptions in aid of that Fund amount to Rs. 46,328, of which Rs. 20,756 have been realized. This sum, even if only a portion of the balance be collected, will be a material help to the institution which it is proposed now to reform, and Sir Steuart Bayley has observed with satisfaction that the subscribers propose to apply it in this manner rather than to attempt the establishment of an independent Asylum.

In reply to this communication, which reached him in Darjeeling, the Lieutenant-Governor informed the Joint-Secretaries that he would let them know his views after he had returned to Calcutta and consulted the Local authorities; in the meantime a copy of it was communicated to the Calcutta Corporation and to the District Charitable Society. His Honour now finds that no further preliminary references need be made, since there is ample evidence that immediate action is unanimously admitted to be necessary; and he recognizes the anxiety of all parties that this action should be undertaken in combination, and harmoniously carried through to a successful result.

The Lieutenant-Governor will now ask the Calcutta Corporation, the District Charitable Society, and the subscribers to the Permanent Memorial Fund, to nominate their several representatives; on receipt of their replies the Committee will be formally appointed and gazetted. The most obvious topics for the consideration of the Committee appear to be the locality for a new Asylum, the number of inmates for whom accommodation should be provided (on the assumption that no more stringent provision is made for compulsory detention than is contained in the Bill already circulated by the Government of India), the provision of funds for its maintenance and superintendence, the constitution of a governing body, and the regulation of the conditions under which patients are to be admitted, retained and discharged. But this enumeration is not intended to be exhaustive, and Sir Steuart Bayley will be glad to receive the advice of the Committee on any other points which may appear to them likely to promote the successful establishment and management of this most important institution.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 26th July, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
BURDWAN DIVN. 1	Burdwan July 26, '90	5·88	Weather—rainy and seasonable. Transplantation of *amun* and *aus* going on Sugarcane doing well. Prices of common rice :— Srs. Burdwan ... ... 15 Culna ... ... 13 Cutwa ... . 14 11/12 per rupee. Ranigunge 15
	Culna ...	3·67	
	Cutwa ...	2·95	
	Ranigunge ...	2·22	
2	Bankoora ,, 26, '90	3·03	Weather—warm and cloudy. Transplanting of *amun* rice still going on. Weeding of *aus* continues. Sugarcane thriving. Common rice sells at 18 seers per rupee at Sudder and 17½ seers at Bishenpore.
3	Birbhum ,, 26, '90	5·58	The rainfall of the season has been unusually heavy. Last year (a particularly favourable agricultural year) there were almost exactly 12 inches of rain in each of the months of June, July, August, and September—say 48 inches in the 4 months. This year 34 inches of rain have already fallen before the first 2 months are over. The present condition of the crops is all that could be desired. Prices 15 to 18 seers per rupee for common rice.
	Rampore Haut ...	4·42	
4	Midnapur ,, 26, '90	2·24	Sky overcast; frequent but not heavy rain. Rice doing well everywhere, but the high lands in Tumlook are said to want more rain. Prices of common rice :— Srs. Sudder ... ... 15 Contai ... ... 18 Tumlook ... ... 14½ per rupee. Ghatal 16
5	Hooghly ,, 26, '90	2·06	Weather—showery. State and prospects of crops excellent. Prices of common rice :— Srs. Ch. Sudder ... ... 13½ 0 Serampore ... ... 16 0 per rupee. Jehanabad 14 14
	Serampore ...	1·16	
	Jehanabad ...	4·25	
	Howrah ,, 26, '90	2·24	Weather—showery. Transplanting of *amun* in progress. *Aus*, sugarcane, and jute doing well. More rain wanted in the Uluberia subdivision. Price of common rice 13 to 14 seers per rupee.
	Uluberia ...	0·88	
	Central Districts.		
PRESIDENCY DIVN. 6	24-Pergbs. July 26, '90	2·71	Weather—seasonable. Prospects of *aus* and jute fair. Transplantation of *amun* proceeding briskly. More rain wanted. Prices stationary.
7	Nuddea ,, 26, '90	2·23	Weather—cloudy with occasional rain. Prospects of early rice good. Paddy on low lands in some places is being reaped.
	Kushtea ...	1·38	
	Meherpore ...	2·15	
	Chuadanga ...	1·21	
	Ranaghat ...	1·83	
8	Khoolna ,, 26, '90	3·26	Weather—rainy. Prospects and condition of crops continue favourable. Transplantation of *amun* still going on.
	Bagirhat ...	3·54	
	Satkhira ...	5·28	
9	Jessore ,, 26, '90	2·79	Weather—seasonable. *Aus* harvesting has commenced; outturn expected to be satisfactory. *Amun* and jute doing well.
	Jhenidah ..	2·19	
	Magura ...	0·96	
	Narail ...	0·48	
	Bongong ...	2·45	
10	Moorshedabad ,, 26, '90	7·92	Weather—wet. *Amun* and *aus* doing well. Transplantation going on.
RAJSHAHYE DIVN. 11	Dinagepur ,, 26, '90	5·54	Weather—very wet. About half the *haimanti* paddy has been transplanted. The present rains very favourable for this crop. Prospects of other crops continue favourable. Price of rice as before.
	Thakurgaon ...	3·30	
12	Rajshahye ,, 26, '90	6·65	Weather very seasonable, there being abundance of rain. Prospects favourable throughout the district. Jute is being steeped, with promise of fair outturn. *Aus* coming on nicely. *Amun* is being transplanted.
	Nattore ...	2·36	
	Nowgong ..	6·48	
13	Rungpur ,, 26, '90	2·57	Weather—cool and cloudy with frequent heavy showers. All crops promise well. Jute is being cut. Transplantation of *amun* continues. Sugarcane coming up well.
	Nilphamari ...	1·86	
	Kurigram ...	3·68	
	Gaibanda ...	1·36	
14	Bogra .. 26, '90	2·93	Weather—seasonable. State and prospects of all crops very good. Common rice selling at 19 seers per rupee.
	Sherpur ..	3·92	
	Nowkbilla ...	4·65	
15	Pubna ,, 26, '90	3·31	Weather—hot and cloudy. Prospects of jute, *aus*, and *aman* continue good. Prices have fallen slightly.
16	Darjeeling ,, 26, '90	10·22	Weather—very rainy and cloudy. Excessive rain has done damage to jute in the Terai and has retarded transplantation of *aghani* rice in places. Sunshine is much needed for the tea gardens, and the outturn of tea generally is much behind the average.
17	Julpigoree .. 26, '90	7·84	Weather—seasonable. Prospects of standing crops generally good. Common rice selling at 14 seers per rupee at the Sudder station.

	No.	District and date of return.	Rainfall at each Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—*concluded.*				
		Eastern Districts.		
Dacca Divn.	18	Dacca July 26, '90	2·40	Weather—rainy and cloudy with gleams of sunshine at intervals. Jute and *aus* paddy being harvested. *Aus* paddy has suffered to some extent owing to rapid rise of rivers. Prospects of *amun* and other crops good. Fodder is not available in abundance. Price of common rice stationary.
	19	Furreedpur ,, 26, '90	4·10	Weather—seasonable. Harvesting of *aus* paddy and jute continues. *Amun* doing well. Crops partially damaged in some parts of Madaripore by insects. River rising. Price of common rice stationary.
	20	Backergunge ,, 26, '90	4·45	Weather—seasonable. Prospects of standing crops generally good. Extent of sowing and transplanting of *amun* same as last year. Common rice selling at about 14 seers per rupee.
	21	Mymensingh ,, 26, '90	2·18	Weather cloudy and rainy. *Aus* paddy and jute being harvested. Transplantation of *amun* still going on. Prospects of standing crops favourable. Common rice sells at 13 seers 9 chittacks per rupee.
Chittagong Divn.	22	Chittagong ,, 26, '90	8·05	Weather—seasonable *Aus* crop sown to the extent of over 12 annas. Prospects good. Common rice selling at 17 seers per rupee.
	23	Noakholly ,, 26, '90	6·29	Weather—seasonable. Reaping of *aus* commenced. Prospects generally good. *Amun* crop is being transplanted.
	24	Tipperah ,, 26, '90	4·46	Weather—very rainy and cloudy. Transplanting of *amun* going on. Here and there *aus* and jute being cut. Prospects of paddy good.
	25	Chittagong Hill Tracts.	.	Report not received.
		Hill Tipperah ,, 25, '90	2·60	Weather rainy. Harvesting of *aus* paddy and *til* nearly completed. Transplanting of *amun* continues. Prospects of *jum* crops fair. No change in prices.
BEHAR.				
Patna Divn.	26	Patna ,, 26, '90	2·22	Weather—hot. Transplantation of paddy going on. Prospects of *bhadoi* crops fair, but cessation of rain is required. Harvesting of *cheena* has commenced in the Barh subdivision. Prices of food-grains almost stationary.
		Barh ...	2·00	
		Dinapore .	4·80	
	27	Gya ,, 25, '90	5·44	Weather—cloudy. Transplantation of paddy commenced. Sugarcane doing well. *Bhadoi* has been much injured by excessive rain. Prices of food-grains stationary.
	28	Shahabad ,, 26, '90	15·30	Weather—very wet; cooler. In the Buxar and Sudder subdivisions *bhadoi* crops very much damaged by excess of rain. In Sasseram and Bhabuah prospects of *bhadoi* crops reported to be better. Paddy thriving. Prices stationary.
		Buxar ...	5·95	
		Bhabuah ..	2·75	
	29	Sasseram .	7·42	
		Durbhunga ,, 26, '90	4·71	Weather—cloudy and rainy. Prospects of *bhadoi* crops continue very favourable. Transplantation of rice is being rapidly pushed on. Indigo manufacture in progress. Prices remain unchanged.
		Madhubani ...	5·85	
		Soumastipur ...	9·17	
	30	Mozufferpur ,, 26, '90	7·82	Rainfall during five days of the week. Prospects of all crops excellent, but a few days of sunshine now wanted.
		Hajipur .	4·04	
		Sitamarhi ...	3·64	
	31	Saran ,, 26 '90	3·76	Weather—continually wet: rain every day. Rice very good. *Bhadoi* wants some sun. About ⅔ of *rahar* sown; remainder of the crop will be sown after some fine weather.
	32	Chumparun ,, 26, '90	3·84	Weather—rainy. Heavy rain again last night (24th) and night before Sky still covered with clouds. Sunshine urgently needed to save *cheena*, *makai*, and *marua* from damage. Paddy transplantation continues, but coming to a close. Indigo manufacture progressing.
		Bettiah ...	6·21	
Bhagulpore Divn.	33	Monghyr ,, 26, '90	3·80	Weather—cloudy and rainy. *Makai* and *marua* doing well, also *aghani* rice. Transplanting going on.
		Begusarai ...	1·73	
		Jamui ...	6·45	
	34	Bhagulpur ,, 26, '90	2·81	Weather—rainy with a good deal of cloud. There has been enough rain everywhere for the crops except in the north-east of Soopool, where it is reported scanty. Transplantation is being vigorously pushed on, and standing crops are doing well. Harvesting of *cheena* and *janera* commenced, and outturn likely to be good.
		Banka ..	6·12	
		Mudhepura ..	3·89	
		Soopool ...	3·23	
	35	Purneah ,, 26, '90	3·16	Weather—cloudy with showers. Prospects continue favourable, except where floods have done damage in the centre of the district and along the course of the Kusi and Mahanadi. Transplanting going on. A break in the rains would do good.
		Kishengunge ...	3·12	
		Arrareah ...	5·03	
	36	Maldah ,, 26, '90	2·07	Weather—cloudy and rainy. Harvesting of *bhadoi* commenced in thana Ratua and outpost Manickchak. About 2 annas of the crop in the Maldah station have been destroyed by inundation. Transplantation of winter rice in progress. Manufacture of indigo is being pushed on vigorously. Common rice selling at from 14 to 16 seers per rupee.
		Chanchal ...	2·43	
		Shibgunge ...	4·12	
		Gajole ...	5·67	
	37	Sonthal Pergns. ,, 26, '90	4·04	Weather—wet and cloudy. Rain every day, and cultivators are very busy transplanting paddy. *Janera* coming up well, and all other crops progressing satisfactorily.
		Deoghur ...	6·96	
		Godda ...	6·60	
		Jamtara ...	5·82	
		Pakour ...	2·50	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack July 26, '90	5·48	Weather—seasonable. Transplanting of *sarad* and weeding of *beali* going on. Slight damage of the paddy crop from the rise of the rivers is reported from the Jhalkuri chakla of the Jajpur subdivision. Prospects generally good.
	39	Pooree ,, 24, '90	2·10	Weather—seasonable. Puddling and transplanting of *sarad* crop going on. *Beali* being weeded. Price of common rice stationary.
	40	Balasore ,, 26, '90	2·29	Weather—seasonable. Transplanting and puddling of rice crop continue. Prospects generally good. Number of coolies on relief-works 48.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh July 26, '90	5·69	Weather—seasonable. A break in the rains required. Transplanting of rice in progress. Some injury to Indian-corn by heavy and incessant rain, otherwise prospects good. Common rice selling at from 15 to 18 seers per rupee.
	42	Lohardugga ,, 26, '90	3·39	Weather—seasonable. Rain daily during the week. Sowing of winter rice crop finished. Transplantation commenced. *Bhadoi* crops doing well.
		Palamow (up to 21st July)	6·85	
	43	Singbhoom July 26, '90	1·88	Weather—seasonable. Condition of crops very favourable in all parts of the district. Prices of common rice range from 20 to 24 seers per rupee.
	44	Manbhoom ...	..	Report not received.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	31·90

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for th
The Assumidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The ant
for the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the
Means in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

arly. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.
ng cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means
ns. The means o the district are the numerical average of the rainfall returns received in the districts, i.e., from total rainfall at the sub-divisional

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 29th July* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 25TH OF JULY 1890.

WEATHER conditions during the past week seem to have been influenced by a very shallow depression which, forming at the beginning of the week in the north-west corner of the Bay, moved slowly towards the mouth of the Hooghly, and without being immediately followed by either stormy weather or heavy rain, passed over part of South-West Bengal and Chutia Nagpur. On Friday the 19th, pressure was lowest at False Point after a very slow fall of a thirtieth of an inch, but the formation of the depression was accelerated by a gradually increasing rise of pressure towards the north-west, where it exceeded a twentieth of an inch. Winds had a tendency to take cyclonic directions, but were everywhere feeble in force. Temperature was rising rather rapidly over the eastern half of the province, and falling moderately elsewhere, the rainfall having become much more scattered in East and North Bengal than it had been for some days In Orissa, Chutia Nagpur, and Behar general rain was falling, and amounts were considerable at many of the stations in the last. On the 20th the slow and rather local fall of pressure continued in the north-west corner of the Bay and adjoining districts, the depression intensifying slightly and the centre appearing to be about south of Saugor Island, where pressure was lowest and about ·15 inch below the normal. The wind circulation was cyclonic in Orissa, South-West Bengal, and Chutia Nagpur, but in the other districts the usual easterly or south-easterly directions prevailed, and though there was a considerable increase of velocity from that of the previous day, it still remained below the average. Heavier rain was falling in Orissa, but in the other districts falls were lighter and less general, especially in North Behar and North Bengal, where possibly, owing to the indraught to the low-pressure area, rainfall to a large extent ceased. On the 21st the depression had advanced as far as Bankoora, pressure falling briskly at a few stations in that neighbourhood and slowly over the rest of the province. There was no further increase of intensity, and it was evidently beginning to fill up, the area within which defect was more than a tenth of an inch including the greater part of South-West Bengal and Orissa and the eastern half of Chutia Nagpur, and the largest defect being only ·13 inch at Midnapore. Wind velocity increased to rather more than 20 miles an hour in the north-west corner of the Bay, so that weather was never stormy to the rear of the depression, vessels arriving from the Bay reporting only fresh or strong breezes with rain squalls and rough sea. Rainfall diminished in Orissa and became more general and heavy in South-West Bengal and Chutia Nagpur, while general light rain was received in the other districts. On the 22nd the depression had left the province, and pressure was lowest in South Behar; but as pressure was rising very slowly in the southern districts, a diffused shallow low-pressure area covered the whole of the western half of the province Ordinary monsoon weather prevailed, light rain falling at almost all stations, and very few heavy falls occurring; but in South Behar and the north of Chutia Nagpur falls were nearly all between 1 and 2 inches. On the 23rd a brisk rise of pressure set in, continuing on the 24th, and general heavy rain fell in all districts except Orissa. Easterly winds continued in the northern districts till the 24th, but on this day westerly winds were blowing in South Behar and the southern districts, and on the last day of the week over the whole province. It would appear that after the filling up of the depression on the 23rd and 24th the inrush of westerly winds, interfering with the moist current following the depression from the Bay, has caused the much more generally heavy rain than fell about the middle of the week immediately after the passage of the depression.

Pressure—Changes have generally been small, never exceeding a tenth of an inch, and only on one or two days exceeding a twentieth of an inch; these occurring near the depression while passing over the province, and during the brisk rise on the 23rd and 24th. Defect was over a tenth of an inch in the western districts in the early part of the week, and as there was very little change till the 23rd, means for the week are generally considerably below the normal. In Orissa, South-West Bengal, Chutia Nagpur, and Behar, mean defect is over a twentieth of an inch, while in the eastern half of Bengal and Assam it is about four-hundredths of an inch.

Temperature—Owing to the almost continuous rain, has been everywhere below the nomal, defect in Behar being nearly 2°, in Chutia Nagpur 1·4°, Assam 1·3°, North Bengal 1·1°, South-West and East Bengal ·7°, and Orissa ·5°. On the first day of the week it fell rapidly in Behar and slowly over the western half, while it rose moderately in the eastern half of the province. On Sunday there was an almost general rise followed by slight irregular changes till Thursday the 24th, when a general fall set in and continued till the end of the week.

Rainfall—Though generally light or moderate, almost continuous rain has fallen in all districts, the number of rainy days being one and in Behar and Chutia Nagpur two above the average. The mean falls are consequently everywhere above the normal; the greatest difference occurring in Behar and Chutia Nagpur, where falls are double the normal. In Chutia Nagpur the average fall is 5·2 inches, or 2·4 inches above the normal; in South Behar 4·6 inches, excess being 2·3 inches; in North Behar 4·36 inches, excess 2 inches. The other falls are—East Bengal 4·2, North Bengal 4, Orissa 3·4, and South-West Bengal 2·5 inches, excess varying from half an inch in the last two to 1·4 inches in North Bengal.

Actual falls generally lie between 2 and 5 inches over the greater part of the province, but detached areas occur within which they are usually over 5 inches. These are—Chittagong, Backergunge, and Noakholly in East Bengal, the heaviest falls being 11 inches at Cox's Bazar, 8·5 inches at Fenny, and about 7·5 inches at Rangamati and Bauphal; Julpigoree and the Darjeeling Hills in North Bengal, Bhagatpore, Darjeeling, Kalimpong, and Kurseong reporting more than 10 and several others more than 7 inches; North Bhagulpore in North Behar, and Hazaribagh, Lohardugga, and Manbhoom in Chutia Nagpur. The heaviest falls in Behar and Chutia Nagpur are—Mozufferpore 7·8, Dehree 7·5, Sasseram 7·7, Arrah 14·5, Bickram 7, Hazaribagh 8, Karagdeha 7, Palamow 10·2, Raghunathpore and Jhalda 7 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 25th of July 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

Meteorological Office, India;
The 28th July 1890.

MEMORANDUM.

Monthly review of deaths registered in forty-five districts of Bengal for the month of April 1890.

[THE delay in the publication of this review is due to the non-receipt of the Gya district return, which was not received in this office till the 23rd instant, or nearly *three* months after the month to which it relates.]

The deaths registered in forty-five districts of Bengal during the month of April 1890 were 138,245, and correspond to an annual rate of 25·08 per 1,000 of the aggregate population of those districts, which is 65,859,534. The rate is 1·56 higher than the mean rate of corresponding periods of the five years 1885—89, and is also higher than the rate of the corresponding periods of any of the past five years except 1889, *vide* the figures below—

	April 1885.	April 1886.	April 1887.	April 1888.	April 1889.	Monthly average of five years, 1885—89.	April 1890
Ratio of deaths per 1,000 of the population per annum	21·36	20·88	22·80	23·76	28·56	23·52	25·08

The following table shows the highest proportions of deaths registered during the month of April 1890, compared with the corresponding month of 1889 :—

Districts.	Ratio per *mille* during— April 1890.	April 1889.	*Districts.*	Ratio per *mille* during— April 1890.	April 1889.
Darjiling ...	49·56	44·16	Hughli ...	28·44	23·16
Bhagulpore ...	45·36	33·96	Pubna ...	27·72	29·52
Julpaiguri ...	41·52	44·52	Backerganj ...	27·72	42·12
Noakhali ...	32·64	41·88	Shahabad ...	27·48	20·16
Rajshahye ...	32·04	36·72	Serampore ...	27·24	21·60
Maldah ...	31·08	38·04	Birbhum ...	26·88	30 48
Hazaribagh ...	30·24	24·72	Patna ..	26·88	18 60
Jessore ...	29·88	28·68	Gya ...	26·88	20·16
Purneah ...	29·76	98·04	Bogra ...	26·52	28·08
Durbhanga ...	29·64	15·24	Howrah ...	25·80	20·40
Monghyr ...	29·16	23·76	Faridpore ...	25·80	37·68
Rungpore ...	28·56	25·44	Dinajpur ...	25 56	33·60

The total mortality during the month under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding month of 1889 and the average of the five years 1885—89 :—

	Ratio per *mille* during— April 1890.	April 1889.	Monthly average of five years 1885—89.
Cholera	3·00	6·00	3·84
Small-pox	·36	·24	·12
Fever	17·64	17·64	15·24
Bowel-complaints	·60	·72	·72
Injury	·24	·24	·24
Other causes	3·00	3·48	2 88

The highest annual death-rates from the several registered death-causes occurred in the following districts :—

Cholera.	Ratio per *mille.*	*Small-pox.*	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes*	Ratio per *mille.*
Bhagulpore ...	21·84	Chumparun ...	2·40	Julpaiguri ...	38·76	Poori ...	12·24
Durbhanga ...	8·88	Patna ...	2·16	Darjiling ...	36·12		
Purneah ...	8·88	Poori ...	2·16	Rajshahye ...	28·92		
Faridpore ...	6·84			Noakhali ...	27·24		
Maldah ...	6·84			Hazaribagh ...	26·28		
Monghyr ...	6·00			Pubna ...	24·96		
Chumparun ...	5·16			Shahabad ...	24·24		
Jessore ...	4·44			Rungpore ...	23·88		
Backerganj ...	3·96			Gya ...	23·88		
Tipperah ...	3·72			Jessore ...	23·28		
Mymensing ...	3·24			Dinajpur ...	22·92

Howrah ...	2·68						
Hughli ...	2·64						
Murshedabad ...	2·28						
Noakhali ...	2·16						
Patna ...	2·04						

The mortality of the month under review, according to *Sex*, *Class* and *Age*, was distributed as follows :—

According to Sex.	Ratio per *mille.*
Males	27·84
Females... ...	22·44
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population ...	124

According to Class.	Ratio per *mille.*
Christians ...	11·40
Hindus ...	25·32
Mahomedans ...	25·20
Buddhists ...	15·96
Other classes ...	20·16

According to Age.	Ratio per *mille.*
Under 1 year	160·80
1 and under 5 years ...	28·08
5 „ 10 „ ...	13·68
10 „ 15 „ ...	12·12
15 „ 20 „ ...	16·68
20 „ 30 „ ...	16·68
30 „ 40 „ ...	18·96
40 „ 50 „ ...	24·96
50 „ 60 „ ...	36·00
60 years and upwards ...	57·36

Detailed information regarding the mortuary statistics of the forty-five districts of Bengal during the month under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 24th July 1890.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,

W. H. GREGG, *Dip. Publ. Health, Camb.*,

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 12th July 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 12th July 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 18·2 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 1·3 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years except 1886 and 1889—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	23·2	17·7	18·5	19·9	18·2	19·5	18·2

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 21st June 1890.	28th June 1890.	5th July 1890.	12th July 1890.	Towns.	Weeks ending— 21st June 1890.	28th June 1890.	5th July 1890.	12th July 1890.
Burdwan	7·6	19·8	16·8	13·7	Narainganj	58·0	12·4	4·1	20·7
Midnapore	3·1	20·1	17·0	23·2	Chittagong	23·5	21·1	42·3	28·2
Hughli and Chinsurah	14·8	18·1	26·3	18·1	Comillah	11·5	38·5	34·7	3·8

Dacca	7·8	9·7	11·0	9·7					

It will be seen that last week the highest birth-rate was returned from Monghyr (38·9), and the lowest from Purneah (3·5). No births were registered during the week in Utterpara town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 21·4 per 1,000 of the population. The rate of the week is 5·2 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1888—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	36·2	23·5	24·0	21·1	28·6	26·6	21·4

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 21st June 1890.	28th June 1890.	5th July 1890.	12th July 1890.	Towns.	Weeks ending— 21st June 1890.	28th June 1890.	5th July 1890.	12th July 1890.
Burdwan	15·3	19·8	16·8	22·9	Narainganj	16·6	20·7	8·3	24·8
Midnapore	20·1	26·3	21·7	23·2	Chittagong	16·4	23·5	37·6	30·9
Hughli and Chinsurah	19·7	27·9	23·0	21·3	Comillah	11·5	34·7	46·2	26·9
Serampore	15·7	29·4	20·4	29·4	Patna	15·3	14·3	15·3	14·9
Utterpara	28·3	...	9·4	18·9	Gya	34·8	27·3	26·0	32·1
Howrah	13·0	8·6	8·6	11·5	Arrah	37·1	46·5	31·1	35·9
Bali	17·5	10·5	24·6	3·5	Mozufferpore	26·8	36·5	31·6	31·6
Kishnagar	...	...	13·3	3·8	Durbhanga	21·2	25·0	17·3	23·6
Ranaghat	6·0	...	6·0	18·0	Chupra	14·1	19·1	8·0	21·1
Santipore	15·8	7·0	14·0	8·8	Bhagulpore	18·1	16·8	15·4	15·4
Jessore	30·7	13·2	18·4	30·6	Monghyr	17·2	19·9	9·0	25·3
Rampore Beauleah	23·6	15·8	15·8	10·5	Purneah	10·4	27·7	10·4	13·9
Darjiling	37·0	59·3	51·9	22·2	Poori	362·0	245·5	80·0	65·0
Dacca	17·5	19·5	21·4	15·6					

It will be seen that last week the highest mortality occurred in the town of Poori (65·), and the lowest in Bali (3·5).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Arrah ...	15·5	Jessore ...	30·6	Poori ...	16·8
Midnapore ...	13·9	Poori ...	29·3	Serampore ...	13·7
Mozuffer pore ...	12·2			Gya ...	13·0
Poori ...	10·5			Monghyr ...	9·9
Serampore ...	7·8				
Chupra ...	7·0				
Monghyr ...	4·5				

The total mortality from the several registered death-causes in the twenty-seven towns amounted to 3·7 from cholera, against 3·1 per 1,000 in the preceding week; ·5 from small-pox, against the same ratio; 8·6 from fever, against 8·5; 2·1 from bowel-complaints, against 1·9; ·5 from injury, against ·4; and 6· from other causes, against 5·6 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	23·0	Christians ...	22·4	Under 1 year ...	196·7
Females	19·7	Hindus ...	22·7	1 and under 5 years ...	29·7
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	116	Mahomedans ...	18·4	5 „ 10 „ ...	13·7
				10 „ 15 „ ...	15·7
				15 „ 20 „ ...	10·9
				20 „ 30 „ ...	11·3
				30 „ 40 „ ...	13·1
				40 „ 50 „ ...	12·5
				50 „ 60 „ ...	22·8
				60 years and upwards ...	46·7

Detailed information regarding the vital statistics of the twenty-seven towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 28th July 1890. *Sanitary Commissioner for Bengal.*

Comparative Statement of the principal commodities carried over the Bengal Central Railway during the month of May 1890.

	Tons.
INCREASES.	
Betel-nuts	1,712
Principally from the Bengal Central Flotilla Company.	
DECREASES.	
Coal	590
The decrease is due presumably to there being a sufficiency of stock at Bongong and Khoolna.	
Jute, unscrewed	214
The decrease was in despatches from Khoolna, and is said to be due to the dullness of the market.	
Seeds	1,307
The decrease was general throughout the district, and is said to be due to short crops. The market in Calcutta was also bad.	
Sugar	1,828
The foregoing remark applies to this item also. Muslandpur, Gobardanga, Jadabpur, Nabharan, Jhikargacha, and Jessore are the principal sugar-manufacturing stations, and all exhibit decrease; that from Jhikargacha being 18,379 maunds.	

F. P. QUINLAN,
Examiner of Accounts.

CALCUTTA, *the 26th July* 1890.

RESOLUTION ON THE ANNUAL REPORT ON THE CALCUTTA MEDICAL INSTITUTIONS FOR THE YEAR 1889.

RESOLUTION.

MEDICAL.

Dated Calcutta, the 30th July 1890.

READ—

The Report on the Calcutta Medical Institutions for 1889.

Read also—

The Report for 1888 and the Resolution recorded upon it.

1. The year 1889 was not remarkable for any great increase or decrease in the recorded mortality; but it is necessary to bear in mind that changes have been recently made in the boundaries of the Suburbs, and that the figures relating to this area cannot be accurately compared with those for former years. The number of deaths from cholera in Calcutta and Howrah was far less numerous than in 1888, and in the Suburbs the decrease in the figures has been so large as to justify the belief that, even allowing for the change in boundaries, there was a real and substantial decrease in the actual prevalence of the disease. The mortality from small-pox, which in the years 1886, 1887 and 1888, had been trifling in comparison with that of former years, suddenly increased, though not sufficiently to cause serious anxiety. The death-rate from all causes in the town was 26·9, as against 26·97 in 1888, and in Howrah 22·71, against 21·68.

2. The following table shows the number of persons treated, as in-door or out-door patients, in the several hospitals during the past two years :—

	1889.				1888.			
	Total treated.			Died per mille of treated.	Total treated.			Died per mille of treated.
	In-door.	Out-door.	Total.		In-door.	Out-door.	Total.

Grand Total ...	24,330	197,210	221,540	120·13*	22,612	231,094	253,706	124·05*

* Reckoned on cases treated, exclusive of cases treated in the ophthalmic ward of the Medical College Hospital.

The increase in the number of in-door patients, although distributed among all the charitable institutions, except the Mayo Hospital and its dependencies, was very considerable in the Campbell Hospital, which is resorted to by paupers, and is attributed by the Inspector-General of Civil Hospitals to the high price of food-grains which prevailed in Calcutta and the surrounding districts for a great part of the year. The falling off in the number of out-door patients amounts to 37,350 in the Mayo Hospital, and is said to be due to the operation of a new rule under which the institution is closed on Sundays. Dr. Hilson takes exception to this practice, and remarks that it should not have been introduced without the sanction of Government, as it is likely to lead to great confusion in the preparation of annual statistics. This no doubt is true, but the point is not one in which the Government need interfere with the discretion of the Governors of the Mayo Hospital. In Howrah there was a decrease of 916 in the attendance of out-patients. In reference to the action of the Superintendent of the Howrah Hospital in refusing medicine and medical attendance to well-to-do out-patients, the Inspector-General observes that, "although some such restriction on the attendance of people of this class is much to be desired, the change should not be introduced without the sanction of Government, and, if made at all, it should be applicable to other charitable medical institutions in Calcutta." In this connection the attention of the Inspector-General will be drawn to the orders of Government contained in circular No. 1, dated the 1st January 1880, directing that, in the case of hospitals and dispensaries at the Presidency and in the Suburbs, where there are druggists' shops, and where advice and medicines can be obtained otherwise than at charitable institutions, out-door relief shall be, as far as possible, restricted to those whose circumstances do not admit of their seeking and obtaining it elsewhere on payment. These orders are moreover applicable to other hospitals in Calcutta and its suburbs.

3. Only 31,338 women and 51,439 children were treated in the various institutions to which the report refers in 1889 as compared with 36,030 women and 59,404 children in 1888. This falling off is undoubtedly due in no small measure to the very successful management of the Lady Dufferin Hospital by Mrs. Foggo. The death-rate in all Hospitals, excluding the Eye Infirmary, rose from 124 to 126, the rates for the Campbell and Howrah Hospitals, where paupers are treated, and into which many moribund and incurable cases are admitted, being, as usual, very high. Though the general death-rate was slightly higher than in the preceding year, which again showed a slight increase on the years 1887 and 1888, it was still much below the average of the years 1879—85.

4. Whatever form of treatment was adopted in cholera cases, about half the patients died, and the Lieutenant-Governor regrets to learn that the experiments made with the new remedy, salol, which has been tried with success by Dr. Nicholson in Patna, were not followed by encouraging results. Cases of enteric fever still continue rare in Calcutta, and remittent fever appears to be on the decrease.

5. There were 1,143 admissions for venereal diseases, against 1,064 in the previous year. In commenting on these figures, Dr. Hilson observes :—

"It should be borne in mind that the figures represent only the in-door patients, and that many more cases were treated either in the voluntary lock-

hospitals or in the out-door department of the other hospitals. Hitherto the system of classifying these affections has been extremely faulty, owing to the absence from the printed returns of any heading for venereal diseases other than those in group A, and the consequence has been that a large proportion of cases have been entered under other headings, and have not been taken into account when estimating the prevalence of venereal disease. This circumstance was pointed out during the year to the Government of India, with the result that the insertion of a heading as above mentioned has now received official sanction, and in future it will be possible to draw more correct conclusions regarding the extent to which these affections are prevalent."

6. The number of important surgical operations in the Calcutta institutions rose from 1,719 in 1888 to 1,926, and the minor operations from 20,264 to 20,933. There were 80 deaths after operation, the rate of mortality being 39 per mille (including the cases left over from the previous year) as compared with 46 per mille in 1888. The Lieutenant-Governor agrees with the Inspector-General in considering that these results are satisfactory evidence of the skill of the operators and of the care taken of the patients.

7. On the subject of entrusting a larger number of surgical operations to House Surgeons and senior students, Dr. Hilson observes:—"The Medical College Hospital is designed primarily for the treatment of the sick, but it is also intended for the practical instruction of natives in medicine and surgery, and it seems to me that more opportunities of performing operations might be given to the House Surgeons and advanced students. To the want of such opportunities is to be traced in some measure the small amount of surgical work performed in Bengal by Assistant Surgeons after they leave the College and begin to practise in the districts. I know it has been urged that House Surgeons and senior students in the large English Hospitals are only allowed the privilege of operating on patients to a very limited extent, and that the high reputation which the Medical College Hospital at present enjoys might suffer if a different course were followed, and many operations were performed by inexperienced and unskilful hands. To this it may be replied that India is not England, that the Indian student requires a more practical training than his English *confrère* to fit him for the active duties of his profession, and that there is no necessity to entrust him with other than the more simple operations, which might be satisfactorily performed under the immediate supervision of the senior officers of the surgical wards. At the Mayo Hospital, Lahore, the Assistant Surgeons and senior students are allowed to perform a considerable number of the major operations every year, and this system of training the students and enabling them to acquire confidence in their own capabilities does not seem to detract in any way from the usefulness and reputation of that institution." Sir Steuart Bayley would commend these observations to the careful consideration of the Medical College Council.

8. In the Eden Hospital 2,435 women and children were treated against 2,668 in the previous year, showing a decrease of 233 cases. Owing to want of accommodation when the building was under repairs, many applicants had to be refused admission. Of the 2,435 patients treated, 832 were Europeans and 1,603 natives. The deaths among the former amounted to 29, and among the latter to 56. The number of confinement cases fell from 513 in 1888 to 497; the mortality among this class of patients being 18 against 20 in 1888. The very few cases of septicæmia which occurred in the Hospital show that antiseptic precautions were carefully enforced in all cases of labour. The importance of these precautions has been fully impressed on the nurses, and it is hoped that no pains will be spared to eliminate this dangerous and fatal disease. The steam laundry sanctioned for this institution is not yet ready for use, owing to some delay in fitting it with the requisite machinery. Certain alterations made by Dr. Joubert in the classification of obstetric and gynæcological operations, are likely to produce some confusion in the annual returns, but appear, at the same time, to be unavoidable, as, in the absence of any recent orders on the subject, difficulty is often experienced in the classification of these operations. With a view to ensure one uniform system in the different hospitals, the Inspector-General suggests that the classification sanctioned in the Resolution of the Government of India, No. 129, dated the 21st February 1877, should be revised. The Lieutenant-Governor agrees in these remarks, and will consult

the Inspector-General of Civil Hospitals with a view to formulating the alterations which may be recommended to the Government of India.

9. In the Ezra Hospital 1,438 out-patients and 236 in-patients, most of whom were Jews, were treated during the year. Of the in-door patients 153 were cured, 43 relieved, 26 otherwise discharged, and 3 died. These figures show that the benefits conferred by this institution are fully appreciated by the Jewish community.

10. The Lieutenant-Governor is glad to find that the nurses employed in the hospitals continue to discharge their duties thoroughly and well, and has read with great pleasure the high praise accorded by Dr. Hilson to the ladies of the Clewer Sisterhood in speaking of the indefatigable services rendered by them in supervision and in tending the sick. Four permanent nurses were appointed this year to the Eden Hospital, as it was considered dangerous to rely exclusively on temporary nurses, many of whom do not possess sufficient experience in the work. Twelve European and Eurasian nurses passed their examination, two of them with great credit.

11. The invested capital of the Calcutta institutions shows a decrease of Rs. 8,500; securities to the value of Rs. 12,000 were withdrawn, and applied to the construction of a new moribund ward in the native department of the Howrah Hospital. The total income during the year, including the opening balance, amounted to Rs. 5,21,390; of this sum Rs. 3,46,858 were contributed by Government. The total expenditure, excluding the amount invested, was Rs. 5,01,970, against Rs. 4,27,082 in 1888. The increase was mainly due to a large expenditure on buildings and repairs in the Campbell Hospital, while the increase in the amount contributed by Government is due to the entire cost of the Police Hospital having been met from Provincial Funds. The Inspector-General remarks that the Calcutta Municipality contributed nothing towards the Mayo institutions, and that it is time to consider whether, in view of the fact that Government has undertaken all charges on account of Calcutta Police, the Municipality should not relieve the Government of its contribution towards the medical charities of the city. It has already been pointed out to Dr. Hilson that the entire relief afforded to the Municipality by the reduction of police estimates is hypothecated to the improvements of the Suburbs, and that, so far as this argument is concerned, it affords no ground for asking the Municipality to undertake all charges on account of the medical relief of the town.

12. The thanks of Government are due to Dr. Hilson for his careful and interesting report.

ORDER—Ordered that a copy of the Resolution, with a copy of the Report, be submitted to the Government of India for information.

Ordered also that a copy of the Resolution, be forwarded to the Inspector, General of Civil Hospitals for information and guidance; that a copy of the Resolution, and of the Report, be forwarded to the Chairman of the Calcutta Corporation and to the Commissioner of Police, Calcutta, for information, and that a copy of the Resolution be forwarded to the Governors of the Mayo Hospital and to the Commissioner of Burdwan for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secretary to the Govt. of Bengal.

RESOLUTION ON THE INLAND EMIGRATION REPORT FOR THE YEAR 1889.

GENERAL DEPARTMENT—INLAND EMIGRATION.

Calcutta, the 31st July, 1890.

RESOLUTION.

READ—

The Report of the Superintendent of Emigration, Calcutta, No. 937, dated 30th April, 1890, on Inland Emigration for the year 1889.

Contractors' emigrants.

Emigration to Assam is now conducted on three different systems, which work on lines so distinct that it is convenient to deal separately with the facts and figures as to each set forth in the report. That first established, of transmission by contractors, contemplates full supervision by Government over the character of recruiters, the execution of labour contracts, and the sanitary arrangements for the journey. Under it 1,835 labourers were engaged during the year 1889, of whom only 1,442 actually started, a number small by comparison with the results obtained on the rival systems, but considerably greater than that returned for the previous year. The increase is attributed by the Superintendent of Inland Emigration to the opening of a new depôt; and it is also to be remembered that there has been a reaction among exporters of labourers in favour of increased control by Government in this department. Eighty-two recruiters were licensed during the year, a number which appears large, as the majority of the emigrants engage in the 24-Pergunnahs and Burdwan, where they are strangers, having in all probability been really recruited in their own districts by men who have not taken out licenses. Two licenses were cancelled for very sufficient reasons. The number of desertions is considerable (168), as also that of discharges from depôt (132), and they suggest that the original work of selection was not performed with sufficient care in the interest of employers. The mortality—4 persons in depôt, or ·27 per cent., and 3 persons on the journey, or ·17 per cent.—is not excessive. It is, indeed, clear that under this system every sanitary precaution is taken, and that in this respect it works satisfactorily, whatever its drawbacks in other directions. The contractors' coolies, whether bound for the Surma Valley or for Assam Proper, follow the Goalundo route only.

Sirdari coolies.

2. In the case of labourers engaged by garden sirdars, the employer is primarily responsible for the character of the recruiter, and the arrangements for healthy depôts are less elaborate; but Government supervises the execution of labour contracts and the general arrangements for the journey. The number of labourers engaged by garden sirdars was 10,822, against 12,225 in 1888, a decline which, as the Superintendent observes, is undoubtedly due to the exceptional facilities afforded by the system of Assam contracts. The number of desertions is not known, or the total mortality, as the rule requiring the return of the way-bills which would afford information on these heads, is still very generally neglected. But such way-bills as have been received back from Cachar and Sylhet show that the losses on that route have been very great, 80 deaths having occurred among 2,564 emigrants, being 3·97 per cent. of the whole. This Government is at present in correspondence with the Assam Administration on the subject of effecting improvements on the sanitary supervision over emigrants to the Surma Valley.

Free emigrants.

3. The great majority of the emigrants proceed under the free system, that is to say, without supervision on the part of the State. Of these, 44,401 arrived during the year in Assam, making, with the members of the classes referred to above, a total of 57,058. The emigrants classed as "free" in the Bengal returns generally execute contracts under Act I of 1882 on entering Assam. Of 28,948 of this class of emigrants who passed through Dhubri, all but 780 made such engagements there. A certain amount of sanitary supervision is now exercised over emigration of this class under Bengal Act I (B.C.) of 1889, and the opinions expressed as to the working of that measure are all favourable.

The present report, though it does not show any outbreak of cholera, such as that which occurred on the railway route to Dhubri in 1886, still bears witness to a heavy mortality on that line, which indicates the necessity of increased precautions.

4. The Superintendent notices the fact that a rule was introduced during the year to ensure the provision of a cooked meal for emigrants at Parbatipore, a matter to which the Lieutenant-Governor attaches great importance. As has been indicated by the Magistrate of Rungpore, the rules on the subject of the food to be supplied on the railway journey are not enforced with sufficient strictness, the agents do not seem to be always aware of their responsibility in the matter, and the subordinate medical officers who inspect at certain stations do not notice instances of neglect. Since the close of the year a rule has been passed definitely imposing this duty on such officers. The Superintendent notices the following sanitary measures among others adopted during the year:—

"The supervision of the medical establishments provided for coolies at Kurigram and Kaunia was entrusted to the Medical Officer in charge of the Eastern Bengal State Railway. In the early part of the year the Lieutenant-Governor had under consideration the circumstances connected with the outbreaks of cholera among emigrants on their way to Assam and the means best calculated to check such epidemics.

In addition to the arrangements already sanctioned, viz.—

the remedying of the sanitary defects of the depôts at Raneegunge and in Chota Nagpore;

the construction of a cholera shed at, and the deputing of medical establishment to, Kurigram;

the transference of the medical agency from Magra to Naihati;

arrangements for the proper treatment of emigrants travelling by rail;

report by telegram of cases of cholera on the railway line, and at Goalundo for cases occurring on steamers,

it was further ordered that the private depôts in Calcutta and Raneegunge be inspected and sanitary defects remedied; that arrangements be made at Raneegunge for the disposal of the dead; that a cholera hospital be built at Raneegunge, and a medical officer be deputed to the Raneegunge and Sealdah Railway stations to examine emigrants and prevent those infected starting, and to ascertain the depôt from which the infected coolies came.

Similar inspection and medical assistance to the sick were afterwards ordered at Parbatipore, and it was arranged that the number of coolies to be despatched from stations on the East Indian Railway should be limited to 320 daily; that the carriage of coolies by goods train be discontinued, and the conveyance of coolies in goods wagons be not allowed until suitable wagons had been approved of by a Committee.

The Resolution of the 3rd September, 1889, sanctioned—

(1) The posting of a Civil Hospital Assistant to the charge of the coolie depôt at Raghunathpore in the Manbhoom district.

(2) The construction at Raghunathpore of a cholera mat hospital and the sinking of a masonry well.

(3) The adoption of similar measures at the municipal town of Jhaldah in Manbhoom.

(4) The placing of the Assistant Surgeon of the Giridih sub-division in charge of all the coolie depôts there, and the construction at that place of a cholera mat hospital, also to be in charge of that officer; an extra allowance of Rs. 20 being granted him on this account during the recruiting season.

(5) The adoption of similar arrangements at the sub-division of Govindpore, an extra allowance of Rs. 10 being likewise granted to the Civil Hospital Assistant during the recruiting season.

(6) The appointment of the Assistant Surgeon at Sara on a special allowance of Rs. 20 per mensem, with a compounder on a salary of Rs. 8 per mensem, to supervise the sanitary arrangements of rest-houses there.

A Committee having been formed to consider the question of the use of goods wagons for the conveyance of coolies, certain pattern wagons with improvements in ventilation and as to inlet and exit for passengers were inspected at Kaunia and pronounced suitable for coolies, and the use of such wagons was sanctioned.

A uniform fee of eight annas per head was directed to be charged for the treatment of sick coolies of all classes in railway hospitals.

In November last the inspection at Goalundo before embarkation of all casual coolies proceeding to Assam by the Assistant Surgeon of Goalundo, and the adoption of the arrangements as regards duration of halt and food, which were prescribed for coolies proceeding *vid* Dhubri, was ordered."

5. The general working of Act I of 1882 has to be separately reviewed during the current year, under the orders of the Secretary of State, and it therefore seems unnecessary to comment on this subject at present. Surgeon-Major Comins, the Superintendent of Inland Emigration, has administered the department with much discretion, and the successive Commissioners of Chota Nagpore (Mr. Stevens and Mr. Grimley) have given much attention to the subject, which is of great importance in that division. Mr. Skrine, Magistrate of Rungpore, also deserves mention for his attention to the sanitary requirements of emigrants passing through his district.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

ADMINISTRATION REPORT OF THE METEOROLOGICAL DEPARTMENT, 1889-90.

THE following report is published for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Govt. of Bengal.

The 30th July 1890.

IN accordance with the orders of Government the reports submitted during the past two years have given information regarding the more important changes and working in the department, the full details being reserved for the triennial report, which it is now my duty to prepare. The information given by Mr. Pedler, in his reports for the two past years, regarding the changes carried out in extending the Storm Signal Service, and also regarding the extensive system of changes effected by Mr. Eliot at the commencement of 1889, has been full and complete, and as it is therefore unnecessary that I should repeat the information, I shall confine my attention to the details concerning the ordinary working of the department.

The department was under Mr. Pedler's charge during the past year, with the exception of the period between 5th August and 29th October, when he was on leave. During these months I officiated for him.

The system of work commenced in 1889 has been maintained, and as the changes and improvements then carried out were very thorough, the work of the department has gone on smoothly throughout the past year, and no change of any sort has been required.

One observatory, viz., that at Tezpore in Assam, had to be closed during last year. On the 16th March 1889 the observer reported that the lock of the cage containing the thermometers had been broken open and all the thermometers stolen. As this observatory had not been working satisfactorily for some time, it was decided by the Meteorological Reporter to the Government of India not to issue new thermometers, but to close the observatory.

On the other hand, a new observatory has been started at Mozufferpore in Bengal. In June 1889 it was represented that regular meteorological observations from this station would be of great service to the indigo-planting community, and after due enquiry on this point, Babu C. C. Chatterjee was deputed to select a site and make other arrangements to establish a regular meteorological observatory at Mozufferpore. The best available site was selected, an observer appointed and trained, and with the assistance of the Executive Engineer, Mr. Norman, the shed, &c., were constructed. The Magistrate kindly consented to act as Superintendent of the Observatory. When everything was ready, Mr. Pedler visited Mozufferpore, and, as he found all in a very satisfactory condition, ordered the commencement of the regular work of observation. The first report received was on the 3rd April 1890.

The following table gives the number of stations reporting observations to this department during the past three years:—

Observatories.

1887-88.		1888-89.		1889-90.	
1st Class Imperial ...	1	1st Class Imperial ...	1	1st Class Imperial ...	1
2nd „ „ ...	2	2nd „ „ ...	15	2nd „ „ ...	15
3rd „ „ ...	49	3rd „ „ ...	35	3rd „ „ ...	35
Other stations reporting for the Storm Warning Service only	10	Other stations reporting for the Storm Warning Service only	11	Other stations reporting for the Storm Warning Service only	10

Returns were also received from four voluntary observatories, viz., Tura, Demagiri, Shortt's Island, and Lungleh. The two last stations commenced observations from 1st April and 9th July 1889, respectively.

Vizagapatam is an independent observatory under the direction of Mr. A. V. Nursing Row, who has continued to favour this department with his observations which are received with great punctuality. The department is also now indebted to him for special storm telegrams, which he kindly sends us whenever required in response to our telegraphic request. The thanks of this department are therefore again due to Mr. Nursing Row for his continued valuable assistance in connection with the Bay of Bengal Storm Signal Service.

The following table gives a list of the observatories which have been working during the last three years, together with the names of the observers:—

Personnel of Observatories in Bengal and Assam during the years 1887-88, 1888-89, *and* 1889-90.

NOTE.—The classification of observatories as given in this table dates from 1st January 1889. Previous to this date Dhubri and Saugor Island only were 2nd class and the rest third class observatories. The allowance also was re-arranged, and from 1st January 1889 the allowance was fixed as given for the year 1889-90.

Inspection of observatories.—The following stations were inspected :—

Akyab—Was visited by Mr. Eliot in November 1887 to decide on the question of removing the observatory to a better site, made necessary by the erection of the new telegraph office building close to the thermometer shed. No very satisfactory site was available, but as it was very desirable to retain the observatory at the telegraph office, a new position about as far from the new telegraph office as the observatory was from the old office was chosen. The anemometer was continued at the old site, but the staging was raised to a height of about 36 feet above the ground.

Arrah—Was visited by Mr. Pedler on 25th March 1888. The instruments were all in good order except the barometer. A set of comparative readings made with a standard taken from Calcutta shewed that the barometer was working sluggishly, though the correction had scarcely changed. Another barometer was supplied, and the old one sent back to Calcutta for verification. The observer was well qualified for his duties, and the general condition of the observatory very satisfactory. A second visit was made on the 13th and 14th March 1889 chiefly for the purpose of having the observatory transferred to the Telegraph office, as the observer was unable to take the observations at 8 A.M. A new site for the thermometer shed was selected, and it had the advantage of being more open than the previous position. The new site for the wind instruments, however, was not quite so good. Observations were first taken in the new positions on 1st April 1889.

Bankoora—Observatory was inspected on 21st to 23rd August 1887 by the head clerk, and again on the 4th April 1889 by Mr. Pedler. At the time of the first visit the observatory was in a very unsatisfactory condition, the instruments being nearly all out of order, and the observer ignorant of the rules laid down for his guidance. The instruments were put right so far as was possible at the time, and the local overseer of road cess kindly undertook to see that the wind vane was properly set, and the Magistrate, that the observer made himself acquainted with his instructions.

The second visit was made shortly before 8A.M., the hour for taking the observations, and the observer was found to attend punctually. The observatory was in very good order, all the instruments being clean, and properly set, with the exception of the wind vane, which was not quite perpendicular. The observer was slow in reading the barometer. The observatory was every way in a much better condition than at the previous visit.

Burrisaul—Observatory visited on 4th January 1888, was found to be in very good order. The observer read the instruments quickly and correctly, and kept them clean.

Berhampore—Was visited on the 12th August 1887. The observatory and instruments were in satisfactory order.

Bhagulpore—Observatory has been inspected four times during the past three years, two of the visits being very recent—in August of last year by Babu C. C. Chatterjee, Inspector of Observatories, and again by Mr. Eliot in December. When inspected on 9th and 10th August 1887 the instruments were found to be dusty, but otherwise in good condition.

In August 1889 the shed was found to be in want of repair, and an estimate was prepared for sanction. Comparative readings of the barometer were taken during the two days, with fairly satisfactory results. The thermometers were in good order, but the rain-gauge, anemometer, and wind vane were all unsatisfactory. The rain-gauge was not horizontal and only 6½ inches above the ground, to remedy which a level masonry platform was ordered to be made. The wheels of the anemometer were worn and the wind vane was not working smoothly. Both instruments were replaced by new ones. When the observatory was started in 1883 there were some low trees in the neighbourhood of the wind instruments, and these were found to have grown so as to interfere with the free circulation of the air. At the instance of the Inspector the landlord kindly consented to have the trees cut down. When inspected by Mr. Eliot in December the trees had been removed and the exposure was quite satisfactory. In other respects the observatory was satisfactory, the orders given in August having been carried out. The observer is intelligent, but not very careful and his readings are hence occasionally doubtful.

Bogra—Observatory, inspected on 16th June 1888, was in very good order, various improvements having been made on the shed and a masonry platform made for the rain-gauge. Comparative readings taken with the Calcutta standard showed a very slight error in the station barometer.

Burdwan—Observatory was inspected on 13th August 1887, and again on 13th January 1888. On both occasions the instruments were in good order, and repairs, found necessary on the first visit, were carried out before the second. A new barometer had been supplied shortly before Mr. Pedler's visit on 13th January and comparative readings taken by him shewed that the correction had not varied. Further inspection was not considered necessary

till August 1889 when Babu C. C. Chatterjee went for the purpose of changing the positions of the instruments requiring good exposure, viz., the wind instruments and the rain-gauge. Arrangements were made for altering their positions, and the other instruments were inspected and found in very good order. Comparative readings of the barometer and thermometers were also taken. Objection was afterwards taken by the Civil Surgeon to the position fixed for the wind instruments as being too near the edge of the roof of the registry office building. He suggested that they should be fixed over one of the central walls, and to ensure that there would be no loss of exposure, Mr. Pedler went on the 19th January 1890 to examine the proposed sites. As he had no objection to the central position, the pillars were erected and the instruments removed there on 31st January. The height of the anemometer has been increased from 16 feet to 24 feet, and it can be easily reached for reading and oiling. The exposure is not altogether satisfactory, but it is the best that can be got in the neighbourhood. The fence made round the thermometer shed also encloses the rain-gauge, which is at least five feet from the fence.

Buxar—Was visited by Mr. Pedler on 23rd October 1888. The wet bulb thermometer had been broken the day before, but otherwise the thermometers were in good order. The barometer was not so satisfactory, the mercury in the cistern having become oxidised, and in the tube above the column the mercury was found to have evaporated and adhered in small drops to the glass. Being a Fortin's principle barometer, the evaporation did not affect its accuracy, but the possibility of condensation of mercury in this way is of the greatest importance in the use of instruments constructed on the Kew principle, as any readings taken from one in such a condition would be altogether worthless, a considerable unknown error being introduced. The anemometer was working well, but the wind vane, one of the Roorkee pattern, was working very heavily, chiefly from want of oil. The rain-gauge was rusty, holes having been eaten right through the outer tin case.

Chittagong—Has not been inspected since 1887, when Mr. Eliot found all the instruments in good order. The observer continued to give satisfaction until the last year, when Mr. Tocher, the present Telegraph Master, took over charge of the Chittagong Telegraph Office, who, considering his other duties required all his time, gave over charge to Mr. Mackenzie, a telegraph signaller, on the 1st of April 1889. According to the orders of the Director-General of Telegraphs, the signaller ought to have a thorough knowledge of the methods of reading the instruments and of preparing the code telegram, but Mr. Mackenzie has, throughout the period during which he has held the appointment of observer, made numerous mistakes, and, on the occasion of stormy weather in the neighbourhood of Chittagong in October of last year failed to be of the slightest assistance from his ignorance of the method of framing the telegram by means of the storm signal code used in forwarding additional observations. These observations were of the greatest importance, as any action taken in warning the port of Chittagong would have largely depended on them. This is only one of several cases that have lately occurred when the permanent observer has given over charge before his successor has acquired the necessary facility in reading instruments, or a competent knowledge of the working of an observatory. In some cases no fault can be found with the out-going observer, as his relieving officer may have come from a distance, and time not been available to give full instruction, or to see that he had previously acquired the requisite skill. This excuse cannot be applied in the Chittagong case, as Mr. Mackenzie had been a signaller there for some time, and had either from ignorance or carelessness disobeyed the order of the Director-General of Telegraphs.

In connection with this, I may mention that during the monsoon season last year, the Serajgunge observer went on leave, and his successor was so unqualified for the work and so unwilling to do it, that in the absence of any opportunity of instructing him, the observatory had to be closed until the permanent observer's return.

Later at the very end of the year 1889-90 there was a change of observers at Diamond Island, and the new observer supplied information so out of agreement with the other stations that there was no hesitation in rejecting all his observations. Unfortunately, while he was still on duty, the first storm of

the present season occurred in the near neighbourhood of that station, and knowing the character of his work, I was at a loss to say whether the storm was severe or not.

I have mentioned these three instances which have all occurred within six months to shew the risk of a partial failure of the storm warning system from a man of incompetent knowledge having to take over charge as observer. I understand that quite recently the Meteorological Reporter to the Government of India has been in communication with the Director-General of Telegraphs with a view to have the order revived, viz., that signallers make themselves thoroughly acquainted with the work so as to be able at short notice to assume the responsibility of supplying correct information.

Chupra—Was visited on the 25th January 1888 by Mr. Eliot. The observatory was in every way satisfactory, except that the observer had taken the readings by Madras time instead of local time. The correction for local time was given him, and the rain-gauge removed from the compound of the Road Cess Office to that of the circuit-house. The next visit made was by Mr. Pedler on the 24th March 1889, when he found the observatory in a disgraceful condition and the observer very careless in the performance of his duties. The instruments were found to be more or less out of order and the records very badly kept. Arrangements were then made to transfer the observatory from the Public Works Department to the Telegraph Department, and in September of the same year the Inspector of Observatories was sent to see the observatory started under the superintendence of the Telegraph Department, the Telegraph Master becoming observer. A new shed had been built on the grounds of the Telegraph Office, and some minor defects in it were pointed out and remedied as far as possible. The barometer was removed from the Collector's room to the signal-room, and the difference of level of the two positions ascertained. It was also arranged that the old observer should continue on duty for one month, so as to allow sufficient time for the telegraph master to become thoroughly acquainted with his duties.

Comillah—Observatory was inspected by Babu C. C. Chatterjee in January 1888. The permanent observer was away without leave, and the acting one did not understand his work. He was thoroughly drilled. The shed was in a shaky condition, but was repaired shortly after. The instruments were all found in good order, any small defects noticed being removed by the Inspector. But the position of the shed having been found faulty, another on a better site was built and comparative observations carried on for a year up to 30th April 1889. The observations from this observatory, more especially those of the barometer, are, however, frequently found to be erroneous.

Dacca—[illegible]as visited twice—by Babu C. C. Chatterjee on 12th January 1888 and by Mr. Pedler on 5th February 1889. The instruments were found in excellent order on both occasions, and the observer has in every way given satisfaction. The rain-gauge has given some trouble. At first it was apt to be flooded by the river, and Babu C. C. Chatterjee had it removed, but in its new position some neighbouring trees and the telegraph buildings sheltered it to such an extent that Mr. Pedler had to fix a new site.

Darjeeling—Observatory was in a satisfactory condition when visited by Mr. Pedler on 28th to 31st March 1888. The new Beckley's anemograph had just been erected, and the first difficulties got over, so that Mr. Pedler expected valuable results from the instrument. Though the wind velocity portion of the apparatus was working very freely at that time, it was very much out of order when the observatory was next inspected by Mr. Gilliland about the middle of October 1889. It worked only with winds of over ten miles an hour, and the adjustment of the direction recorder was also unsatisfactory. The part of the instrument exposed to the weather had suffered to such an extent during the previous eighteen months, that it had to be dismantled and thoroughly cleaned. The anemometer, wind vane, sun thermometers, and the barometer were also found to be somewhat defective, and were put right as far as possible.

Dhubri—Observatory inspected 21st March 1888 and 22nd to 24th October 1889. At the time of the first visit made by Mr. Pedler, the instruments were in good order with the exception of the anemometer, wind vane, and anemograph. The velocity part of the anemograph was working very freely, but that giving the direction record worked very heavily, and was so adjusted [illegible]

direction given was the opposite of what it ought to have been. The defects were remedied, but as the anemograph house was undergoing repairs, it was impossible at that time to have the instruments thoroughly cleaned.

During the past year nearly all the observers in North Bengal were changed, and the new men being not thoroughly instructed in the reading of the instruments, advantage was taken of the October college vacation to send Mr. Gilliland to find out to what certain small errors, which were daily apparent, more especially in the readings of the barometer, were due. The observatories which urgently required this visit were Julpigoree, Rungpore, and Dhubri, and as these observatories are in the same part of the country, the observations taken at one frequently corroborated those of another though all the readings were unreliable. I may state that the errors usually made are of two kinds, one from careless reading of the scale, whereby the correct graduation is not taken though the instrument be properly adjusted; second, where the instrument is badly adjusted, but the reading otherwise correctly taken. The first is entirely due to carelessness on the part of the observer, and is generally punished by a fine, the second probably to ignorance, and it was to remove errors of the second kind that these observatories had to be visited. It was found that none of these observers knew how to lower the vernier until it was just touching the column, and that they were also not in the habit of keeping the eye in a horizontal line with the top of the mercury. These faults are of the greatest importance because they occur so frequently in the case of new observers, and are only found out after the observer, who has given over charge, has left the station, so that there is no possibility of removing the errors except by sending some one from the head office. These remarks, though given under the head of Dhubri observatory, are equally applicable to Julpigoree, Rungpore, and some others. Though these errors were of daily occurrence during the monsoon, it will be seen in a table given below that very few errors of the other kind, that is the result of carelessness, have been made by the observer at Dhubri.

Dinagepore—Visited on 12th June 1888. The observatory was in good order, and the observer punctual in taking observations, but being at that time lately appointed, he was unable to read the barometer with accuracy. The method of adjustment was fully explained to him, and a series of readings taken which shewed that the error of the barometer had not altered.

Durbhunga—Observatory was inspected on the 17th January 1888, and twice in 1889—on the 22nd March and 23rd August. The observatory remained a voluntary one till the 1st January 1889 when an allowance of Rs. 10 a month was made, though this was not full remuneration for the observations supplied according to the ordinary rate of payment of observers in the department. Just before the first visit the shed had been dismantled and the thermometers removed to a room in the hospital, and they remained there till very recently when a new shed was finally erected. During this interval the thermometer readings were worthless, as they gave the temperature of the room and not that of the open air, and they have therefore been rejected in forming averages. The instruments were generally found to be dusty, but the barometer, though old, was capable of giving accurate readings.

Furreedpore—Observatory, visited on the 16th January 1888, was found to be in fair condition, but the observer was in want of instruction on the adjustment of the barometer.

Gya—Observatory, when inspected from 26th to 29th January 1888 by Mr. Eliot, was in fair condition. The rain-gauge and anemometer wanted repair or renewal, but the thermometers were in good condition. The chief object of the visit was to find out the cause of the discrepancies in the barometer readings, and after a series of comparative readings it was found that the correction was ·016 inch instead of ·003 inch, as obtained at Alipore. When next visited on the 24th October 1888, it was necessary to make arrangements for moving the instruments nearer the new cutcherry. The wind instruments were fixed on the highest part of the roof of the cutcherry parapet, and the thermometer shed was placed in an open space near the treasury guard. The instruments were all found to be in good order. In September 1889 the observatory was again found to be in good condition, except that the barometer tube had become loose in the case, but the error resulting was inappreciable.

Hazaribagh—Observatory was inspected on 10th April 1889 mainly for the purpose of arranging for the mounting of the new Beckley's anemograph. The instruments, records, and thermometer shed were all in excellent condition. "Arrangements were made in consultation with Dr. Moorhead and the Public Works Department subordinates as to strengthening the anemograph house to receive the new instrument." Though all preliminaries were then seen to, the work was never carried out by the Public Works authorities, and as a Beckley's anemograph was lately urgently required at Allahabad, Mr. Eliot ordered the transfer of the one at Hazaribagh, so that no further anemograms will be received from this station.

Jessore—Observatory was inspected three times, and on each occasion was in fairly good order, but when visited by Mr. Pedler on the 8th February 1889 the observer was twelve minutes late in arriving to take the observations, a matter of considerable importance, as at 8 A.M., all the meteorological elements are rapidly changing.

Julpigoree—Observatory, when inspected by Mr. Pedler in March 1888, was in a most unsatisfactory condition, the observer having taken leave without informing the Calcutta office, and left his duties to be performed by a man very ignorant of the methods of adjusting and reading the instruments. On Mr. Pedler's recommendation the observatory was transferred to the local post office, and with the consent of the Postmaster-General, the Postmaster was appointed observer. Babu C. C. Chatterjee was sent in June of the same year to train the new observer and to select the most suitable positions for the thermometer shed, the barometer and the wind instruments. A change of observers was made in the following year, and from that time very unsatisfactory reports were made for the reason already stated in connection with Dhubri observatory. After Mr. Gilliland's visit the barometer readings were more satisfactory, but those of the maximum thermometer have still been unreliable from the observer's failing to understand the method of setting the instrument after reading.

Krishnaghur—Observatory was inspected twice during 1888, and was found in satisfactory condition.

Maldah—Was visited in December 1887, the readings reported being unreliable. The instruments were in very bad order, and the observer unable to read them with accuracy. He received full instructions as to the method of procedure, and has continued since then to give more satisfaction, but, as shown by the table given below, he is not one of the most careful observers.

Midnapore—Had to be visited in May 1887 because of the very low readings of the barometer. The instrument was found to be in bad order, but the observer was also very careless in his adjustment. He benefited by the instruction then given, so that further inspection visits have not been considered necessary, but there is still a certain amount of carelessness shown in his returns.

Motiharee—Observatory was in a very satisfactory condition when visited by Mr. Pedler in January 1888 and March 1889. The object of the second visit was to arrange for the handing over of the observatory to the Civil Surgeon from the 1st April 1889, his clerk becoming observer. The instruments were in the same excellent order as when previously inspected, and Mr. Pedler has recorded that "Mr. Clarke the Supervisor, Public Works Department, must be thanked for the general care he has shewn in the charge of the observatory." As the new observer was not well qualified for the work of observing, a third visit was made by Babu C. C. Chatterjee, who gave the required instruction as to reading the barometer and wind vane, and saw that the instruments were thoroughly cleaned and oiled.

Mymensingh—Observatory was inspected on 14th January 1888 and 3rd February 1889. The instruments were in fair condition on both occasions, but the observer had, each time, difficulties which could only have been removed by verbal instruction.

Noakhally—Visited from 5th to 7th January 1888. The observer was found to be reading the barometer too low from wrong adjustment of the vernier. The instruments were in fair order, with the exception of the wind vane and anemometer, which were replaced by new ones.

Nya Doomka—Observatory was inspected in August 1887 by Babu C. C. Chatterjee. The observer read his instruments quickly and correctly. Most of

the instruments had been well kept. The Inspector removed all defects, and the new instruments wanted were supplied immediately after his return to Calcutta.

Patna—Observatory has been inspected three times—in March and October 1888 and September 1889. The instruments were in good order, except where they had become unserviceable from wear, in which cases new ones were supplied. On the occasion of Mr. Pedler's visit in October 1888, the observer was more than half an hour late in arriving to take the observations, and as the records at the telegraph office shewed that the telegrams to Simla were invariably late in being sent for despatch, the observer was fined.

Purneah—Observatory was inspected in December 1887, August 1889, and March 1890. When first inspected the observer took the readings quickly and and correctly, but the observatory was not in good order in several important particulars.

Rampore Beauleah—Was visited on the 19th June 1888. The instruments were in very bad order, from want of attention on the part of the observer, the thermometers being unserviceable, and the wind instruments working with a great deal too much friction from want of oil. He read the barometer very slowly and with doubtful accuracy. During the past year the results have been more satisfactory, and very few careless errors have been discovered.

Raneegunge—Observatory was inspected in August 1887 and in January and October 1888. The instruments were mostly in good order, and the observer was found to read the instruments quickly and correctly.

Rungpore—Inspected in June 1888, October 1889, and March 1890. During the first year the observatory was in a most unsatisfactory condition, the observer shewing great want of punctuality and being very careless in keeping the instruments in order. As the shed was very near the post-office, the Postmaster was appointed observer. But when the observatory was next visited by Mr. Gilliland in October 1889, the observer was found to be reading the barometer very inaccurately, not altogether from carelessness, as he was very willing to learn but because he had failed to understand from the *Vade Mecum*, the method of correctly setting the instrument. As far as time would permit, he was drilled in setting and reading, and when Mr. Pedler inspected the observatory in March last, he found the observer read only a few thousandths of an inch too low, probably owing to somewhat defective vision.

It will be seen from the preceding remarks that in many cases the defective observations are not due to carelessness so much as to an imperfect knowledge of the duties, for which the observer cannot be said to be blameworthy, unless he has had previous opportunities of direct instruction. The only way of introducing improvement is to have an officer who may be in a position to go to any observatory when required, and to stay there instructing the observer till there can be no further doubt as to his being able to read all the instruments with the utmost accuracy.

Errors in observations.

In addition to these errors arising from ignorance on the part of observers, frequent careless errors are made by some. These are generally discovered by comparison at the head office, and from the records, I have arranged in the following table the observatories according to the number of errors made during the past year, partly to show how careless some observers are, and partly to show which observers are making every effort to give satisfaction :—

Under five mistakes.	Between five and ten mistakes.	Between ten and twenty mistakes.	Over twenty mistakes.
Akyab.	Arrah.	Bhagulpore.	Balasore.
Berhampore.	Bankoora.	Chittagong.	Burrisaul.
Burdwan.	Bogra.	Chupra.	Comillah.
Buxar.	Cuttack.	Dacca.	Julpigoree.
Chybassa.	Dehree.	Darjeeling.	Pooree.
Coconada.	Dinagepore.	Furreedpore.	Rungpore.
Dhubri.	Durbhunga.	Maldah.	
Gopalpore.	False Point.	Midnapore.	
Hazaribagh.	Gya.	Nellore.	
Krishnagtaur.	Jessore.	Noakholly.	
Madras (Port Office).	Motiharee.		
Nya Doomka.	Mymensingh,		
Patna.	Purneah.		

Under five mistakes.	Between five and ten mistakes.	Between ten and twenty mistakes.	Over twenty mistakes.
Rampore Beauleah. Ranchee. Serajgunj. Sibsagar. Silchar. Tavoy.	Raneegunge. Saugor Island.		

To make the observers more careful, a system of fining has been employed for some time, and the observers who have been most frequently punished during the year ending March 1890, are those at Balasore, Burrisaul, Chittagong, Chupra, Comillah, Gya, Noakholly, Pooree, and Rungpore. The observer at Comillah was fined sixteen times, at Balasore eight times and most of the others five times.

Most of the inland stations have been inspected some time during these three years, but it has been impossible to visit the stations on the coast. The observations, however, have been carefully watched, and any errors made immediately brought to the notice of the observers, so that those who are in the habit of taking careless readings are at once reminded that more care is necessary. A condition of high efficiency is maintained, as shown by the accuracy with which the movements of storms in the Bay can be followed. In connection with Chittagong observatory, I have shown from what cause the greatest risk of failure in supplying accurate information arises, and that it is in a fair way of being removed.

In past years the condition of the lines connecting Diamond Island and False Point with the mainland has been the subject of comment. During the year 1889-90 there was no serious stoppage at either station, but the weather was never very stormy during the monsoon season, so that they were not put to the same test as in other years. The telephone line between Hookeytollah and the False Point Lighthouse has been thoroughly overhauled, and the telephone replaced by Morse instruments which will soon be in use. Though the telegraph authorities think it unlikely that the line will, even now, be able to stand the strain of very stormy weather, there is no doubt but that it will now be much more reliable.

Rain recording stations.

The number of rainfall recording stations during the past three years is as given below :—

Year.	Stations.
1887-88	250
1888-89	255
1889-90	258

These stations have generally despatched their returns with great regularity. There were, however, a few exceptions. Piplee submitted no returns throughout the year. Sorah, Balasore, Azimgunge, Patkabari, Bogra, and the more outlying stations in Purneah, Mozufferpore, Lohardugga, and Singbhoom were late on several occasions.

Pilot telegrams.

With a view to obtain daily meteorological observations from the pilot-brigs cruising at the Sandheads, Mr. Pedler, with the assistance of Mr. S. R. Elson, devised and issued a special code by means of which the meteorological observations taken in the pilot-brigs can be reported by a single hoist of four flags displayed in passing Saugor Island Lighthouse and thence telegraphed to the Meteorological Office.

These telegrams have been received with fair regularity. The observations seem to have been taken from different instruments and probably by different persons from time to time, so that the pressure reported is not very reliable, especially as there has sometimes been difficulty in ascertaining to what day the observations belong. A list given below shows the number of telegrams received each month since the system was started.

June	1889	... ...	1	November	1889	... Nil.
July	„	... ...	17	December	„	... 13
August	„	... ...	9	January	1890	... 10

A—1887-88. | B—1888-89. | C—1889-90.

Storm signals.

The following tables give a brief summary of the various cyclonic storms in the Bay of Bengal during last year, and the action taken by this office to warn the coasts affected by them :—

Table giving a brief statement of the storms which affected the Bay of Bengal coasts during the year 1889-90.

No.	Date.	Character of storm.	Coast affected.
1	May, 21st and 22nd ...	Feeble depression off Pegu coast...	It passed into the Central Provinces and merged into the area of permanent low pressure.
2	June, 9th to 11th ...	Small depression off Ganjam coast	Crossed North Orissa coast on the 11th.
3	June, 17th	Feeble depression in north-east of the Bay.	
4	June, 24th to 27th ...	Feeble cyclonic storm off Orissa coast.	Crossed North Orissa coast at about 8 P M. on 26th.
5	July, 12th to 20th ...	Small cyclonic storm off Orissa coast.	Crossed the coast between Balasore and Saugor Island on the morning of the 20th.

No.	Date.	Character of storm.	Coast affected.
6	August, 5th and 6th ...	Small depression over the head of the Bay.	Crossed Orissa coast near Pooree.
7	August, 15th to 17th ...	Small depression over the head of the Bay.	Passed northwards.
8	August, 25th and 26th ...	Feeble depression off Orissa coast	Passed inland.
9	September, 16th to 19th	Cyclonic storm formed in the centre of the Bay moved in a westerly direction.	Crossed Ganjam coast on the evening of 18th.
10	September, 25th to 27th	Feeble diffused depression in the north-east of the Bay.	Passed northwards.
11	October, 4th to 11th ...	Shallow depression off Circars coast.	Merged into the area of uniform pressure.
12	October, 13th to 16th ...	Feeble depression off Orissa coast	Crossed coast on the morning of the 16th.
13	October, 21st to 27th ...	Shallow depression, formed off Orissa coast, and moved slowly in northerly direction	Crossed coast east of Saugor Island, passing over Sunderbunds on the 27th.
14	November, 2nd and 3rd	Small depression in the Gulf of Martaban.	Moved northward towards the land.
15	November, 13th to 20th	Cyclonic storm formed in the southern half of the Bay.	Approached Madras coast till the 18th then moved rapidly in a northerly direction, the centre passing inland near Gopalpore on the morning of the 20th. Gave heavy gales on the Circars and south Orissa coast.
16	December, 16th to 18th...	Small depression in the south-west of the Bay.	Crossed Madras coast to south of Negapatam on the morning of the 18th.
17	December, 23rd to 26th	Small depression formed in the south of the Bay.	Moved in a north-westerly direction, and crossed the coast as a feeble depression near Nellore.

Table showing the action taken by the Calcutta Meteorological Office in warning the coasts affected by the storms enumerated in the above table.

Storm number.	Hoisting of Storm Signals.			Warning of Ports by cautionary telegrams.	
	Ports ordered to hoist signals.	When hoisted.	When lowered.	Ports warned by cautionary telegram.	Time and date of despatch of cautionary telegrams.

Cautionary Signal.

An additional weather signal for the approaches to the port of Calcutta and for the port itself, called the *cautionary signal*, has been introduced amongst the existing weather signals by a notification issued on the 29th June 1889.

Daily weather telegram to Port officer, Madras.

During last year the Madras Port authorities represented to Government the desirability of receiving daily information as to the weather passing over the Bay, and in consequence the duty has been entrusted to the Calcutta Meteorological Office. With a view to give the fullest information regarding the whole Bay, Mr. Pedler devised a special meteorological telegraphic code, a manuscript copy of which was sent to the Presidency Port Officer, Madras, on the 28th March 1890, and the first telegram giving such information commenced from the 4th April 1890.

Weather reports.

The regular reports which are issued by this Department are—

1*st*.—Monthly reports of the meteorology of Bengal and Assam which are also illustrated in a few cases with maps drawn by hand representing the actual rainfall, the variation from the normal, and the rainfall expressed as a percentage of the normal fall. Copies of these maps were also regularly supplied to the Sanitary Commissioner, Bengal.

2*nd*.—Weekly reports of the meteorology of Bengal and Assam, and particularly of the rainfall of Bengal.

Both the monthly and weekly reports have been published regularly throughout the year in the *Calcutta Gazette*. The date of publishing of the monthly reports has been in almost every case that of the second Gazette after the close of the month in question, while each Gazette has dealt with the weather statistics of the week up to and including the Friday previous to its issue.

Two other general reports of the meteorology of Bengal are also prepared —the first is the meteorological summary for the whole year prepared and submitted to Government in July for incorporation in the Bengal Administration Report. It was illustrated by maps showing the actual rainfall of the year, and its percentage variation from the normal. The second general report deals with the meteorology of the monsoon season only. This was prepared as usual, and it appeared in the *Calcutta Gazette* of 18th December 1889. A few copies of maps representing the actual monsoon rainfall, its variation from the normal, and the percentage of the actual rainfall as compared with that of normal years, were also prepared for submission with this report.

The Daily Bengal Report, which is published during the monsoon season, was issued regularly from the 27th of April to the 2nd of November. It dealt with the observations of 42 stations, and it was issued to 101 Government officers and to 15 private subscribers.

The Bay of Bengal Daily Weather Report of the Storm Signal Service was issued regularly throughout the year. The usual time at which the report is printed and ready for distribution is between 10-30 and 11 A.M., and it contains the observations made at 8 A.M. at 25 stations in India and Burma, and at two stations (Galle and Trincomallee) in Ceylon. In the latter case the observations are taken at 9-30 A.M., and they consequently cannot be included in the report for the same day, but appear in that of the day following. The report is prepared and issued mainly to give information as to the state of the weather in the Bay of Bengal and over the surrounding coast areas, and to enable the Storm Signal Service to be worked effectively by the Reporter.

This report was supplied free to 43 Government officers and 23 subscribers, paying at the rate of Rs. 2 a month. The receipts from subscribers during the year have covered the cost of printing the reports in this office and of distributing them. There was a small balance at the end of the year 1889-90. This amount was kept in hand to meet urgent demands for repairs to the lithographic presses, &c.

Previous to 1st January 1890 during the monsoon months, May to November, a daily chart was prepared showing the meteorological conditions obtaining over Bengal as communicated to the Calcutta office from the various observatories by telegram. But since the 1st January 1890 five separate charts graphically showing the various meteorological data are being prepared, and this work will be continuous for the whole year in future. These charts are drawn by hand and filed in the office for reference.

Special work.—A special report was prepared by Mr. Pedler giving a full account of the cyclonic storm in the Bay of Bengal of 21st to 28th August 1888. It was submitted to the Meteorological Reporter to the Government of India on 3rd August 1889, and published by the department as "Cyclone Memoir, Part II," in March 1890.

There has been no change in the office establishment during the past year.

Office establishment.

Under the very efficient superintendence of Babu F. M. Basu work has gone on smoothly, and the opinion I have formed during the few months the office has been under my charge enables me fully to endorse the very favourable expressions which Mr. Pedler has recorded in previous reports.

METEOROLOGICAL OFFICE,
Calcutta, the 27th June 1890.

C. LITTLE,
Offg. Meteorological Reporter to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 2nd August, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
Burdwan Divn. 1	Burdwan Aug. 2, '90	5·64	Weather—rainy. Prospects of cultivation good. Transplantation of *amun* going on. Prices of common rice :—
	Culna ...	2·80	
	Cutwa ...	3·66	
	Ranigunge ...	2·42	Srs. Burdwan ... ... 15; Culna ... ... 13; Cutwa ... . 14½; Ranigunge ... ... 15½ } per rupee.
2	Bankoora ,, 2, '90	6·85	Break in the rains in the latter part of the week. Transplanting of *amun* rice still going on. Indigo is being cut. Sugarcane thriving. Price of common rice at Sudder 18 seers per rupee and at Bishenpore 16½ seers per rupee.
3	Birbhum ,, 2, '90	3·71	Very heavy showers of rain. The present condition of the crops is extraordinarily good. All low land cultivated, and an unusually large area of high land as well.
	Rampore Haut ...	3·25	
4	Midnapur ,, 2, '90	0·74	Weather—fine with occasional showers. Paddy and indigo doing well. Paddy still being transplanted. Prices of common rice :— Srs. Sudder ... ... 15; Contai ... ... 18; Tumlook ... ... 14; Ghatal ... ... 16 } per rupee.
5	Hooghly ,, 2, '90	1·95	Weather—close and cloudy. State and prospects of crops good. Prices of common rice :—
	Serampore ...	4·11	
	Jehanabad ...	7·50	Srs. Sudder ... ... 13½; Serampore ... ... 16; Jehanabad ... ... 14½ } per rupee.
	Howrah ,, 2, '90	1·11	Weather—seasonable. Transplanting of *amun* continues. Crops as a rule doing well. Common rice sells at 13 and 14 seers per rupee.
	Uluberia ...	3·02	
	Central Districts.		
Presidency Divn. 6	24-Pergns. Aug. 5, '90	2·27	Weather—hot and clear. Prospects of *aus* and jute fair. Transplantation of *amun* going on, but more rain wanted. Prices stationary.
7	Nuddea ,, 2, '90	3·82	Weather—seasonable. 2·66 inches of rain fell on Monday last (28th). Prospects of crops good. A considerable portion of the *aus* and jute plants on chur lands in the Kushtea subdivision has been destroyed by the rise of the river. The rivers have risen higher than usual for the season.
	Kushtea ...	3·56	
	Meherpore ...	4·59	
	Chuadanga ...	1·69	
	Ranaghat ...	2·65	
8	Khoolna ,, 2, '90	4·91	Weather—rainy. Prospect and condition of crops continue favourable. Transplantation of *amun* still going on. Some damage is being done to *amun* paddy by insects.
	Satkhira ...	1·83	
9	Jessore ,, 2, '90	2·77	Weather—rainy and cloudy. Prospects of standing crops good. Harvesting of *aus* going on. Price of rice has slightly risen.
	Jhenidah ..	9·50	
	Magura ...	2·83	
	Narail ...	1·56	
	Bongong ...	1·15	
10	Moorshedabad ,, 2, '90	7·46	Weather—wet. Rivers very high. Damage done on some low lands. *Aus* and *amun* standing promise very well.
	Lalbagh ...	10·17	
	Kandi ...	9·8	
	Jungipore ...	3·86	
11	Dinagepur ,, 2, '90	9·21	Weather very wet. *Haimanti* transplanting is still in progress. Prospects continue to be very favourable. Price of rice unchanged.
	Thakurgaon ...	4·82	
Rajshahye Divn. 12	Rajshahye ,, 2, '90	Figures not given	Weather—rainy and cloudy. Cutting and steeping of jute in progress. Sowing of winter paddy in the Barandra tracts almost finished. A few days' cessation of rain is necessary for the purpose of weeding.
	Nattore ...	6·62	
13	Rungpur ,, 2, '90	7·37	Weather—cool and cloudy with frequent heavy showers. All standing crops promising well. Jute is being cut and steeped. *Amun* is being transplanted. *Aus* is being cut.
	Nilphamari ...	5·97	
	Kurigram ...	5·94	
	Gaibanda ...	11·03	
14	Bogra ,, 2, '90	6·16	There has been scarcely any sunshine during the week, and a break in the rains would now do good. All crops are doing and promising well. *Amun* rice has been transplanted already on about half the area usually cultivated with this crop. Common rice selling at 19 seers per rupee.
	Sherpur ...	5·79	
	Nowkhilla ...	6·65	
15	Pubna ,, 2, '90	2·34	Weather—cool and rainy. Prospects of *aus*, *amun*, and jute continue good, though the rise of the rivers threatens to do damage to the crops standing on low-lying lands. Jute and *aus* are being reaped. Prices have decreased still more.
16	Darjeeling ,, 2, '90	22·69	Weather—continues very wet. Rainfall at Darjeeling 33 inches over the average. Sun much wanted for tea. Four annas of the jute crop spoilt by rain in the Terai. *Bhadoi* crop doing well.
17	Julpigoree ,, 2, '90	6·96	Weather—rainy and cloudy. Reaping of *aus* commenced. Transplanting of *amun* going on. Jute doing well. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Aug. 2, '90	2·85	Weather—cloudy and rainy. Harvesting of jute and *aus* paddy going on. Damage to *aus* paddy anticipated owing to high flood. *Amun* paddy thriving. Fodder not available in abundance. Price of common rice stationary.
19	Furreedpur ,, 2, '90	3·69	Weather—seasonable. The river has risen very considerably and has overflooded a large portion of the Sudder sub-division and submerged the crops. If the flood remains at its present level for some days more, the crops will be seriously damaged. The outlook in Goalundo and Madaripur is, however, reported to be hopeful. Price of rice stationary.
20	Backergunge ,, 2, '90	2·93	Weather—seasonable at sub-divisions, but hot at Sudder. State of standing crops generally good. Common rice selling at about 13 seers 8 chittacks per rupee.
21	Mymensingh ,, 2, '90	6·03	Weather—cloudy and sultry with heavy rain almost daily. *Aus* paddy excellent and is being gathered. Jute somewhat injured by incessant and early rain. About half the normal area transplanted with *amun* paddy seedlings. Coarse rice sells at 13¾ seers per rupee.
Chittagong Divn. 22	Chittagong ,, 2, '90	22·00	Weather—seasonable. Cultivation was at a standstill in consequence of the heavy rainfall during the first part of the week, but it is again in progress. Some damage, but not very much, appears to have been caused to the *aus* crop by the heavy rain. Lands are being prepared for *amun*. Common rice selling at 16 seers per rupee.
23	Noakholly ,, 2, '90	7·09	Weather—cloudy and rainy. Reaping of *aus* crop progressing. *Amun* crop is being transplanted. Cocoanuts maturing and in good condition.
24	Tipperah ,, 2, '90	6·33	Weather—cloudy, wet, cool. *Aus* and jute are being cut. *Amun* is being transplanted. Prospects good. Rice selling at from 21 seers 5¼ chittacks to 13 seers 5¼ chittacks per rupee.
25	Chittagong Hill Tracts. ,, 1, '90	10·01	Weather—rainy and cloudy throughout the week. Early *jum* paddy ripening. Cotton progressing. Transplanting in low lands commenced. Common rice is being sold at 12 seers 5 chittacks per rupee.
	Hill Tipperah ,, 1, '90	6·12	Weather—rainy and damp. Harvesting of *aus* and *til* finished in some parts of the State. *Amun* still being transplanted. *Jum* crops doing well. Prices stationary.
BEHAR.			
Patna Divn. 26	Patna ,, 2, '90	7·43	Weather hot. Transplantation of paddy is being pushed on. *Bhadoi* crops
	Barh ...	7·87	reported to have been damaged in the Barh sub-division owing to floods and
	Dinapore ...	7·07	incessant rain. Prices of some of the food-grains are slightly falling.
27	Gya ,, 2, '90	4·37	Weather—hot and cloudy. Transplantation of paddy going on. Prospects of *bhadoi* not favourable owing to incessant rainfall. Prices of food-grains almost stationary.
28	Shahabad ,, 2, '90	3·36	Weather—rainy and cloudy. Prospects of the *bhadoi* crops in the Sudder and
	Buxar ...	3·24	Buxar sub-divisions are not favourable owing to excessive rainfall. In other
	Bhamuah ...	3·54	sub-divisions the crops are doing well. Transplantation of paddy in progress.
	Sasseram ...	2·44	Prices stationary.
29	Durbhunga ,, 2, '90	5·81	Weather—cloudy with frequent rain. *Bhadoi* and rice crops in north-western
	Madhubani ...	13·27	part of the Sudder sub-division considerably damaged by floods of the
	Somastipur ...	9·32	Bagmati and Kamla. Elsewhere prospects continue favourable, but a break in the rains is urgently needed. Indigo manufacture in progress. Prices falling.
30	Muzaffarpur ,, 2, '90	6·17	Weather—cloudy and wet throughout the week, and no sign of a cessation of
	Hajipur ...	7·94	the rain at the time of report. Excessive rain has done much damage to
	Sitamarhi ...	6·51	the *bhadoi* crops and low-lying paddy in parts. The Toorkee bund has been cut, and much water is pouring over the country south of it, causing serious injury to indigo, *makai*, and other crops. Area affected cannot yet be reported.
31	Sarun ,, 2 '90	10·86	Weather—very wet and stormy. *Bhadoi* wants sun badly. Some low rice lands swamped. Indigo outturn fair.
32	Chumparun ,, 2, '90	9·44	Weather—cloudy. Rain almost daily, resulting in slight damage to *bhadoi*. Fine weather anxiously looked for. Transplantation of paddy nearly finished. Indigo manufacture continues.
Bhagulpore Divn. 33	Monghyr ,, 2, '90	10·06	Heavy rain and cloudy sky. Very little sunshine. The excessive rain has injured
	Begusarai ...	10·35	the *bhadoi* crops, and along the Ganges they have been submerged to a large
	Jamui ...	9·62	extent.
34	Bhagulpur ,, 2, '90	11·1	Heavy rain and continued cloud. The very heavy rain during the week and the
	Banka ..	4·14	rising of the rivers have done some damage to the *marua* and *makai* crops.
	Mudhepura ...	11·0	Prospects of the rice crop are good, but a break in the rains with some
	Soopool ...	14·4	sunshine is now wanted.
35	Purneah ,, 2, '90	7·84	Weather—stormy with much rain. Jute has suffered from excessive rain;
	Kishengunge ...	4·79	estimated outturn 12 annas in Kishengunge and 14 annas in the rest of the
	Arrareah ...	4·08	district. *Bhadoi* crops are being harvested in Kishengunge. Prospects favourable, but some damage to young winter rice from floods. Prices falling.
36	Maldah ,, 2, '90	5·20	Weather very wet. Rain every day. Transplantation of *amun* continues.
	Chanchal ...	6·68	*Bhadoi* has been much injured by excessive rain and early rise of the rivers.
	Shibgunge ...	4·29	No change in prices.
	Gajole ...	4·86	
37	Sonthal Pergns. ,, 2, '90	4·85	Weather—cool. Constant rain during the week has somewhat damaged the
	Deoghur ..	7·21	*makai* crop. Transplantation of rice going on, and mostly completed.
	Rajmehal ...	2·92	Owing to heavy rainfall rice cultivation on high lands more than usual. A
	Jamtara ...	3·96	spell of sunshiny weather now much wanted.
	Godda ...	4·38	
	Pakour ...	2·85	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	ORISSA.			
Orissa Divn.	38	Cuttack Aug. 2, '90	3·58	Weather—seasonable. Transplantation of *sarad* still going on. Sugarcane doing well. Prospects generally good.
Orissa Divn.	39	Pooree July 31, '90 Khoordah ...	1·04 6·90	Weather—seasonable. Transplanting and puddling of *sarad* rice in progress. *Beali* rice is being weeded. Cotton, sugarcane, &c., doing well. Price of common rice stationary.
Orissa Divn.	40	Balasore Aug. 2, '90	0·20	Weather—cool and cloudy, but almost rainless. Very little short of the usual area has been already sown or transplanted with rice, both *sarad* and *guru*. More rain is much wanted, especially in the north of the district. Number of coolies on relief-works 41.
	CHOTA NAGPORE.			
	South-West Frontier Agency.			
Chota Nagpore Divn.	41	Hazaribagh Aug. 2, '90	2·51	Rainfall lighter. A partial break in the rains during the last three days of the week. Excessive rain has damaged Indian-corn and other *bhadoi* crops. Paddy is being transplanted, and good progress made. Rice selling at from 15 to 18 seers per rupee.
Chota Nagpore Divn.	42	Lohardugga ,, 2, '90 Palamow (up to 28th July)	5·90 5·78	Weather—warm and cloudy. Rain daily during the week. Transplantation of winter rice is being carried on vigorously. Prospect of *bhadoi* good. No material change in prices.
Chota Nagpore Divn.	43	Singbhoom Aug. 2, '90	2·54	Seasonable rain on all but one day of the week. Reports of the condition of the crops are most favourable from all sides. Tussur cultivation has only just commenced; its progress is very slight owing to wet weather.
Chota Nagpore Divn.	44	Manbhoom ,, 2, '90 Govindpore ...	2·38 3·90	Weather during week favourable for the crops. *Bhadoi* crops doing well except in the Govindpore subdivision, where they are said to be suffering from damp. Price of rice 17 to 20 seers per rupee.

Published for general information.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers.

N. B.—In the weekly report from 6th to 12th July 1890 read 82·2 for 82·8 as the mean temperature of the 7th July 1890.
In the weekly report from 13th to 19th July 1890 read 9·6 for 9·9 as the range of the 18th, and also read 80·6 for 83·6 as mean wet bulb of the 16th July 1890.

J. H. GILLILAND,

* Mean of 6 days. † Mean of 4 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100, A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fall.

for the week ending Friday, the 1st of August 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	OF WEEK. Mean for district.	OF WEEK. Normal mean.	DISTRICT OBSERVATIONS. RAINFALL. Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 5th August* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 1ST OF AUGUST 1890.

THE important features of the weather of the past week have been the very heavy continuous rain in the northern districts, moderate general rain in the south of the province with the exception of Orissa, and the very cool weather for the season which has prevailed in all districts. At the commencement of the week gradients were steep over the Bay with a strong monsoon blowing, and ships arriving in port reported fresh to strong breezes with heavy rain squalls The current from the Bay was confined to the eastern districts, as for several days a steady westerly wind was blowing over the western half of the province. The interaction of these two currents evidently caused the phenomenal rainfall which has been reported from Behar and North Bengal throughout the week, as amounts began to diminish when easterly winds recommenced and the Bay current was allowed to take its normal course up the Gangetic plain. Pressure has been generally above the normal, and changes have rarely exceeded a twentieth of an inch. At first there was a general small defect above a twentieth of an inch in Behar only, and then the ordinary wind circulation prevailed, except that directions were south or south-west in North Bengal and over the whole of South Behar, but the usual easterly winds continued at the western stations of North Behar. A brisk rise of pressure on the 27th over the western districts displaced the area of lowest pressure towards the east, and the inrush of westerly winds became general, very heavy rain being received in East and North Bengal and Behar. Pressure continued rising on the 28th, but a general slow fall on the 29th, increasing in amount towards the north-west, gave a more normal distribution, and easterly winds set in over North Bengal and North Behar; the rainfall at the same time, though still heavy, beginning to diminish in quantity, except in the west of North Behar. On the 30th pressure fell briskly in Orissa and slowly over the rest of the province, a very uniform distribution resulting over the western half of the province, but in the Bay and East Bengal gradients were still steeper than usual. Winds had an easterly tendency except in Chutia Nagpur and Orissa, where slow indraught was taking place towards the north-west corner of the Bay. Rainfall was very light except in the Darjeeling Hills and the west of North Behar; but even there amounts were only moderate. From the 30th till the end of the week a steady increase of pressure continued, normal monsoon winds were blowing in all districts, and temperature, though generally below the normal, was rising; while rainfall had ceased in Lower Bengal and was light, though general, elsewhere.

Pressure—Has never differed much from the normal, and has been more frequently above than below. The weekly means are hence above the normal at all stations, the difference being largest in South-West and East Bengal and Assam, where it is from two to three-hundredths of an inch. In the other districts it is generally between one and two-hundredths of an inch. The only occasions of changes greater than a twentieth of an inch were on the 27th, when it rose about ·07 inch in the western districts; on the 28th at a few stations in the east of the province; on the 30th in Orissa, where pressure fell ·06 inch; and on the 31st, when there was a rise of ·06 inch in Assam.

Temperature—Fell steadily during the first three days, rose on the 29th, again fell on the 30th, and then rose till the end of the week. Changes have generally been moderate and fairly regular, and the distribution has been everywhere largely below the normal. The mean defect for the week in Behar is 3·6°, in Assam 3·3°, in North Bengal and Chutia Nagpur 2·4°, in East Bengal 1·8°, and in Orissa and South-West Bengal 1·6°.

Rainfall—As compared with the normal, has been very heavy in North Bengal and Behar, moderately heavy in East Bengal and South Behar, about normal in South-West Bengal and Chutia Nagpur, and considerably below the normal in Orissa. The fall in North Bengal is exactly double the normal, and in North Behar nearly two and a half times the normal; while in East Bengal though the average fall is as heavy as in North Bengal, excess is only 1·5 inches. Rainfall in the south-west corner of the province, and especially in Orissa, has been rather scattered, but elsewhere rain has fallen at almost every station on every day of the week, as shown by the average number of rainy days being 6·5 in all districts except Orissa and South-West Bengal. In Orissa the heaviest fall was 3·6 inches at Cuttack; in South-West Bengal a few stations received from 5 to 8 inches, but generally falls were between 2 and 5 inches, the heaviest being Berhampore 11·4 and Jhenidah 9·5 inches. In Furreedpore and Dacca falls were under 5 inches, but elsewhere in East Bengal they were generally between 5 and 10 inches. Chittagong received 22 and Cox's Bazar 15·4 inches. In North Bengal falls were between 5 and 10 inches, except in Julpigoree, Cooch Behar, and the Darjeeling Hills. Siligoree and Darjeeling received about 22, Bhagatpore and Kurseong 16·5, Buxa 15, and Dinhatta 14 inches. The falls in North Behar were nearly always between 6 and 8 inches, Bagaha and Burhurwa, in the Chumparun district, receiving more than 12 inches. In Shahabad and Gya falls were generally under 5 inches and in the other districts of South Behar between 5 and 7 inches; while in Chutia Nagpur amounts were more irregular, ranging from 2 to 8 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 1st August 1890 :—

Meteorological Divisions	Temperature.						Rainfall.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above below normal mean of week.	Of week.			Rainy days.		Since 1st of July.		Since 1st May 1890.

Meteorological Office, India ;
The 4th August 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal municipalities of Bengal for the week ending with Saturday, the 19th July 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 19th July 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 19·1 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 1·4 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years except 1887—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	22·5	21·4	16·9	19·3	22·5	20·5	19·1

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 28th June 1890.	5th July 1890.	12th July 1890.	19th July 1890.	Towns.	Weeks ending— 28th June 1890.	5th July 1890.	12th July 1890.	19th July 1890.

It will be seen that last week the highest birth-rate was returned from Monghyr (33·4), and the lowest from Bali (3·5).

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 22· per 1,000 of the population. The rate of the week is 6·4 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1888—*vide* the figures below : —

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	39·7	24·8	27·2	20·1	30·1	28·4	22·0

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 28th June 1890.	5th July 1890.	12th July 1890.	19th July 1890.	Towns.	Weeks ending— 28th June 1890.	5th July 1890.	12th July 1890.	19th July 1890.
Burdwan	19·8	16·8	22·9	19·8	Narainganj	20·7	8·3	24·6	16·6

Dacca	19·5	21·4	15·6	23·4					

It will be seen that last week the highest mortality occurred in the town of Utterpara (56·6), and the lowest in Kishnagar (3·8).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Serampore ...	11·8	Jessore ...	42·8	Midnapore ...	10·8	Serampore ...	19 6
Arrah ...	10·7					Poori ...	18·9
Mozufferpore ...	9·7					Midnapore ...	17·0
Midnapore ...	6·2					Gya ...	15·7
Chupra ...	4·0						
Durbhanga ...	3·1						
Patna City ...	2·3						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 2·5 from cholera, against 3·7 per 1,000 in the preceding week; ·4 from small-pox, against ·5; 8 6 from fever, against the same ratio; 3·1 from bowel-complaints, against 2·1; ·8 from injury, against ·5; and 6·6 from other causes, against 6· in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	23·5	Hindus ...	23·5	Under 1 year ...	159·8
Females	20·4	Mahomedans ...	18·9	1 and under 5 years ...	34·1
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	115			5 „ 10 „ ...	16·9
				10 „ 15 „ ...	12·4
				15 „ 20 „ ...	14·8
				20 „ 30 „ ...	11·8
				30 „ 40 „ ...	14·5
				40 „ 50 „ ...	15 8
				50 „ 60 „ ...	22 8
				60 years and upwards ...	46·7

Detailed information regarding the vital statistics of the twenty-seven towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

The 4th August 1890. *Sanitary Commissioner for Bengal.*

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of May 1890.

INCREASES.

	Tons.
Jute, unscrewed	3,057
Serajganj, Goalundo, and the Northern Section contributed this increase.	
Betel-nuts	621
Principally in receipts from Bengal Central Flotilla stations and in upwards booking from Armenian Ghât. There were also transactions between Northern Bengal State Railway stations and from Narayanganj.	

DECREASES.

Coal	4,807
Sufficiency of stock for railway and flotilla consumption.	
Cotton piece-goods	463
Ordinary trade fluctuations.	
Rice	1,430
The decrease is from the Northern Section principally, and is said to be due to the dullness of the market.	
Jute, screwed	737
The decrease was from Narayanganj principally.	
Metals	315
Ordinary fluctuations.	
Oil-seeds	3,262
Due to dullness of the market and in some degree to lessened production.	
Salt	1,989
The decrease in this traffic cannot be accounted for.	
Sugar	2,351
Due principally to the short receipts from Bengal Central Railway short crops and no demand in Calcutta for this class of sugar.	
Tobacco	1,445
Due to decreased despatches from the Northern Section, said to be due to an unfavourable market.	

CALCUTTA, *the 29th July* 1890.

F. P. QUINLAN,
Examiner of Accounts.

Nalhati State Railway.

Statement showing Increases and Decreases in tonnage of Staples carried over the Nalhati State Railway during the month of June 1890, *as compared with the same month of the previous year.*

	Tons.
INCREASE.	
Coal	90
This increase is due to greater import for storage.	
Grains—	
(2) Rice	71
This is due to greater export from intermediate stations.	
(4) Others	27
Due to import of paddy for greater demand.	
Jute—	
(1) Raw	172
This is chiefly due to despatches of Mr. Yules pressed jute by rail this year.	
Metals—	
(2) Iron	17
Chiefly due to despatches of old rails of East Indian Railway brought by public from Nalhati to Azimganj.	
Provisions—	
(3) Others	28
This is due to export of fresh fruits, chiefly mangoes, from Azimganj station this year.	
Railway plant and rolling-stock	46
Due to greater despatches of railway materials.	
Sugar—	
(1) Drained	13
Due to greater demand.	
(2) Undrained	54
Due to greater demand.	
DECREASE.	
Cotton piece-goods—	
(1) European	14
Chiefly in despatches from Calcutta by steamer.	
Grains—	
(3) Gram	11
This traffic is carried by steamer this year.	
Jute—	
(2) Gunny-bags and cloths	10
Due to the dull traffic in grains.	
Oil-seeds—	
(1) Linseed	207
The falling off is due to this traffic being carried by steamer.	
(2) Mustard and rape	58
Due to less import owing to the dull market at Azimganj neighbouring marts.	
Salt	16
Carried by boat.	

R. G. MOOKERJEE,
Manager, Nalhati State Railway.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, AUGUST 6, 1890.

[Second Publication.]

PUBLIC WORKS DEPARTMENT,—MARINE.

NOTICE.

The 29th July 1890.—The following draft of rules, which it is proposed to issue under section 29 of Act VI of 1884 (as amended by section 11 of Act III of 1890), for the grant of certificates of service to masters, engineers, and engine-drivers of inland steam-vessels, is published for general information. These rules will be taken into consideration on the expiry of a month from the date of their first publication in the *Calcutta Gazette*, and the Lieutenant-Governor will receive and give due attention to any objections or suggestions which may be made by any person within that period.

J. M. McNEILE, *Col.*, R.E.,

Secretary to the Government of Bengal.

1. A certificate of service will be granted to any person who has served as a master, or as a engineer, or as an engine-driver of an inland steam-vessel before the first day of April 1890, and who, in the opinion of the Local Government, is qualified for the duties which such certificate will entitle him to perform.

2. Applications for certificates of service must be made upon the appropriate form [Certificate of Service 1], and must be submitted to the Port Officer of Calcutta, together with the applicants' testimonials and any other evidence which they may have to offer in respect of their qualifications.

3. A fee according to the following scale shall be paid for each certificate of service :—

	Rs.
First class master	10
Second ditto	5
Engineer	10
Engine-driver	5

4. Certificates of service shall be made and issued in the forms hereunto annexed.

5. Every certificate of service shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate, and the other shall be kept and recorded by the Port Officer of Calcutta.

Form A.

Government of Bengal.

By the Honourable the Lieutenant-Governor of Bengal.

Certificate of Service

AS

FIRST CLASS MASTER OF AN INLAND STEAM-VESSEL UNDER ACT VI OF 1884.

To .....

Whereas *it has been proved to the satisfaction of the Local Government that you have served as Master of an Inland Steam-Vessel before the first day of April* 1890, *and that you are qualified to fulfil the duties of First-class Master of an Inland Steam-Vessel, I do hereby grant you this CERTIFICATE OF SERVICE as such First-class Master.*

By order of the Government of Bengal.

REVISION OF APPENDIX A OF THE ACCOUNT RULES UNDER THE BENGAL MUNICIPAL ACT, 1884.

THE following is published for general information.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

The 12th August 1890. *Secretary to the Govt. of Bengal.*

MUNICIPAL DEPARTMENT—MUNICIPAL—No. M $\frac{2R}{18}$ 8.

Dated Calcutta, the 4th August 1890.

From—H J. S. COTTON, Esq., Secretary to the Government of Bengal,
To—All Commissioners of Divisions.

I AM directed to forward to you, for communication to all municipalities in your Division, a copy of a letter from the Accountant-General, Bengal, No. $\frac{LA}{152}$, dated 9th July 1890, together with its enclosure.

2. That enclosure is a revision of Appendix A to the Account Rules for municipalities issued under section 82 of the Act, and prescribes a revised procedure with suitable forms for adoption by municipalities in collecting taxes and rates. The revision of the Account Rules under section 82 is in progress, but it is not thought desirable to sanction any revised rules during the current

year. In the meantime, however, the revision in regard to procedure is complete, and the accompanying Appendix A, with the letter from the Accountant-General explaining the changes made, is now circulated for the information and guidance of municipalities. Wherever possible, the new procedure should be introduced at once, and it is the desire of Government that it should be everywhere adopted with effect from the 1st April 1891.

3. One important feature in the forms herewith prescribed is that the remission register, the tax collector's daily register, and the progress register, provide columns for the transactions of two years only. The Lieutenant-Governor entirely concurs with the Accountant-General that it is necessary to enforce greater punctuality in dealing with municipal taxation. In many municipalities the accounts are now four or five years in arrear without any excuse or justification. It commonly happens that the executive is in arrear with taxation, and that the outstandings cannot be clearly ascertained and proved from the registers, and the audit therefore for practical purposes breaks down, a certified list of outstandings being obtained and accepted as the basis of audit. This unsatisfactory state of things is due principally to laxity in management, but also in some measure to certain imperfections which experience has detected in the taxation accounts. The object of the revised forms and procedure is to remedy these defects.

4. In the Lieutenant-Governor's opinion not more than one complete year of arrears should ever be allowed. Taxes should always be collected or remitted with far greater promptitude than is now done. Municipalities which, like Ranchi and Kurseong, work in a business-like manner, never have more than two quarters' arrears, and very often not more than one; and if municipalities generally avail themselves of the means provided in sections 120 to 129 of the Act, there is no reason why taxation should ever be allowed to fall into arrear for a long period.

5. The revision of assessments in municipalities is also a very important duty which the Lieutenant-Governor desires to take this opportunity of impressing on Municipal Commissioners. In some municipalities this duty is properly discharged, but in too many it is entirely neglected. Mr. Atkinson rightly points out that the new rules and forms should be accompanied by a revision of assessments, and the Lieutenant-Governor trusts that the immediate attention of Municipal Commissioners may be turned to this question, so that the revised assessment and new forms may be introduced together without delay.

APPENDIX A.

Procedure to be adopted by Municipalities in Bengal for the collection of taxes upon occupiers of holdings, rates upon the annual value of holdings, latrine rates, lighting rates and water rates.

General outline of the Taxation Accounts.

1. The municipality is divided into taxation circles, and these are sub-divided into mohallas, streets, roads, &c., according to convenience.

A complete and separate set of registers is maintained for each circle, and from the circle registers the results are compiled for the whole municipality.

Circle Accounts.—The Demand Registers show the demand to be made against each rate-payer. The totals are brought on to Abstracts. Subsequent remissions in respect of the next demand are entered in the Remission Registers, whence the details pass into the Demand Registers, and the totals into the Abstracts in correction of the demand previously shown therein. Additions to the demand are similarly treated through the Enhancement Registers.

Bills made out are registered and are satisfied by payment or remission in whole or in part, payments being posted into the Bill Registers from the sircar's daily collection accounts, and remissions from the Remission Registers.

Compilation of the municipal accounts.—The total municipal demand is compiled from the circle abstracts into an abstract for the whole municipality, and passes into the tax-darogah's daily register for the quarter concerned. There will be as many of these tax-darogah's daily registers in use as there are quarters in respect of which there are bills outstanding. See rule 47.

Against each quarter's demand are written up daily (*a*) the payments in respect of that demand taken from the several sircar's collection accounts; (*b*) the remissions from the Remission Registers; and (*c*) the outstandings.

Lastly, the daily registers are abstracted and a monthly progress statement is worked out for each sircar, so that the outstandings for each quarter can be checked and compared with the undelivered receipts in the hands of the collecting agency, and all arrears can be promptly dealt with either by enforcing payment or remitting the amounts.

N.B.—It will be observed that the Remission Registers, the sircar's daily registers, and the monthly progress statements provide for transactions relating to the current and previous year only. Except under very special and unusual circumstances, taxation should never be allowed to fall into arrears extending over more than one complete year, and municipalities which deal promptly with taxation seldom have more than two quarters' arrears or three at most.

Rules 51 to 56 below prescribe the procedure to be adopted by the Municipal Commissioners in watching the taxation accounts, in reporting upon arrears and in clearing the registers.

Division of the Municipal area into Circles.

2. The municipality shall be divided into collecting circles by a calculation based on the area of ground to be traversed and the number of bills to be delivered. Each circle shall be numbered, and to each circle shall be appointed a sircar. The collecting circles should be as compact as possible, and so arranged as to distribute the work of tax collecting evenly among the sircars. No collecting circle shall contain more houses than can be visited by one sircar during the working days of a month.

3. The circles having been determined, and the assessment list, or the valuation and rating list prescribed by section 112 of the Act having been published, the registers of the municipal rates and taxes shall be opened.

4. Whenever a municipality levies a house-rate upon owners, and also a rate or rates upon occupiers for water, latrines or lighting, a double set of registers shall be opened, *i.e.*, one set for owners and the other for occupiers.

5. The procedure of opening and maintaining both of these sets of registers is alike. For the sake of brevity therefore the procedure as regards owner's house-rate only is described in the following rules. But the rules apply equally to the house tax and to rates leviable from occupiers.

6. Similarly, to avoid duplication the specimen forms annexed have been drawn out and headed as for owner's house-rate only, but with slight and obvious verbal modifications they are equally adapted to the house tax, and to the water, latrine, and lighting-rates which are leviable from occupiers, and the necessary additional columns must of course be introduced when more than one tax or rate is levied from occupiers.

7. The following is a list of the forms and registers which shall be kept :—

Demand Registers by circles.
Demand Abstracts by circles.
Demand abstract for the whole municipality.
Bill forms.
Bill Registers by circles.
Sircar's Collection Registers by circles.
Tax-darogah's Daily Registers by quarters.
Abstracts of Tax-darogah's Daily Registers, by quarters.
Progress Statements by circles.
* Petition Register. [This may also, if convenient, be kept by circles.]
Remission Registers by circles.
Enhancement Registers by circles.

THE DEMAND REGISTERS.

The Demand Registers shall be in Form A.

FORM A.

CIRCLE No.

Demand Register of Rate on the Annual Value of Holdings levied under Act III (B.C.) of 1884.

Number on rating list published under section 112 or serial No. in the enhancement register if subsequently added.	Description of holding.	Owner's name.	ORIGINAL RATE.				SUBSEQUENT REVISIONS.			Reference to page and entry in the Register of Remissions, or in the Register of New and Improved Holdings.	Initials of the Vice-Chairman.	REMARKS.
			As per rating list.		As per first demand.			Future rate.				
			Annual value of holding.	Quarterly instalment.	Annual value of holding.	Quarterly instalment.	Date of revising order.	Annual value of holding.	Quarterly instalment.			
1	2	3	4	5	6	7	8	9	10	11	12	13

a separate volume shall be assigned to each collecting circle, and a sub-division of the volume to each mohulla, road or street as may be most convenient: a sufficient space being left below each sub-division for subsequent entries of new holdings.

N. B.—The same sub-divisions in the same order shall be followed in posting the Bill, the Remission and the Enhancement Registers.

9. Columns 1 to 5 shall be filled up from the rating list; and a space of 2½ or 3 inches shall be left between each name in order to provide room for posting revisions.

10. As petitions against the rating list come in [see rules 19 and 20 below], their numbers and date shall be noted in column 13, "Remarks," in order to keep the entries to be made in columns 6 and 7 open to the latest convenient date.

11. Columns 6 and 7 shall be filled up as follows:—

First.—In respect of those names against which there is no reference to petitions in column 13, by entering the same amounts as are shown in columns 4 and 5 respectively.

Secondly.—In respect of those names against which the receipt of a petition has been noted, by entering the amounts shown in the orders passed by the Commissioners of Appeal, or, if no orders have been passed in time, the amounts shown in columns 4 and 5 respectively.

12. Columns 6 and 7 shall be totalled by sub-divisions. The Vice-Chairman, the Secretary, or a Commissioner appointed for the purpose, shall then carefully compare the entries in columns 1 to 7 with the rating list, and with the orders of the Commissioners of Appeal, and shall sign his name below each sub-divisional total in token of having made this comparison. Each sub-divisional total shown in column 7 shall then be posted into the quarterly demand abstract of the circle in Form B, which shall be prepared on the opening pages of each Demand Register.

13. Columns 8 to 11 shall be filled up from columns 3, 25, and 26 of the Remission Register, or from columns 2, 8, and 9 of the Enhancement Register, as the case may be.

14. The Vice-Chairman shall take care that the Demand Registers are free from erasures, and no alteration shall be made in them except under the initials of the Vice-Chairman or other officer empowerd to sign for him.

ABSTRACT OF DEMAND FOR EACH CIRCLE.

15. The abstract shall be prepared in the opening page of each Demand Register. It shall be in Form B.

FORM B.

CIRCLE No.

Quarterly Abstract of the demand on account of Owner's House-rate during the currency of the Valuation published in the year .....

	SUB-DIVISIONS OF THE CIRCLE.						TOTAL.	REMARKS.
	No. 1.	No. 2.						
Demand for the [First] quarter of 18								
Add new and improved holdings during the quarter (as per total of column 11 of Enhancement Register) ...								
Total ...								
Deduct remissions granted during the quarter (as per total of column 28 of Remission Register)								
Demand for the [Second] quarter of 18								
(and so on)								

16. The first entries shall be posted from the sub-divisional totals shown in column 7 of the Demand Register, and thereafter the entries shall be posted punctually every quarter from the Enhancement and Remission Registers as prescribed and explained in the form itself.

17. The totals of each Circle Demand Abstract shall be posted quarterly into the Abstract of Demand for the whole municipality, which may conveniently be placed at the beginning of the Demand Register belonging to circle No. 1.

ABSTRACT OF DEMAND FOR THE WHOLE MUNICIPALITY.

18. This abstract shall be in Form C. It shall be posted quarterly from the totals of the Abstracts of Demand of each circle.

FORM C.

Quarterly Abstract of the demand on account of Owners' House-rate during the currency of the Valuation made in the year ....

	COLLECTING CIRCLES.						TOTAL.	REMARKS.
	No. 1.	No. 2.						
Demand for the [First] quarter of 18								
Add new and improved holdings during the quarter ...								
Total ...								
Deduct remissions granted during the quarter ...								
Demand for the [Second] quarter of 18								
(and so on).								

PETITIONS.

19. Petitions against the assessment should, if possible, be presented in forms of a uniform pattern. The use of the form annexed to those rules is suggested for this purpose.

20. Petitions shall be registered in Form D by means of which the progress made in dealing with petitions shall be watched.

FORM D.

PETITION REGISTER.

Register of Petitions for exemption from or reduction of Owners' house-rate.

Serial No.	Name of petitioner.	HOLDING TO WHICH THE PETITION RELATES.			Date of receipt of petition.	Date when passed on by Vice-Chairman to revising authorities.	Date of orders passed on petition.	Remarks and note of whether entry has been made in the Remission Registers.
		Circle.	Sub-division.	No. on list published under section 112 or on Register of New and Improved Holdings.				
1	2	3	4	5	6	7	8	9

Remission Register.

21. All remissions shall be entered in the Remission Register, Form E, of the circle concerned.

Form E.

Circle No.

Register of Remissions of Owner's house-rate granted during the quarter ending

Date of entry in this register.	Serial number.	Date of order of remission.	Sub-division, *e.g.* village, street or road.	Number of holding on rating list.	Owner's name.	Rate as it stood before this revision.		Remissions by cancellation or reduction of outstanding rate bills [*all entries in these columns are to be posted into the Bill Register*].												Remissions by reduction of demand next to be made.		Difference between previous rate (columns 7 and 8) and revised rate (columns 25 and 26) being the amount by which the future demand will be reduced.		Initials of Vice-Chairman.	Remarks. Reference to proceedings, petitions and lists of irrecoverable rate bills, &c.
								Amount remitted for each quarter of the previous year.						Amount remitted for each quarter of the current year.						Future rate to be posted into the Demand Register.					
								1st quarter.		2nd quarter.		3rd quarter.		4th quarter.		1st quarter.		2nd quarter.		3rd quarter.		4th quarter							
						Annual value of holding.	Quarterly instalment.	Number of bill.	Amount.	Number of bill.	Amount.	Number of bill.	Amount.	Number of bill.	Amount.	Number of bill.	Amount.	Number of bill.	Amount.	Number of bill.	Amount.	Number of bill.	Amount.	Annual value of holding.	Quarterly instalment.	Annual value of holding.	Quarterly instalment.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30

22. Remissions are of two kinds, viz.—

(*a*) Those in respect of bills made out, whether actually served or not.

(*b*) Those in respect of the demand next to be made.

Two separate sets of columns are therefore provided, viz., Columns 9 to 24 for bills drawn, and columns 25 and 26 for future rate. The remissions shown in columns 9 to 24 shall be posted into the Bill Registers in detail, and the daily total of these remissions shall be posted into the tax-darogah's Daily Registers, Form J, for the circles and quarters concerned.

The amounts in columns 25 and 26 shall be posted in detail into the Demand Register, Form A.

The quarterly total of column 28 shall be posted into the Circle Demand Abstract, Form B.

23. Whenever a remission is granted in respect of a bill made out, the counterfoil of the bill and also its red receipt shall be placed, together with the Remission Register, before the Vice-Chairman.

If the demand has been entirely remitted, both the counterfoil of the bill and the red receipt shall be stamped "Cancelled" in large type, and the fact of cancellation attested by the initials of the Vice-Chairman.

If the demand has been reduced, the necessary correction shall be made in the counterfoil of the bill and in the red receipt, and attested by the initials of the Vice-Chairman.

Enhancement Register.

24. All new assessments made after the publication of the list under section 112, and all enhancements of the original assessments, shall be posted in the Enhancement Register, Form F, under the initials of the Vice-Chairman or Secretary.

Form F.

Enhancement Register of new and improved holdings, showing increase to the demand on account of house-rate for the Quarter ending

Serial No.	Date when brought on to this register.	Sub-division.	No. of holding, if any, in Demand Register.	Name of owner and description of holdings.	Former valuation, if any.		New or enhanced valuation.		Difference between previous and revised valuation being amount of increase to demand.		Remarks and reference to proceedings, &c.	Vice-Chairman's initials.
					Annual value of holding.	Quarterly instalment.	Annual value of holding.	Quarterly instalment.	Annual value of holding.	Quarterly instalment.		
1	2	3	4	5	6	7	8	9	10	11	12	13

25. The entries in columns 8 and 9 shall immediately be posted in detail into the Demand Registers in the space left for this purpose below the sub-division concerned (see rule 8), and the quarterly total of column 11 shall be posted into the Circle Demand Abstract, Form B, to work out the demand for the following quarter.

26. It must be remembered that, under section 93 of the Act, the new and enhanced assessments take effect only from the beginning of the following quarter.

BILLS AND BILL FORMS.

27. Bills for house-rate shall be in three parts in Form G, the receipt portion being printed in red ink.

Vice-Chairman.

28. An estimate shall be made of the number of forms likely to be required for a year's consumption, and arrangements shall be made with the Superintendent of Government Printing at Calcutta to supply the bill forms printed in English, or in the vernacular, or both, the complete year's supply being consecutively numbered, and stitched in books of convenient size (say each containing 100 forms).

The full year's supply need not of course be obtained at once, but by means of two or more indents, so as to ensure the year's supply agreeing very closely with the actual requirements.

29. The surplus forms, which will be very few in number if proper care be taken in making the estimate and indents, shall be destroyed by the Vice-Chairman at the end of each year.

30. On receipt of the forms from the press, they shall be counted under the supervision of the Vice-Chairman or Secretary. On the fly leaf or cover of each book shall be noted the number of forms it contains attested by the initials of the person who counted them.

31. The Vice-Chairman shall keep the bill forms in his personal custody and under lock and key. He shall draw up written instructions prescribing in minute detail the procedure to be adopted in registering the receipt and issue of the forms, in supervising the issue of forms to the bill writers, and in proving that they deliver back every bill form which they have been entrusted to fill up, and in proving the issue of the completed bills to the sircars.

32. The Vice-Chairman shall be especially and primarily responsible for preventing the preparation of fraudulent bills, as well as for closely and constantly watching and enforcing the prompt realisation or obtaining the speedy remission of all bills which bear his signature.

33. The bill forms shall be filled up from the Demand Registers, and the Vice-Chairman shall issue written instructions regarding the comparison of the Bills with the Demand Register before they are brought to be signed.

34. The bills shall be signed or stamped with a *fac simile* signature by the Chairman, Vice-Chairman, Secretary, or the Commissioner for the ward to which the bills belong, and the signing officer shall satisfy himself that the comparison of the bills with the Demand Register has been carefully made.

35. If a *fac simile* stamp be used, it shall always be kept in the personal custody of the officer whose signature it represents, and shall never be used except in his presence and actually in his sight.

Bill Register.

36. The signed bills shall be entered in the Bill Registers, Form H. The form requires no explanation, but it should be noted that in the case of bills paid in full a tick mark may be entered instead of the amount in columns 6, 12, 18 and 24.

Form H.

Circle No.

Register of Bills for Owners' rate on holdings for the year.....

Sub-division.	No. of holding on the Demand Register.	Name of owner.	First quarter.						A set of columns Similar to Nos. 4 to 9 for 2nd, 3rd, and 4th quarters, respectively.	Remarks.
			No. of bill.	Amount.	How satisfied.					
					Paid.		Remitted.			
					Amount.	Date.	Amount.	Date.		
1	2	3	4	5	6	7	8	9	10 to 27	28

37. As stated in rule 8, the sub-divisions of each Bill Register will be identical with those of the corresponding Demand Register.

38. Each sub-division shall be totalled every quarter under the initials of the Vice-Chairman or Secretary, and shall be compared and agreed with the figure in the Circle Demand Abstract, Form B, which shall be signed by the Vice-Chairman in token of agreement.

Service of Bills.

39. The bills having been made over to the collecting sircars in accordance with the procedure prescribed by the Vice-Chairman under rule 31, each sircar shall commence the service of the bills on the first day of the quarter.

40. If the tax be paid upon presentation of the bill, the sircar shall sign the red receipt, shall hand the bill together with the receipt to the tax-payer, and shall note the date of payment in the counterfoil of the bill, and he shall also enter the transaction in his Daily Register of collections, Form I.

Form I.

Circle No.

Sircar's Daily Register of Collections on account of Owner's house-rate.

Date.	Sub-division.	Number of holding.	Owner.	Number of bill.	Amount received on account of the previous year.				Amount received on account of this year.				Total.	Warrant fees.	Remarks and note of any bill paid to the Cashier at Office.
					First quarter.	Second quarter.	Third quarter.	Fourth quarter.	First quarter.	Second quarter.	Third quarter.	Fourth quarter.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

41. He shall either take the register with him on his rounds and enter therein each payment as he collects it, or if, owing to the size of the register, or to there being more than one

kind of tax, this plan is found inconvenient, he shall take with him a note-book in the following form :—

Name.	No. of bill.	Whether for last or current year.	For what quarter.	House.			Latrine.			Water.		
1	2	3	4	5			6			7		
				Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.

This note book may conveniently be of foolscap size divided lengthways, the left hand page being assigned for columns 1 and 2, and the right hand page for columns 3 to 7.

42. If the tax be not paid upon presentation of the bill, the sircar shall separate the bill from the receipt and serve the bill in the manner prescribed in section 356 of the Act. He shall at the same time, whenever possible, inform the assessee on what date he will again demand payment.

43. The sircar shall return to the Municipal Office either every day, or, if so permitted by the Vice-Chairman, every alternate day, and shall deliver to the tax-darogah all the money he has collected, together with his daily register duly written up in Form I, and the bill books relating thereto.

44. The tax-darogah shall then check the sircar's account by comparing the amounts shown in the register with the bill book counterfoils from which the red receipts are missing.

He shall then total the register and see that it corresponds with the money delivered to him by the sircar. If all is in order, he shall initial the register in token of having received the money.

45. If the sircar takes his daily register with him on his rounds, he shall be provided with two copies, which he shall use alternately, and he shall leave one copy in the office to enable the tax-darogah to post his books.

46. The entries in the Sircars' Daily Registers shall then be posted into the Bill Registers, and the tax-darogah shall post the total amount received from each sircar into his cash-book as provided in Part I of the Account Rules.

47. The tax-darogah shall then post his Daily Registers of Collections, Remissions and Outstandings in Form J.

N. B.—There will be one of these registers in use for each quarter, the demand for which has not been wholly cleared.

FORM J.

Tax-darogah's Daily Register of Collections, Remissions, and Outstandings of house-rate in respect of the quarter ending

Memorandum of the quarter's demand in each circle.	Date.	Circle No. 1.				Similar sets of columns 3 to 6 for every other circle.

Total of the month ...						

48. The columns headed "Collections" shall be posted from the tax-darogah's cash-book, and those headed "Remissions" from the columns of the quarter concerned in the several Remission Registers.

49. When the total for the month has been struck, an abstract shall be prepared in Form K, showing the condition of the taxation account in respect of the quarter to which the particular daily register relates, viz.—

FORM K.

Abstract of the Tax-darogah's Daily Register for the quarter ending

Total remissions ...			
Total collections plus remissions			
Outstanding for the quarter ending			

50. The abstracts for every quarter in respect of which there are outstandings having been prepared, their totals shall be posted into monthly progress statements, which shall be prepared separately for each circle, so as to show clearly how each sircar is working the circle entrusted to him. The circle progress statement shall be in Form L.

FORM L.

MONTHLY PROGRESS STATEMENT OF CIRCLE No. UNDER SIRCAR

	LAST YEAR.				CURRENT YEAR.				Total.
	1st quarter.	2nd quarter.	3rd quarter.	4th quarter.	1st quarter.	2nd quarter.	3rd quarter.	4th quarter.	
Demand for each quarter									
Collections up to the end of last month for each quarter.									
Collections during this month for each quarter.									
Total collections for each quarter ...									
Remissions up to the end of last month for each quarter.									
Remissions during this month for each quarter.									
Total remissions for each quarter ...									
Grand total of collections plus remissions for each quarter.									
Balance outstanding for each quarter									

51. The progress statements for each circle shall be verified by the Vice-Chairman or Secretary and the Accountant, and shall be laid before the Commissioners each month at their ordinary monthly meeting held under section 38 of the Act.

52. It will be unnecessary to compile the circle progress statements into a combined statement for the whole municipality every month, but it shall be done at least twice a year, and as often as the Commissioners may require it.

53. The progress statement of each circle shall be carefully scrutinised by the Commissioners at their monthly meeting. Whenever any progress statement shows outstandings extending over three complete quarters, the Commissioners shall cause a detailed list to be prepared of the bills outstanding for more than a complete half-year.

54. This list shall be prepared, circle by circle, from the Bill Registers by a clerk unconnected with the taxation department, if possible, and shall be verified by comparison with the undelivered receipts by the Secretary or other officer nominated to the duty. If the circle totals do not agree with those shown in the progress statements, a Committee shall be appointed to audit the taxation accounts and to reconcile the difference. If this difference be not reconciled within fifteen days, the Municipal Commissioners shall submit to the Magistrate a report stating the amount of the difference, the causes to which it is attributed, and the steps taken to reconcile it.

55. The Commissioners shall proceed to deal with the outstandings either by collecting or remitting the amounts. Every year, in the month of June, the Commissioners shall submit a taxation report through the Magistrate to the Commissioner of the Division in the form of a combined progress statement for the whole municipality, and if there are outstandings extending further back than the first quarter of the previous year, full explanation shall be given as to why these taxes have neither been collected nor remitted, and the Commissioner of the Division shall forward these explanations to Government with his remarks.

56. The outstandings mentioned in rule 55 will be dealt with as a separate arrear account and worked entirely from the lists. *i.e.*, in the month of June, in preparing this list of old outstandings from the Bill Registers, the letter A in blue pencil shall be entered in the Bill Registers against each bill transferred to the arrear list and the total amount transferred shall be noted at the foot of the circle progress statement concerned.

All subsequent realisations or remissions of the bills so transferred shall be entered in the list only, and not in the Bill Registers or Remission Registers, which provide for the current and last year's transactions only. The sircars shall set apart separate pages in their collection register or note-book for the entry of these arrear collections. The general registers will thus be wholly cleared, and shall not be used for the record of what have become practically dead accounts.

SECOND SERVICE OF BILLS, NOTICES OF DEMAND AND DISTRESS WARRANTS.

57. On the first day of the second month of the quarter, the sircar shall again take round the undelivered receipts, together with notices of demand, which shall in the interval have been attached to the receipts by the tax-darogah. If the demand is then not paid, the notices of demand shall be left with the assessees, and the undelivered receipts shall be returned to the tax-darogah for the preparation of distress warrants with a note of the date on which the notices of demand were served. When fifteen days shall have elapsed after the delivery of a notice of demand, the sircar shall proceed with a warrant of distress, and if the demand as well as the fee prescribed by law for the warrant expenses be not then satisfied, he shall make an attachment of the defaulter's property, preparing an inventory of all goods and chattels so attached, and proclaiming a notice of sale by beat of drum.

BILLS PAID AT OFFICE.

58. In the event of any unpaid bill, of which the counterfoil and red receipt are in the custody of the tax-darogah being brought to the Municipal Office and there satisfied, the

tax-darogah shall deal with the transaction precisely as the collecting sircar does in ordinary course, entering the amount in the Sircar's Daily Register, and noting the fact that the bill has been paid at office in the remark column as provided in the form.

COLLECTION OF TAXES AT THE MUNICIPAL OFFICE.

59. An alternative procedure is suggested, the distinctive feature of which consists in the refusal to permit the sircars to collect any money. Their duty will be strictly limited to serving the bills and notices of demand upon the assessees in the manner prescribed in the preceding rules. But each bill will contain a caution against the payment of any money to the server of the bill, and a direction to the rate-payer to proceed to the Municipal Office and pay the amount of the bill there.

60. At the end of each week the serving peons will bring back the bill-books and receipts to the Municipal Office with a certificate that every bill missing from the book has been properly served upon the assessee.

61. The tax-darogah, assisted by a sufficient number of clerks, should remain in the Municipal Office at a counter during certain fixed hours of each day, and upon presentation of a bill by a tax-payer he should receive the amount and hand to the tax-payer the corresponding red receipt.

62. The amount so received should be entered in a Daily Receipt Register, Form I, one such register being used for each kind of rate or tax. A separate register or set of registers should of course be supplied to each receiving clerk.

Form for Petition of Objection against assessment or valuation under Section 113 *of the Bengal Municipal Act, to be presented within one month from the date of publishing the Assessment or Valuation List.*

[The petitioner is required to fill up only seven columns, Nos. 1 to 7: the rest are to be filled up by the Officers noted herein.]

1		3	4		6	7	8	9	10	11	12	13
Date of petition.	Petitioner's name, his father's name.	No. or name of the mohalla in which each house exists.	No. of house on the Register over-assessed in each mohalla.	TAX.		Grounds of remission to be stated in brief by the applicant.	Office certificate as to the correctness of columns 1 to 5 (in brief).	Opinion of the Ward Commissioner or of the officer enquiring.	SUB-COMMITTEE'S ORDERS WITH REGARD TO EACH HOUSE.		Initials of the disposing officer.	Remarks of the disposing officer as to any arrears due from the petitioner, and the date from which the order is to take effect.
				Paid last year.	Assessed this year.				Amount remitted.	Amount finally assessed.		

No. 198Mne., dated Calcutta, the 4th August 1890.

THE following report of the 13th quarterly inspection of the Dock Works at Kidderpore, which are being carried out by the Commissioners of the Port of Calcutta, is published for general information.

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Government of Bengal.

QUARTERLY INSPECTION OF THE KIDDERPORE DOCK WORKS.

Dated Calcutta, the 31st July 1890.

From—MAJOR A. D. MCARTHUR, R.E., and W. CONNAN, ESQ.,
To—The Secretary to the Government of Bengal, Public Works Department.

ADVERTING to the orders of the Government of Bengal, communicated with your letter No. 1874M. of the 19th instant, we have the honour to report that the 13th quarterly inspection of the Dock Works was made on the 26th instant.

2. The usual tabular statement and the index plan showing the work done during the quarter, ending 30th June last, and the total amount executed from the commencement which have been prepared by the Superintending Engineer of the Dock Works, are already with Government. The present state of the various works under construction is reported in the following paragraphs:—

Sixty feet Lock.—This work is completed with the exception of the river-side revetments; about 13·7 per cent. of excavation and 2·6 per cent. of masonry work still remains to be done. The hanging of the riverside gates is almost completed.

Eighty feet Entrance.—The hanging of the gates is finished, and, with the exception of the riverside revetments, the work is almost completed. About 21·0 per cent. of excavation remains to be done.

Double entrance to Dock No. 1.—The work is almost completed, the gates being hung, and the completion of the erection of the swing bridge only remaining.

Tidal Basin.—The quay wall foundation has now been completed, and only a small quantity of the superstructure remains to be done; about 7·4 per cent. of masonry still remains.

Graving Dock.—All foundations are in; earthwork completed and only 4·3 per cent. of masonry remains to be done. The foundations of the engine-house and chimney shaft are also in.

Government Graving Dock.—Earthwork completed, foundations all in and two-thirds of the masonry done.

Dock No. 1.—The quay wall foundations and masonry all completed, with the exception of coping; 3,771,3[illegible]3 c.ft. of excavation is completed, and about 14·0 per cent. remains to be done. Considering the state of the work, it is expected that the earthwork will be completed during the current quarter.

Boat Canal.—During the quarter the excavation of this work was proceeded with, and about 1,978,618 c.ft. of earthwork executed, thus leaving only 25·1 per cent. of excavation to be done. The lift-lock is finished with the exception of gate erection. Main pumping station is well in hand. The bridges are practically complete with the exception of the approaches. The foundation of the Chetla Hât lock is in a forward state.

Subsidiary Works.—The chimney, shaft and engine-houses are complete, and the engine erected. The accumulator tower is bordering on completion and the erection of the accumulator almost complete. The jetty heads to the entrance are well in hand, and good progress has been made with the foundations of six cargo sheds.

Expenditure.—The total expenditure up to end of the quarter under review is reported to be Rs. 1,85,97,963, of which Rs. 1,59,95,278 represent outlay on works and Rs. 26,02,685 on account of land.

Sanitary.—The health of the workpeople was not so satisfactory as in the previous quarter. The average number of coolies employed was 7,579, among whom there were 19·0 deaths, thus showing a death-rate of 29·30 per annum.

General Remarks.—We are of opinion that fair progress has been made with the works, and that so far as we have been able to judge from a quarterly inspection the character of the work was satisfactory, and the quantity of the work done was all that could be desired, promising completion at an early date.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 9th August, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.

	Howrah „ 9, '90	2·46	Weather—showery. Transplanting of *amun* continues. *Aus*, jute, and sugarcane doing well. More rain wanted in parts of the Uluberia subdivision. Price of common rice 13 to 14 seers per rupee.
	Uluberia ...	0·83	
	Central Districts.		
PRESIDENCY DIVN. 6	24-Pergbs. Aug. 12, '90	3·10	Weather—seasonable. Prospects of *aus* and jute continue fair. Transplantation of *amun* going on briskly, but more rain wanted in places. Prices stationary.
7	Nuddea „ 9, '90	3·80	Weather—seasonable. Prospects of standing crops good. *Aus* paddy on chur lands damaged by the rise of the rivers. Indigo crop unsatisfactory.
	Kushtea ...	1·44	
	Meherpore ...	2·52	
	Chuadanga ...	1·11	
	Ranaghat ...	1·60	
8	Khoolna „ 9, '90	2·00	Weather—seasonable. Prospects of crops continue favourable, but transplantation has been somewhat retarded on the low lands in Bagirhat and Khulna by excessive moisture.
	Bagirhat ...	1·85	
	Satkhira ...	1·84	
9	Jessore „ 9, '90	1·48	Weather—hot and cloudy with occasional showers. Harvesting of *aus* going on. Prospects of *amun* good. Rivers rising. Some damage done to *aus* crop in thana Sailkupa and also in part of thana Jhenidah by the early rise of the river.
	Jhenidah ...	1·20	
	Magura ...	2·09	
	Narail ...	1·59	
	Bongong ...	1·02	
10	Moorshedabad „ 9, '90	1·52	Weather—fine with passing clouds. Bhagiruthee unprecedentedly high, gauge reading being this noon (9th August) 30′ 6½″. Much damage has been done to the *bhadoi* crop in the Lalbag and Jungipore subdivisions by the floods. *Amun* progressing on well.
RAJSHAHYE DIVN. 11	Dinagepur „ 9, '90	0·49	Weather—seasonable Transplantation of *haimanti* rice continues. Reaping of *bhadoi* rice and jute has just been taken in hand. Prospects very favourable. Price of rice stationary.
	Thakurgaon ...	6·0	
12	Rajshahye „ 9, '90	2·05	Weather—seasonable. Plenty of rain. Prospects of crops excellent. The rain has done no harm. Jute is being cut and steeped. The crop will be a good, if not a bumper one; but prices are low. *Aus* is being reaped.
	Nattore ...	3·15	
	Nowgong ...	1·07	
13	Rungpur „ 9, '90	1·20	A break in the rains. Bright weather, with light easterly winds. All crops promise well. Jute has been cultivated this year to an extent hitherto unknown.
	Kurigram ...	2·55	
	Gaibanda ...	4·23	
	Nilphamari ...	2·94	
14	Bogra „ 9, '90	2·78	Weather—very damp and gloomy, with frequent showers up to the 8th instant inclusive. On the 9th sunshine has begun, which was much wanted. Transplantation of *amun* is going on apace. *Aus* is still being harvested, with good outturn. Jute is still being cut and steeped, and is an excellent crop. Common rice is selling at 19 seers a rupee.
	Sherpur ...	1·04	
	Nowkhilla ...	2·04	
15	Pubna „ 9, '90	0·96	Weather—hot in the day, but cool at night. Prospects of *amun* and *aus* paddy and jute are favourable. *Aus* and jute on low lands partially damaged. Prices of food-grains stationary.
16	Darjeeling „ 9, '90	7·10	Weather—rainy with occasional breaks. The rain has abated, and there has been some sunny weather. Jute crop in the Terai estimated at 10 annas.
17	Julpigoree „ 9, '90	1·19	Weather—close and cloudy. Transplantation of *amun* going on rapidly. Reaping of *aus* progressing. Jute growing well. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Aug. 9, '90	4·62	Weather—mostly cloudy with gleams of sunshine at intervals. Jute and *aus* paddy being harvested. *Aus* has suffered to some extent owing to flood. *Amun* paddy thriving. Price of common rice 13 to 15 seers per rupee.
19	Furreedpur „ 9, '90	1·00	Weather—seasonable. River has risen higher than the last year's highest flood level, and has submerged the growing crops in the thanas of Kotwali, Ainpore, and Bhanga. River is now going down slowly to the great relief of the people. *Aus* had been harvested for the most part before the waters rose, and the damage done to it will not probably be more than four annas. Jute crop has been good, but its price is low, about Rs. 2-4 per maund. *Amun* has not been so damaged as it was anticipated at first. The crops in Madaripur are fair, and such is also nearly the case in Goalundo. Want of fodder is severely felt. Price of rice stationary.
20	Backergunge „ 9, '90	2·17	Weather—seasonable. State of standing crops generally good, but some damage has been done to *amun* seedlings by floods. Common rice selling at about 13¼ seers per rupee.
21	Mymensingh „ 9, '90	2·14	Usual monsoon weather with slight rainfall. In the Tangail subdivision the crops are being damaged by high flood. In other parts of the district prospects continue favourable on the whole. Common rice sells at 13 seers 9 chittacks per rupee.
Chittagong Divn. 22	Chittagong „ 9, '90	5·36	Weather—seasonable. Prospect of *aus* fair. Lands are still being prepared for *amun*. Rice selling at 16 seers per rupee.
23	Noakholly „ 9, '90	3·12	Weather—seasonable. *Aus* crop is being reaped and harvested. Transplantation of *amun* going on. Price of *amun* rice 13 seers and of *aus* rice 16 seers per rupee at Feny subdivision.
24	Tipperah „ 9, '90	2·54	Weather—seasonable. *Aus* paddy is being cut. Prospects of *amun* paddy good. Jute cutting and steeping going on. The flood is high at Brahmanberiah. No injury to paddy crop has been yet caused.
25	Chittagong Hill Tracts. „ 8, '90	7·04	Weather—cloudy and rainy throughout the week, except on the 2nd. Early *jum* paddy ripening. Cotton progressing. Transplanting on low lands commenced. Common rice being sold at 12 seers 5 chittacks per rupee.
	Hill Tipperah ...	.....	Report not received.
BEHAR.			
Patna Divn. 26	Patna „ 9, '90	3·79	Weather—hot. Transplantation of paddy continues. Prospects of *bhadoi* crops not favourable owing to excessive rain. Much injury reported to have been done to them in the Barh subdivision. Prices of food-grains stationary.
	Barh ...	2·16	
	Behar ...	3·47	
27	Gya „ 9, '90	0·89	Weather—hot and cloudy. Transplantation of paddy going on. *Bhadoi* injured by excessive rain. Sugarcane doing well. Prices of food-grains almost stationary.
28	Shahabad „ 9, '90	5·92	Weather—cool and stuffy alternately; some sunshine. *Bhadoi* is almost all gone in the Sudder and Buxar subdivisions, and partially damaged in the Sasseram and Bhabuah subdivisions. Prospects of paddy good. Prices stationary.
	Buxar ...	4·32	
	Sasseram ...	1·41	
	Bhabuah ...	1·34	
29	Durbhunga „ 9, '90	4·05	Bright sunshine in the latter part of the week. Prospects of the *bhadoi* and *aghani* crops continue favourable except where damage has been done by floods. A break in the rains for a few days would do good to the crops. Indigo manufacture still going on. Prices remain stationary.
	Madhubani ...	4·11	
30	Muzufferpur „ 9, '90	5·64	A good deal of rain has fallen during the week, but there have been two clear, dry days, which have effected some improvement in the prospects of the crops. The Bur Gundak which has overflowed its banks, and submerged a considerable area of crops, is now falling. The damage done by floods in all parts of the district is less serious than in the past year.
	Hajipur ..	3·13	
31	Sarun „ 9, '90	2·88	Weather—finer with some sun. *Bhadoi* crops almost all gone for want of sun and from excessive rain. Heavy floods have seriously damaged the rice and indigo crops. Extent of damage cannot at present be stated.
32	Chumparun „ 9, '90	2·22	Weather—cloudy off and on; hot with east wind. Sunshine after heavy and continuous rainfall has been beneficial to the *bhadoi* crops, some of which have been damaged to some extent. Transplantation of paddy nearly completed. Indigo manufacture of first cutting finished.
	Bettiah ...	3·58	
Bhagulpore Divn. 33	Monghyr „ 9, '90	0·75	Easterly winds, less rain and more sun. Floods have damaged the *bhadoi* crops, especially along the Ganges. Indian-corn promises well.
	Boguserai ...	2·00	
34	Bhagulpur „ 9, '90	1·21	Weather—clear. Slight rain. Previous heavy rain and rising of the river have done some damage to *marua* and *makai*. Prospects of paddy good, and there has been sunshine for the last 3 or 4 days.
	Banka ..	3·08	
	Mudhepura ...	2·52	
	Soopool ...	2·11	
35	Purneah „ 9, '90	1·12	Weather—sunny with breezes. *Bhadoi* harvest commencing with favourable prospects. Jute harvest also commencing, but some damage done by excessive rain. Transplanting of winter rice continues. Some injury done by floods in the north-east and centre of the district.
	Kishengunge ...	7·24	
	Arrareah ...	4·92	
36	Maldah „ 9, '90	2·30	Weather—hot and cloudy with occasional showers. *Bhadoi* is being harvested. A great deal has been damaged by inundation. Transplantation of winter rice going on. This crop also has suffered to some extent from inundation. Jute is being cut. Common rice selling at from 11 to 17 seers per rupee.
	Shibgunge ...	2·33	
	Gajole ...	3·43	
37	Sonthal Perghs. „ 9, '90	6·56	Ordinary monsoon weather. Paddy transplantation almost finished; prospects excellent. *Makai* somewhat damaged by excessive rain, and a good deal by early rise of the river in Rajmehal.
	Deoghur ...	2·30	
	Godda ...	2·73	
	Jamtara ...	1·12	
	Pakour ...	5·25	
	Rajmehal ...	4·75	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Aug. 9, '90	1·89	Rainfall during the week quite insufficient. Transplanting of *sarad* paddy in many places interfered with for want of sufficient rainfall. In Binjharpur Chakla of the Jajpur subdivision, *sarad* paddy has been attacked by insects.
	39	Pooree ,, 7, '90	1·29	Weather—seasonable. Puddling, weeding, and transplanting of *sarad* rice crop going on. *Beali* or early rice in ear. Miscellaneous crops doing well. Prices of common rice vary from 18 seers 6 chittacks to 21 seers per rupee in the Sudder subdivision.
		Khoordá ...	0·79	
		Banpur ...	3·34	
	40	Balasore ,, 9, '90	2·65	Weather—more seasonable than in previous week. Crops suffered from want of rain in the latter part of July. Prospects somewhat better now. Number of coolies on relief-works 38.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Aug. 9, '90	2·62	Weather—seasonable; fair at intervals. Moderate rainfall. Transplantation of paddy progressing vigorously. All crops doing well except Indian-corn, which has been damaged by excessive rain. Prices about stationary.
	42	Lohardugga ,, 9, '90	2·80	Weather—seasonable. Transplantation of winter rice is being carried on actively everywhere. Prospect of *bhadoi* crop continues good. No material change in prices.
		Palamow (up to 4th Aug.)	2·55	
	43	Singbhoom Aug. 9, '90	0·78	Rain holding off too long. Heavy rain urgently needed. Rice crop suffering for want of sufficient rain. *Bhadoi* crops are, however, in very satisfactory condition. Rice selling at from 16 to 24 seers per rupee except at Manaharpur in Sarandha, where it has risen to 12 seers per rupee.
	44	Manbhoom ,, 9, '90	0·69	Weather—seasonable. Slight rain fell during the week, but it is not unfavourable to the crops. Transplantation about three-fourths finished. Prospects of crops good. Ordinary rice selling at from 15 to 20 seers per rupee.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1890.

THE chief peculiarities in the weather of July have been—

1. The uniformly low pressure which obtained during the greater part of the month, the only occasion when excess continued for any considerable time being during the last week, when there was excess of from two to four hundredths of an inch in the southern districts, and of less than two hundredths in North Bengal, Behar and Chutia Nagpur. The mean defect for the month was generally between ·01 inch and ·02 inch in Lower Bengal, and between ·02 inch and ·05 inch in the northern districts.

2. Low temperature has prevailed. The month commenced with almost normal temperature, but after the first week there was always a considerable deficiency, especially in the northern half of the province, where unusually heavy rain has been falling. Defect increased towards the end of the month, and during the last week varied from 1·6° in Orissa to 3·6° in North Behar. The mean defect for the month is therefore considerable, being between ·6° and 1° in Lower Bengal and about 1·5° in the northern half.

3. Ordinary monsoon weather has prevailed with practically no intervals of disturbed weather. Rain has fallen in Orissa and South West Bengal on about the normal number of days, but in Behar and North Bengal the number is from four to six above the average, while the amount of rain received has been very largely above the normal in the Northern districts, especially over the Himalayas, and considerably above in the other districts, except Orissa and South-West Bengal.

4. The absence of the small cyclonic storms which usually form during the rainy season has been very marked, one depression occurring at the beginning of the month and another very unimportant whirl about the middle.

Cyclonic storm from June, 28th, to July, 2nd.—The depression began to form on June, 28th, and then appeared as a local shallow low pressure area over Orissa and South-West Bengal, the lowest pressure within it being 29·585 inches at Balasore. Westerly winds were blowing at Cuttack and False Point, and the easterly element in directions had become more pronounced in South-West Bengal, while rainfall was only light and local in Lower Bengal. On the following day pressure fell briskly everywhere; the cyclonic circulation became more distinct and the centre was still over the land between Balasore and Calcutta. After this a somewhat rapid deepening set in to the south-east of the depression, the largest changes being in Arakan, and a trough of low pressure extended from the Bay in a northerly direction. The centre was to the east of False Point and south of Saugor Island, and stormy weather, with heavy rain squalls, prevailed over the northern half of the Bay, but over the greater part of Bengal rainfall had almost ceased. On the 1st of July the storm had developed, the greatest difference of pressure from the south-east to north-west of the Bay being nearly half an inch Gradients were therefore steeper, and a slow westerly motion was taking the depression towards the Orissa coast, so as to pass near False Point. The storm area crossed the coast during the evening of this day, and after the passage of the centre, when pressure at False Point fell to 29·09 inches, a southerly gale blew at all the coast stations. A very rapid rise of pressure followed immediately afterwards, not only in the north-west of the Bay, but over the whole of Bengal, and from being largely below the normal an excess of about two-tenths of an inch accumulated in 28 hours. From about 9 P.M. on the 1st, when the storm centre was near False Point to 8 A.M. on the 2nd, pressure rose about half an inch, and in the eastern districts of Bengal the rise amounted to nearly two-tenths of an inch. These rapid changes of pressure seem to have had an important influence in preventing the in-rush of moist southerly winds, which usually follows depressions of even less intensity than this over the western districts of Bengal, as a westerly current commenced and shortly became general over the whole province, comparatively fine weather prevailing from the 3rd to the 5th.

After the rapid rise of pressure, which continued till the 4th, a slow steady fall set in over the whole province, and lowest pressure being in North Bengal and gradients rather steep, strong south-westerly winds blew at the head of the Bay and in Lower Bengal. Westerly winds blew for a day or two in the northern districts, but by the 7th easterly directions again prevailed, in consequence of the displacement of the area of lowest pressure towards the west. From this date till the 18th ordinary monsoon weather was unbroken, and is noteworthy only because of the weak monsoon which blew in the west of the Bay, while in East and North Bengal and Behar very heavy rain fell almost without interruption. Falls were usually heavy in the Darjeeling Hills and adjacent plains from the 14th to the 18th, with the exception of the 16th. The absence of rain in the western districts was probably due to the comparatively dry westerly current which had been blowing from central India, generally extending as far east as the centre of South-West Bengal, and on the 17th as far as Rungpore and Dhubri.

From the 19th till nearly the end of the month conditions were influenced by the shallow depression which, commencing to form in the north-west corner of the Bay on that day, moved towards the mouth of the Hooghly, and thence in a north-westerly direction over Chutia Nagpur. On the 20th the centre was close to Saugor Island, and pressure was under 29·4 inches; on the 21st the area of lowest pressure lay to the west of Burdwan and was almost unchanged in intensity from the previous day; while by 8 A.M. on the following day it had passed out of the province and lay well to the west of Hazaribagh and Gya. It

remained in the North-Western Provinces till the 24th when it filled up, the trough of low pressure at the same time closing up towards the Himalayas, and a steady south-westerly current blew over the whole province, giving heavy rain in all districts. On the 28th pressure fell briskly, and the distribution becoming more normal and uniform, easterly winds again set in and continued till the end of the month.

Strength of the monsoon.—The strength of the monsoon current blowing from the Bay over Bengal from year to year can only be judged by the wind velocities at the coast stations. In the table below are given the means of the actual daily wind velocities for July 1889 and 1890, compared with the normal values for the same month at representative stations on or near the coast line from Akyab to Gopalpore, at which wind observations have been taken for a sufficient length of time to give reliable averages. It will be seen that the only stations where velocity is under the average are Chittagong and Calcutta, and that the difference for these two is small while at all the others, except Akyab, there has been a large excess, amounting at Gopalpore to 110 miles per day and at Saugor Island to 96 miles. The strength of the monsoon current during this year has so far, therefore, been considerably above that of average years.

Stations.	Actual average wind velocity for July 1889.	Actual average wind velocity for July 1890.	Normal wind velocity in July.	Variation of wind velocity for July 1890 from the normal.
	Miles per day.	Miles per day.	Miles per day.	
Akyab ...	120	120	105	+ 15
Chittagong ...	132	149	162	— 13
Dacca ...	138	202	145	+ 57
Calcutta ...	91	102	130	— 28
Saugor Island	408	502	406	+ 96
False Point ...	303	324	280	+ 44
Gopalpur ...	348	410	300	+110

Pressure.—Changes were very large at the beginning of the month, and on the 1st a defect of nearly a quarter of an inch had accumulated in the neighbourhood of the depression. On the 2nd a very rapid rise was general in all districts except South Behar, exceeding ·2 inch in parts of Assam and East Bengal and ·15 inch in Orissa, South-West Bengal, and North Bengal. On the 3rd the rise was still more rapid in Orissa and Chutia Nagpur, and varied from ·22 inch to ·28 inch, but in the other districts it was much smaller and practically zero in North Bengal and Assam. On the 4th a very rapid fall prevailed, the resulting distribution being almost normal. As these rapid changes counterbalanced each other, the mean pressure during these days did not differ much from the normal, and as ordinary small oscillations followed till the middle of the month, large differences from the normal did not again occur. A rapid fall occurred on the 17th, followed by a slow steady rise for some days, after which small upward and downward changes rarely exceeding a twentieth of an inch, alternated till the end of the month. The means for the month are very nearly normal in East Bengal, and below the normal in the other districts by amounts varying from one to four hundredths of an inch.

Temperature—During the first five days was two or three degrees above the normal over the greater part of the province, but after that it has been almost without a break, considerably below in the northern districts, and slightly below in Lower Bengal except in Orissa and the adjacent part of South-West Bengal where, owing to the more scattered rainfall, temperature was at times slightly in excess. Defect in North Bengal and North Behar was very large at times, and during the last week the day temperatures were unusually low, the difference from the normal maximum temperature being at times very little under 10°, while defect in mean temperature was from 4° to 6°. On the 28th maximum temperature at Purneah was 10° below the normal, at Patna 9·8°, Arrah 9·1°, Rungpore 8·9°, and Chupra 8·6°; on the 29th at Arrah 9·1°, Buxar 8·7° and Chupra 8·5°; on the 30th at Durbhunga, Motihari, Patna, and Buxar defect was 8° or more. The monthly means, in consequence of these steady low temperatures, are largely below the normal in all districts except in Orissa and South-West Bengal, where defect is, however, over half a degree. Defect in South Behar is 1·6°, in North Behar, Chutia Nagpur, and Assam 1·4°, and in East and North Bengal ·9°.

Rainfall—Has been unusually heavy in all the northern districts, and moderately heavy in Chutia Nagpur and East Bengal, but in Orissa and South-West Bengal the falls have been very nearly normal, defect being nearly half an inch in the former and excess only ·2 inch in the latter, with an average fall of about 12 inches. The average falls in the other districts are very uniform, North Behar receiving 21·45, East Bengal 19·87, North Bengal 18, South Behar 16·28, and Chutia Nagpur 15·1 inches. Excess is largest in North Behar, amounting there to 9·1 inches, and in the other districts it varies from 4·26 inches in South Behar to ·12 inches in Chutia Nagpur. The districts where the amounts reported from the various stations show the greatest diversity are North Bengal and East Bengal, falls at the hill stations in the former rising to more than 70 inches, while in the plains one or two stations report about 10 inches. In East Bengal the range is from 10 inches to a little over 50 inches.

The comparison of the actual rainfall of the seven meteorological divisions of the province is most accurately shown in the form of a percentage. The figures representing the rainfall for the month calculated in this way are included in the table below under the heading of July. This table gives a condensed summary of the rainfall statistics of the present year up to date for each division, the first seven columns giving the actual rainfall in each month expressed as a percentage of the normal, while the eighth column shows the actual rainfall for the first seven months expressed as a percentage of the normal for the same period. It will be seen that, with the exception of East Bengal in June and Orissa in July, the rainfall during the monsoon season has been considerably in excess, and that, notwithstanding the very deficient rainfall during the early part of the year, the average amount from the beginning of the year has been exceeded in all districts by 2 to 4 per cent. in Lower Bengal, 9 per cent. in Chutia Nagpur, 17 per cent. in North Bengal, and 40 per cent. in Behar.

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	Actual rainfall of first seven months of 1890, expressed as a percentage of the normal fall for the period.
Orissa ...	24	5	216	20	99	124	97	103
South-West Bengal	98	Nil	39	75	87	141	102	104
East Bengal ...	184	4	70	122	102	89	120	102
North Bengal ...	98	Nil	26	155	81	132	129	117
North Behar ...	38	2	25	40	95	140	174	141
South Behar ...	Nil	5	63	80	95	183	136	138
Chutia Nagpur ...	Nil	Nil	120	1	65	132	116	109

With the exception of the south of Orissa and the south-east corner of East Bengal, actual falls have generally increased from the south towards the north. Over a band of country, including the south of Chutia Nagpur, Balasore, the greater part of Midnapur and the 24-Pergunnahs, Howrah, Hooghly, and Jessore, falls have been under 10 inches, and in the other parts of these districts between 10 and 20 inches, frequently about 15 inches. In Chittagong amounts vary from 33·8 at Satkanya to 51·28 inches at Chittagong station, in Chittagong Hill Tracts and Noakholly from 20 to 25 inches, but Hurrishpur reports 46·2 inches. Elsewhere in East Bengal falls are generally between 15 and 20 inches, increasing in the Mymensingh district where the heaviest fall is 29·9 inches at Durgapur. In Pubna, Bogra, Rajshahye, Maldah, Dinagepur, and Rungpur falls are between 10 and 15 inches, but in Julpigoree, Cooch Behar, and the Darjeeling Hills rainfall has been unusually heavy, Kurseong receiving 71·4, Silliguri 69·6, Buxa 60, Darjeeling, Bhagatpur and Kalimpong between 50 and 60, Julpigoree, Fallacatta, and Matabhanga more than 40 inches. In North Behar amounts have been very uniform, very rarely under 20 inches, and over 25 at Kaliaganj, Soopool, and Bagaha only. In South Behar falls are generally between 12 and 18 inches, the stations receiving more than 20 inches being Arrah 28, Gya 21·6, Bickram 22·5, Jamui 21·5, Gogri and Bongaon 28 and Kolgong 21 inches.

Rainfall has been deficient over a very small portion of the country, and as in those districts where these relatively light falls have been recorded, others considerably above the normal have occurred, the means are below the normal in Orissa only. The districts where there is either a small excess or deficient rainfall are Orissa (defect large in Balasore); Midnapur, 24-Pergunnahs, Howrah, the greater part of Burdwan, Nuddea, Khoolna and Jessore in South-West Bengal; Backergunge, Furreedpore, and Dacca in East Bengal; Bogra and Rungpore in North Bengal; Singbhoom and Manbhoom in Chutia Nagpur. On the other hand, excess is more than 5 inches at scattered stations in Lower Bengal and South Behar, from 5 to 10 inches at almost all stations in North Behar, 12·87 inches at Buxa, 15·4 at Julpigoree, 18·9 at Matabhanga, 25·29 at Kalimpong, 28·27 at Darjeeling, and 36·78 at Silliguri.

The following table gives full data for the comparison of the actual and normal rainfall for July in all districts. The first column gives the normal rainfall, the second the actual district rainfall as determined from the weighted rainfalls of the month, the third expresses

the percentage of actual to normal rainfall, and the fourth the excess or defect per cent. of normal :—

Percentage Table for July 1890.

*Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for th
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100 A clear sky is denoted by 0 and the overcast sky by 10. The nu
ans the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during th
stations in the district heading in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

ie week ending Friday, the 8th of August 1890.

Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	District observations. Rainfall. Of week. Mean for district.	Normal mean.	Since 1st of month. Mean for district. Explanation.—.... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of th are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 12th August* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 8TH OF AUGUST 1890.

THE features of interest in the meteorology of the past week are—

1. The high pressure which has prevailed throughout, giving an average excess of nearly a tenth of an inch in the east and north of the province, of a little over a twentieth in part of South-West Bengal and Chutia Nagpur, and about four-hundredths in Orissa.

2 The general low temperature, which, however, was more pronounced at the beginning and end of the week, a rise taking place during the partial break of the rains which spread over the province.

3. The scattered rainfall in Lower Bengal during the first few days and later in the northern districts.

4. A shallow depression, which, notwithstanding the prevailing high pressure, remained for some days, without causing any unsettled weather, in the neighbourhood of the Orissa coast.

At the commencement of the week pressure was rising, and rainfall had almost ceased in Orissa, Chutia Nagpur, and South-West and East Bengal with the exception of Nuddea, Dacca, and Mymensingh, but in North Bengal and Behar very heavy rain continued to fall. With the steadily rising pressure which continued without a break till the middle of the week, the monsoon current grew weaker in the northern districts, and rainfall rapidly diminished in amount, while wind velocity was generally below the average. The shallow depression in the north-east corner of the Bay first appeared on the 2nd to the south of Gopalpore, where a northerly wind was blowing, and apparently without deepening it kept that position till the 4th, the cyclonic circulation including the winds in its vicinity only. Pressure remained over 29·6 inches, but on the 6th a slow fall was general in the west of the Bay, when pressure, still lowest at Gopalpore was slightly under that amount On the 7th the depression had passed away, but a small whirl still appeared in the north-west corner. This moved over the north of Orissa, rain becoming general in the southern districts, but it was still very scattered in Behar and North Bengal. Though there was a partial break in the rains, temperature remained low except about the 5th, when a slight excess obtained except in Behar. After rainfall again set in towards the end of the week, temparature again fell, and on Friday was below the normal by small amounts in all districts.

Pressure—Rose steadily during the early half of the week, but on the 5th a brisk fall occurred in Assam, East Bengal and North Bengal, and a slow to moderate fall elsewhere, after which slow downward changes continued in the western districts and a slow rise elsewhere till the 8th, when a brisk rise in the north-west corner of the Bay gave a more normal distribution there; the small depression which had existed for some days completely disappearing. The largest excess was on the 4th, when it varied from ·1 inch to ·15 inch over nearly the whole of Bengal, but was less than ·1 inch in Chutia Nagpur, Orissa, and Assam.

Temperature—Though not so low as in previous weeks, has on an average been largely below the normal in Behar, slightly below in Chutia Nagpur, North Bengal, and Assam, and almost normal in East Bengal, South-West Bengal, and Orissa. During the break in the rains in the early part of the week, there was an upward tendency in Lower Bengal, resulting in a small excess there, but as heavy general rain continued to fall in Behar, there was still defect of more than 5°. Mean defect for the week in North Behar is 2·1°, in South Behar 1·8°, in North Bengal and Assam ·6°, Chutia Nagpur ·4°, and in the other districts temperature has been practically normal.

Rainfall—As stated above, had become very light and scattered in Lower Bengal at the beginning of the week, but heavy falls were still being received in Behar. The break, however, gradually spread over the province, and by the middle of the week general light rain was falling in the lower districts, and scattered showers in North Bengal and Behar. Scattered rain continued to fall in Orissa, South-West Bengal, Chutia Nagpur, and East Bengal, from the 2nd to the 5th, after which general light rain fell till the end of the week. In the northern districts general rain fell from the 2nd to the 4th, and then the break commencing, scattered showers were received till the 8th with the exception of the 7th, when fairly general rain fell. The mean amounts for the week are all below the normal except in North Behar, where there is excess of 1·3 inches Defect is about 1·3 inches in Orissa, East Bengal, and Chutia Nagpur, ·9 inch in South-West Bengal, ·7 inch in North Bengal, and about half an inch in South Behar.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 8th of August 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st month.		Since 15th May 1890.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 8 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6 higher; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograp and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All t thermometers are verified, and the readings have been corrected to a standard constructed and verified at t Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four fe above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, former at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

METEOROLOGICAL OFFICE, INDIA;
The 11th August 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 26th July 1890.

Births.

The births registered during the week ending with Saturday, the 26th July 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 18·2 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 2·7 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years except 1887—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	26·9	20·7	15·9	19·8	21·2	20·9	18·2

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 5th July 1890.	12th July 1890.	19th July 1890.	26th July 1890.	Towns.	Weeks ending— 5th July 1890.	12th July 1890.	19th July 1890.	26th July 1890.
Burdwan	16·8	13·7	30·5	12·3	Naraingunj	4·1	20·7	16·6	29·0
Midnapore	17·0	23·2	29·4	7·7	Chittagong	42·3	28·2	4·7	14·1
Hughli and Chinsurah	20·3	18·1	32·8	23·0	Comillah	34·7	3·8	7·7	15·4
Serampore	25·5	13·7	31·4	23·6	Patna City	10·1	11·4	11·4	12·7
Utterpara	37·7	...	28·3	18·9	Gya	14·3	29·4	26·0	33·5
Howrah	21·2	17·2	14·3	15·5	Arrah	14·4	23·9	17·9	19·1
Bali	10·5	28·1	3·5	14·0	Mozufferpore	13·4	18·2	15·8	13·4
Kishnagar	1·9	17·0	15·1	11·4	Durbhanga	13·4	22·8	18·9	27·5
Ranaghat	18·0	18·0	12·0	12·0	Chupra	7·0	12·1	20·1	11·1
Santipore	12·3	10·5	19·3	10·5	Bhagulpore	20·9	19·9	25·3	18·1
Jessore	6·1	6·1	18·4	6·1	Monghyr	14·5	38·9	33·4	41·6
Rampore Beauleah	34·2	18·4	23·6	18·4	Purneah	17·3	3·5	6·9	20·8
Darjiling	14·8	37·0	22·2	22·2	Poori	23·1	14·7	10·5	18·9
Dacca	11·0	9·7	15·6	9·7	Total ...	16·2	18·2	19·1	18·2

It will be seen that last week the highest birth-rate was returned from Monghyr (41·6), and the lowest from Jessore (6·1).

Deaths.

The deaths registered during the week under review correspond to an annual rate of 23·1 per 1,000 of the population. The rate of the week is 6·1 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1888—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	38·5	28·9	28·6	19·2	26·2	29·2	23·1

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 5th July 1890.	12th July 1890.	19th July 1890.	26th July 1890.	Towns.	Weeks ending— 5th July 1890.	12th July 1890.	19th July 1890.	26th July 1890.
Burdwan	16·8	22·9	19·8	27·5	Naringanj	8·3	24·6	16·6	16·6
Midnapore	21·7	23·2	35·6	17·0	Chittagong	37·6	39·9	18·8	18·8
Hughli and Chinsurah	23·0	21·3	19·7	24·6	Comillah	46·2	26·9	26·9	38·5
Serampore	29·4	29·4	45·1	39·3	Patna City	15·3	14·9	14·6	18·8
Utterpara	9·4	18·9	56·6	47·2	Gya	36·0	32·1	32·1	37·6
Howrah	8·6	11·5	16·0	13·7	Arrah	31·1	35·9	23·9	39·5
Bali	24·6	3·5	7·0	21·1	Mozufferpore	31·6	31·6	29·2	32·8
Kishnagar	13·2	3·8	3·8	11·4	Durbhanga	17·3	23·6	32·3	25·2
Ranaghat	6·0	18·0	24·0	12·0	Chupra	8·0	21·1	16·1	18·1
Santipore	14·0	8·8	17·5	15·8	Bhagulpore	15·4	15·4	10·0	22·6
Jessore	18·4	30·6	42·8	12·2	Monghyr	9·0	25·2	26·2	25·3
Rampore Beauleah	15·8	10·5	5·2	23·6	Purneah	10·4	13·9	10·4	10·4
Darjiling	51·9	22·2	37·0	22·2	Poori	38·0	65·0	44·1	35·7
Dacca	21·4	15·6	23·4	15·6	Total ...	20·1	21·6	22·0	23·1

It will be seen that last week the highest mortality occurred in the town of Utterpara (47·2), and the lowest in Purneah (10·4).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Arrah	14·3	Comillah	34·7	Utterpara	37·7	Gya	15·0
Chupra	11·1	Rampore Beauleah	21·0	Poori	21·0	Mozufferpore	13·4
Midnapore	9·3					Serampore	11·8
Serampore	7·8					Hughli and Chinsurah	11·5
Mozufferpore	6·0					Monghyr	10·8
Durbhanga	5·5					Burdwan	10·7
Patna City	3·9						
Gya	2·7						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·3 from cholera, against 2·5 per 1,000 in the preceding week; ·1 from small-pox, against ·4; 10·2 from fever, against 8·6; 2·4 from bowel-complaints, against 3·1; ·9 from injury, against ·8; and 6·2 from other causes, against 6·6 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	24·0	Christians	14·9	Under 1 year	21·0
Females	22·2	Hindus	23·3	1 and under 5 years	28·5
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population	108	Mahomedans	23·1	5 „ 10 „	15·5
				10 „ 15 „	15·7
				15 „ 20 „	9·6
				20 „ 30 „	11·3
				30 „ 40 „	14·5
				40 „ 50 „	17·4
				50 „ 60 „	23·5
				60 years and upwards	51·6

Detailed information regarding the vital statistics of the twenty-seven towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 11th August 1890. *Sanitary Commissioner for Bengal.*

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 26th July 1890.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, AUGUST 13, 1890.

[Third Publication.]

PUBLIC WORKS DEPARTMENT,—MARINE.

NOTICE.

The 29th July 1890.—The following draft of rules, which it is proposed to issue under section 29 of Act VI of 1884 (as amended by section 11 of Act III of 1890), for the grant of certificates of service to masters, engineers, and engine-drivers of inland steam-vessels, is published for general information. These rules will be taken into consideration on the expiry of a month from the date of their first publication in the *Calcutta Gazette*, and the Lieutenant-Governor will receive and give due attention to any objections or suggestions which may be made by any person within that period.

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Government of Bengal.

1. A certificate of service will be granted to any person who has served as a master, or as a engineer, or as an engine-driver of an inland steam-vessel before the first day of April 1890, and who, in the opinion of the Local Government, is qualified for the duties which such certificate will entitle him to perform.

2. Applications for certificates of service must be made upon the appropriate form [Certificate of Service 1], and must be submitted to the Port Officer of Calcutta, together with the applicants' testimonials and any other evidence which they may have to offer in respect of their qualifications.

3. A fee according to the following scale shall be paid for each certificate of service :—

	Rs.
First class master	10
Second ditto	5
Engineer	10
Engine-driver	5

4. Certificates of service shall be made and issued in the forms hereunto annexed.

5. Every certificate of service shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate, and the other shall be kept and recorded by the Port Officer of Calcutta.

Form A.

Government of Bengal.

By the Honourable the Lieutenant-Governor of Bengal.

Certificate of Service

AS

FIRST CLASS MASTER OF AN INLAND STEAM-VESSEL UNDER ACT VI OF 1884.

LIBERALITY OF BABU OODIT NARAIN SINGH OF HANDWAH BHAGULPORE.

THE following correspondence is published for general information.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,
Secretary to the Government of Bengal.

MUNPL. DEPT.,
The 12th August 1890.

No. 2 $\frac{R\text{-}T}{M}$, dated Yacht Rhotas, the 12th August 1890.

From—H. J. S. COTTON, Esq., Secretary to the Government of Bengal, Municipal Department,
To—The Commissioner of the Bhagulpore Division.

I AM directed to acknowledge the receipt of your letter No. 1312G, dated 8th August 1890, and to request that you will communicate to Babu Oodit Narain Singh of Handwah the Lieutenant-Governor's high appreciation of his public spirit and liberality in subscribing Rs. 26,000 towards the completion of the Bhagulpore water-works and a further sum of Rs. 10,000 in aid of the Leper Asylum Fund.

2. A copy of the correspondence will be published in the *Calcutta Gazette*.

No. 1312G, dated Bhagulpore, the 8th August 1890.

From—C. C. QUINN, Esq., Offg. Commissioner of the Bhagulpore Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to forward, for the information of the Lieutenant-Governor, a copy of a letter from Babu Oodit Narain Singh of Handwah, containing the munificent offer of Rs. 26,000 towards the completion of the Bhagulpore water-works and of a further sum of Rs. 10,000 in aid of the Leper Asylum Fund. I would suggest that the liberality and public spirit which Babu Oodit Narain Singh has displayed by this offer may receive the recognition of Government.

From—BABU OODIT NARAIN SINGH, Rajah of Handwah,
To—The Commissioner of the Bhagulpore Division.

I MOST humbly and respectfully beg to offer Rs. 26,000 towards the completion of the water-works at Bhagulpore and Rs. 10,000 towards a Leper Asylum in this town.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF 1890-91.

No. 588B, dated Calcutta, the 12th August 1890.

From—K. G. GUPTA, Esq., Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

SIR H. L. HARRISON, KT.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the first quarter of 1890-91, comprising the months of April, May, and June 1890.

2. The quantity of salt of every description cleared during the quarter under report amounted to 26,51,986 maunds 8 seers 5 chittacks, against 24,01,999 maunds 18 seers 6 chittacks in the previous quarter, and 24,03,784 maunds 35 seers 15 chittacks in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 62,34,543-12, against Rs. 56,82,037-13 in the previous quarter, and Rs. 56,36,201-9 in the corresponding quarter of the previous year.

3. The quantity of excise salt sold in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter are shown in table I :—

TABLE I.

	Cuttack.	Pooree.	Balasore.
	MDS. S. T.	MDS. S. T.	MDS. S. T.

	Ranigunge ..	4·48	
			Srs.
			Burdwan 14¼
			Culna 14
			Cutwa 14 13/16
			Ranigunge 16
			per rupee.
2	Bankoora ,, 16, '90	1·24	Weather—warm Transplanting of *amun* rice finished and weeding going on vigorously. Sugarcane prospering. It is estimated that about 16 annas of the area under rice have been cultivated this year in the Bissenpore subdivision. Common rice selling at 19 seers per rupee at Sudder and 17 seers at Bissenpore.
3	Birbhum ,, 16, '90	1·21	Breaks of dry weather more frequent. Prospects of paddy very promising.
	Rampore Haut ...	4·93	Prices of rice range from 16 to 18 seers per rupee.
4	Midnapur ,, 16, '90	2·01	Weather—showery. More rain wanted in some parts. Paddy doing well. Transplantation still going on. Prices of common rice :—
			Srs.
			Sudder 15½
			Contai 15
			Ghatal 16
			Tumlook 14
			per rupee.
5	Hooghly ,, 16, '90	1·49	Weather—seasonable. State and prospects of crops good. Prices of common rice :—

			Serampore 16
			Jehanabad 15
			per rupee.
	Howrah ,, 16, '90	3·60	Weather—seasonable. *Aus*, *amun*, jute, and sugarcane doing satisfactorily.
	Uluberia .	2·65	Prospects good. Price of common rice 13 to 14 seers per rupee.
	Central Districts.		
	PRESIDENCY DIVN.		
6	24-Perghs. Aug. 19, '90	2·27	Weather—hot and clear with occasional light showers. Prospects good. *Aus* and jute being cut. Transplantation of *amun* going on vigorously, but more rain wanted. Price of rice stationary.
7	Nuddea ,, 16, '90	2·55	Weather—seasonable Crops on high lands continue good, but those on low
	Kushtea ...	2·41	lands swamped by floods. Rivers still rising.
	Meherpore ...	2·20	
	Chuadanga ...	4·26	
	Ranaghat ...	1·17	
8	Khoolna ,, 16, '90	1·30	Weather—seasonable. Prospects of crops continue favourable. Transplantation now going on rapidly.
	Bagirhat ...	1·92	
	Satkhira ...	2·63	
9	Jessore ,, 16, '90	6·85	Weather—hot and cloudy with occasional showers. Harvesting of *aus* going
	Jhenidah ..	2·23	on. Partial damage to *amun* and *aus* crops done by early rise of rivers in
	Magura ...	4·71	parts of Jhenidah, Magura, and Bongong subdivisions.
	Narail ...	4·49	
	Bongong ...	1·77	
10	Moorshedabad ,, 16, '90	3·24	Weather—fine with passing clouds. The gauge stood 30′ 11¼″ last noon (15th), the highest rise ever on record. To-day (16th) there is a fall by ·5 of an inch. Greater portion of *aus* submerged under water, and the outturn will, as it appears, be much less than usual. Some *amun* lands in the Lalbagh subdivision and greater portion of them in the Kandi subdivision have been overflooded, but transplantation will begin on the receding of the water.
11	Dinagepur ,, 16, '90	0·25	There has been a break in the rains, with hot and sultry weather, but to-day
	Thakurgaon ...	0·86	(16th) it is raining again. Harvesting of jute and *bhadoi* paddy going on. Outturn of each crop may still be estimated at 18 annas. Prospects of *haimanti* paddy continue to be very favourable. It is expected that this crop will be transplanted over the full usual area, but only about 12 annas of the crop have as yet been transplanted. Price of rice unchanged.
	RAJSHAHYE DIVN.		
12	Rajshahye ,, 16, '90	0·16	Weather—seasonable and wet. Prospects of crops so far excellent. Ganges very
	Nattore ...	1·18	high, and an inundation is feared.
	Nowgong ..	1·22	
13	Rungpur ,, 16, '90	0 02	Very little rain fell during the week, but the sky is now overcast. Rain is
	Nilphamari ...	0 47	wanted for the young *amun*, the transplantation of which is hindered by the
	Kurigram ...	0·18	unusual drought. Jute is being cut and steeped. Owing to over production, prices of jute are low. Sugarcane promises well.
14	Bogra ,, 16, '90	1·51	Weather—cloudy and showery, with short intervals of sunshine Harvesting
	Sherpur ...	1·32	of *aus* going on with good outturn. *Amun* is still being transplanted.
	Nowkhilla ...	1·33	Jute is being cut and steeped. All prospects good. Common rice selling at 18½ seers per rupee Rivers have fallen rapidly.
15	Pubna ,, 16, '90	2·04	Weather - cool and cloudy. *Aus* partially damaged. Prospects of jute and *amun* continue favourable. Prices of rice have risen a little.
16	Darjeeling ,, 16, '90	3·13	Weather—fine. Jute crop in Terai being cut; estimated outturn 12 annas. *Bhadoi* rice in ear.
17	Julpigoree ,, 16, '90	1·99	Weather—hot and cloudy with occasional showers. Transplantation of *haimanti* rice continues. Average outturn of *bhadoi* rice reported to be 12 annas, and that of jute 10 annas. Prices stationary.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts.		
Dacca Div.	18	Dacca Aug. 16, '90	0·93	Weather—seasonable. Jute and *aus* being harvested, but they have been damaged to some extent owing to high flood. Rivers falling slowly. *Amun* paddy thriving. Common rice being sold at from 13 to 15 seers per rupee.
	19	Furreedpur „ 16, '90	1·91	Weather—seasonable. The flood has gone down a little, and the harvesting of *aus* paddy and jute is in full progress, with an average outturn of 10 annas. *Amun* plants have been damaged to some extent by the high flood. Fodder is scarce. Price of common rice rising.
	20	Backergunge „ 16, '90	2·28	Weather—seasonable. State of standing crops generally good, but some damage has been done to *amun* seedlings by floods. Common rice selling at about 13 seers per rupee.
	21	Mymensingh „ 16, '90	1·60	Weather—cloudy with occasional rainfall. Jute has been injured by excessive rain and flood. Outturn of jute expected to be 14 annas, and that of *aus* paddy 18 annas. Common rice sells at 13 seers 9 chittacks per rupee.
Chittagong Div.	22	Chittagong „ 16, '90	3·26	Weather—seasonable. *Aus* grown to the extent of 12 annas; prospects of this crop fair. Lands are being prepared for *amun*. Rice selling at 16 seers per rupee.
	23	Noakholly „ 16, '90	6·17	Weather—rainy and cloudy. *Aus* crop being harvested. Transplantation of *amun* continues. Prospects fair.
	24	Tipperah „ 16, '90	0·41	Weather—cloudy, hot and muggy. Jute and *aus* being cut. The recent floods have caused no serious damage to crops. Prospects very promising. Rice selling at from 12 seers 12½ chittacks to 21 seers 5½ chittacks per rupee.
	25	Chittagong Hill Tracts. „ 15, '90	2·78	Weather—cloudy and rainy, with occasional sunshine throughout the week. Early *jum* paddy ripening. Cotton progressing. Transplanting of plough-paddy in low lands commenced. Common rice being sold at 12 seers 5 chittacks per rupee.
BEHAR.		Hill Tipperah „ 15, '90	2·48	Weather—sultry with occasional showers. *Amun* being transplanted. *Jum* paddy being reaped. No change in prices.
Patna Div.	26	Patna „ 16, '90	0·78	Weather—hot and sultry. Transplantation of paddy still going on. *Bhadoi* crops reported to have been damaged more or less all over the district owing to excessive rain and floods. Prices of food-grains almost stationary.
		Barh ...	2·0	
		Behar ...	1·08	
		Dinapore ...	2·82	
	27	Gya „ 16, '90	1·74	Weather—hot and cloudy. Transplantation of paddy going on. Prospects of *bhadoi* not favourable. Sugarcane doing well. Prices of food-grains almost stationary.
	28	Shahabad „ 16, '90	1·89	Weather—hot and steamy. Some *bhadoi* in Sasseram and Bhabuah still left. Paddy prospects good on the whole; but if there be much more rain, paddy seedlings will be washed away too to a great extent. Prices stationary, and falling in Sasseram.
		Buxar ...	2·11	
		Bhabuah ...	3·60	
		Sasseram ...	3·74	
	29	Durbhunga „ 16, '90	0·09	Weather—occasionally cloudy in the latter part of the week. A break in the rains for the last 8 days has done immense good to the *bhadoi* crops not injured by floods. *Aghani* rice is being replanted in places where it has been washed away by floods; elsewhere prospects continue very satisfactory. Prices remain stationary.
		Madhubani ...	1·02	
		Somastipur ...	0·49	
	30	Mozufferpur „ 16, '90	0·68	Weather—hotter and drier than in the previous week. The prospects of the *bhadoi* and rice which have not suffered from floods are fair. The damage done by floods is considerable in some localities, but the general *bhadoi* outturn of the district promises to be better than expected during the recent bad weather.
		Hajipur ...	0·49	
		Sitamarhi ...	0·42	
	31	Sarun „ 16, '90	1·10	Weather—finer and hot. *Bhadoi* crops practically all gone. Continued floods have destroyed nearly all the rice in the Sudder subdivision; elsewhere the rice promises a 12-anna crop. Indigo much damaged by floods.
	32	Chumparun ...	...	Report not received.
Bhagulpore Div.	33	Monghyr „ 16, '90	0·58	Weather—hot and close. *Bhadoi* crops damaged owing to floods and excessive rainfall. Prospects of winter rice good.
		Begusarai ...	0·79	
		Jamui ...	2·02	
	34	Bhagulpore „ 16, '90	0·52	Weather—hot with a good deal of sun. Break in the rains beneficial. Some damage done to standing crops by inundation, but on the whole prospects of rice good.
		Banka ..	1·26	
		Madhepura ...	0·61	
		Soopool ...	0·73	
	35	Purneah „ 16, '90	2·94	Weather—bright and sunny. Break in the rains has done great good. *Bhadoi* harvest progressing. *Aghani* transplantation still going on. Indigo manufacture closed with fair results. Floods subsiding except in the south.
		Kishengunge ...	0·37	
		Arrareah ...	0·50	
	36	Maldah „ 16, '90	0·38	Weather—hot and bright with occasional showers. High east wind prevails. Harvesting of *bhadoi* continues. About 10 annas of this crop have been damaged by inundation. Transplantation of winter rice is being pushed on. Common rice selling at from 13 to 16 seers per rupee.
		Shibgunge ...	2·40	
		Gajole ...	0·50	
	37	Sonthal Perghs. „ 16, '90	1·79	Weather—generally cloudy. Much less rain and more sunshine than last week. This will improve *janera* prospects. Transplantation of paddy nearly over. Prospect of this crop is very promising everywhere, and with seasonable rain about the end of September, a 16-anna outturn is anticipated; but the *janera* will not be more than 10 or 12 annas.
		Deoghur ...	1·22

		Pakour ...	1·67	
		Rajmehal ...	1·91	

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.			
ORISSA DIVN. 38	Cuttack Aug. 16, '90	5·33	Weather—seasonable. Rain during the week has much benifited cultivation. Transplantation of *sarad* nearly over. Prospects of *bara bhali* generally good.
ORISSA DIVN. 39	Pooree „ 14, '90	3·74	Weather—seasonable. Transplanting and weeding of *sarad* crop going on. *Beali* in ear. State of miscellaneous crops good. Prices of common rice vary from 18 seers 6 chittacks to 21 seers per rupee in the Sudder subdivision and 21 seers per rupee in the Khoorda subdivision.
	Khoorda ...	1·49	
	Banpur ...	4·06	
ORISSA DIVN. 40	Balasore „ 16, '90	3·25	Weather—seasonable. The *beali* crop suffered somewhat from want of rain last month. Prospects otherwise good. Number of coolies on relief-works 38.
CHOTA NAGPORE.			
South-West Frontier Agency.			
CHOTA NAGPORE DIVN. 41	Hazaribagh Aug. 16, '90	1·99	Weather—seasonable. A break in the rains has set in. Transplanting of paddy about three quarters finished. Indian-corn poor; about 8 annas crop expected. All other crops doing well. Prices more or less stationary.
CHOTA NAGPORE DIVN. 42	Lohardugga „ 16, '90	1·59	Weather—warm and cloudy. Transplantation of winter rice still going on vigorously. Prospect of *bhadoi* continues favourable. *Goondli* is being cut. Sugarcane in Palamow doing well. Prices steady.
	Palamow (up to 11th Aug.)	4·78	
CHOTA NAGPORE DIVN. 43	Singbhoom Aug. 16, '90	1·61	Weather—cool, but more rain badly wanted. Rice crop has suffered to the extent of two annas in Chybassa and its neighbourhood. Rain much wanted in these parts. From the remainder of the district seasonable rain reported, and condition of crops said to be favourable. Price of common rice ranges from 12 to 24 seers per rupee.
CHOTA NAGPORE DIVN. 44	Manbhoom „ 16, '90	5·39	Weather—has been favourable to crops. Paddy transplanting is on the point of completion. Prospects generally fair so far. *Bhadoi* outturn in the Govindpore subdivision will be below the average.
	Govindpore ...	2·56

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for The Assmidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The r are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

week ending Friday, the 15th of August 1890.

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of th are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 19th August* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 15TH OF AUGUST 1890.

WEATHER conditions during the past week have remained settled throughout, and the only noticeable features are—

1. A very shallow depression formed in the north-west corner of the Bay about the beginning of the week, and though wind velocity hardly increased, it was accompanied by a very local cyclonic circulation of winds, and seems to have had considerable influence on the rainfall distribution.

2. Pressure has generally been slightly below the normal, the deficient distribution being due to the passage of the low-pressure area over the province.

3. Temperature has been above the normal in North Bengal, Behar, and Assam, normal in East Bengal, and below elsewhere.

4. Rainfall has been very deficient in North Bengal and North Behar, considerably below the normal in East Bengal, slightly below in South-West Bengal and South Behar, and above in Orissa and Chutia Nagpur.

At the commencement of the week pressure distribution was very nearly normal, and a steady slow fall was general, the changes being above a twentieth of an inch in the north-east corner of the Bay. The normal circulation of winds prevailed, except that easterly winds were blowing over the whole of South-West Bengal and Chutia Nagpur. This showed that the current of air was being deflected more to the west than usual, and to this may be due the fact that for the greater part of the week very little rain has fallen at the northern stations. On the 10th a brisk fall of pressure occurred in the north-west corner of the Bay, and though defect of rather more than a twentieth of an inch was general over the northern half of the Bay, and a smaller defect over Bengal, a cyclonic circulation of winds obtained in Lower Bengal. General rain was falling in Orissa and East Bengal and some of the central districts, but elsewhere only scattered showers were being reported. On the 11th the shallow depression was over the centre of Bengal, and westerly winds had commenced in the south-western districts, while rainfall had become much more general in all districts. After this the low pressure area slowly drifted in a westerly direction, being over parts of Chutia Nagpur, South Behar, and South-West Bengal on the 12th, over Chutia Nagpur and South Behar on the 13th, in the North-Western Provinces on the 14th. Rain continued to fall at all stations in Orissa till the 12th, in South-West and East Bengal, Chutia Nagpur, and South Behar till the 13th, but in North Bengal and North Behar the 11th was the only day of the week on which fairly general rain was received, except in Pubna, Bogra, Rajshahye, and Maldah, where the distribution was similar to that in the southern districts.

Pressure—Has generally been below the normal in consequence of the low-pressure area within which defect was a little over a twentieth of an inch, having moved first from the head of the Bay into Central Bengal, and thence in a westerly direction over Chutia Nagpur and South Behar. Defect in mean pressure is therefore greatest in South-West Bengal, Chutia Nagpur, and South Behar, where it averages ·03 inch, while in the other districts it is smaller and rarely over ·01 inch.

Temperature—Changes have generally been small, and the differences from the normal very slight in South Behar and East Bengal. There has been a small excess in North Bengal and North Behar throughout the week, and a similarly steady defect in Orissa and Chutia Nagpur. A steady rise was fairly general in the northern districts on the 9th and 10th; but as rainfall extended over the province, a fall occured in all districts on the 11th and 12th, after which a slow rise prevailed, first in the eastern districts, and then over the whole province, till the end of the week. Mean excess amounts to 1·5° in Assam, 1·3° in North Behar, and ·9° in North Bengal, while defect is 1·5° in Chutia Nagpur and ·9° in Orissa.

Rainfall—Has been general in Lower Bengal during the greater part of the week, and very scattered in the northern districts. The average fall in Orissa is ·7 inch above the normal and in Chutia Nagpur ·4 inch, and though falls in the other districts have been all deficient, the difference from the normal is small in South-West Bengal and South Behar. The falls in East Bengal, North Bengal, and North Behar are, however, considerably below the normal, as shown by the following numbers which give the percentage of the normal fall for the week:—North Bengal 27, North Behar 14, East Bengal 62.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 15th of August 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st month.		Since 15th May 1890.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 18th August 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 2nd August 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 2nd August 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 15·3 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 6·6 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	25·7	21·5	23·8	19·4	19·2	21·9	15·3

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 12th July 1890.	19th July 1890.	26th July 1890.	2nd August 1890.	Towns.	Weeks ending— 12th July 1890.	19th July 1890.	26th July 1890.	2nd August 1890.
Burdwan	13·7	30·5	12·2	13·7	Naraingunj	20·7	16·6	29·0	24·8
Midnapore	23·2	29·4	7·7	15·5	Chittagong	28·2	4·7	14·1	4·7
Hughli and Chinsurah	18·1	32·8	23·0	14·8	Comillah	8·8	7·7	15·4	15·4
Serampore	13·7	31·4	25·6	27·5	Patna City	11·4	11·4	12·7	14·9

Howrah	17·2	14·3	15·5	17·8	Arrah	23·9	17·9	19·1	13·2
Bali	28·1	3·5	14·0	10·5	Mozufferpore	18·2	15·8	13·4	14·6
Krishnagar	17·0	15·1	11·4	5·7	Durbhanga	22·8	18·9	27·5	19·7
Ranaghat	18·0	12·0	12·0	6·0	Chupra	12·1	20·1	11·1	6·0
Santipore	10·5	10·3	10·5	14·0	Bhagulpore	19·9	25·3	18·1	18·1
Jessore	6·1	18·4	6·1	18·4	Monghyr	38·9	33·4	41·6	22·5
Rampore Beauleah	18·4	23·6	18·4	31·5	Purneah	3·5	6·9	20·8	10·4
Darjiling	37·0	22·2	22·2	7·4	Poori	14·7	10·5	18·9	6·3
Dacca	9·7	15·6	9·7	11·0	Total ...	18·2	19·1	18·2	15·3

It will be seen that last week the highest birth-rate was returned from Rampore Beauleah (31·5), and the lowest from Chittagong (4·7).

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 19·2 per 1,000 of the population. The rate of the week is 13·6 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	44·1	28·2	40·3	22·6	29·0	32·8	19·2

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 12th July 1890.	19th July 1890.	26th July 1890.	2nd August 1890.	Towns.	Weeks ending— 12th July 1890.	19th July 1890.	26th July 1890.	2nd August 1890.
Burdwan	22·9	19·8	27·5	19·8	Naraingunj	24·8	16·6	16·6	16·6
Midnapore	23·2	35·6	17·0	7·7	Chittagong	39·9	18·8	18·8	11·7
Hughli and Chinsurah	21·3	19·7	24·6	26·3	Comillah	20·9	20·9	38·5	26·9

Howrah	11·5	16·0	13·7	10·9	Arrah	35·9	23·9	39·5	8·4
Bali	3·5	7·0	21·1	14·0	Mozufferpore	31·6	29·2	32·8	15·8
Krishnagar	3·8	3·8	11·4	5·7	Durbhanga	23·6	32·3	25·2	16·6
Ranaghat	18·0	24·0	12·0	24·0	Chupra	21·1	10·1	18·1	11·1
Santipore	8·8	17·5	15·8	17·5	Bhagulpore	15·4	10·0	22·6	14·5
Jessore	30·6	42·8	12·2	12·2	Monghyr	25·3	20·2	25·3	15·4
Rampore Beauleah	10·5	5·2	23·6	15·8	Purneah	13·9	10·4	10·4	13·9
Darjiling	22·2	37·0	29·3	88·9	Poori	65·0	44·1	35·7	33·6
Dacca	15·6	23·4	15·6	27·2	Total ...	21·4	22·0	23·1	19·2

It will be seen that last week the highest mortality occurred in the town of Darjiling (88·9), and the lowest in Krishnagar (5·7).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Santipore	10 5	Darjiling	44·5	Gya	21·2
Arrah	4 8	Comillah	23·1	Serampore	17·7
Chupra	4·0			Poori	16·8
Dacca	3·9			Dacca	11·7
Durbhanga	3 9			Hughli and Chinsurah ...	11·5
Gya	2·7				
Patna City	2·6				

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 2·1 from cholera, against 3·3 per 1,000 in the preceding week; ·04 from small-pox, against ·1; 7·4 from fever, against 10·2; 2·4 from bowel-complaints, against the same ratio; ·8 from injury, against ·9; and 6·4 from other causes, against 6·2 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	21·0	Christians ...	44·8	Under 1 year ...	159·8
Females	17·3	Hindus ...	19·1	1 and under 5 years ...	26·9
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	121	Mahomedans ...	19·1	5 „ 10 „ ...	11·3
				10 „ 15 „ ...	10·3
				15 „ 20 „ ...	8·4
				20 „ 30 „ ...	11·1
				30 „ 40 „ ...	13·1
				40 „ 50 „ ...	15·4
				50 „ 60 „ ...	16·8
				60 years and upwards ...	46·7

Detailed information regarding the vital statistics of the twenty-seven towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 18th August 1890.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 2nd August 1890.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during month ended 26th July 1890.

INCREASES.

Cotton.—This is a continuation of the increase previously reported, and was chiefly in despatches from the Bombay, Baroda and Central India Railway *vid* Agra to Howrah for export.

Turmeric.—Chiefly in despatches from Howrah to Cawnpore and Delhi.

Wheat.—The improvement in this commodity was in despatches from stations on the "R" and "B" districts to Howrah for export to London.

Lac.—The increase appears chiefly in despatches of shell-lac from Mirzapur to Howrah for export to Europe; also in lac refuse to the Port Commissioners' railway and to stations on the Tirhoot State Railway.

Ghee.—Chiefly in long distance despatches from stations on the "D" district to Howrah for local consumption.

Stone.—The increase recorded under this head was principally in despatches of stone ballast from Pakur to Chitpore, Sealdah, Howrah and other stations.

Bones.—Principally in despatches from Digha Ghât *viâ* Digha Ghât, *viâ* Mogulserai and Agra to Bally and Chitpore.

Potatoes.—Chiefly in despatches from Patna City to Howrah and Seoraphuli for local consumption.

DECREASES.

Coal and coke, up and down.—The falling off was chiefly in upwards coal for the Bombay, Baroda and Central India, the North-Western, and the Bengal and North-Western Railways owing to decreased demands from those lines. The decrease in the downwards traffic is attributable to less exports to coast ports.

Piece-goods, European.—This falling off appears chiefly in despatches from Howrah and from Bombay *viâ* Jubbulpore, and was due to the fluctuation in exchange unsettling the market.

Gunny.—Following the falling off in the export trade.

Rice (husked and unhusked).—This decrease, as reported in previous months, was due entirely to the falling off of despatches of upward consignments sent from stations on the "A" and "R" districts last year.

Other rain and spring crops.—As stated in previous months, the falling off recorded under this head was due to the unusually heavy traffic in cheap food-grains last year from stations on the "B" district to stations on the Tirhoot State Railway owing to scarcity of food-grains in Tirhoot.

Brass and copper.—Chiefly in despatches from Howrah owing to demand being very dull during the period under review.

Railway material, Foreign.—The falling off was chiefly in despatches from Howrah to Katni, Umaria, and Umballa.

Salt.—The decrease in this staple appears chiefly in despatches of imported salt from Howrah to stations on the Tirhoot State and the Bengal and North-Western Railways owing to heavy rains up-country.

Seeds.—Chiefly in linseed to Howrah for export; also in mustard-seed to Howrah and other stations for local consumption.

Sugar (refined).—The falling off was principally in despatches from the Shahabad district to Howrah, Cawnpore, Agra and to stations on the Jubbulpore line, the Great Indian Peninsula and the Bombay, Baroda and Central India Railways.

Tobacco.—Chiefly in despatches from Barh and stations on the Tirhoot State Railway to Cawnpore, Jubbulpore and stations on the Great Indian Peninsula Railway.

EMIGRATION FROM THE PORT OF CALCUTTA DURING THE YEAR 1889.

GENERAL DEPARTMENT—COLONIAL EMIGRATION.

Calcutta, the 15th August, 1890.

RESOLUTION.

READ—

The Report on Emigration from Calcutta during the year 1889.

Read again—

The Report on Emigration from Calcutta during the year 1888.

DURING the past year colonial emigration from Bengal has been marked by an unusual activity, arising from the fact that the colonies have now been obliged to make up for the small importation of labour caused by the uncertainty of the sugarcane industry in the preceding years. The increased demand is not, however, regarded by the Protector as indicative of any probable revival of the industry. The requisitions in the year 1889 amounted to 9,945 as against 7,180 in 1888, the increase of 2,765 being attributed generally to the cause above mentioned, and more particularly to the re-opening of emigration to the colonies of Natal and Mauritius, which did not indent for coolies during the previous year. The larger requisitions gave rise to an increase in the number of recruiters from 511 to 717, and in the number of registrations from 10,325 to 16,813, the excess being, roughly speaking, divided proportionately among the more important of the recruiting districts. The number of adults actually despatched was 10,041, against 6,544 in 1888 and 4,563 in 1887. The two leading districts of Shahabad and Benares maintained their places on the list, the former having supplied 2,630, and the latter 2,085 registrations. The district of the 24-Pergunnahs, which shows on paper the largest number of registrations, cannot be compared with the others, owing to the fact that a large proportion of the

recruiting in that district is carried on among coolies brought to Calcutta by unlicensed emigration agents under pretence that they are destined for Assam. The Lieutenant-Governor agrees with the Protector that this practice is objectionable, inasmuch as it is a breach in spirit of the Colonial Emigration Act, which provides for all emigrants being registered for the colonies in the district of recruitment. It does not appear, however, that under the law, as it at present stands, there is any means of remedying the evil. The question is under consideration in connexion with the amendment of the Inland Emigration Act (Act I of 1882), which is now before this Government and the Government of India.

2. The standard attained in the management of the depôts in Calcutta has, with the single exception of the Mauritius depôt at Bhowaniporo, been all that could be desired, both with a view to the sanitary arrangements and to the comfort of the emigrants while awaiting embarkation. The slight increase in the rates of depôt sickness and mortality was not more than would naturally follow on a much increased depôt population. The Mauritius depôt was only re-opened during the course of the year, and is described by the Medical Inspector as wanting in space for exercise, and so much shut in on all sides that free ventilation and perflation of air are deficient, although the regulations as to cubical and superficial area were literally complied with, and the Lieutenant-Governor is pleased to learn that the depôt will very shortly be abandoned and a more convenient site selected on the river bank at Garden Reach. The frequent occurrence of sickness, especially measles, in the Bhowaniporo depôt, had much to account for both in increasing the general average mortality and in causing delay in the departure of emigrant ships.

3. During the year under report 21 vessels left Calcutta for various colonies, of which five were steamers bound either to Natal or Mauritius. In every case the women carried were in excess of the prescribed number, and it is noticed with satisfaction that in the case of Surinam more than half of the women embarked were married. The mortality on the voyages, though showing a slight increase in the average, calls for no particular notice. Careful enquiry is made in each case in which the result of the voyage seems to indicate unusual sickness.

4. Five thousand one hundred and two emigrants were reshipped from the different colonies as against 3,908 in the preceding year. Of these 109, or a percentage of 2·14, died on the voyage—a percentage which the Lieutenant-Governor agrees with the Protector in considering moderate, looking to the age and decrepit condition of many of the returning emigrants. The Protector has been requested in future reports to notice particularly the question of the return of lepers from the colonies, and has been at the same time instructed to use great care in preventing the despatch as emigrants from Calcutta of any person open to the slightest suspicion of incipient leprosy. From correspondence subsequent to the report now under review it appears that no less than 38 lepers were returned from the colonies during the year 1889, of whom 18 came from Demerara and 12 from Mauritius. The Lieutenant-Governor is not inclined to accept the position that colonies should be allowed to return emigrants who have contracted the disease during the period of their expatriation.

5. The administration of the estates of deceased emigrants, which now forms an important part of the work of the Protector's office, has been carried on with diligence and patience, with the result that enquiries for heirs were completed in 257 cases, or 67·1 per cent. of the number of estates under administration during the year. The Lieutenant-Governor agrees with the Protector that it is most important that these enquiries should be instituted as soon as possible after the death of the emigrants, and that the Protector should be put in possession of the information on which to conduct the investigation without any unreasonable delay. It is also very desirable that the estates of those whose heirs have been traced should be made over to the Protector with the greatest possible promptitude.

6. The thanks of the Lieutenant-Governor are due to Surgeon-Major D. W. D. Comins for the manner in which he has carried out his duties as Protector of Emigrants; to Surgeon-Major J. F. P. McConnell, who held the position of Medical Inspector, and to Dr. R. C. Chandra, who officiated for Dr. Comins from July to October.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE LEGAL AFFAIRS OF THE GOVERNMENT OF BENGAL FOR THE YEAR 1889-90.

RESOLUTION.

JUDICIAL.

Dated Calcutta, 25th August 1890.

READ—

The Report on the Legal Affairs of the Government of Bengal for the year 1889-90.

Read also—

The Reports for the two preceding years, and the orders of Government thereon.

At the close of the year 1888-89 six appeal cases were pending before the Privy Council. Of these only two were decided—one against the Government in which the Secretary of State was the appellant, and one in favour of the Court of Wards as the respondent. One case was dismissed, the subject-matter of the dispute having been amicably settled between the parties themselves in this country. Only one appeal was instituted before the Privy Council during 1889-90, but as it was admitted late in the year, the papers of the case are not yet ready. The Secretary of State is respondent in this case.

2. The following statement shows the result of civil litigation in all the Courts of Bengal to which Government was a party during the year 1889-90 as compared with the two preceding years:—

	Original cases.			Appeals.						Total.		
				Before High Court.			Before Lower Courts.					
	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.
Decided in favour of Government	344	289	234	118	23	50	62	26	44	524	338	348
Ditto against ditto	56	136	51	3	.....	1	13	19	6	72	155	58
Compromised, remanded, or withdrawn	83	55	39	1	.....	5	5	2	4	89	57	48
Percentage in favour of Government (omitting fractions) ...	86	69	83	98	100	98	83	58	88	88	69	86

The Legal Remembrancer explains that of the 58 cases decided against Government, 26 were land acquisition cases, in which the Collector's offer was slightly varied by the Judge on reference. Leaving these cases out of calculation, the percentage in favour of Government would be 87 in 1887-88, 66 in 1888-89, and 86 in 1889-90. The results of litigation in the High Court and the lower Appellate Courts do not seem to call for notice. In the Courts of first instance 51 cases were decided against Government, and the percentage of cases decided in favour of Government is 83, against 86 in 1887-88 and 69 in 1888-89. Omitting land acquisition cases, the percentages would be 75 in 1887-88, 65 in 1888-89, and 81 in 1889-90.

3. The Legal Remembrancer reports that the only case of any importance decided against Government was that of Messrs. Watson and Company, in which they sued to recover possession of 284 bighas of land. They asserted that their *zemindari* and *putni* mehals, situated on the left bank of the river Howlia, were diluviated in 1272 B.S. and re-appeared on the original site in 1281 B.S., when it was included in the contiguous mehal Chur Kadipur and settled with Rani Brojosundari Debi. Limitation was pleaded on the part of Government, and it was also urged that, as the plaintiffs did not raise any objection when the land was settled, they must, in the event of their establishing their title to the land, wait for possession until the expiration of the term of settlement. The Court, however, overruled the plea of limitation and, having found on local enquiry that the greater portion of the land in dispute was a re-formation of the old site of the plaintiffs' mouzahs Dharmadaha and Tekulia, gave a modified decree to the plaintiffs. It was not considered necessary to prefer an appeal against this decision.

4. The following figures show the result of the litigation in which the Court of Wards was concerned for the year under report as compared with the two preceding years:—

	Original cases.			Appeals—					
				Before High Court.			Before Lower Courts.		
	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.	1887-88.	1888-89.	1889-90.
In favour of Court of Wards ...	662	745	514	10	11	14	35	62	56
Against Court of Wards	76	82	49	...	4	...	109	24	18
Compromised, remanded, or withdrawn	60	33	42	5	...	2	3	10	10
Percentage in favour of Court of Wards (omitting fractions)	90	90	92	100	74	100	25	7	85

It is explained that the decrease in the number of cases is due to a falling off in the number of original suits on behalf of the Burdwan Raj in the districts of Burdwan, Birbhum, and Bankura, and of two other estates, one in Tipperah and the other in Hazaribagh.

In all the cases in the High Court the Court of Wards was respondent. In six of those in which the Court of Wards preferred appeals unsuccessfully in the lower Appellate Courts, and in 41 out of 49 of the cases decided against the Court of Wards in original suits, action had been taken without previous communication with the Legal Remembrancer. It is not stated how many of the successful cases had been similarly undertaken by the local authorities on their own responsibility.

5. The figures below show the amount of Government decrees recovered during 1889 90 as compared with the two preceding years:—

	1887-88.	1888-89.	1889-90.
	Rs.	Rs	Rs.
Amount under realization ...	48,884	67,540	55,247
Realized during the year	11,389	30,281	11,659
Percentage of recovery	23½	44⅘	21⅕

No explanation has been given of the great falling off in the percentage of recovery, but details are given by the Legal Remembrancer to show that measures for the recovery of outstanding amounts are being taken in all districts, and it is further said that a large portion of the balance will have to be written off, all attempts to realize having proved unsuccessful. Only Rs. 760 were remitted during the year.

6. The following table shows the amount of wards' decrees recovered during the year as compared with the two previous years:—

	1887-88.	1888-89.	1889-90.
	Rs.	Rs.	Rs.
Amount under realization ...	13,20,600	13,94,090	11,74,880
Realized during the year ...	2,59,312	2,68,027	2,15,720
Percentage of recovery ...	19⅔	19¼	18⅓

7. The largest outstanding balances are noted in the margin. In many instances it is reported that considerable sums are irrecoverable, and if this be the case, the amounts should be reported for remission at an early date. Recent collections on the Burdwan Raj Estate are said to be encouraging, and special arrangements have been made by the Board of Revenue for the realization of the balance due on the estate of the three younger Dighapatia wards. No information is forthcoming at present as to the very large balance reported from the Tikari Estate, and the Lieutenant-Governor would be glad to have a special report on the subject. His Honor would be glad also to hear what action has been taken on the special reports called for by the Legal Remembrancer on this subject in 1888-89, as the percentage of collections generally is far from satisfactory.

		Rs.
Burdwan Raj	Estate ...	2,69,785

	Bongong ...	1·05	
	Moorshedabad ,, 23, '90	4·22	Weather—hot with occasional heavy showers. River imperceptibly falling down; the gauge stood this noon (23rd) 30′ 8″. Four annas outturn of *bhadoi* crop reported from the Jungipore subdivision. General outturn of this crop expected to be much less than usual. Prospects of standing crops on the whole good. *Amun* thriving well.
	RAJSHAHYE DIVN.		
11	Dinagepur ,, 23, '90	5·78	Weather—seasonable. Harvesting of jute and *bhadoi* still going on. Prospects
	Thakurgaon ...	5·0	of *haimanti* paddy very favourable. Transplantation of *haimanti* not yet finished. Price of rice stationary.
12	Rajshahye ,, 23, '90	2·28	Weather—rainy and seasonable. State and prospects of crops good in Nattore
	Nattore ...	2·74	and Nowgong ;—but the inundation is seriously affecting the standing crops
	Nowgong ...	1·37	in nearly all thanas of the Sudder subdivision; it is too early to estimate the damage that may have been caused.
13	Rungpur ,, 23, '90	7·04	Weather—cloudy with occasional showers. The rain has been beneficial to
	Nilphamari ...	9·91	*amun* which is being transplanted. Sugarcane promising well.
	Kurigram ...	5·17	
	Gaibanda ...	0·89	
14	Bogra ,, 23, '90	3·59	Weather—rainy and cloudy with south-easterly wind. Condition of sugarcane,
	Sherpur ...	3·93	*aus*, and *amun* good. *Aus* and jute are being cut. Common rice is being
	Nowkhilla ...	2·87	sold at 18½ seers per rupee.
15	Pubna ,, 23, '90	2·56	Weather—cool and cloudy. The continual rise of the rivers has caused partial damage to the jute, sugarcane, *aus*, and *amun* crops. Prices stationary.
16	Darjeeling ,, 23, '90	9·10	Weather—very rainy again. Winter rice is being transplanted in the Terai.
17	Julpigoree ,, 23, '90	17·22	Weather—rainy and cloudy. Harvesting of *aus* paddy going on. Jute is being cut in places. Transplantation of *haimanti* paddy continues. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*			
	Eastern Districts.		
DACCA DIVN. 18	Dacca Aug. 23, '90	2·19	Weather—cloudy with gleams of sunshine at intervals. Jute and *aus* paddy being harvested. *Amun* paddy thriving. Rivers rising again slowly. Fodder is not available in abundance. Common rice 13 to 15 seers per rupee.
19	Furreedpur ,, 23, '90	5·26	Weather—seasonable. In the Goalundo subdivision, where the water has not risen very high, *aus* rice is nearly all gathered with a good outturn; and the state of *amun* continues fair. Sugarcane, however, has been partially damaged by caterpillars. In the Sudder and Madaripore subdivisions the water is again rising. About eight annas of *aus* paddy have been damaged, but the prospect of *amun* paddy continues fair. Fodder is scarce, and cattle are suffering in consequence. Common rice is selling at 13 seers a rupee at its cheapest.
20	Backergunge ,, 23, '90	2·31	Weather—seasonable. Rainfall in the district has been very divergent, in Perozepur only ·97 of an inch, and in Bhola and Patuakhali 4·28 and 5·49 inches respectively. State of standing crops generally good, but some damage has been done both to the *aus* crop and the *amun* seedlings by rise of water. Common rice selling at about 13 seers per rupee.
21	Mymensingh ,, 23, '90	4·00	Weather—rainy and cloudy with occasional sunshine. *Aus* and jute are still being harvested. Transplantation of *amun* is nearly completed. Common rice selling at 13½ seers per rupee.
CHITTAGONG DIVN. 22	Chittagong ,, 23, '90	2·18	Weather—seasonable. Transplanting of *amun* and reaping of *aus* paddy commencing. *Aus* damaged on low lands by recent heavy rain. Rice selling at 16 seers per rupee.
23	Noakholly ,, 23, '90	5·88	Weather—rainy. Sunshine is scarcely seen. Harvesting of *aus* going on. *Amun* is being transplanted. Price of *amun* rice 13 seers and of *aus* rice 15 and 16 seers per rupee at Feny subdivision.
24	Tipperah ,, 23, '90	4·67	Weather—seasonable; frequent showers; cool and cloudy. Three-fourths of *aus* crop reaped. *Amun* thriving. Half of the jute crop cut in the Sudder subdivision. Prospects of standing crops continue good. Prices stationary.
25	Chittagong Hill Tracts. ,, 21, '90	0·79	Weather—cloudy with occasional sunshine and rain throughout the week. Harvesting of early *jum* paddy continues. Cotton progressing. Transplanting in low lands continues. Common rice being sold at 12 seers 15 chittacks per rupee.
BEHAR.	Hill Tipperah ,, 22, '90	1·64	Weather—seasonable. Transplanting of *amun* still going on. Prospects of jute and sugarcane not favourable. *Jum* crops doing well.
PATNA DIVN. 26	Patna ,, 23, '90	4·54	Weather—cloudy and showery. Transplantation of paddy going on vigorously. Sugarcane doing well. Prospects of *bhadoi* crops not good, much injury having been done by excessive rain and floods. Prices of food-grains almost stationary.
	Behar ...	1·21	
	Dinapore ...	0·67	
	Barh ...	1·70	
27	Gya ,, 23, '90	7·01	Weather—rainy and cloudy. Paddy transplantation almost finished. *Marua* being harvested in places. Sugarcane doing well. Prices of food-grains almost stationary.
28	Shahabad ,, 23, '90	2·16	Weather—hot and some wet days. *Bhadoi* almost all gone in Sudder and Buxar; some still left in Sasseram and Bhabuah. Paddy prospects good. Prices stationary; rice slightly risen in Arrah.
	Buxar ...	2·16	
	Bhabuah ...	0·44	
29	Durbhunga ,, 23, '90	2·39	Weather—cloudy with occasional rain. Prospects of *bhadoi* crops not injured by floods continue favourable. *Aghani* rice is still being replanted in places where it has suffered from flood. Indigo manufacture not yet over. Prices remain almost stationary.
	Madhubani ...	4·56	
	Somastipur ...	0·46	
30	Muzufferpur ,, 23, '90	2·28	A good deal of rain during the week, and it was raining at the time of report. Paddy being retransplanted on some of the lands previously inundated. Condition of *makai* and rice not injured by floods satisfactory.
	Hajipur ...	2·12	
	Sitamarhi ...	4·48	
31	Sarun ,, 23, '90	4·49	Monsoon weather. *Bhadoi* crop is almost a total failure on account of the flood. Rice is a complete failure over one-fourth of the district, but elsewhere it is about a 12-anna crop. Indigo prospects poor.
32	Chumparun ,, 23, '90	1·64	Good showers of rain last night (22nd); clouds still hanging in the sky, threatening more rain. Prospects of *makai* very poor from the effects of flood and excessive rainfall of the past weeks. Slight damage to paddy also reported from some parts, but the crop generally is doing well and is in good condition.
	Bettiah ...	4·66	
BHAGULPORE DIVN. 33	Monghyr ,, 23, '90	3·85	Weather—hot and sultry with occasional rainfall. Transplantation of winter rice nearly finished. Harvesting of *bhadoi* crops still going on in places in the Begusarai subdivision.
	Begusarai ...	2·79	
	Jamui ...	3·43	
34	Bhagulpore ,, 23, '90	5·2	Weather—cloudy with a good deal of rain. *Marua, kheri,* and *janera* are being reaped, but a good deal of the crops on low lands destroyed by floods. Prospects of rice crop good.
	Banka ..	2·46	
	Mudhepura ...	3·92	
	Soopool ...	8·00	
35	Purneah ,, 23, '90	4·35	A good deal of rain with occasional sunshine. *Aghani* transplantation continues. *Bhadoi* harvesting going on. Steeping of jute begun. Rivers falling.
	Kishengunge ...	4·65	
	Arrareah ...	4·84	
36	Maldah ,, 23, '90	7·18	Heavy showers with changeable winds. In the centre and south of the district a great deal of the *bhadoi* crop has been damaged by inundation. The jute and rice crops around Kharba and Chanchal are splendid, and the latter has been benefited by the copious rainfall. Common rice selling at from 12 to 18 seers a rupee.
	Shibgunge ...	1·20	
	Gajole ...	4·69	
37	Sonthal Perghs. ,, 23, '90	7·00	Weather—seasonable. *Makai* damaged a good deal by rain. In Deoghur only four annas crop expected; elsewhere ten or twelve annas crop. Rice prospects excellent, but of course depend greatly on September rainfall.
	Deoghur ...	2·81	
	Godda ...	3·60	
	Jamtara ...	2·15	
	Pakour ...	2·83	
	Rajmehal ...	2·62	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Aug. 23, '90	1·60	Rainfall during the week has been insufficient. *Satika beali* is being gathered. In the Dharmsala thana of the Jajpur subdivision *guru beali* is withering for want of sufficient rain. In the Tirtol thana of the Sudder subdivision *sarad* paddy has in some places been attacked by an insect locally known as *soonamuhi*. General prospects fair.
	39	Pooree ,, 21, '90	2·26	Weather—seasonable. Puddling and weeding of the *sarad* crop are in progress. *Beali* is beginning to ripen. Miscellaneous crops are doing well. Prices of common rice vary from 18 seers 6 chittacks to 21 seers per rupee in the Sudder subdivision.
		Khoorda ...	0·62	
		Banpur ..	0·89	
	40	Balasore ,, 23, '90	1·59	Weather—cool and cloudy. Prospects of rice crop generally good, but more rain urgently needed, especially in Bhuddruk subdivision. Number of coolies on relief-works 27.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Aug. 23, '90	3·96	Weather—seasonable. Ample rain all over the district. Transplanting of paddy nearly completed in most places. Prospects very good. *Bhadoi* crops, particularly Indian-corn, greatly damaged by excessive rain. Prices more or less stationary.
	42	Lohardugga ,, 23, '90	1·34	Weather—warm and cloudy. Transplantation of winter rice still going on. Prospect of *bhadoi* good. *Goondli* is being reaped. Prices steady.
		Palamow (up to 18th Aug.)	2·63	
	43	Singbhoom Aug. 23, '90	0·42	Rain holding off in greater part of the district. Weather cloudy and cool. Damage is being done to the rice crop on the "bera" lands by the break in the rains. Rain is badly wanted in all parts but Monorpore and Bharagoora. Indian-corn is a full crop, and other *bhadoi* crops are yielding fully.
	44	Manbhoom ,, 23, '90	2·03	Weather—seasonable. Prospects of winter rice crop generally favourable. *Bhadoi* crop is not up to the average, and from Govindpur it is reported to be a failure.
		Govindpore ...	0·76

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for t
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The ra
are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during th
stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

a. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.
b. Cloud amounts represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means
c. The means of the district are the numerical average of the rainfall return received in the district, *i.e.*, from total rainfall at the subdivisional

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 22nd of August 18

Meteorological division.	District.	Station.	Rainfall. Saturday, 16th August.	Sunday, 17th August.	Monday, 18th August.	Tuesday, 19th August.	Wednesday, 20th August.	Thursday, 21st August.	Friday, 22nd August.	Total number of rainy days.	Total Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 26th August* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 22ND OF AUGUST 1890.

SETTLED conditions have again prevailed throughout the week, the only notable features of the weather being—the rainfall distribution, which has been the reverse of that of the previous week, viz., scanty in the southern districts and heavy in North Bengal and Behar, and two very shallow depressions which formed, one in the centre of the Bay on the 16th, and the other in the north-west corner on the 19th, both, however, disappearing within a day or two of their first appearance.

Pressure has generally been above the normal and changes very small, but as excess in the west of the Bay was about a tenth of an inch during the latter half of the week, gradients have been steeper than usual, and a moderately strong monsoon current has been steady over the eastern and northern districts of the province. The rainfall in East Bengal has been practically normal, and the rather excessive rain in North Bengal and Behar may be due to the westerly winds blowing in these districts from the 17th to 19th and again on the 22nd. The heaviest rain fell when directions were undergoing change, that is about the 17th, the 20th, and the 22nd, and then pressure was either low or uniform over Bengal, and air motion had probably a larger vertical component than with a normal distribution of pressure. On the 16th there was a widely diffused low-pressure area over the centre of the Bay within which a slight defect obtained, while round the coast there was generally excess of about a twentieth of an inch. The depression extended over part of the Circars and as far east as the Burmah coast, but on the following day, owing to a slow rise of pressure, it had disappeared, a faint cyclonic whirl remaining in South Orissa and the Circars and a ridge of relatively high pressure running east and west over Lower Bengal and the head of the Bay. Squally weather probably occurred during these days in the centre of the Bay, as the sea was rough, first in Burmah and then on the Circars and Orissa coast, and wind velocity rose somewhat at the head of the Bay, but even when strongest it was very little above the average and never worse than a fresh breeze. On the 18th a brisk fall of pressure occurred at Saugor Island and Calcutta, and a slow fall continuing on the following day, a shallow depression appeared in the north-west corner of the Bay with cyclonic winds at a few of the neighbouring stations. It was more diffused on the 20th, but the centre of the wind circulation was still between Saugor Island and False Point, and on the 21st it had practically disappeared, leaving the pressure distribution very uniform over the greater part of the province and steep gradients in the north-east corner of the Bay. Wind velocity again increased at the head of the Bay, but, as before, the monsoon was only of about average strength.

Pressure—Changes have rarely exceeded a twentieth of an inch. A slow rise was almost general during the first two days, followed by a slow fall on the 18th and 19th. On the 20th it again increased moderately except in the north and north-east, where the rise exceeded a twentieth of an inch. This slow upward change continued till the last day of the week, when there was a slow fall. These changes had little influence on the general distribution, which on an average has been slightly above the normal at nearly all stations by amounts varying between two and five-hundredths of an inch, the largest excess being in Orissa and South-West Bengal.

Temperature—Owing to the scanty rainfall and comparatively clear skies in the southern districts, has been above the normal in the south-west of the province, while in Assam, East and North Bengal, and Behar, where heavy rain has been fairly continuous, a considerable defect has been recorded. Excess in Orissa and South-West Bengal is about 1°, and in Chutia Nagpur ·3°, while defect in Assam is 2°, in North Bengal and Behar rather over 1°, and in East Bengal ·4°.

Rainfall.—In the early part of the week practically no rain fell in Orissa and South-West Bengal, and only scattered showers in Chutia Nagpur and East Bengal, but during the last four days more rain was received in these districts, though it became general in East Bengal only. In Behar and North Bengal general heavy rain fell throughout the week, and the mean weekly fall has been largely above the normal. Excess in North Bengal [illegible] ·86, in North Bahar 2·43, and South Behar 1·57 inches. The mean fall in East Bengal is [illegible]ry nearly normal, and is below the normal in Chutia Nagpur by ·6 inch, in Orissa by 1·32 [illegible] and South-West Bengal by 1·79 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 22nd of August 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the mometers are verified, and the readings have been corrected to a standard constructed and verified at the y Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet ve the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly he Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ≏ dew.

J. H. Gilliland,

For Meteorological Reporter to the Govt. of India.

Teorological Office, Govt. of India;

Calcutta, the 25th August 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 9th August 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 9th August 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 17·4 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·5 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years except 1887, *vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	25·7	21·1	16·4	20·8	20·3	20·9	17·4

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 19th July 1890.	26th July 1890.	2nd August 1890.	9th August 1890.	Towns.	Weeks ending— 19th July 1890.	26th July 1890.	2nd August 1890.	9th August 1890.
Burdwan	30·5	12·2	13·7	13·7	Naraingunj	16·6	29·0	24·8	16·6
Midnapore	29·4	7·7	15·5	13·9	Chittagong	4·7	14·1	4·7	4·7
Hughli and Chinsurah	32·8	23·0	14·8	10·4	Comillah	7·7	15·4	15·4	11·5
Serampore	31·4	23·6	27·5	23·6	Patna City	11·4	12·7	14·9	13·3
Utterpara	28·3	18·9	18·9	18·9	Gya	26·0	33·5	17·8	21·9
Howrah	14·3	15·5	17·8	14·3	Arrah	17·9	19·1	13·2	20·8
Bali	3·5	14·0	10·5	7·0	Mozufferpore	15·8	13·4	14·6	17·0
Krishnagar	15·1	11·4	5·7	11·4	Durbhanga	18·9	27·5	19·7	29·9
Ranaghat	12·0	12·0	6·0	24·0	Chupra	20·1	11·1	6·0	2·0
Santipore	19·3	10·5	14·0	17·5	Bhagulpore	25·3	16·1	18·1	23·6
Jessore	18·4	6·1	18·4	6·1	Monghyr	33·4	41·6	23·5	38·9
Rampore Beauleah	23·6	18·4	31·5	15·8	Purneah	6·9	20·8	10·4	13·9
Darjiling	22·2	22·2	7·4	37·0	Poori	10·5	18·9	6·3	12·6
Dacca	15·6	9·7	11·0	14·9	Total ...	19·1	18·2	15·3	17·4

It will be seen that last week the highest birth-rate was returned from Monghyr (38·9), and the lowest from Chupra (2·).

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 23·3 per 1,000 of the population. The rate of the week is 8·3 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	48·0	28·7	37·0	25·4	29·1	31·6	23·3

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Dacca	23·4	15·6	27·2	25·3	Total ...	23·0	23·1	19·2	21·3

It will be seen that last week the highest mortality occurred in the town of Darjiling (66·7), and the lowest in Chupra (3·).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Gya	16·4	Darjiling	44·5	Serampore	17·6
Arrah	9·5	Serampore	23·6	Gya	14·3
Santipore	8·7	Gya	22·6	Poori	10·5
Durbhanga	7·9				
Mozufferpore	4·9				
onghyr	3·6				
Patna City	2·9				

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·6 from cholera, against 2·1 per 1,000 in the preceding week; ·1 from small-pox, against ·04; 9·6 from fever, against 7·4; 3·5 from bowel-complaints, against 2·4; ·4 from injury, against ·8; and 6·1 from other causes, against 6·4 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	24·3	Christians ...	7·5	Under 1 year ...	194 6
Females	22·1	Hindus ...	25·5	1 and under 5 years ...	30·8
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	110	Mahomedans ...	18 2	5 „ 10 „ ...	9·9
				10 „ 15 „ ...	15·1
				15 „ 20 „ ...	15·4
				20 „ 30 „ ...	9 9
				30 „ 40 „ ...	15·7
				40 „ 50 „ ...	19 9
				50 „ 60 „ ...	23·5
				60 years and upwards ...	60·1

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

The 25th August 1890. *Sanitary Commissioner for Bengal.*

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 9th August 1890.

Comparative Statement of the principal commodities carried over the Bengal Central Railway during the month of June 1890.

	Tons.
INCREASES.	
Betel-nuts	521
From the Bengal Central Flotilla Company.	
DECREASES.	
Coal	329
Due presumably to sufficiency of stock for railway and flotilla consumption	
Oilseeds	326
Khoolna, Nawapara, and Jhikargacha show the principal decreases, which are said to be due to poor crops in the neighbourhood.	
Sugar	728
Jhikargacha shows the largest falling off. The decrease generally is due to the successful competition of raw sugar from Java.	

F. P. QUINLAN,
Examiner of Accounts.

The statistical returns for the years 1887-88 and 1888-89, with the remarks thereon.

Read also—

The Report for the year 1886-87 and the Resolution thereon.

The Inspector-General of Registration submits the first triennial report in compliance with the instructions of the Government of India contained in Home Department Resolution No. 28—1579-95, dated the 15th July 1887. The Lieutenant-Governor hopes that in future years it may be possible to obtain correct figures and reports from the district offices by the 1st May, so that the Inspector-General may be able to submit his report for the whole province on an earlier date. On the present occasion there has been no delay in Mr. Holmwood's office. The report is full and interesting and at the same time sufficiently concise, and it is illustrated by a useful and instructive map.

2. The following table, which is taken from the body of the report, is of general interest:—

Year.	Number of registrations.				Total receipts.	Total expenditure.	Surplus.	Number of registration offices.
	Affecting immoveable property.		Other registrations.	Total.				
	Compulsory.	Optional.						
					Rs.	Rs.	Rs.	
1884-85	374,730	193,811	119,839	688,380	10,74,501	5,54,110	5,20,391	290

Decrease	.....	243,588	.....	.....	.....	.....	.....	.....

* Including some deeds the registration of which has since become compulsory under the Bengal Tenancy Act.

The most noticeable figures in the above statement are those that show a decrease in optional registrations affecting immoveable property. They are fully explained by Mr. Holmwood, who shows that the decrease is due solely to the gradual introduction of the Transfer of Property Act and to a change in the classification of deeds for the transfer of permanent tenures and holdings of small value by sale or gift. The registration of these was formerly held to be optional, but is now deemed compulsory. In all cases in which sufficient time has elapsed to give these changes their full effect it has been found that optional registrations steadily increase *pari passu* with compulsory ones. There has been a steady increase in the operations of the Department, and its financial position is excellent, the surplus at the close of 1889-90 being larger than that of any previous year. Several new offices have been opened since the close of the year, and the demand for an extension of registration operations still continues.

3. The number of perpetual leases decreased from 78,766 in 1886-87 to 71,642 in 1887-88 and 69,330 in 1888-89, but it again rose to 76,390 in 1889-90. Mr. Holmwood's remarks on this point are of considerable interest and importance. He says:—"There are two great classes of perpetual leases—those given by zemindars to their tenants and those sublet by tenants to others. These two classes fluctuate independently of each other, and the circumstances of each particular district become a factor in determining their variations. But as far as the first class of perpetual leases is concerned, a general rule, such as would be naturally expected, seems to be at work. The amount of land being limited, the settlement by zemindars with their ryots in perpetuity has a tendency to increase up to a certain point, and then to steadily decrease as the majority of the lands become settled. This has actually been observed to be the case in the sub-district of Baraset in the 24-Pergunnahs, where the Sub-Registrar is the most punctual and business-like officer I have under me (which renders his office very popular), and is also a most careful observer and notes facts in connection with registration transactions in the most intelligent manner. He has observed a regular permanent settlement going on during the past two or three years between the zemindars and their ryots, owing to the zemindars finding it difficult to make arbitrary enhancements or ejections under the new law, and the number of registrations under this settlement has already reached its maximum and begun to decline. I have no doubt that this same cause is at work in other sub-districts, where the usual stereotyped explanation is given, that the zemindars find themselves in straitened circumstances owing to a succession of bad harvests; but it is only in particular districts, like those in the Dacca and Chittagong Divisions, where the ryots are prosperous and insist on obtaining some certainty of tenure, that these settlements are at all general." Many of the registrations are, of course, mere paper transactions due to the necessity for re-registration of under-tenures when the ownership of the property is transferred. The disturbance in the ordinary current of land transactions occasioned by the introduction of the Bengal Tenancy Act has rendered it difficult of late years to appreciate the true nature and value of fluctuations in figures of registration of deeds; but the experience of three years of its working

does show that the number of transactions under the head of perpetual leases has steadily increased and tends to reach a certain maximum, after which a decrease may be looked for. The following statement shows the number of perpetual leases registered in some of the important districts since 1882-83, and generally points to the conclusions arrived at by the Inspector-General, although in some districts the individual action of two or three large landholders always affects the statistics, and the bearing of the Tenancy Act upon them is thus prevented from being apparent:—

District.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.
Burdwan	904	863	1,012	1,051	1,183	1,118	1,318	1,374
Bankura	1,651	1,899	1,971	2,377	2,554	2,826	2,709	3,270
Midnapore	1,036	1,303	1,478	1,618	2,071	1,694	1,998	1,248
24-Pergunnahs	4,619	4,481	5,051	6,143	6,727	5,839	7,010	7,510
Nuddea	1,713	1,601	1,710	1,569	1,244	1,539	1,586	1,812
Jessore	11,881	11,199	21,315	9,750	6,207	3,792	3,009	4,360
Khulna	2,562	4,576	4,878	4,701	4,376	4,641	5,194	5,210
Dacca	535	790	590	763	899	1,234	1,221	1,317
Furreedpore	6,221	6,076	6,509	6,623	8,038	8,082	7,822	8,810
Backergunge	11,180	10,813	12,069	10,999	10,138	8,988	8,489	8,234
Noakholly	3,631	5,536	7,621	8,117	5,759	5,299	4,555	4,762
Chittagong	15,803	17,248	22,540	23,172	20,137	18,204	16,322	19,027

4. Of the total number of other than perpetual leases, which rose from 187,263 in 1886-87 to 227,686 in 1889-90, 175,231 were counterparts, the percentage of leases being 23·03 as compared with 27·06 in 1886-87, 23·65 in 1887-88, and 23·72 in 1888-89. Any deductions from these figures are dangerous, as District Registrars appear to be doubtful in some cases as to whether kabulyats should be classed as leases, or merely as the counterparts they are, and because pottahs are also frequently entered as counterparts. Moreover, the prevalence of *zar-i-peshgi* and *kurtaoli* leases, of which no counterparts are given, in the most important districts of Behar, frustrates any attempt at theorizing on these statistics. At the same time it is unsatisfactory to note that some of the District Registrars are of opinion that the low figures for their own districts are due to "the inability of the ryots to exact pottahs from their landlords, and the aversion of zemindars to give pottahs on account of their dignity suffering by so doing, on account of the expense, which they consider unnecessary and the ryots are unwilling to incur, and, lastly, on account of a fear of their ryots obtaining occupancy rights."

5. The number of instruments of mortgage of the value of Rs. 100 and upwards rose gradually from 58,648 in 1886-87 to 77,555 in 1889-90. There was a slight decrease last year in the districts of Rungpur, Dacca, and the Sonthal Pergunnahs. Similar instruments of value less than Rs. 100 also considerably increased during the last three years, the figures of the past year being 130,007 against 72,355 in 1886-87. The increase is in many cases ascribed to failure of crops and the high price of food-grains. An interesting cause of the increase during the past year is reported from Noakhali, where the crops have been good and land operations extensive. The District Registrar supposes that many mortgages of small plots of land have been executed by the ryots who have extended cultivation, for the purpose of buying cattle and agricultural implements. In Sarun, where the circumstances are wholly different, a very similar reason for increase is given. The matter is clearly one for further investigation, and the Inspector-General, who has called for a further report from the District Registrar of Noakhali on the subject, will be requested to notice this point in his notes while submitting the statistical returns for the current year. The increase in deeds of mortgage does not appear to have affected the registrations of obligations for payment of money, including bonds and miscellaneous deeds, such as kabinnamahs. The latter rose from 89,795 in 1886-87 to 103,962 in 1889-90. About 82 per cent. of the bonds were of values up to Rs. 100, the rest exceeding that amount. The increase in this case, as in the case of mortgages, is probably due, to a great extent, to the scarcity that affected many parts of Bengal during the past year. The total number of registrations affecting moveable property, excluding wills and written authorities to adopt, increased from 125,188 in 1886-87 to 149,350 in 1889-90.

6. While the aggregate value of property transferred by registered documents increased by more than 520½ lakhs of rupees in 1888-89, it decreased by more than 412½ lakhs during the past year. There was an increase of nearly 11 lakhs in the value of moveable property transferred, but the value

of immoveable property diminished by more than 423 lakhs. It is unsatisfactory to note that no explanation is forthcoming of the wholly unprecedented increase observed last year or of the great fall in the year following. In former years fluctuations in these figures were not considerable, and it is an insufficient explanation to attribute them to general dulness of trade. The Lieutenant-Governor is glad to note that the Inspector-General has called for a special report on this subject, and hopes to hear at an early date what has resulted from a further examination of the details of the statistics now given.

7. Statement XII appended to the report shows that 90,691 transfers of estates and tenures were effected by deeds of sale during the past year against 52,858 in 1886-87 and 81,382 in 1888-89, and that 9·9 per cent. of the purchasers were mahajans, traders or money-lenders, 15·3 per cent. zemindars, 29·6 per cent. intermediate tenure-holders, 24·1 per cent. ryots, and 21·1 per cent. others not specified. The details which show the numbers in each class of purchasers, and the proportion of each to the total, lose much of their value from the fact that certain classes of purchasers, such as mahajans and zemindars, are more likely to register purchases than the lower classes of ryots, and also from the fact that town properties and other estates in the neighbourhood of registration offices must always bear an undue proportion to the total number of transfers registered. The following table compares the sales of ryoti holdings and the number and classes of purchasers during the last four years, and shows a steady increase in the number of such transactions, which is, no doubt, the result of the facilities afforded by the Tenancy Act:—

Year.	RYOTI HOLDINGS AT FIXED RATES.							RYOTI HOLDINGS WITH RIGHT OF OCCUPANCY						
	Number of transactions.	Purchasers.						Number of transactions.	Purchasers.					
		Mahajans, traders, or money-lenders.	Zemindars.		Ryots.	Others.	Total.		Mahajans, traders, or money-lenders.	Zemindars.		Ryots.	Others.	Total.
			Landlords of holdings transferred.	Other landlords.						Landlords of holdings transferred.	Other landlords.			
1886-87 ...	24,721	3,791	786	2,804	13,500	7,315	27,896	53,971	6,458	1,050	3,315	37,602	8,070	56,564
1887-88 ...	30,137	4,830	891	2,577	16,368	7,918	32,584	58,200	7,654	974	3,405	40,086	8,143	60,862
1888-89 ...	81,396	5,124	1,395	3,092	17,823	8,176	35,610	64,449	8,301	1,371	4,434	45,012	8,030	67,148
1889-90 ...	35,343	5,161	1,181	2,51[illegible]	20,390	8,396	37,649	77,373	10,029	2,060	5,198	54,234	9,277	80,798

8. The number of registrations under sections 12 and 18 of the Bengal Tenancy Act fell from 79,109 in 1886-87, 76,324 in 1887-88, and 47,391 in 1888-89 to 26,780 in 1889-90. The decrease in the past two years is due, to a certain extent, to the discontinuance of the practice of registering deeds relating to fractional portions of permanent tenures or ryoti holdings at fixed rates, where the partition is not made with the landlord's consent in writing. On the subject of sections 12 and 18 of the Act, Mr. Holmwood remarks: "there is not the least doubt that the levy of landlords' fees under those sections is exceedingly unpopular with both landlords and tenants, and that it is evaded in every possible way. The reasons of this unpopularity are not far to seek. The ryots object to pay the landlord's fee because in a great many cases it is refused by the landlord as being beneath his dignity, or as being likely to amount to an admission of an occupancy right of the tenant, and in nearly every case the ryot is not exempted by its payment from the necessity of giving *salami* to his landlord." Sir Steuart Bayley is inclined to agree with the Inspector-General in his deductions from the figures showing a great increase in the number of registrations of leases, mortgages and sales, and to attribute them to the indirect effect of the Bengal Tenancy Act. Mr. Holmwood's interesting comments on these figures and his explanation of them will be brought to the notice of the Revenue Department.

9. Further enquiry will be made into the forgery cases mentioned in paragraph 53 of the report, and the Inspector-General of Registration will be asked for recommendations on the subject of the rules relating to impounded deeds. Mr. Holmwood's remarks as to the power which is given to Rural Sub-Registrars to give gratuitous advice to parties are useful. There can be no doubt

that a free use of this power by sympathetic officers would largely increase the popularity of registration offices among the lower classes.

10. The number of inspections made by the Inspector-General and other officers during the past year was 861 against 868 in 1888-89 and 906 in 1887-88. His Honour is glad to observe that District Registrars have themselves done a fair share of this work, but would impress on them their direct responsibility for the great falling off in the number of inspections by Sadr Sub-Registrars and Sub-divisional Officers. In 16 of the districts that have sub-divisions there were no inspections made at all, and Sir Steuart Bayley is convinced that there can be no adequate excuse for such a failure in duty. The remarks made by the Inspector-General on the subject of *ex-officio* Sub-Registrars at Sadr stations have been noted by the Lieutenant-Governor, and any further representations or special reports on the subject that Mr. Holmwood may think fit to make will receive His Honour's careful consideration.

11. The following table shows the working of Act I (B.C.) of 1876 for the Voluntary Registration of Mahomedan Marriages and Divorces since its introduction:—

Years.	Number of districts in which the Act was in force.	Number of offices open on the 31st March.	Number of marriages registered.	Number of divorces other than *kholas* registered.	Number of *kholas* registered.	Total number of ceremonies registered.
1876-77	14	77	2,555	402	161	3,118
1877-78	14	103	7,391	1,404	595	9,390
1878-79	14	103	8,161	1,705	771	10,637
1879-80	14	107	7,137	2,097	623	9,857
1880-81	14	106	5,777	1,874	779	8,430
1881-82	14	107	4,951	2,239	667	7,857
1882-83	14	112	5,068	2,247	766	8,081
1883-84	14	112	4,279	2,315	895	7,483
1884-85	14	112	3,913	2,540	957	7,410
1885-86	14	112	3,993	2,422	1,109	7,524
1886-87	14	112	3,926	2,179	1,147	7,252
1887 88	14	112	4,100	2,478	1,090	7,668
1888-89	14	113	4,527	2,819	1,113	8,459
1889-90	14	113	3,959	3,119	1,137	8,215

The districts of Dinagepur, Pubna, Backerganj, Noakhali, Mymensingh, Bogra, Tipperah, and Dacca showed an increase in the total number of ceremonies registered, while the districts of Khulna, Rajshahye, Rungpur, Faridpur, and Chittagong showed a decrease. The Inspector-General of Registration thinks that in the majority of districts the Mahomedan Marriage Registrars are slowly but surely gaining ground, and that in those districts where they do not do so, it is owing to their own inferior qualifications or to the active opposition of interested headmen and zemindars. Mr. Holmwood was lately asked for a separate report with reference to the alleged unpopularity of the Act, and he has given his reasons for holding that it is not in any way unpopular, though in certain places it is neglected and in certain others its effects are destroyed by the opposition of a few hostile zemindars, and the Lieutenant-Governor is inclined to agree with the view he has expressed. Some practical reforms suggested by Nawab Abdul Latif Bahadur, C.I.E., in a valuable minute on the working of the Act, have been adopted by the Permanent Committee and approved by Government, and they will be immediately introduced. The Act is at the same time to be extended, on the recommendation of the Permanent Committee, to the Town of Calcutta and the districts of 24-Pergunnahs, Jessore, and Murshidabad. As regards the Qazis' Act, the Inspector-General writes that the "Act does not seem to gain ground much, though wherever the Qazis are energetic enough to establish Naib Qazis and get hold of the professional persons who arrange marriages there is a marked increase in their operations. This is specially noticed in the districts of Eastern Bengal." The Lieutenant-Governor hopes that district officers will show more interest in the working of this important Act in the future, and notices with

much pleasure the commendation bestowed by the Inspector-General on the admirable work done by Baboo Nil Ratan Mookerjee in Mymensingh.

12. Mr. Blyth was in charge of the Department throughout the past year, with the exception of a few days of the closing month, and was relieved by Mr. Holmwood, the present Inspector-General, on the 16th March 1890. The thanks of the Lieutenant-Governor are due to Mr. Holmwood for his careful and interesting report. The names of the officers specially commended by the Inspector-General will be noted in the Appointment Department.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Inspector-General of Registration for information and guidance.

Ordered also that extract paragraph 8 of the Resolution and extract paragraph 51 of the Report be forwarded to the Revenue Department for information.

Ordered also that a copy of the Resolution, together with a copy of the Report, be submitted to the Government of India, in the Home Department, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. C. STEVENS,

Offg. Chief Secy. to the Govt. of Bengal.

FLOODS IN THE DISTRICT OF SARUN.

REVENUE DEPARTMENT.

Dated Yacht Rhotas, 26th August 1890.

RESOLUTION.

READ—

Letter No. 28R, dated the 9th August, 1890, from the Commissioner of the Patna Division, asking the sanction of Government to his authorising the Collector of Sarun to make advances under the Agricultural Loans Act and the Land Improvement Advance Act to the extent of Rs. 15,000 in addition to the sum of Rs. 10,000 already assigned to that district on account of heavy inundations.

Read—

Letter No. $\frac{3929}{150}$ Fam., dated the 12th August, 1890, to the Commissioner of Patna, approving of his proposal to authorise the Collector of Sarun to make the advances if the Commissioner is satisfied, on receipt of the Collector's report, that advances to such an extent are necessary.

Read—

Letter from the Commissioner of Patna, No. 505G, dated the 14th August, 1890, submitting a report from the Collector of Sarun on the inundations.

Read—

A letter, dated the 24th August, 1890, from the Commissioner of Patna, submitting a further report from the Collector of Sarun on the inundations and the measures he has taken, and is taking, for the relief of distress.

Mr. Bourdillon has shewn both energy and organising capacity in the arrangements made by him for the relief of the distress caused by the floods. The measures taken within the town of Chupra itself are well conceived, and the Lieutenant-Governor was glad to see, on his visit of inspection, that they had been efficiently carried out. The expense has hitherto been met from municipal funds, from money raised by private subscription, and by the diversion to this purpose of a sum collected for His Honour's reception, a transfer most pleasing to Sir Steuart Bayley. But if a moderate grant should hereafter be required from Government, it will be very willingly given.

In the interior it would appear from the eagerness with which grain sent from Chupra by boat was purchased that there is real distress, which all residents will not be able to provide for by buying grain. The Lieutenant-Governor is, moreover, inclined to doubt whether the mahajans will advance to all ryots, now that the usual security has disappeared with the loss of the crop on the ground, and also whether all labourers will be supported, as the best of them will doubtless be, by their usual employers. It seems desirable to establish a village agency for ascertaining the facts, and administering relief where necessary; also for co-operating with the officers whom the Collector proposes to depute to examine applications for loans. These may be freely given, where required, up to the amount of the Government grant for the purpose, and the proceeds may without objection be applied to the support of the ryots, and their cattle. Very small loans may occasionally be made to labourers, on such security as they can offer. The result of the enquiries made by the village agency will indicate how far gratuitous relief is needed; where required it should not be withheld.

The Lieutenant-Governor desires that the additional arrangements now ordered should be made promptly, and does not contemplate their continuance for any length of time. They are applicable in full only so long as the labourers are deprived of work by the effects of the flood, and may be curtailed when the waters subside. The loans will, no doubt, be necessary at a later period, to ease the pressure caused by the loss of the crop.

ORDER.—Ordered, that a copy of the Resolution be forwarded to the Commissioner of the Patna Division for information and for communication to the Collector of Sarun.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 30th August, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
Burdwan Div. 1	Burdwan Aug. 30, '90	0·57	Weather—cloudy and hot. Sugarcane not bad. *Aus* promising. *Amun* in good state. Prices of common rice :—
	Culna ...	0·18	
	Cutwa ...	0 58	
	Ranigunge ...	1·36	Srs. Burdwan ... ... 15; Culna ... ... 14; Cutwa ... ... 14 1/16; Ranigunge ... ... 15 1/4 — per rupee.
2	Bankoora „ 30, '90	1·15	Weather—cloudy with occasional light showers. More rain wanted for *aus* as well as for *amun* crop on high lands. Prospects favourable. Extent of rice sowing this year in the Sudder subdivision estimated at 16 annas. Common rice selling at 19 seers per rupee at Sudder and 18½ seers at Bissenpore.
3	Birbhum „ 30, '90	4·50	Weather—seasonable. Prospects of all crops—early rice, late rice, and sugarcane—are at present exceptionally good. Prices of rice continue at from 16 to 18 seers per rupee.
	Rampore Haut ...	3·55	
4	Midnapur „ 30, '90	Nil	Some rain in south of district. Prospects of rice crop fair. More rain wanted throughout district. Demand for canal water increasing. Prices of common rice :— Srs. Ch. Sudder ... ... 16 0; Contai ... ... 16 0; Tumlook ... ... 14 3; Ghatal ... ... 16 0 — per rupee.
5	Hooghly „ 30, '90	1·48	Weather—cool with showers. State and prospects of crops excellent. More rain required for *amun* rice in the Serampore subdivision. Prices of common rice :— Srs. Sudder ... ... 13; Serampore ... ... 16; Jehanabad ... ... 16 — per rupee.
	Serampore ...	0·52	
	Jehanabad ...	1·20	
	Howrah „ 30, '90	Figures not given.	Weather—showery. More rain wanted in north of district. Transplanting of *amun* not yet finished. Condition of crops generally on the whole satisfactory. Price of common rice 13 to 14 seers per rupee.
	Central Districts.		
Presidency Div. 6	24-Perghs. Aug. 30, '90	2·10	Weather—seasonable. Prospects of standing crops good. Transplantation of *amun* rice still going on. Prices stationary.
7	Nuddea „ 30, '90	1·50	Weather—seasonable. *Aus* paddy on high land is being cut and is in good condition. The crops on low lands have been destroyed by the floods.
	Kushtea ...	1·58	
	Meherpore ...	0·40	
	Chuadanga ...	0·59	
	Ranaghat ...	0·28	
8	Khoolna „ 30, '90	2·08	Weather—sunny and hot in early part of week, rainy in latter part. Excessive rain has done some damage to the crops in the Khoolna thana and to the *aus* crop in Satkhira, but prospects are still fair.
	Bagirhat ...	0·62	
	Satkhira ...	2·16	
9	Jessore „ 30, '90	2·68	Weather—hot and cloudy with occasional showers. Much injury has been caused by floods in Bongong, Jhenidah, and Magura to all crops. The *aus* crop in the greater part of Bongong has been destroyed. More flood water is expected in a few days. Average price of common rice about 13 seers per rupee.
	Jhenidah ..	0·44	
	Magura ...	2·36	
	Narail ...	0·11	
	Bongong ...	2·30	
10	Moorshedabad „ 30, '90	0·84	Weather—seasonable. Considerable destruction of *aus* and *amun* in all the lower tracts from flood. Rain wanted for *amun*. People much inconvenienced by inundation, but distress not much. The Bhagiruthee falling slightly.
11	Dinagepur „ 30, '90	6·01	Much rain during the week. Prospects of crops continue favourable. Price of rice unchanged.
	Thakurgaon ...	9·25	
Rajshahye Div. 12	Rajshahye „ 30, '90	0·93	Weather—cloudy and rainy. Flood higher than in last year; it has done some damage to *aus* paddy which could not be reaped earlier. *Haimanti* paddy on low lands submerged. Prospect as yet good, if the flood subsides soon.
	Nattore ...	2·90	
	Nowgong ...	1·77	
13	Rungpur „ 30, '90	2·49	Weather—cool and cloudy with frequent showers. Jute harvest in full swing. *Amun* rice is being transplanted. Sugarcane flourishes. Prices still range very high.
	Nilphamari ...	3·56	
	Kurigram ...	1·66	
	Gaibanda ...	7·97	
14	Bogra „ 30, '90	5·09	Weather—very rainy and cloudy. Transplantation of *amun* nearly completed. Condition of *aus* and jute good, and *amun* and sugarcane crops promising. Reaping of *aus* and jute not yet finished. Common rice selling at 18 seers per rupee.
	Sherpur ...	2·91	
	Nowkhilla ...	2·15	
15	Pubna „ 30, '90	0·63	Weather—cool and showery. Jute and *aus* are being cut. Outturn of the latter expected to be 12 annas. Prospects of *amun* continue good except on low lands. Prices stationary.
16	Darjeeling „ 30, '90	4·98	Weather—rainy. *Bhadoi* crop harvested; transplantation of winter rice completed in Terai; prospects of *marua* good.
17	Julpigoree „ 30, '90	7·21	Weather—wet and cloudy. Transplanting of *haimanti* paddy and harvesting of *aus* paddy going on. Prospects generally good. Jute is being cut. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Aug. 30, '90	2·29	Weather—mostly cloudy and rainy. *Aus* paddy and jute being harvested. *Amun* paddy thriving. Rivers are rising again rapidly, and *aus* and jute have suffered to some extent in consequence. Fodder is available, but not in abundance. Common rice sells at from 13 to 15 seers per rupee.
19	Furreedpur „ 30, '90	3·99	Weather—seasonable. Water rising. State of *amun* fair. *Aus* partially damaged. Common rice selling at 13 seers rupee. Fodder scarce; cattle suffering in consequence.
20	Backergunge „ 30, '90	1·26	Weather—seasonable. Rainfall heavy in Perozepur (5·16 inches), elsewhere much lighter. Outturn of *aus* crop estimated at 12 annas. Standing crops promise fair, though partially damaged by flood. *Amun* seedlings damaged by rise of water in some places, but new sowings have done well. Transplantation going on rapidly; an average crop is expected. Common rice selling at about 13 seers per rupee.
21	Mymensingh „ 30, '90	3·54	Weather—rainy and cool. About three-fourths of the area set apart for *amun* paddy has been sown and seedlings transplanted. The plants are healthy and very promising. Jute is being harvested. Coarse rice sells at 13½ seers per rupee.
Chittagong Divn. 22	Chittagong „ 30, '90	6·04	Weather—seasonable. *Aus* is being harvested. Transplantation of *amun* going on. Prospects fair. Common rice selling at 16 seers per rupee.
23	Noakholly „ 30, '90	4·54	Weather—rainy and cloudy. Reaping of *aus* crop nearly completed. Transplantation of *amun* progressing.
24	Tipperah „ 30, '90	4·09	Weather—seasonable; cool, cloudy and wet. Jute and *aus* rice are being cut. *Amun* is being transplanted. Floods considerable in the district, but no serious damage done to standing crops. Prices stationary.
25	Chittagong Hill Tracts. „ 28, '90	4·95	Weather—rainy and sunny throughout the week. Harvesting of early *jum* paddy continues Transplanting of late rice crop in low lands nearly finished. Common rice is being sold at 12 seers 15 chittacks per rupee.
	Hill Tipperah „ 29, '90	1·29	Weather—cloudy with occasional showers. Transplanting of *amun* nearly over. *Jum* crops promising. Common rice selling at from 13 to 16 seers per rupee.
BEHAR.			
Patna Divn. 26	Patna „ 30, '90	8·27	Weather—very hot. Transplantation of paddy still continues. *Marua* is being reaped in some places. Prospects of *bhadoi* crops poor. Sugarcane looks well. Prices of food-grains generally stationary.
	Behar ...	2·62	
	Dinapore ...	9·51	
	Barh ...	6·23	
27	Gya „ 30, '90	10·30	Weather—rainy and cloudy. Paddy transplantation finished. *Marua* is being reaped in places. Prospect of *bhadoi* not good. Prices of food-grains almost stationary.
28	Shahabad „ 30, '90	2·47	Weather—hot but changeable. Paddy prospects continue good. As already reported, scarcely any *bhadoi* in Sudder and Buxar. A little *bhadoi* crop in Sasseram and Bhabuah. Prices stationary.
	Buxar ...	6·37	
	Bhabuah ...	5·10	
	Sasseram ...	4·47	
29	Durbhunga „ 30, '90	9·13	Weather—generally cloudy. *Makai* and *marua* commenced to be harvested in places. Retransplanting of rice still going on on some of the lands previously inundated. Prospects generally favourable. Price of common rice varies from 14 to 16 seers per rupee.
	Somastipur ...	4·31	
	Madhubani ...	6·41	
30	Muzufferpur „ 30, '90	6·99	Another rainy week, but it has now cleared up and there is some prospect of dry weather. Condition of rice crop satisfactory, except in low places where damage has been done by floods. *Makai* ripening; a crop of from 6 to 8 annas will probably be gathered. Prices stationary and much lower than last year.
	Hajipur ...	3·14	
31	Sarun „ 30, '90	2·70	Monsoon weather. *Bhadoi* crop is almost a total failure. Rice a complete failure over one-fourth of the district from flood; about a 12-anna crop elsewhere. Indigo prospects poor.
32	Chumparun „ 30, '90	8·80	Weather—fair and cloudy alternately. Heavy rain again during the week. Harvesting of *saro* rice and *kodo* commenced. *Aghani* rice doing well. *Makai* in ear.
	Bettiah ...	6·65	
Bhagulpore Divn. 33	Monghyr „ 30, '90	2·90	Weather—cloudy and rainy with sunshine at times. Prospects of winter rice continue favourable. *Sama, kaoni,* and *makai* are being reaped in the Beguserai subdivision.
	Beguserai ...	2·47	
	Jamui ...	4·34	
34	Bhagulpore „ 30, '90	6·01	Weather—rainy with intervals of sunshine. Except for portion of the crop in the Soopool subdivision destroyed by floods, the prospects of the *aghani dhan* are good. *Marua, janera,* and *bhadoi dhan* harvests are in progress.
	Banka ..	2·71	
	Mudhepura ...	3·25	
	Soopool ...	3·58	
35	Purneah „ 30, '90	6·83	Copious rain throughout the week and cloudy weather. *Aghani* transplantation is still going on in the Purneah and Kishengunge subdivisions. It is doing well in the Arrareah subdivision. *Bhadoi* paddy and jute are still being cut; outturn good.
	Kishengunge ...	9·70	
	Arrareah ...	7·29	
36	Maldah „ 30, '90	6·48	Weather—generally bright. Heavy rain on 29th. Much damage has been done to *bhadoi* by inundation. *Bhadoi* outturn expected to average about 6 annas. Prospects of jute and winter rice good, though in some places they have been slightly damaged. Common rice selling at from 12 to 17 seers per rupee.
	Chanchal ...	3·08	
	Shibgunge ...	2·31	
	Gajole ...	11·64	
37	Sonthal Perghs. „ 30, '90	0·75	Weather—seasonable. Present break in the rains is doing much good. Rice crop is everywhere doing very well, and prospects are excellent. *Makai* has been more damaged by the rain than was anticipated, and from Deoghur it is reported to be nearly a total failure.
	Deoghur ...	3·39	
	Godda ...	2·11	
	Jamtara ...	0·87	
	Pakour ...	2·03	
	Rajmehal ...	3·17	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	ORISSA.			
Orissa Divn.	38	Cuttack ...	...	Report not received.
Orissa Divn.	39	Pooree Aug. 28, '90 Khoorda ... Banpur ...	6·28 0·78 1·83	Weather—seasonable. Transplanting and weeding of *sarad* going on. *Beali* is being harvested. Miscellaneous crops doing well. Price of common rice ranges from 21 seers to 18 seers 6 chittacks per rupee.
Orissa Divn.	40	Balasore ,, 30, '90	0·08	Weather—cloudy but rainless. The insufficient rainfall of July and August has spoilt the excellent prospects of June, especially in the Bhadrak subdivision. Number on relief-works 36. Relief-works close tomorrow (31st August).
	CHOTA NAGPORE.			
	South-West Frontier Agency.			
Chota Nagpore Divn.	41	Hazaribagh Aug. 30, '90	2·70	Weather—seasonable. Rain and sunshine alternating. Transplanting of paddy completed in most places, and the crop is doing very well. Prospects of Indian-corn poor. Other *bhadoi* crops also damaged by excessive rain. Prices stationary.
Chota Nagpore Divn.	42	Lohardugga ,, 30, '90 Palamow (up to 25th Aug.)	2·30 2·16	Weather—warm and cloudy. Transplantation of winter rice finished. Prospect of *bhadoi* is good. Some damage has been caused to *makai* in Palamow by excessive rain.
Chota Nagpore Divn.	43	Singbhoom Aug. 30, '90	0·28	Rain still holding off in Chybassa and its neighbourhood; in other parts sufficient rain said to have fallen. Excepting in Chybassa thana, where the *bera* paddy crop is said to have suffered from 2 to 4 annas in extent, all crops are reported to be doing well. Indian-corn and *gora* paddy are yielding fully.
Chota Nagpore Divn.	44	Manbhoom ,, 30, '90 Govindpore ...	0·47 2·37	Weather—seasonable. Prospects of winter crops good. *Bhadoi* crop not favourable; outturn much below the average. No report about indigo outturn yet received. Common rice selling at from 17 to 22 seers per rupee.

Published for general information.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ☁ dew.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the l

* The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numb

are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the p

stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 29th of August 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	On week. Mean for district.	On week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1890. Mean for district.	Since 15th May 1890. Normal mean.	Since 15th May 1890. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Divisions.

Explanation.—.....indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of t
are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 2nd September* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 29TH OF AUGUST 1890.

WEATHER conditions have been very similar to those of the previous week: pressure slightly above the normal and subject to small oscillations, temperature uniformly below in the northern and normal on an average in the southern districts, while the rainfall distribution is identical, scattered in Orissa, South-West Bengal, and parts of Chutia Nagpur and East Bengal, and considerably above the normal in North Bengal and Behar. These conditions have been very constant from day to day, and with the exception of a brisk rise of pressure in the middle of the week in the northern districts while the barometer remained steady in the north-west of the Bay, pressure changes have had little or no influence in altering the general distribution. Lowest pressure has generally been over the north-west of the province, and gradients running east and west, accompanied by the normal circulation of winds, south-west in Orissa and Chutia Nagpur, south-east in East Bengal, and easterly elsewhere. At times westerly winds blew in South Behar, but directions in that district have been irregular and velocity at times very low. On the 26th, when pressure rose between a twentieth and a tenth of an inch in all districts except Orissa, where the rise was only about a hundredth of an inch, a depression formed in the north-west corner of the Bay and adjacent land, but it disappeared by the following day, leaving very uniform pressure over the greater part of the province, gradients being somewhat steeper than usual in the east. After the 26th pressure fell slowly, and the distribution at the end of the week was exactly similar to that at the beginning, but wind circulation was much lighter in North Bengal and Behar, and rainfall not so heavy or general.

Pressure—On the 23rd, the first day of the week, was rising slowly in Orissa and South-West Bengal, and falling slowly in the other districts; on the 24th it remained steady and again fell slowly on the 25th, when the distribution was practically normal, but slightly above, the largest excess being less than a twentieth of an inch in Orissa. On the 26th the most important change of the week occurred, after which excess varied from a twentieth of an inch in Orissa to a tenth in North Bengal. During the latter half of the week there was a steady slow fall in all districts except in Behar and Chutia Nagpur, where a brisk rise occurred on the 29th. The distribution at the close of the week was again nearly normal, there being a slight defect in North Bengal, and a small excess elsewhere, largest in the western districts, but nowhere over a twentieth of an inch. Average pressure for the week is about a twentieth of an inch above the normal in Orissa, and elsewhere about three-hundredths.

Temperature—At the beginning of the week was falling in all districts, and the daily means were below the normal by variable amounts ranging up to nearly 5° in Orissa and South Behar. The defect occurred to a greater extent during the day than at night, and the difference from the average maximum temperature for the season was over 6° at False Point and Arrah, while defect in night temperature was only 2·5° and 2·3° respectively. From the 24th to the 28th temperature rose steadily, and by the latter date defect had almost disappeared. On the 29th a general fall again took place, giving defect at nearly all stations; but on this occasion while a large defect occurred in the day temperatures in North Bengal and North Behar, these were nearly normal in South Behar, and minimum temperature was from 3° to 5° below the normal. The means for the week are all below the normal except that for South-West Bengal, where however excess is only a tenth of a degree. Defect in Assam is 2·4°, North Behar 1·4°, South Behar 1·3°, Chutia Nagpur ·9°, Orissa ·8°, East Bengal ·7°, and North Bengal 2°.

Rainfall—As stated above, has been scattered in South-West and East Bengal and Chutia Nagpur, but heavy and general elsewhere, especially during the first two and last two days of the week. Falls in Orissa have been variable: under 1 inch in Balasore, over 2 in Pooree, and over 3 inches at Cuttack and Kendrapara. In parts of Midnapore, Jessore, and Moorshedabad falls are over 2 inches, but elsewhere in South-West Bengal they are generally between 1 and 2 inches. In East Bengal heavy rain fell on the 23rd in Chittagong, Backergunge, and Noakholly, and on the 29th in Furreedpore, Dacca, Tipperah, and Mymensingh, but the total falls for the week are very variable, ranging from half an inch to 6 inches. In Julpigoree, Cooch Behar, and Darjeeling hills general heavy rain has fallen, the heaviest falls being Alipur Dooar 20·3 inches, Mickilgungo and Buxa over 18 inches. In the other districts of North Bengal falls vary from 1 inch to 10 inches. In Behar the distribution is more uniform, at about 4 inches, but sometimes as high as 10 inches. The means for the larger divisions are above the normal in East and North Bengal and Behar and below elsewhere. Excess in North Behar is 3·26, in South Behar 2·12, North Bengal 2·05 inches, and the largest defect is 1·11 inches in South-West Bengal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 29th of August 1890 :—

Meteorological Office, India; *The 1st September* 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 16th August 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 16th August 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 18·7 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·7 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years, except 1887 —*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	20·7	22·7	17·9	20·1	21·8	22·4	18·7

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 26th July 1890.	2nd August 1890.	9th August 1890.	16th August 1890.	Towns.	Weeks ending— 26th July 1890.	2nd August 1890.	9th August 1890.	16th August 1890.
Burdwan	12·2	13·7	13·7	15·3	Naraiuganj	29·0	24·8	16·6	33·1
Midnapore	7·7	15·5	13·9	12·4	Chittagong	14·1	4·7	4·7	16·4
Hughli and Chinsurah	23·0	14·8	16·4	6·6	Comillah	15·4	15·4	11·5	11·6
Serampore	23·6	27·5	23·6	23·6	Patna City	12·7	14·9	13·3	13·6
Uttarpara	18·9	18·9	18·9	9·4	Gya	33·5	17·8	21·9	28·7
Howrah	15·5	17·8	14·3	18·3	Arrah	19·1	13·2	20·3	26·3
Bali	14·0	10·5	7·0	7·0	Mozufferpore	13·4	14·6	17·0	18·2
Krishnagar	11·4	5·7	11·4	13·3	Durbhanga	27·5	19·7	29·9	18·1
Ranaghat	12·0	6·0	24·0	6·0	Chupra	11·1	6·0	2·0	12·1
Santipore	10·5	14·0	17·5	14·0	Bhagulpore	18·1	18·1	23·6	25·3
Jessore	6·1	18·4	6·1	.....	Monghyr	41·6	23·5	38·9	40·7
Rampore Beauleah	18·4	31·5	15·8	36·8	Purneah	20·8	10·4	13·9	6·9
Darjiling	22·2	7·4	37·0	22·2	Poori	18·9	6·3	12·6	6·3
Dacca	9·7	11·0	14·9	17·5	Total ...	18·2	15·3	17·4	18·7

It will be seen that last week the highest birth-rate was returned from Monghyr (40·7), and the lowest from Ranaghat (6·). No births were registered during the week in Jessore town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 22·8 per 1,000 of the population. The rate of the week is 8·7 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	51·0	28·4	27·7	26·1	24·5	31·5	22·8

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 26th July 1890.	2nd August 1890.	9th August 1890.	16th August 1890.	Towns.	Weeks ending— 26th July 1890.	2nd August 1890.	9th August 1890.	16th August 1890.
Burdwan	27·5	19·8	13·7	10·7	Naraingani	16·6	16·6	12·4	16·6
Midnapore	17·0	7·7	15·5	17·0	Chittagong	18·3	11·7	9·4	21·1
Hughli and Chinsurah	24·6	26·3	18·1	31·2	Comillah	38·5	26·9	7·7	23·1
Serampore	39·3	51·0	51·0	33·4	Patna City	18·8	13·0	20·1	15·3
Uttarpara	47·2	37·7	9·4	37·7	Gya	37·6	44·4	56·7	56·7
Howrah	13·7	10·9	20·0	19·3	Arrah	29·5	6·4	20·3	13·2
Bali	21·1	14·0	10·5	24·6	Mozufferpore	32·8	15·8	23·1	20·7
Krishnagar	11·4	5·7	11·4	11·4	Durbhanga	25·2	15·5	34·3	27·5
Ranaghat	12·0	24·0	24·0	12·0	Chupra	18·1	11·1	3·0	15·1
Santipore	15·8	17·5	19·3	14·0	Bhagulpore	22·6	14·5	12·7	24·4
Jessore	12·3	12·3	12·3	18·4	Monghyr	25·3	15·4	28·9	21·7
Rampore Beauleah	23·6	15·8	21·0	26·3	Purneah	10·4	13·9	24·3	13·9
Darjiling	22·2	88·9	66·7	66·7	Poori	25·7	33·6	23·1	25·2
Dacca	15·6	27·2	25·3	20·1	Total ...	23·1	19·3	23·3	23·8

It will be seen that last week the highest mortality occurred in the town of Darjiling (66·7), and the lowest in Burdwan (10·7).

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Gya	15·0	Darjiling	37·0	Midnapore	12·4	Gya	13·7
Durbhanga	13·4	Rampore Beauleah	23·6	Hughli and Chinsurah	11·5	Bhagulpore	10·9
Santipore	7·0	Gya	21·2				
Mozufferpore	6·1						
Chupra	5·0						
Patna City	2·9						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·5 from cholera, against 3·6 per 1,000 in the preceding week; 9·4 from fever, against 9·6; 3·9 from bowel-complaints, against 3·5; 5·4 from other causes, against 6·1 in the preceding week. Small-pox and injury exhibit the same ratios as in the preceding week, viz. ·1 and ·4 respectively.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	25·4	Christians	7·5	Under 1 year	163·9
Females	20·0	Hindus	24·0	1 and under 5 years	43·6
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population	127	Mahomedans	20·1	5 „ 10 „	17·9
				10 „ 15 „	10·3
				15 „ 20 „	16·1
				20 „ 30 „	13·5
				30 „ 40 „	14·5
				40 „ 50 „	12·5
				50 „ 60 „	16·8
				60 years and upwards	52·2

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 1st September 1890. *Sanitary Commissioner for Bengal.*

RULES UNDER ACTS I (B.C.) OF 1889 AND I OF 1882.

GENERAL DEPARTMENT.

Calcutta, the 9th September, 1890.

RESOLUTION.

READ—

The Resolution dated the 17th April, 1890, publishing for public criticism draft rules as to emigration to the tea districts of Assam under Act I (B.C.) of 1889 and Act I of 1882.

Read also the following letters commenting on the draft rules:—

Letter from the Superintendent of Emigration, No. 1083, dated the 17th May, 1890.

Letter from the Superintendent of Emigration, No. 1119, dated the 27th May, 1890, covering a communication from the Indian Tea Association.

Letter from the Consulting Engineer to the Government of India for Guaranteed Railways, No. 945, dated the 22nd May, 1890.

Letter from the Superintendent and Remembrancer of Legal Affairs, No. 466, dated the 14th July, 1890.

Letter from the Superintendent of Emigration, No. 1573, dated the 19th August 1890.

Draft rules for the further guidance of those conducting emigration to Assam either under Act I of 1882 or Bengal Act I of 1889 were published for public criticism in the *Calcutta Gazette* of the 14th May last. The suggestions received in reply having been considered, and adopted in nearly every

instance, the following rules are now approved by the Lieutenant-Governor with effect from the 1st October next:—

Rules issued in addition to the existing rules under Act I (B.C.) of 1889.

18. The daily despatch of emigrants by train shall be previously arranged for by the forwarding agent with the Railway authorities concerned, so as to prevent overcrowding by the securing of sufficient carriage accommodation for the whole number of emigrants intending to travel.

19. The agent shall provide for emigrants started on a railway journey after 9 A.M. a cooked meal, and for those started at or before that hour, if a cooked meal cannot be provided, a dry meal instead, consisting of bread or biscuit and sugar in the proportion of one pound of bread or two large biscuits and one ounce of sugar to each emigrant of and above ten years of age, and half the above quantities to each emigrant under the age of ten years. Also, if the journey between two halting stations is likely to occupy more than six hours, bread or biscuit and sugar in the same proportions shall be given by the agent for distribution to the emigrants for consumption during the journey.

20. When a medical officer has been appointed by Government to examine emigrants, no emigrants shall be put into the train without being inspected and passed as fit to undertake the journey by such officer. The medical officer will report any breach of Rule 19 which may come to his notice.

21. When despatching emigrants by train, the purest drinking water obtainable shall be supplied by the agent in a sufficient number of suitable vessels conveniently placed with the emigrants in the carriages. Emigrants shall be afforded during the journey opportunities for leaving their carriages at three selected watering-stations between Sara and Parbutipur, one-third of the carriages at a time being emptied to admit of the station latrines being used and of additional supplies of drinking-water being obtained.

22. Emigrants about to travel by train shall be accommodated in third class carriages specially reserved for them, or in suitably constructed goods waggons, and the number in each carriage or goods waggon shall in no case exceed the regulation number. When a goods train is used for carrying emigrants, the speed shall not be less than 15 miles an hour on the broad gauge and 12 miles an hour on the metre gauge, exclusive of halts for the convenience of emigrants, but not of other halts.

23. The train journey of emigrants under conveyance from recruiting districts direct to Dhubri or to Goalundo shall be performed by the Hooghly-Naihati route.

24. If cholera occurs on the journey by train, the patient shall as soon as possible be removed by the Railway authorities to the nearest cholera hospital on the line or other suitable place for medical treatment; and particulars of the case, furnishing name of emigrant, batch to which belonging, and depôt from which originally despatched, shall be forwarded by the station-master to the officers concerned. The expense incurred in removal to a suitable place for medical treatment shall be debited to the Inland Labour Transport Fund, and subsequently recovered from the forwarding agent or employer interested in the patient.

5A. It shall be the duty of the Superintendent of Inland Emigration to inspect places of accommodation provided for emigrants in Calcutta.

25. The provision of Rule 16 of the rules previously issued shall extend to the present rules.

Rules to be substituted for the existing Rules 64, 65, *and* 69 *under the Inland Emigration Act, I of* 1882.

64. The daily despatch of emigrants shall be previously arranged for by the contractor or forwarding agent with the Railway authorities concerned, so as to prevent overcrowding by the securing of sufficient carriage accommodation for the whole number of emigrants intending to travel.

65. The contractor or garden sardar shall provide for emigrants started on a railway journey after 9 A.M. a cooked meal; and for those started at or before that hour, if a cooked meal cannot be provided, a dry meal instead, consisting of bread or biscuit and sugar in the proportion of one pound of bread or two large biscuits and one ounce of sugar to each emigrant of and above ten years of age, and half the above quantities to each emigrant under the age of ten years. Also, if the journey between two halting stations is likely to occupy more than six hours, bread or biscuit and sugar in the same proportions shall be given by the contractor or garden sardar for distribution to the emigrants for consumption during the journey.

69. When a medical officer has been appointed by Government to examine emigrants, no emigrants shall be put into the train without being inspected and passed as fit to undertake the journey by such officer.

69A. When despatching emigrants by train, the purest drinking-water obtainable shall be supplied by contractors or forwarding agents in a sufficient number of suitable vessels conveniently placed with the emigrants in the carriages. In the absence of latrine arrangements, emigrants shall be afforded opportunities for leaving their carriages at three selected watering-stations between Sara and Parbutipur, one-third of the carriages at a time being emptied to admit of the station latrines being used and of additional supplies of drinking water being obtained.

Rules issued in addition to the existing rules under Act I of 1882.

69B. Emigrants about to travel by train shall be accommodated in third class carriages especially reserved for them, or in suitably constructed goods waggons attached to passenger trains only, and the number in each carriage or goods waggon shall in no case exceed the regulation number. When a goods train is used for carrying emigrants, the speed shall not be less than 15 miles an hour on the broad gauge and 12 miles an hour on the metre gauge, exclusive of halts for the convenience of emigrants, but not of other halts.

69C. The train journey of emigrants under conveyance from recruiting districts direct to Dhubri or to Goalundo shall be performed by the Hooghly-Naihati route.

170A. Whoever commits a breach of any of the following rules under the Act shall be punishable with fine which may extend to Rs. 500:—Rules 19, 37, 49 to 52, 62 to 69, 71, 72, 79, 113, 118 to 120, 165, and 166.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

THE following report is published for general information.

H. J. S. COTTON,

Secretary to the Government of Bengal.

REPORT ON THE WORKING OF THE FIRE BRIGADE IN THE TOWN AND SUBURBS OF CALCUTTA AND IN HOWRAH DURING THE YEAR 1889-90.

No. 4895, dated Calcutta, the 14th August 1890.

From—J. LAMBERT, ESQ., C.I.E., Commissioner of Police, Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, under section 30 of Act IV (B.C.) of 1883, the following report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah, for the year 1889-90.

2. The Brigade was in attendance at 36 fires during the year, 11 in the Town, 18 in the Suburbs and 7 in Howrah, as compared with 38 fires in the preceding year. The value of the property destroyed was Rs. 4,59,800, against Rs. 13,06,255.

3. Of the several fires which occurred during the year under review, the following call for special notice:—

In the town two destructive fires occurred in the Jorabagan section, in one of which property to the value of Rs. 93,000 was burnt, and in the other several tiled huts and a large godown, containing oil, tobacco and tar, valued in all at Rs. 15,000, were destroyed, and a man who was sleeping in one of the huts was burnt to death. In the port of Calcutta four boats laden with straw and one laden with jute, valued at Rs. 10,340, were destroyed.

In the Suburbs, on the 16th May 1889, a large quantity of hay and straw and 14 tiled huts at Narcoldanga, valued at Rs. 40,000, were burnt, and on the 10th March 1890 the press-house of the Bengal Hydraulic Jute Company in Chitpore, containing 9,000 bales of jute, was destroyed. The value of the property so destroyed was estimated at Rs. 2,70,000.

In Howrah the fires were confined to thatched and tiled huts.

4. A memorandum of the fires, and also a statement of the receipts and expenditure of the Brigade, are enclosed.

5. During the year under reference, 28 persons were prosecuted in the town of Calcutta under the Indian Explosives' Act IV of 1884, for the manufacture, possession and sale of fireworks, and of these 26 were convicted and 2 acquitted.

6. No license for the sale of fireworks was withdrawn during the year.

Memorandum of Fires in the Town and Suburbs of Calcutta and in Howrah from 1st April 1889 to 31st March 1890.

Number.	Date.	Locality with section letter.	Duration of fire.	Approximate value of property destroyed.	Remarks, showing nature of damage done, &c.

J. LAMBERT,
Commissioner of Police.

CREATION OF A FREE STUDENTSHIP IN THE SANSKRIT COLLEGE.

GENERAL DEPARTMENT—EDUCATION.
Calcutta, the 6th September, 1890.

RESOLUTION.

READ—

A letter from the Director of Public Instruction, No 4808, dated the 29th August, 1890 regarding the offer of Sreemati Sati Devi of Chandannagar to create a free studentship in the Sanskrit College.

The Director of Public Instruction reports that Sreemati Sati Devi of Chandannagar has offered through the Principal of the Sanskrit College to make over 4 per cent Government securities of the nominal value of Rs. 600 for the creation of a free studentship in the First Arts class of that College for the benefit of a son of a Bhattacharyya Brahmin, on condition that the fee payable by such free student be fixed at Rs. 2 a month, and that the free student be called "Sati Devi's scholar." The Lieutenant-Governor is pleased to accept this offer, and tenders the thanks of Government to the donor for her liberality. The Principal of the Sanskrit College will be the administrator of the fund.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Director of Public Instruction for information and communication to the donor.

Ordered also, that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE MARINE DEPARTMENT FOR 1889-90.

No. 2370Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

RESOLUTION.

Dated Calcutta, the 4th September 1890.

READ—

The Annual Report of the Port Officer of Calcutta for the year 1889-90.

Lieutenant E. W. Petley, R.N., was in charge of the Port Office throughout the year, and the report is submitted by him.

2. The building for the Port and Shipping Offices was not completed during the past year, as was expected at the time when the Annual Report of the Marine Department for 1888-89 was reviewed. It is now nearly finished.

3. The strength of the Pilot Service at the end of the year was 60 pilots of all grades and 17 leadsmen apprentices. The number of pilots now accords with the scale which was sanctioned in the orders dated the 4th July 1888. No leadsmen apprentices were appointed during the year.

4. The leadsmen apprentices still occupy the two houses at Garden Reach rented by Government for their accommodation, and the premises are reported to be admirably suited for the purpose. These quarters were, as in the year before, under the management of a Mess Committee, and the Port Officer, who inspected them frequently during the year, found them to be in excellent order.

5. The following statement shows the number of arrivals and departures during the past two years:—

	1888-89.			1889-90.		
	Number.	Gross tonnage.	Net tonnage.	Number.	Gross tonnage.	Net tonnage.
Arrivals ...	1,037	2,245,857	1,615,935	1,038	2,250,948	1,604,153
Departures ...	1,034	2,240 444	1,608,656	1,018	2,202,819	1,570,776
Total ...	2,071	4,486 301	3,224,591	2,056	4,453,767	3,174,929

6. These figures are exclusive of 13 light-vessels, 13 pilot brigs, and 34 other Government vessels; 2 vessels put back, 7 steam-tugs, which are constantly moving up and down the river, and the steamers trading to the Orissa ports. Of these there were 133 arrivals and 134 departures. They do not also include the native craft.

7. The size and draft of steamers visiting the port still continue to increase. One hundred and forty-three steamers, drawing over 21 feet, entered the port during the year under review, against 120 in the year before.

8. The average number of vessels piloted by the several grades of the Pilot Service, with the exception of the Junior Masters, was in excess of that of the preceding year. The number, however, that fell to the share of Junior Masters came down from 3·26 a month in 1888-89 to 3·13 during the year under review. It is very difficult to reconcile all the interests involved in the division of tonnage amongst the several grades of pilots, but on the whole the arrangement which was sanctioned in the orders of the 4th July 1888 has worked well so far.

9. Thirty-nine cases of grounding and five of collision took place during the year, against 50 and 12 in the year before. None of these casualties, however, resulted in the loss of a vessel, and in one only was serious damage done. The collisions were all accidental, but as regards the groundings blame was attached to the pilots in ten cases. Eight of these were due to error of judgment, one to inattention, and one to unskilfulness. The remaining cases of grounding were either accidental or unimportant, or due to alteration of channel.

The percentage of casualties amounted to 2·14, against 2·99 in the year before and 2·84 in 1887-88. The reduction of the percentage is satisfactory.

10. The Eastern Channel and the lower part of the Gasper have remained unaltered, but the channel between the Longsand and the Upper Gasper light-vessels deteriorated considerably. The channel between the Longsand light-vessel and the Longsand spit buoy has also shoaled somewhat, and there is no anchorage for deep vessels anywhere between the Lower Eastern Gasper and the Longsand spit buoys. The Eden Channel has improved, and has 17 feet of water in the best track over the bar. It is stated that seven inward-bound vessels and two outward-bound were delayed for want of sufficient water over the bars. This does not, however, take account of vessels being kept in the port for want of water over the bars during certain stages of the tides. Were these cases included, the number of outward-bound vessels delayed would be higher.

11. The new steamer *Guide*, which was built in England to take the place of the *Undaunted*, arrived towards the close of the year, and was, after being surveyed, taken over from the builders and fitted out for duty. The vessel is well fitted in every way for the service on which she is employed. She has, since the close of the year, been taken over by the Government of India in the Marine Department. The new pilot brig *Fume* arrived at the beginning of the year. Considerable expenditure had to be incurred on alterations and in rectifying defects to make her fit for the work of a pilot brig. The *Sarsuti* was thoroughly overhauled, cleaned and painted during the year, and is reported to be in good condition. The hull, rig and equipment of the *Coleroon* were thoroughly repaired to render her efficient with the usual ordinary repairs for some years to come. The new launch for the Port Officer has been completed since the close of the year.

12. One hundred and twenty-four candidates were examined for colonial and local certificates of competency of various grades, of whom 88 passed. Of the successful candidates, 19 obtained colonial certificates of competency as master, 24 as first mate, 3 as only mate, 17 as second mate, 3 as first class engineer, and 6 as second class engineer. The local certificates consisted of 1 master's, 1 first mate's, 2 second mate's, 4 second class engineer's, and 44 engine-driver's. One candidate obtained a license as a steam-tug pilot, and three certificates as master were granted under Act VI of 1884. The licenses of two of the native pilots were renewed, 14 new permits were granted to native coasters and 6 were renewed. Five vessels were registered under the English Merchant Shipping Act of 1884, and the registry of three was cancelled.

13. The Government of India having asked for a separate report on the working of the Native Passenger Ships Act, 1887, the number of certificates issued during the year is not given in the report under review.

14. Lieutenant Petley's management of the department during the year was entirely satisfactory.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 6th September, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
BURDWAN DIVN. 1	Burdwan Sept. 6, '90	4·74	Weather—hot and clear. Prospects of crops good. Rain wanted in certain parts of the district. Prices of common rice:— Srs. Burdwan ... ... 16; Culna ... ... 14; Cutwa ... ... 15 1/16; Ranigunge ... ... 16 — per rupee.
	Culna ...	6·31	
	Cutwa ...	1·19	
	Ranigunge ...	0·33	
2	Bankoora „ 6, '90	1·00	Weather—fine and warm. More rain wanted. *Aus* ripening. *Amun* on high land suffering for want of moisture. Sugarcane doing well. Common rice selling at 19 seers per rupee at Sudder and 18 seers at Bishenpore.
3	Birbhum „ 6, '90	0·28	A decided break in the rains, which is very good for weeding operations. Prospects of crops continue to be excellent. Prices of rice range from 16 to 19 seers per rupee.
	Rampore Haut ...	0·73	
4	Midnapur „ 6, '90	2·75	Weather—sultry. Rain general except in the Contai subdivision, which reports none up to 4th instant. More rain wanted for rice crop. Prices of common rice:— Srs. Ch. Sudder ... ... 16 0; Contai ... ... 16 0; Tumlook ... ... 14 3; Ghatal ... ... 16 0 — per rupee.
5	Hooghly „ 6, '90	2·08	Temperature has increased considerably. Weather generally fair with occasional heavy showers. State and prospects of crops satisfactory. Prices of common rice:— Srs. Sudder ... ... 13 & 14; Serampore ... ... 16; Jehanabad ... ... 16 — per rupee.
	Serampore ...	4·33	
	Jehanabad ...	0·04	
	Howrah „ 6, '90	0·45	Weather—fair except for a few showers. More rain wanted for *amun* crop. Harvesting of *aus* crop begun. Prospects of crops still continue satisfactory. Price of common rice 13 to 14 seers per rupee.
	Uluberiah ...	1·21	
	Central Districts.		
PRESIDENCY DIVN. 6	24-Pergha. Sept. 9, '90	1·21	Weather—hot and clear. Prospects of all standing crops continue good except those in the northern parts of the Bussirhat subdivision, which are said to have been affected by the floods. Transplantation of *amun* nearly finished. Harvesting of *aus* and jute going on. Prices stationary.
7	Nuddea „ 6, '90	2·61	Weather—sunny and hot. Harvesting of *aus* still going on. Flood has slightly gone down. Price of common rice 13 seers per rupee.
	Kushtea ...	4·28	
	Meherpore ...	1·52	
	Chuadanga ...	0·73	
	Ranaghat ...	4·17	
8	Khoolna „ 6, '90	0·17	Weather—very hot at head-quarters, rainy in Satkhira. Floods in the northern part of the district, and crops on low lands submerged and destroyed. *Aus* is being harvested; outturn will be about 10 annas. Transplantation of *amun* going on. Prices of food-grains rising.
	Bagirhat ...	1·08	
	Satkhira ...	4·79	
9	Jessore „ 6, '90	0·16	Weather—hot with occasional light showers. Flood reported to be falling in Magura and Jhenidah; rising in Bongong. Narail report not received. Ten annas of *aus* crop and a large portion of jute crop said to have been destroyed in Bongong and Jhenidah. Fodder very scarce in Bongong.
	Jhenidah ...	3·86	
	Magura ...	1·04	
	Bongong ...	1·90	
10	Moorshedabad „ 6, '90	1·33	Weather—hot. River falling gradually. *Aus* is still being harvested. Transplantation of *amun* going on. Distress in affected areas being relieved.
RAJSHAHYE DIVN. 11	Dinagepur „ 6, '90	1·14	Weather—warmer. Prospects of crops continue to be favourable. Price of rice unchanged.
	Thakurgaon ...	2·74	
12	Rajshahye „ 6, '90	2·82	Weather—hot and cloudy with rain at intervals. In thanas Tanore, Charghat, Baraigram, Lalpur, and Panchupore *aus* about 2 to 3 annas, jute and a little *amun* paddy submerged. In the remaining thanas no damage done. Prospects of winter paddy and sugarcane are as yet good. Flood receding.
	Nattore ...	1·00	
	Nowgong ...	1·82	
13	Rungpur „ 6, '90	2·77	Weather—cloudy with frequent heavy showers. A good deal of damage reported from the Brahmaputra churs owing to a sudden rise of that river. Otherwise prospects are excellent all round.
	Nilphamari ...	5·37	
	Kurigram ...	3·46	
	Gaibanda ...	4·29	
14	Bogra „ 6, '90	5·75	Weather—cloudy; south-east wind. *Aus* and jute are still being reaped. Transplantation of *amun* still going on. Prospects of crops good. Common rice selling at 18 seers per rupee.
	Sherpur ...	7·67	
	Nowabgunge ...	6·14	
15	Pubna „ 6, '90	0·55	Weather—hot and cloudy. Jute is being cut. Outturn of *aus* expected to be 12 annas. Prospects of *amun* continue good except on low lands. Prices stationary.
16	Darjeeling „ 6, '90	4·69	Weather—rainy with occasional breaks. Constant showers of rain are doing much good to the winter rice at Terai. *Bhutta, chota marua*, and potatoes are being harvested. *Bhaddi* and *bara marua* progressing well.
17	Julpigoree „ 6, '90	6·70	Weather—rainy and cloudy. Transplantation of *haimanti* paddy not yet finished. Harvesting of jute and *aus* paddy going on. Price of rice unchanged.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
DACCA DIVN. 18	Dacca Sept. 6, '90	1·06	Weather—seasonably warm and mostly cloudy. *Aus* paddy and jute being harvested. Some damage done to these crops owing to high flood. *Amun* paddy thriving. Fodder available, but not in abundance. Common rice sells at from 13 to 15 seers per rupee.
19	Furreedpur „ 6, '90	0·03	Weather—hot and close. The river has risen more than a foot and-a-half above the last year's highest flood-level. Only about 8 annas of the *aus* crop could be reaped, and the *amun* has been damaged to the extent of about 2 annas. If the flood continues to be at its present level for some time more, the damage will be considerable. Price of rice stationary.
20	Backergunge „ 6, '90	0·84	Weather—hot. Outturn of *aus* crop estimated at 12 annas. *Amun* seedlings in many places damaged by high water, and transplantation not yet finished. Common rice selling at about 13 seers per rupee.
21	Mymensingh „ 6, '90	2·94	Weather—cloudy and hot with occasional rainfall. Harvesting of *aus* and jute still continues. Transplantation of *amun* not yet over. Standing crops promising and favourable. Common rice sells at 13½ seers per rupee.
CHITTAGONG DIVN. 22	Chittagong „ 6, '90	7·28	Weather—seasonable. About eight annas of *aus* cut. *Amun* transplanted to about ten annas of land by this time. Prospects favourable. Prices steady.
23	Noakholly ...	.....	Report not received.
24	Tipperah „ 6, '90	1·18	Weather—cool and wet at beginning of week, hot and dry at its close. Jute and *aus* rice being cut. River water unusually high. Price of rice has risen about 3 annas a maund in Chandpore.
25	Chittagong Hill Tracts. ...	.....	Report not received.
	Hill Tipperah „ 5, '90	1·01	Weather—hot and sultry. Transplanting of *amun* finished. Prospects of crops generally fair. Prices almost stationary.
BEHAR.			
PATNA DIVN. 26	Patna „ 6, '90	Nil	Weather—very hot. Transplantation of paddy nearly finished. *Bhadoi* crops are being harvested; outturn reported to be poor. Sugarcane doing well. Prices of food-grains generally stationary.
	Barh ...	0·30	
	Behar ...	1·61	
	Dinapore ...	0·95	
27	Gya „ 6, '90	Nil	Weather—clear. *Bhadoi* crops are being harvested. Paddy and sugarcane doing well. Prices of food-grains almost stationary.
28	Shahabad „ 6, '90	0·02	Weather—hot. *Bhadoi* is being harvested in Sasseram and Bhabuah with an outturn of about four annas. Paddy prospects good. Prices stationary.
	Buxar ...	1·20	
	Bhabuah ...	0·65	
	Sasseram ...	Nil	
29	Durbhunga „ 6, '90	0·18	Weather—hot and close. Harvesting of *marua* and *makai* in progress; outturn expected to be from 8 to 12 annas on an average. Bagmati has again risen, and crops on low-lying lands submerged. Rice crop elsewhere doing well. Prices rising.
	Somastipur ...	1·74	
30	Muzufferpur „ 6, '90	Nil	The week has been dry, and no sign of rain at the time of report. Bagmati has risen and flooded a large area of country. Extent of damage cannot at present be ascertained. *Makai* is being being gathered. Prices stationary.
31	Sarun „ 6, '90	Nil	Weather—fine and clear. In Sewan and Gopalgunge the *bhadoi* will be a 3-anna crop and the rice a 12-anna crop; elsewhere *nil*. Prospects of indigo khuntis very bad.
32	Chumparun „ 6, '90	Nil	Weather—fine and hot: the season is apparently changing. *Makai* ripening. *Bhadoi* rice and *kodo* being reaped. Winter rice coming on well. Prices almost stationary.
BHAGULPORE DIVN. 33	Monghyr „ 6, '90	0·02	Weather—hot and bright. Prospects of winter rice continue favourable. Harvesting of *bhadoi* finished. Average outturn about 5 annas.
	Begusarai ...	2·25	
	Jamui ...	1·23	
34	Bhagulpore „ 6, '90	Nil	Weather—clear. No rain except slight falls in northern parts and Banka. *Bhadoi* is being harvested; estimated outturn 12 annas. Prospects of winter rice generally good.
	Banka ..	0·51	
	Mudhepura ...	0·8	
	Soopool ...	1·9	
35	Purneah „ 6, '90	0·54	Weather—fine with passing showers. A break in the rains has favoured the *bhadoi* harvest. Over three-fourths of the early rice has been cut with an outturn of 14 annas. Winter rice promising well except in a few villages in the Arrareah subdivision and in the Bahadurgunge and Balrampur thanas. Damage by floods less than expected. Outturn of jute crop 14 annas.
	Kishengunge ...	6·37	
	Arrareah ...	2·36	
36	Maldah „ 6, '90	0·64	Weather—very hot. Harvesting of *bhadoi* paddy over. Jute is being cut; a 12-anna crop expected. Winter rice plants thriving. *Kalai* is being sown in certain places within the jurisdiction of Manickchak outpost. Prices of common rice continue to be from 12 to 17 seers per rupee.
	Chanchal ...	1·35	
	Shibgunge ...	0·16	
	Gajole ...	2·41	
37	Santhal Pergha. „ 6, '90	0·12	Weather—generally fine. Paddy benefited by the recent break, but more rain wanted in Deoghur. *Makai* has turned out a poor crop.
	Deoghur ...	0·7	
	Godda ...	0·13	
	Jamtara ...	2·42	
	Pakour ...	0·20	
	Rajmeha ...	0·57	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack Sept. 6, '90	1·36	Weather—hot. Harvesting of *satika* paddy going on. *Sarad* paddy crop suffering from want of rain in the Jajpur subdivision as well as in the Ershama and Kishennagar outposts of the Sudder subdivision. Prospects elsewhere good.
		Pooree „ 4, '90	3·45	Weather—seasonable. Weeding of *sarad* crop going on. *Beali* is being harvested. The subdivisional officer reports that diseases called *kahalla* and *haldi goondi* have appeared in the *sarad* crop. Price of common rice ranges from 18 seers 6 chittacks to 21 seers per rupee.
		Khoorda ...	0·32	
	39	Banpur ...	2·07	
	40	Balasore „ 6, '90	0·29	Weather—hot and dry. Fairly good rain has fallen at Bhuddruck, but most parts of the Sudder subdivision are suffering greatly from drought. Prices rising.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Sept. 6, '90	Nil	Weather—fine and bright and very warm. Rice crop doing well, but more rain is now wanted. *Gundli, marua, goradhan,* and Indian-corn are being harvested: all below average. Prices about stationary.
	42	Lohardugga „ 6, '90	Nil	Weather—hot and cloudy. Reaping of *gundli* going on. Prospect of *bhadoi* good. Rain wanted for winter rice. No material change in prices of food-grains.
		Palamow (up to 1st Sept.)	3·10	
	43	Singbhoom Sept. 6, '90	1·34	Much more rain wanted, but there seems to be but little hope of any at present. No further damage reported to the rice crop, but unless good rain falls within the next week, much damage will be done. Price of common rice shews a tendency to rise.
	44	Manbhoom „ 6, '90	0·27	Weather—very hot. Break in the rains doing great harm to winter rice crop. Rain urgently wanted. Common rice selling at from 16 to 22 seers per rupee.
		Govindpore ...	0·24

STATISTICAL DEPARTMENT,
The 8th September, 1890.

P. NOLAN,
Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of August 1890.

	Inches.	Date.	Hour.
The mean pressure of the month	29·627		
The average pressure of August from 24 years' registers ...	29·598		
The highest pressure in the month	29·752	26th	10
The lowest pressure in the month	29·463	10th	16
The range of pressure	0·289		
	Hours.		
The total number of hours of bright sunshine during the month	122·3		
The maximum possible number of hours of sunshine ...	398·4		
	°		
The mean temperature of the month	82·5		
The average temperature of August from 24 years' registers	83·1		
The highest temperature in the month	89 8	4th and 18th.	
The lowest temperature in the month	74·6	22nd.	
The range of temperature during the month	15·2		
The mean daily range of temperature	9·8		
The greatest range of temperature in one day	14·5	5th.	
	Per cent.		
The mean humidity of the month	87		
The average humidity of August from 24 years' registers ...	86		
	Inches.		
The mean vapour pressure of the month	0·964		
The average vapour pressure of August from 9 years' registers	1·002		
The mean cloud proportion of the month	7·41		
The average cloud proportion of August from 13 years' registers	8·09		
The total rainfall of the month	9·04		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	8 85		
The average fall of August from 48 years' registers ...	13·94		
The greatest fall in 24 hours	1·74	5th.	
	Days.		
The number of rainy days in the month	23		
The average number of rainy days in August from 24 years' registers	25		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	144·3		
The mean difference of sun and air temperatures	57·5		
The greatest sun temperature	155·7	4th.	
The greatest excess of sun over air temperature	67·9	13th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	75·7		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·3	17th.	
	Miles		
The mean movement of the wind per day	67·6		
The greatest movement of the wind in one day	142·0	28th.	
The greatest movement of the wind in one hour	15 0	28th noon to 1 P.M.	

The number of hours with winds from each of the 8 points—

N. 2, N.E. 9, E. 50, S.E. 134, S. 241, S.W. 134, W. 16, N.W. 1, Calm 157.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 8 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6 higher; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 8th September 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF AUGUST 1890.

THE chief peculiarities in the weather of the month of August have been—

(1). Pressure has been either normal or slightly above the normal, and though it has never differed much, there is a moderate excess in the means for the month.

(2). Temperature has been slightly below the normal in the southern and largely below in the northern districts, especially during the latter half of the month.

(3). Rainfall has been scattered in Lower Bengal throughout the month, and was very scanty in the northern districts during the first two weeks, but during the last two heavy and general rain fell, and in consequence the total falls in the northern half of the province are several inches above the normal.

(4). Stormy weather has never occurred, but several very unimportant depressions formed off the Orissa Coast and either filled up shortly afterwards or moved in a north-westerly direction. The only effect of these depressions in Bengal was slightly higher wind velocities for a day or two, and the scattered rainfall in the early part of the month when most of them occurred.

(5). Very light winds have been blowing except in the eastern districts, as is shown by a table given below of velocities at a few coast stations.

During the first half of the month, the trough of low pressure extended from the head of the Bay in the usual north-westerly direction, and the wind circulation was without interruption southerly or easterly in East and North Bengal and Behar, but in Orissa, South-West Bengal, and Chutia Nagpur wind directions were more variable because of the influence of the shallow depressions, three of which formed during the first two weeks. The monsoon current flowing over the province during this period was, therefore, entirely from the Bay, and as it passed without interruption into the North-Western Provinces, very little rain fell in Bengal. Conditions changed during the second half of the month. The trough of low pressure either moved close up to the hills, or the distribution over Bengal was very uniform, in both of which cases the moist current from the west of India was likely to force its way over the western districts and at times the whole of Bengal. In North Bengal and Behar frequent changes of winds from east to west occurred, and then rainfall was heavy and general. From the 17th to the 19th westerly winds were blowing as far east as Dinagepore, but on the 20th a shallow diffused depression over the head of the Bay and South-West Bengal gave the usual cyclonic circulation, which continued till the 22nd, after which westerly winds blew for several days, and again towards the end of the month. The heavy rain in Behar and North Bengal was probably due to the western current as that from the Bay was very weak, or perhaps to the interference of the two currents, an upward motion and greater condensation probably resulting

The depressions during the month have, as stated above, been unusually feeble and at times would have been hardly noticeable but for a faint cyclonic circulation. The first began on the 2nd, close to the coast of the Circars, where it remained deepening slightly, but almost without change of position till the 6th, when it moved in a north-westerly direction into Central India. On the 9th pressure was again lowest at the southern end of the trough off the Orissa Coast, and winds were irregularly cyclonic at a few neighbouring stations, but on the 10th a considerable deepening occurred in the Central Provinces, which caused strong easterly winds over the whole of Bengal with the exception of Orissa This shallow low pressure area moved to the north-west and filled up, after which pressure was again lowest over the western districts of Bengal, from which a similarly shallow depression moved to the west and filled up several days afterwards in the North-West Provinces. Up to this date, therefore lowest pressure was either over Orissa or the western districts, and hence steady southerly and easterly winds were blowing except near the depressions. During the latter half of the month two very shallow depressions formed at the head of the Bay, the first on the 19th and the second on the 26th. They both moved in a northern direction over Bengal where they filled up, leaving the pressure distribution very uniform, and caused the inrush of westerly winds which was followed by the heavy rainfall in the northern districts during these days.

In the following table are given the actual daily wind velocities for August, compared with the normal values for the same period at stations on and near the coast line from Akyab to Gopalpore. At all of these, except Dacca, the velocity is below the normal, the greatest differences being at Calcutta, Saugor Island, and Gopalpore. In August of last year the mean velocity at the various stations was very similar to that of the present year, and then rainfall was deficient in all districts except Orissa, but the trough of low pressure retained its position well to the west of the province, instead of closing up towards the hills about the middle of the month. This tends to show that if the western current had been prevented by the low pressure area from flowing over Bengal, rainfall would have been

again below the normal in the northern districts owing to the very weak monsoon at the head of the Bay.

Stations.	Actual average wind velocity for August 1890.	Normal wind velocity in August.	Variation of actual for August from the normal.
	Miles per day.	Miles per day.	
Akyab	72	120	— 48
Chittagong	134	144	— 10
Dacca	196	168	+ 28
Jessore	80?	120	— 40
Calcutta	68	168	—100
Saugor Island	359	456	— 97
Balasore	123	144	— 21
False Point	228	288	— 60
Pooree	260	288	— 28
Gopalpore	248	360	—112

Pressure—Was considerably above the normal during the first few days of the month, after which a steady fall continued till the end of the first week. The largest excess was on the 4th, when it varied from ·1 inch to ·15 inch in all districts except Chutia Nagpur, Orissa, and Assam. During the second week there was generally a small defect, and while the shallow depression existed, defect within it was only a little over a twentieth of an inch. Mean defect was about ·03 inch in South-West Bengal. Chutia Nagpur, and South Behar, while in the other districts it was rarely over ·1 inch. Changes continued to be very unimportant in the latter half of the month, but the distribution was steadily above the normal by amounts ranging up to a twentieth of an inch. As there was a slight defect during the second week only, the means for the month are everywhere above the normal by between two and three hundredths of an inch.

Temperature—Notwithstanding a partial break in the rains, which gradually extended over the province—has rarely been above the normal, and then these higher temperatures generally occurred in the south-west. For the first week means were practically normal in Orissa, South-West Bengal, and East Bengal, and below elsewhere by amounts between ·4° in Chutia Nagpur and 2·1° in North Behar. In the second week greater irregularity occurred, and excess was confined to the northern districts. After rainfall became more general, low temperatures were again recorded in Behar and North Bengal, and till the end of the month considerable defect prevailed. During the third week temperature was about 1° above the normal, but towards the end of the month lower temperatures were general, and means were normal, in South-West Bengal and about 1° below in the other districts except North Bengal, where the difference was slight and Assam where it exceeded 2°. The monthly mean for South-West Bengal is normal, and for the other districts below the normal, defect being under half a degree in Orissa and East Bengal and between 1° and 1·5° in Behar and Assam.

Rainfall—Has been deficient in Orissa, South-West Bengal, East Bengal, and Chutia Nagpur, and above the normal in Behar and North Bengal, defect in South-West Bengal being 4·1 inches, in Chutia Nagpur 3·42 inches, in Orissa 2·25 inches, and in East Bengal 1 83 inches; while excess in North Bengal is 4·36. inches, in North Behar 3·94 inches, and in South Behar 2·78 inches. These differences are from 20 to 30 per cent. of the normal except in East Bengal, where it is only 12 per cent. In these southern districts the total rainfall up to the end of August does not differ from the normal by more than 6 per cent., but in North Behar excess is 39 per cent., in South Behar 33 per cent., and in North Bengal 21 per cent.

The comparison of the actual rainfall in the various large divisions of the province with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the table below under the heading of August. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first eight divisions giving the actual average rainfalls in each division in each month expressed as a percentage of the normal, while the ninth column gives the total rainfall for the first eight months expressed as a percentage of the normal rainfall for that period—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	Actual rainfall of first eight months of 1890, expressed as a percentage of the normal fall for the period.
Orissa ...	24	5	216	20	99	124	97	80	96
South-West Bengal	96	Nil	89	75	87	141	102	69	94
East Bengal ...	184	4	70	122	102	89	120	88	99
North Bengal ...	98	Nil	36	155	81	132	129	132	121
North Behar ...	88	2	25	40	95	140	174	134	139
South Behar ...	Nil	5	68	80	96	188	136	125	133
Chutia Nagpur ...	Nil	Nil	120	1	65	132	116	75	97

Falls of more than 15 inches have been received in the south-east corner, including the Sunderbuns, Noakhally, and Chittagong; in parts of the north of Chutia Nagpur, chiefly in the Hazaribagh and Manbhoom districts; in Gya and Patna, in South Behar; in the greater

part of North Behar, the exceptions being parts of North Bhagulpore, Durbhunga, and Mozufferpore; and over the whole of the northern half of North Bengal. Falls under 10 inches are confined to the north of Orissa, the south of Chutia Nagpur, the greater part of South-West Bengal, and irregular portions of East Bengal. The heaviest falls in North Bengal are Buxa 51·48, Alipore Dooars 46·07, Cooch Behar 45·36, Matabhanga 43·35, Kurseong and Mickilgunge 37·64, Bhagatpore 37·06, and Julpigoree 31·07 inches. Falls over 20 inches have been received in North Behar at the following stations:—Kissengunge, Balarampore, Kaliagunge and Bagaha; in South Behar at Gya, Aurungabad, and Arwal; in East Bengal at Cox's Bazar, Chittagong, Noakhally, Fenny, and Durgapore. The following stations received less than 5 inches:—Kurdah in Orissa; Garbetta, Bankoora, Bishenpore, Khatra and Anda in South-West Bengal; Daudkandi and Kusba in East Bengal.

As compared with the normal, heavy falls have been received in the south of Orissa, the west of Chutia Nagpur and South Behar, the whole of North Behar and North Bengal; while defect of more than 4 inches is recorded in the east of Chutia Nagpur, the west of South-West Bengal, the Sunderbuns and part of Tipperah. Defect is over 8 inches at the following stations in South-West Bengal and Chutia Nagpur, Tumlook, Bankoora, Khatra and Raipore, and over 10 inches at Chyebassa, Ghattal, Garbetta and Bishenpore. Excess is over 8 inches at Hajipore and Maldah, over 10 inches at Raigunge, Kissengunge and Gya, over 15 inches at Mickilgunge and Aurungabad, and over 20 inches at Cooch Behar and Matabhanga.

The following table gives full data for the comparison of the actual and normal rainfall of the month of August in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past fifteen years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage; the fourth column states as a percentage how much the district rainfall of the month varied from the normal—

Percentage Table for August 1890.

Division.	District.	Normal district rainfall for August.	Actual district rainfall for August 1890.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

Explanations.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for [illegible]. The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The [illegible] are the numerical means or average of the rainfall in that district, determined from the returns sent in by the sub-divisional station for the period in question during [illegible] stations in the district reading in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

ıe week ending Friday, the 5th of September 1890.

Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of August. Mean for district.	Since 1st of August. Normal mean.	Since 1st of August. Variation.	Since 15th May 1890. Mean for district.	Since 15th May 1890. Normal mean.	Since 15th May 1890. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of th are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 9th September* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 5TH OF SEPTEMBER 1890.

WEATHER during the past week has been notable for (1) the westerly current which has been blowing steadily in all districts except East Bengal and at times North Bengal: (2) the break in the rains which, being caused by the dry westerly winds, commenced in the western districts in the beginning of the week and gradually spread over the greater part of the province: (3) the high temperature which has resulted from the clear skies and scanty rainfall over the greater part of Bengal.

At the commencement of the week pressure was low along the foot of the hills, and as the difference from the normal was about a tenth of an inch in North Bengal and Assam, westerly winds forced their way as far east as Dhubri. Rainfall was confined to the east and south of the province, where heavy showers continued to fall. Temperature was everywhere considerably below the normal, but a rise of between 1° and 3° was general in the west of Behar, and as rainfall ceased it rose at nearly all stations, defect almost disappearing by the 1st of September. Pressure oscillations were very small throughout the week, and the distribution, though tending to become more normal in North Bengal and North Behar, was not affected to such an extent as would cause a change in the wind circulation. The interference of the southerly winds from the Bay blowing over East and North Bengal with the westerly current from Behar caused the heavier rainfall in these eastern districts, and in part of North Bengal falls were general and heavy throughout the week, while in East Bengal moderately heavy showers fell at nearly all stations during the first half. In Orissa and South-West Bengal the showers were fairly general on the 30th and 31st of August and again on the 3rd of September, but on other days, as in Behar and Chutia Nagpur, practically no rain has been received.

Pressure—Fell briskly on Saturday, the first day of the week, giving lowest readings along the foot of the hills and the greatest difference from the normal in North Bengal and Assam, but on other days changes have been small: first, slowly upwards till the distribution was very nearly normal, and again downwards towards the end of the week. The means for the week in South-West and East Bengal differ from the normal by a few thousandths of an inch only; they are above in Orissa and Chutia Nagpur by about two-hundredths, and below in North Behar and North Bengal and Assam by amounts ranging up to four-hundredths of an inch.

Temperature—Was at first two or three degrees below the normal in Lower Bengal and more than 5° in North Bengal and Assam, but the steady rise which has been going on throughout the week, brought it up to three or four degrees above the normal in all districts except North Bengal and Assam, where there was still a small defect on September 5th, the last day of the week. Defect in the mean for the week is 2·3° in Assam, 1·6° in South-West Bengal, 1·3° in Orissa, and ·5° in North Bengal, while excess is 1·1° in Chutia Nagpur and ·9° in Behar. The mean for East Bengal is practically normal.

Rainfall—As stated above, was scattered in the south-western districts on Saturday, Sunday, and Wednesday, and almost absent on the other days. Scattered showers also fell in North Behar on Saturday and Sunday, but, with the exception of these showers, very little rain fell in Behar or Chutia Nagpur. Almost general rain fell in East Bengal and the southern districts of North Bengal during the first half of the week and in the northern half of North Bengal throughout the week. The actual falls expressed as percentages of the normal falls for the large subdivisions are as follows:—North Bengal 108, Orissa 67, South Bengal and East Bengal 62, North Behar 26, Chutia Nagpur 7, and South Behar 2.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 5th of September 1890:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of August.		Since 15th May 1890.

The total fall from 1st January to 6th September 1890	41·21
The average fall of the corresponding period for 24 years, S.-G.'s Office ...	50·50

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; p, passing temporary showers; d, drizzling rain; lr, lightning reflection; ⛅, dew.

METEOROLOGICAL OFFICE, INDIA;
The 8th September 1890.

MEMORANDUM.

Monthly review of deaths registered in forty-five districts of Bengal for the month of May 1890.

[THE delay in the publication of this review is due to the non-receipt of the Julpaiguri district return, which was received in this office on the 2nd instant, more than *three* months after the month to which it relates.]

The deaths registered in forty-five districts of Bengal during the month of May 1890 were 124,450, and correspond to an annual rate of 22·56 per 1,000 of the aggregate population of those districts, which is 65,859,534. This rate is 1·32 higher than the mean rate of the corresponding months of the past five years 1885—89, and is also higher than the rate of the corresponding period of any of the past five years, except 1887, *vide* the figures below—

	May 1885.	May 1886.	May 1887.	May 1888.	May 1889.	Monthly average of five years, 1885—89.	May 1890.
Ratio of deaths per 1,000 of the population per annum	20·64	18·24	25·44	21·00	20·88	21·24	22·56

The following table shows the highest proportions of deaths registered during the month of May 1890, compared with the corresponding month of 1889 :—

Districts.	Ratio per *mille* during— May 1890.	May 1889.	*Districts.*	Ratio per *mille* during— May 1890.	May 1889.
Darjiling ...	59·76	45·84	Durbhunga ...	31·20	13·68
Monghyr ...	39·84	18·96	Hazaribagh ...	31·20	21·36
Patna ...	34·56	17·52	Chumparun ...	30·36	15·00
Bhagulpore ...	34·20	23·88	Lohardugga ...	30·36	17·40
Julpaiguri ...	33·24	44·16	Shahabad ...	28·44	15·96
Noakhali ...	32·64	30·36	Gya ...	28·08	15·60

Except in the case of Julpaiguri the figures of May 1890 show a distinct advance towards accuracy in death registration in the districts mentioned which is encouraging.

The total mortality during the month under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding month of 1889 and the average of the five years 1885—89 :—

	Ratio per *mille* during— May 1890.	May 1889.	Monthly average of five years 1885—89.
Cholera	2·88	4·08	3·60
Small-pox	·24	·12	·12
Fever	15·84	12·72	13·68
Bowel-complaints	·48	·60	·72
Injury	·36	·36	·36
Other causes	2·52	2·64	2·52

Compared with the figures of both the past periods, there is a noticeable increase in the mortality of May 1890 under the head fever, and a sensible decrease in the death-rate from cholera.

The highest annual death-rates from cholera and fever occurred in the following districts :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*
Monghyr	13·68	Darjiling	46·08
Bhagulpore	12·24	Julpaiguri	28·92
Durbhanga	11·64	Noakhali	28·92
Chumparun	11·64	Hazaribagh	27·12
Maldah	7·68	Shahabad	25·56
Patna	6·72	Gya	23·88
Purneah	5·88	Lohardugga	23·52
Chittagong	2·64	Monghyr	23·40
Mozufferpore	2·64	Patna	22·20
Julpaiguri	2·52		
Rajshahye	2·28		
Sarun	2·28		

From small-pox high mortality occurred only in the district of Chumparun—mortality 3·12 per 1,000 of population.

The mortality of the month under review, according to *Sex*, *Class* and *Age*, was distributed as follows :—

According to Sex.	Ratio per *mille.*
Males	24·60
Females... ...	20·64
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population ...	119

According to Class.	Ratio per *mille.*
Christians ...	14·52
Hindus ...	23·76
Mahomedans ...	20·68
Buddhists ...	21·24
Other classes ...	23·76

According to Age.	Ratio per *mille.*
Under 1 year	133·32
1 and under 5 years ...	24·60
5 „ 10 „ ...	11·88
10 „ 15 „ ...	10·68
15 „ 20 „ ...	14·88
20 „ 30 „ ...	15·60
30 „ 40 „ ...	18·00
40 „ 50 „ ...	23·64
50 „ 60 „ ...	33·24
60 years and upwards ...	52·68

Detailed information regarding the mortuary statistics of the forty-five districts of Bengal during the month under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,

The 4th September 1890.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

Sanitary Commissioner for Bengal.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 23rd August 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 23rd August 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 20·7 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 2·7 lower than the average rate of the corresponding week of the past five years, and is also lower than the rate of the corresponding week of any of the past five years, except 1887 and 1888—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of births per 1,000 of the population per annum	30·0	23·4	19·1	19·8	24·5	25·4	20·7

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 2nd August 1890.	9th August 1890.	16th August 1890.	23rd August 1890.	Towns.	Weeks ending— 2nd August 1890.	9th August 1890.	16th August 1890.	23rd August 1890.
Burdwan	13·7	13·7	15·3	16·8	Naraingunj	24·8	16·6	33·1	16·6

Dacca	11·0	14·9	17·5	10·4	Total ...	15·3	17·4	18·7	20·7

It will be seen that last week the highest birth-rate was returned from Darjiling (88·9), and the lowest from Chittagong (9·4). No births were registered during the week in Purneah town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 24·8 per 1,000 of the population. The rate of the week is 8·2 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of deaths per 1,000 of the population per annum	46·9	26·7	29·0	32·5	27·6	33·0	24·8

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 2nd August 1890.	9th August 1890.	16th August 1890.	23rd August 1890.	Towns.	Weeks ending— 2nd August 1890.	9th August 1890.	16th August 1890.	23rd August 1890.
Burdwan	19·8	18·7	10·7	16·8	Naraingunj	16·6	13·4	16·6	24·8

Santipore	17·5	19·3	14·0	26·3	Bhagulpore	14·5	13·7	24·4	19·8
Jessore	12·2	12·2	18·4	58·1	Monghyr	15·4	28·9	21·7	32·6
Rampore Beauleah	15·8	21·0	34·3	28·3	Purneah	13·9	24·3	18·9	24·3
Darjiling	88·9	66·7	66·7	37·0	Poori	35·6	23·1	25·3	42·0
Dacca	27·3	25·3	20·1	24·7	Total ...	19·2	23·3	22·3	24·8

It will be seen that last week the highest mortality occurred in the town of Gya (66·3) and the lowest in Arrah (12·)

Measured by last week's mortality, the highest annual death-rates from the following registered death-causes were as follows:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Santipore ...	... 15·8	Jessore ...	... 36 7	Gya ..	.. 21·1
Mozufferpore ...	... 13·4	Gya ...	... 29 4	Serampore	... 19·6
Gya ...	... 13 0	Rampore Beauleah	... 23 6	Poori ...	... 18·9
Patna City ...	... 7 8	Comillah ...	... 23·1		
Chupra ...	... 4·0	Poori ..	... 20·8		

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·7 from cholera, against 3·5 per 1,000 in the preceding week; 10 5 from fever, against 9·4; 2·7 from bowel-complaints, against 3·9; 7·4 from other causes, against 5·4 in the preceding week. Small-pox and injury exhibit the same ratios as in the preceding week, viz., ·1 and ·4 respectively.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	25·4	Christians	7·5	Under 1 year	... 180 3
Females	24·1	Hindus	... 27·2	1 and under 5 years	... 38 0
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	105	Mahomedans	... 19·1	5 „ 10 „	... 21·7
		Other Classes	.. 76·8	10 „ 15 „	... 15·1
				15 „ 20 „	... 18·0

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of June 1890.

INCREASES.

	Tons.
Rice	2,261
The increase was contributed by the Southern and Behar Sections. The Northern Section showed considerable fluctuations during the month.	
Betel-nuts	522
Principally from Bengal Central Flotilla stations carried *vid* the Bengal Central Railway.	
Railway plant, &c.	7,758
For repairs and renewals.	
Salt	1,472
The principal increase was from Chitpore.	

DECREASES.

Coal	16,678
Short outturn from collieries.	
Cotton piece-goods	724
Ordinary fluctuations.	
Oil-seeds	1,817
Bogoola, Kissengunge, Chooadanga, Damukdia, Jagati, Kooshtea, and Serajganj show considerable decreases, said to be due to the dullness of the market.	

F. P. QUINLAN,
Examiner of Accounts.

CALCUTTA, *the 2nd September* 1890.

* The decrease in coaching traffic is partly due to a larger number of 3rd class Government passengers booked from the N.-W. Ry. *vid.* Ghâziabad to How in the corresponding period of 1889, and partly to a lesser traffic at Howrah, Allahabad, Cawnpore, and Delhi and some minor stations.
